BRANDON PHILATELY

A Tradition for Over Fifty Years

Being one of the World's leading and most active dealers in Important Investment Quality rare stamps we would be pleased to hear from you, should you care to obtain major pieces such as the items illustrated.

Finding that 'SPECIAL' Item

We have thousands of rare and outstanding items available. Whether you are looking for that 'SPECIAL' stamp to complete or improve your collection or build an award winning exhibit, we would be pleased to hear from you.

Expertising

We are internationally recognised as leaders in Philatelic Expertising by auctions and leading collectors world-wide. We offer a service which has issued Certificates for 35 years and these Certificates are highly regarded; each Certificate is signed by a minimum of 3 full-time professional Stamp Dealers with well over 120 years of full-time professional Stamp Dealing between them. Certificates enhance the value and enjoyment of all collections and should you have items which should have a Certificate and you have never found the time to send them for expertising, perhaps it is now time. Further details on request.

Stamps as an Investment

Rare stamps are big business throughout the World. International demand for rare stamps keeps the value continually rising. Rare stamps are saleable throughout the World; they can be purchased in one country with the sure knowledge that there is a ready market for them in a completely different part of the World. So, with the growing lack of confidence in stocks, shares and other generally regarded 'Safe Investments' it must now be recognised that rare stamps really can offer a secure and worthwhile investment. First of all, it is of course, essential to buy the right stamps at the right price. But what are the right stamps for investment? These days the 'print run' of stamps runs into many millions and a wise investor will seek either high value stamps prior to 1937, where it is known that the quantities of stamps printed is small and as a consequence the rarity level is high. Or he could choose in invest in modern stamp issues displaying major printing errors in the design. These can be most appealing and exact quantities discovered are generally known. For fifty years we have been acknowledged leaders in supplying philatelic material for investment. Our unrivalled knowledge and resources in this field enable us to provide the best possible service to the investor. All our material is guaranteed genuine in every respect and all rare items are supplied with a Certificate of genuineness. Each porfolio supplied is tailored to meet individual requirements and our International reputation is your guarantee of satisfaction. For details please contact us.

Commonwealth & British Empire Stamps, 1840-1970

What they said about previous editions:

The latest edition continues to set the high standards for others to aspire to.

- Sam Horton, *Stamp & Coin Mart*, February 2014

Quite simply an ESSENTIAL volume to sit on the desk of every collector.....you'll do well to invest in one.

- Glen Stephens, *Stamp News Australasia*

The prices.....act as a reliable guide to how values have moved.

- Brian Livingstone, *Stamp Lover*, February 2014

Collectors whose interests extend beyond Great Britain to the British Empire and Commonwealth will find this impressive catalogue invaluable.

- Mike Jackson, *The GB Journal*, May/June 2014

This volume is a fine addition to almost 150 years of published catalogues, and should be added to many bookshelves.

- Robert P Odenweller, *Collectors Club Philatelist*, March-April 2014

The one volume that virtually every collector or dealer in British Empire stamps must have to hand continues the high standards already set.

- David Rennie, *Philatelic Exporter*, November 2014

A pricelessly convenient single volume, containing hundreds of hours' happy reading and enlightenment for every purchaser.

- Michael Round, *Stamp Lover*, April 2015

From a production standpoint, the catalogue is a work of art. If you collect the British Commonwealth of nations, there is no question this catalogue is a necessity.

- Everett Parker, *Stamp News Online*, April 2015

This magnificent hard-bound volume needs no introduction to regular users. It's not only a great reference, but an informed source for this collecting area.

- Michael O Nowlan, *Canadian Stamp News*, 28 July 2015

2013 Edition awarded a gold medal at IPHILA, the International Philatelic Literature Exhibition, held in Mainz, Germany, November 2012

2015 Edition awarded large vermeil medals at London 2015: Europhilex (May 2015) and Singapore 2015 World Stamp Exhibition (August 2015).

Kenya and Uganda 1925 £100 red and black, upper left corner example showing plate number "1". One of just five examples that we have been able to trace..

Preface to the 2016 Edition

The 150th Anniversary of the Stanley Gibbons Catalogue

In 1855, 15-year-old Edward Stanley Gibbons went to work at the Naval Bank in Plymouth and we can well imagine the interest sparked in him by all those coloured scraps of paper, attached to the letters arriving at the Bank from its naval officer clients, stationed around the world in the days when Britannia ruled the waves.

But a career in banking was not to be his fate, for a year later his eldest brother, William, died and his father, also William, required the young Edward Stanley to return to his chemists shop and take up his brother's apprenticeship.

The story goes that the younger Gibbons agreed, but only so long as he had a desk in the shop from which he could trade in stamps and it is from that year, 1856, that Stanley Gibbons Ltd. traces its foundation.

In the early years, Plymouth seems to have been a good place from which to run a stamp dealing business, with easy access to the world and even easier access to the men who travelled it. We have all heard the story of the kitbag full of Cape 'Triangulars', bought by Gibbons for £5 in 1864 from two sailors who had won them in a raffle in Capetown. Whatever the exact circumstances of the purchase, there is no doubt that the young philatelic entrepreneur had a substantial stock of these stamps at the time, which he was offering by the dozen and the gross to fellow dealers.

Writing letters was time-consuming and inefficient, however, and Gibbons hit upon the idea of producing a printed price list of the stamps he had to offer and his first 'Descriptive Price List and Catalogue of British Colonial and Foreign Postage Stamps' was published in November 1865, price 2d., and would be sent post free, 'to any address in the Kingdom'. In it, he offered used Penny Blacks for 1d., Cape 1d. 'Woodblocks' at 3s. and 1s. triangulars at 2s.6d. a dozen.

The catalogue appeared monthly until 1879, by which time Gibbons had moved to London, where he established his business, first at Clapham and subsequently at 8 Gower Street. Here, the monthly price list was replaced by an annual book, with illustrations in an appendix at the back. A new issue supplement continued to be produced and this, of course, still appears each month in *Gibbons Stamp Monthly*.

When Charles Phillips purchased the company from Stanley Gibbons in 1890, he rapidly set about preparing it for the 20th century, reorganising the catalogue into four handy pocket-sized volumes, covering the British Empire, Foreign Countries, Postal Stationery and Local Stamps, the last two of which were soon discontinued, but his 'Part 1' is easily recognisable as the precursor to the catalogue you are reading now.

By 1900 the Stanley Gibbons Catalogue had grown into an important work of reference, used by collectors around the world, but, it remained the price list of its publishers, as, indeed, it still is today.

It is this very fact, of course, which gives it its credibility; prices have to be accurately reassessed for each new edition, for, in simple terms, if catalogue prices are too high, no one will buy the company's stamps and if they are too low it would be impossible to replace stocks, once sold.

This reassessment is a long, slow and meticulous process, which, for this catalogue, takes place over a six-month period, taking into account worldwide auction realisations, shop sales, collectors' 'wants lists', the welcome input from collectors and traders and in this Internet age, online auction sales.

PRICES

In this period of low-to-zero inflation it is notable that stamp prices continue to rise, sometimes at a considerable pace, fuelled by the seemingly insatiable demand of the collectors who want them.

For this catalogue, areas of greatest growth continue to come from **Australia and States**, **India and States** and errors and varieties, with **Malaya** and many of the former colonies in Africa also making a strong showing. **Canada**, **New Zealand**, the **West Indies**, the Pacific, Asia and the various 'outposts of Empire' also see a substantial number of increases, though not as many as Australia and India. It is also noticeable that, throughout the catalogue, definitives are in much greater demand than commemoratives.

The **Great Britain** market is becoming ever more specialised, with most of the price growth coming in areas which are outside the scope of this catalogue; notably essays, proofs and postal history. Evidence of the growing interest in the first two is more than adequately demonstrated by the recently published 'Four Kings', volume 2 of the *Great Britain Specialised Catalogue*, price revisions for 'regular' issues in which also appear here.

One aspect of GB postal history which does impact on this catalogue is the markings of the overseas post offices – where there have been a number of rises this year.

Once again, we are extremely grateful to those members of the trade who pass on the benefits of their wisdom and experience in the form of suggested pricing amendments and we must single out Richard Juzwin for particular thanks in respect of **Australia and States**, and the three of four specialist Great Britain dealers who helped with 'Four Kings'. Others have commented on single countries, single sets or even single stamp prices, but their suggestions are no less welcome and we hope that such input continues to come.

It is at this point each year that I am forced to remind all catalogue users – both buyers and sellers – that the prices in this catalogue are for stamps in fine condition. We continue to be disappointed to see stamps in average to poor condition being offered at proportions of catalogue price which they do not merit. It is a well-accepted fact that many people ignore the notes at the front of this catalogue, but they too are reviewed, revised and updated with each new edition and they ought to be read through by all of us every year, if only to remind ourselves that poor quality stamps are seldom the bargain they may first seem, for, with the odd exception like the British Guiana 1 cent black on magenta, their value will never rise at the same rate as a stamp in fine condition.

REVISIONS TO THIS EDITION

Half-way through writing this Preface, the welcome news arrives that the previous edition of this catalogue had been awarded a large vermeil medal at the Singapore 2015 World Stamp Exhibition. Publishing stamp catalogues, however, is not an occupation that allows any time for resting upon one's laurels, as we strive to make each new edition significantly better than the ones that have gone before.

A regrettable result of the recent improvements in printing technology has been the arrival on the market of more and more forgeries – particularly of overprints and cancellations on cleaned, fiscally used high values. Further notes have been added to the catalogue, drawing users' attention to the problem, see, for example, the King George V 'SERVICE' high values of India.

Speaking of fiscally used high values, more prices have now been provided for these in this edition.

There have been further additions and improvements to the colour illustrations – look, for example in the South Africa booklet section. Several new plate and watermark varieties have been added and there have been new discoveries to add to the various 'used abroad' listings throughout the catalogue.

Once again, we would like to thank Gary Diffen for keeping us up-to-date with new discoveries in **Australian States**, where there are a number of new additions to the listings.

There have been further Indian Stamps added to the list of those known used in **Bahrain**, thanks to Thomas Johansen, and in **Bechuanaland** a new note on Stellaland postal markings explains that manuscript cancellations are normal on these stamps.

One of the best new varieties added this year is in **Falkland Islands**, where the 'Break in Cloud' variety on the 1½d. 'Whale catcher' stamp in the 1933 Centenary set was first noted in *Upland Goose*, the journal of the Falkland Islands Philatelic Study Group, only in 2013.

In **Hong Kong** the Crowned Circle handstamps are now illustrated and there have been further additions to the listings of stamps used in the British Post Offices in China.

Further varieties have been added to **New Zealand** in the form of three well-established flaws on the 1d. 'Dominion' stamp of 1909 to 1926, where the 'Feather' is now joined by the 'Globe', 'Q' and 'N' flaws – all clearly illustrated of course.

There are new varieties in the Rhodesias also, from the re-entry on the 1908 £2 Arms stamp of **Rhodesia** and the 'Giraffe' re-entry on the King George VI ½d. of **Northern Rhodesia** to the 'Extra landing light' on the 2s.6d. Airmail Service commemorative of **Rhodesia and Nyasaland**.

There have been a number of improvements to the Nevis listings, following the publication of **Nevis** – *The Stamps and Postal History (1661-1890)* by Frederico Borromeo and Charles Freeland.

Another well-established variety which finally makes its way into the catalogue is the 'Barbed wire' flaw on the 1d. Victory stamp of **South Africa** – and the overprinted versions for **Basutoland**, **Bechuanaland**, **South West Africa** and **Swaziland**.

Also in South Africa, following the article by Alan Drysdall in *Gibbons Stamp Monthly*, the 'CSAR' railway official stamps of **Orange River Colony** and **Transvaal** are listed.

There are two new 'used abroad' listings towards the end of the catalogue, with, following the publication of Peter van der Molen's multi-award-winning *Swaziland Philately to 1968*, a new section covering the 'colonial' issues of Transvaal used in **Swaziland** between 1902 and 1913 and, thanks to Tony Howgrave-Graham a priced list of South African stamps used in **South West Africa** during and immediately following World War I.

As always, I would like to close by thanking my friends and colleagues at Stanley Gibbons, both in Ringwood and at the Strand, for their help and support in producing this catalogue and to repeat my thanks to all those collectors and members of the stamp trade who have contributed in any way towards it.

The Importance of Condition

The prices in the Stanley Gibbons Catalogue are for stamps in 'fine condition' – but what exactly does 'fine' mean, and what effect might a slight defect have upon the price? We visit Stanley Gibbons Specialist Stamp Department to find out

To quote in full the relevant paragraph in the introduction to the current Stanley Gibbons Commonwealth and British Empire Stamps Catalogue; 'The prices quoted in this catalogue are the estimated selling prices of Stanley Gibbons Ltd at the time of publication. They are, unless it is specifically stated otherwise, for examples in fine condition for the issue concerned. Superb examples are worth more, those of a lower quality, considerably less.' This single paragraph is probably the most significant piece of information in the entire catalogue – but one that is frequently ignored or forgotten. The big question, of course, is just how much more is 'more' and how much less is 'less'?

Not surprisingly, the ability to answer that question depends on experience. A knowledgeable philatelist will be able to assess fairly quickly what the price of a particular stamp should be in relation to that quoted in the catalogue. Many sellers, however, both professional and collector, find it simpler to price items for sale by a standard percentage of 'catalogue'; probably only marking down those that are actually damaged. This can mean that stamps in better than 'fine' condition are underpriced, while poorer ones are too expensive; something which buyers need to bear in mind.

Talking to the experts, it quickly becomes obvious that every single feature of a stamp needs to be considered separately before a judgement on its overall condition can be passed. So this article will look at each of those features individually, before drawing them all together and attempting to assess how much more than catalogue price a superb example might be worth and, conversely, how low a price should be put on one of lower quality.

Gum

This would seem to be a relatively easy one – after all it says in the catalogue; 'The prices for unused stamps of Queen Victoria to King George V are for lightly hinged examples. Unused prices for King Edward VIII to Queen Elizabeth issues are for unmounted mint.' Well, at least the definition of unmounted is pretty clear, while lightly hinged means, in theory, a single hinge mark, although, apparently, two or three might be acceptable if the hinges have been lightly applied and carefully removed. The stamps printed by De La Rue for the majority of Colonial postal administrations during the first three decades of the twentieth century have stood up reasonably well to stamp hinges, so finding lightly mounted examples of such stamps should not be too difficult. However, Canadian stamps, for example, which were printed on softer paper and had thicker gum, are more difficult to find in fine mounted condition and should be valued accordingly.

Heavier hinging is acceptable for stamps issued before around 1890 but the majority of the gum should be clear and 'unblemished'. If the stamp has been mounted on a number of occasions or if there is a heavy hinge still attached, the price would drop to about half catalogue and from there on would decline fairly rapidly.

For a twentieth century stamp without gum a price of about one tenth of catalogue would be more or less the order of the day (unless it was normally issued that way, of course!). However, many early issues are extremely rare with gum and in these cases anything up to full catalogue price would be appropriate. Prices for early Western Australia and Sarawak are, for example, without gum; gummed stamps being worth a premium. The first perforated issues of British Guiana are also rarely found with gum, so ungummed examples would be worth a higher proportion of catalogue price than usual – about one third, or more – while Turks Islands provisionals and early New Zealand Chalon heads without gum might rate half catalogue or above.

As for the premium that should be put on earlier stamps in unmounted condition, that will vary from issue to issue and from country to country. Clearly, the older the stamp the less likely it is that it will be easy to find by those seeking 'unmounted' perfection. The *Great Britain Concise* catalogue gives both mounted and unmounted prices for all stamps issued between 1887 and 1935 and the premium ranges from zero, up to 100 per cent, or even more, depending on the relative scarcity of the stamp in unmounted condition.

Some stamps are more acceptable than others without gum

The discounts for mounted issues of the Third Reich period can be dramatic

As for post-1935 stamps in lightly mounted condition, the story is just as complicated. As it says in the catalogue; 'Some stamps from the King George VI period are often difficult to find in unmounted mint condition. In such instances we would expect that collectors would need to pay a high proportion of the price quoted to obtain mounted mint examples. Generally speaking, lightly mounted mint stamps from this reign, issued before 1945, are in considerable demand.' This may hold good for Commonwealth stamps, but on the continent the demand for unmounted has severely affected the market for even lightly mounted specimens. The current *Part 7, Germany, Catalogue* provides some clear examples of this. This catalogue gives unmounted and mounted mint prices for all Third Reich issues, from 1933 to 1945, with unmounted prices only for later issues. The differences are quite dramatic, with the 1936 Local Government Congress set (SG 614/7) rated at £22.00 unmounted, but only £4.75 lightly hinged, and the 1942 Hamburg Derby stamp (SG 804) is priced at £26.00 and £7.25, respectively. Thus, for most mounted mint post-war European stamps, one should probably be thinking in terms of deducting 75 or 85 per cent from the catalogue price.

Even for King George VI stamps the discount for mounted mint can vary

As suggested earlier, Commonwealth collectors are fortunate in that the price differential is not nearly so dramatic. On average, mounted mint prices for post-war King George VI sets are approximately 'half catalogue'. Again, there are exceptions. To take three examples; the first King George VI 3d. of Ascension, the black and ultramarine stamp (42), would only rate around 25 per cent of catalogue in mounted condition, on the other hand, the 1938 set of Perak (103/21) would be more like two thirds, while for some of the Indian Convention States high values the proportion would be even higher, providing the gum is white and not toned. For the first issues of the present reign the proportion drops to around a third, but after about 1965 there is really very little demand for mounted examples of anything other than the more expensive sets, even in fine lightly hinged condition.

Some gum toning can be acceptable on certain King George VI issues

Whether or not a hinge has been attached to it is not the only gum feature that can affect the value of a stamp. Discoloration or toning can also be significant. Stamps which have spent time in the tropics frequently suffer from gum browning and, in extreme cases, cracking and 'crazing', sometimes affecting the face of the stamp as well as the back. The value of such specimens should be marked down accordingly. For stamps of King George VI one would normally aim for no gum toning at all, but the first 10s. definitive of Grenada only exists toned, so that would be considered 'fine for the issue concerned'; later stamps in the series should have cream or white gum, depending on the original

issue. Again, the vast majority of the first Hong Kong definitives have at least some gum toning, so here the discount for lightly toned examples would be smaller than usual.

The demand for unmounted mint, as well as very real concerns that the gum applied to nineteenth century issues was, in itself, potentially damaging, has inevitably led to a certain amount of regumming. Stanley Gibbons' policy is not to sell stamps which have been regummed, especially since the new layer of gum may disguise damage or attempts at repair. It is important, therefore, that the edges of early mint stamps be checked very carefully to make sure that there are no suspicious signs of gum on the surface. (There is one set of stamps, China SG 457/9, which was gummed after printing and perforating, while stamps printed on top of the gum are clearly not a problem – but these are very much the exceptions.)

Margins

Another feature which has long been a part of the 'Stamp Improver's' repertoire has been the adding of margins to stamps which have been deficient in them. Once again, this 'service' has developed because of the premium placed by collectors on 'fine four-margin' examples of stamps like the Penny Black. For some years now the *Part 1* and *GB Concise* catalogues have provided guidance on this matter; illustrating 'good', 'fine', 'very fine' and 'superb' examples of the first postage stamp. As stated, the standard adopted in the catalogue is for stamps described as 'fine', which, in terms of margins, means that the area outside the printed design should be 'approximately one half of the distance between two adjoining unsevered stamps' – on all four sides, of course! Anything more than this will take the stamp into the 'very fine' or 'superb' categories, with the stamp's price rising accordingly. Ultimately, one arrives at a point where the stamp has 'stolen' the margins from all of its neighbours, in which case exaggerated expressions such as 'gargantuan' or 'jumbo' margins are frequently resorted to. Such examples are, indeed, rare and would expect to be valued accordingly; at least double catalogue price and probably more, if other aspects of its condition are 'up to scratch'.

Beware of stamps to which margins have been added

Stamps with abnormally large margins are worth a substantial premium

One factor which needs to be borne in mind is that the distance between two adjoining unsevered stamps varied quite a lot in the early days. So what would be considered only 'fair', or even 'narrow', for the Indian lithographs or the first issue of Norway would be 'enormous' on the early issues of several British colonies whose stamp printing plates were laid down by Perkins Bacon. Ceylon, Queensland and Tasmania are typical examples of countries whose stamps, suffer from this problem – and where narrow margins do not necessarily prevent a stamp being described as 'fine'.

Mention of the Indian lithographs raises the issue of octagonal stamps which have been cut to shape – often to fit into the spaces provided for them by the manufacturers of early stamp albums! Again, the catalogue provides helpful guidance with a note explaining that 'catalogue prices for Four Annas stamps are for cut-square specimens with clear margins and in good condition. Cut-to-shape copies are worth from 3% to 20% of these prices according to condition.'

For more conventionally-shaped imperforate issues, a stamp which has lost one of its margins might be priced as high as half catalogue if it is fine in all other respects, but the price declines rapidly if more than one side is affected. Of course, there are exceptions; the Penny Black, because of its unique desirability, can merit a higher proportion of catalogue price, even with no margins at all, than just about any other stamp – certainly more than its much scarcer partner, the Two Pence Blue!

What might be described as 'narrow margins' for one stamp could be wide for another

Perforations

When we look at the influence which perforations have on value, the situation is no less complicated. Here there are two factors to consider, the condition of the perforations themselves and centring of the stamp image within them.

It makes sense to seek out stamps that are perfectly centred

Centring is easy to understand; in a perfect stamp the space between the edge of the design and the perforations should be equal on all sides. For most modern stamps, perforated on comb machines, good centring is normal and perfect centring would not merit a premium. Even 100 years ago the quality controls at De La Rue, where most British and colonial stamps were produced, were such that poorly centred stamps, particularly the keyplate types, are seldom encountered, so once again, it is hardly an issue. The attractive engraved pictorials, popular with post offices in the mid-twentieth century and popular with collectors to this day, were more variable – irrespective of which firm printed and perforated them. A stamp slightly off-centre could still merit the description 'fine', but if it is visibly off-centre in more than one direction or the design touches the perforations, then a discount from catalogue price could be expected – the clearer the displacement, the bigger the discount. If, of course, the perforations pass right through the middle of the stamp, it becomes an error – and that's a completely different story!

Early stamps are seldom found perfectly centred, especially those printed from plates laid down before perforating was introduced

The moral is that it certainly makes sense to try and seek out stamps that are perfectly centred, although in the case of the above issues it would be unlikely that you would be charged extra for them.

When discussing the problem of finding imperf stamps with good margins, it was noted that the designs were sometimes placed so close together on the plate that it required considerable care on the part of the post office clerk to separate stamps from the sheet without cutting into them. This became even more of a problem when stamps printed from those same plates were required to be perforated. It is not surprising that, in view of the materials they had to work with and the experimental nature of perforating machinery at the time, early stamps are seldom found perfectly centred. For this reason it would be unrealistic to suggest that a slightly off-centre perforated Penny Red was less than 'fine', although to command full catalogue price, the perforations should not touch the design.

Centring is also an important issue among more modern line-perforated stamps, notably those of the USA and Canada – right up to quite recent times. Here, poorly centred stamps were the norm and even a slightly off-centre example could merit the description 'fine'. Because of the inaccuracy of the perforating machines, the stamps can also vary in size quite a bit, and oversized, well-centred stamps, because of their relative scarcity, can be the subject of fierce competition when they come up at auction and can fetch prices vastly in excess of catalogue. In the case of cheaper stamps five or ten times catalogue price is not unknown.

Nibbled, Short or Pulled?

Perforations are easily damaged, especially if the gauge is coarse and the paper soft. On a De La Rue keyplate issue, with a standard perforation of 14, one would expect a 'fine' stamp to have all its perforation 'teeth' intact. One 'nibbled' or 'nibbed' perf tooth (slightly short) would call for a slight discount, but the more teeth affected or the shorter the tooth the greater the reduction in price. Incidentally, a 'short perf' would still show a vestigial 'tooth', a 'missing perf' shows no tooth at all and a 'pulled perf' signifies that there is a 'hole' in the stamp where the perforation tooth was pulled away). Even worse than a short perf on one of the sides is a short corner. Here again, the more of the corner missing the lower the price – but if the damage has resulted in part of the stamp design being torn away then the stamp would be unlikely to be worth more than a tenth of catalogue and possibly much less.

Canadian coil stamps with full perfs are far from common

Whereas on a perf 14 stamp a damaged perforation tooth would be considered a defect which would force a reduction in the price, on a perf 8 stamp, such as some of the Canadian coil stamps of the 1920s and 30s, stamps with full perfs are far from

common. Here, one or two shortish perfs would probably be acceptable, providing they were not too short. Such a stamp with all its perforations could command a premium over full catalogue price, especially if it was also well centred. As the gauge increases, however, the impact of short perfs increases, so that a King George V 'Seahorse' with one or two short perfs would probably carry a 20 per cent discount, any more than that and the price would drop to half catalogue.

Check the perfs on King George V Seahorses

Today, only a small premium is paid for plate number examples of most colonial stamps

Great Britain control numbers are widely available

Booklet stamps

Damaged perforations are not only caused by careless separation. Until very recently, most stamp booklets were made up from reels of stamps, bound into covers by stapling, stitching or gluing and then guillotined to produce the finished books. Inevitably, this cutting was seldom totally accurate, resulting in the majority of booklet panes being trimmed on at least one side. Prices for stamp booklets in the Stanley Gibbons catalogues are for examples with 'average' perforations – that is, slightly trimmed; the prices for booklet panes are for examples with full perforations. If a pane of six has good perforations at the top and side, but is trimmed along the foot, then its value should be based on the three stamps in the top row, the three stamps at the bottom being virtually discounted.

A single stamp which only occurs in booklet panes, such as most of the definitive watermark varieties of Queen Elizabeth Great Britain, should also have full perforations. Trimmed perfs bring the price down significantly and if they are missing completely than even a scarce variety would only merit a tenth of catalogue.

One might expect to pay a premium for a modern plate block

Catalogue prices for booklet panes are for examples with full perforations

Wing margins

Another perforation issue is 'wing margins'. When De La Rue began producing the surface-printed stamps of Great Britain, their printing plates were made up of separate sections which printed as 'panes'. In the case of the 1861 3d., for example, the printed sheet of 240 stamps was made up of 12 panes of 20 stamps. Between each pane there was a 'gutter' and where the panes were side-by-side the gutter was perforated down the centre, giving the stamps at the side of the pane a wide (5mm) margin – the 'wing margin'. Wing margins were frowned upon by early collectors, who liked their stamps to fit exactly into the stamp-size rectangles printed for them by album manufacturers. As a result, stamps with wing margins generally commanded a lower price than stamps from the centre of the pane which had 'normal' perforations and many stamps had their wing margins cut off or had fake perforations added to provide collectors with stamps of the required shape.

Fashions change, and wing margins are now no longer despised, indeed, because of their slightly larger size, they frequently compare well with a 'normal' and they certainly show a postmark to better advantage. Thus, there is no longer a discount for a wing margined stamp, although we have not yet reached a situation where one has to pay a premium for their relative scarcity!

Sadly, however, those stamps which were 'doctored' in order to appeal to earlier fashions are now considered to be considerably devalued, except in the case of a good basic stamp such as the 2s. brown, or perhaps where the stamp has some other redeeming feature such as an attractive cancellation. For more run-of-the-mill stamps a price of one tenth of catalogue would usually be appropriate. With this in mind, of course, it pays to be aware of the corner letters of British surface-printed stamps which should have wing margins, in order to spot ones which have had fake perforations added. This information is given in both *'Part 1'* and the *GB Specialised Catalogue*.

De La Rue printed stamps by the same technique for many British colonies; stamps which do not have corner letters to allow today's collectors to identify those with 'dodgy perfs'. The early stamps of Hong Kong are an obvious example and, bearing in mind the prices which these can fetch in fine condition, it behoves us all to be aware of stamps which may have had wing margins removed and to check them carefully before purchase.

Wing margins were frowned upon by early collectors but not any longer!

Marginal premium

For modern stamps, an intact sheet margin should not add to the value, although one might expect to pay a small premium for a plate block or imprint block over the price for a plain block of four. For most earlier twentieth century stamps, also, a plain margin will do little for a stamp's value, but if that piece of margin includes a control number, plate number or printer's imprint then the difference can be very significant indeed! Great Britain control numbers were widely collected at the time they were current and are widely available to this day. Reference to volume 2 of the *Great Britain Specialised Catalogue* demonstrates that, in spite of the fact that there was only one control single in a sheet of 240 stamps, apart from a few rare examples, they generally only merit a premium of between 50 and 100 per cent over the price of a normal mounted mint example. Plate number singles of colonial stamps occurred once or twice a sheet but, judging from the infrequency with which one encounters them, they were not sought after at the time of issue and are still undervalued today – again a small premium over the price of a fine mint basic stamp is all one should expect.

However, perhaps the Australian market indicates that this may not always be the case. In Australia huge premiums are now being paid for imprint strips and singles at auction. At a recent sale in Australia a 5s. Kangaroo, third watermark, mounted mint 'CA' monogram single, catalogue price for a single stamp £250, sold for

A$21,000 – getting on for £9000 pounds after tax and premium were added!

Even a partial marginal inscription can make a great difference to the price of a Penny Red

The first stamps of Great Britain bore an inscription in the sheet margins, advising the public as to the price of the stamps, where they should be placed on the letter and warning against the removal of 'the cement'. The early surface-printed stamps also bore inscriptions in the sheet margins. The latter are not currently considered to impact significantly on the value of the stamp to which they are attached, but a partial marginal inscription can make a great difference to the price of a Penny Black or Penny Red, and a complete corner, with plate number attached, will be very desirable indeed.

What's the damage?

We have looked at some aspects of damage in this article, notably in relation to perforations, so let us conclude by reviewing other aspects of damage.

All young collectors are advised from the outset to avoid torn stamps, and the advice obviously holds good throughout one's philatelic life. However, that is not to say that all torn stamps are worthless, because even a torn example of a desirable stamp is still collectable and can therefore command a price. In a GB context, a fine used £5 orange or 2s. brown with a 3mm tear, but otherwise superb, would probably rate about one third of catalogue price. A more common stamp, such as a 2s.6d. or 5s. value, would be worth much less and, naturally, the larger or more obvious the tear, the greater its impact on the price.

A 'bend' will generally not be evident on the face of a stamp, only on the back, and will result in a 10 or 15 per cent reduction in price; a gum crease is the natural result of gum ageing and its effect on value will depend upon the damage caused to the face of the stamp. A crease is clearly evident on the surface of the stamp and will result in a more common stamp being worth between one fifth and one tenth of catalogue, depending on the harshness of the crease and where it is – a crease across a corner will be less significant than one right across the middle, for example. A 'wrinkle' gives the appearance of a series of light creases, whose effect on value will depend on its extent and clarity. Once again, a crease or wrinkle on a valuable stamp will be less significant in percentage terms than one on a more common one – all other factors being equal.

The impact a thin will have will similarly depend upon its extent and the effect it may have on the surface of the stamp; a surface abrasion having a greater impact than a hinge thin. Some of the chalk-surfaced key types of the early twentieth century are particularly prone to 'rubbing' and, again, this will always reduce the price of a stamp, the size of the reduction depending upon the degree of the damage and the scarcity of the stamp itself.

Perfins

Stamps bearing perforated initials were at one time treated as little better than rubbish and many were destroyed. The fact that there is now a specialist society devoted to perfins should indicate that the situation has changed; but it is fair to say that the majority of collectors avoid them like the plague. Many official perfins are now listed, in the catalogue and some of them carry a price higher than they would as normals. Some, indeed, are very desirable, notably the China 'Large Dragons' perforated 'NCH' by the *North China Herald*. Demand from specialist perfin collectors has pushed up the price for 'proving covers' that is, covers which show which organisation used a particular set of initials, while some commercial perfins are sought after and command a premium over the price of an unperfined stamp. Nevertheless, a set of perforated initials would still usually result in an otherwise fine stamp being worth only about one tenth of catalogue.

Perfins can enhance the value of a stamp

Fading

One of the reasons why the firm of De La Rue held such an important position in stamp production in the British Empire at the turn of the last century was the security offered by their fugitive inks. The green ink they used, in particular, dissolved into a pale yellow-green upon immersion in water. A footnote in the catalogue under the 1883 definitives of Great Britain comments; 'The above prices are for stamps in the true dull green colour. Stamps which have been soaked, causing the colour to run, are virtually worthless.' This seems rather harsh, particularly in the case of the difficult 9d., but fairly reflects the current market position. The comment is just as relevant to many other stamps, both from Britain and the colonies. The same inks were used in the production of many colonial middle and high values, such as the Federated Malay States 'elephants'. Such stamps, when water affected, would be worth from one fifth to one tenth of catalogue, depending on the degree of discolouration.

Water damage is not only a problem for the typographed issues of De La Rue. Although it is generally recognised that recess-printing inks are more stable, there are examples of such stamps which are susceptible to 'washing' – some of the Rhodesian 'double heads', for example, can be devalued in this way.

Colour change is not, of course, brought about only through immersion in water; sunlight can sometimes have a very significant effect and seriously faded stamps should be viewed in the same way as 'washed' ones – more common items being 'virtually worthless', rarer ones rating up to one fifth of catalogue, providing that the fading is not too serious.

Tone spots – the brownish spots encountered on many stamps which have been stored in damp conditions – especially in the tropics – will also reduce the value of a stamp or cover; the degree of reduction once again depending upon the extent of the toning and the value of the stamp in fine condition. A few toned perforation tips should, say the experts, be viewed in the same way as if they were 'short'. A small brown spot in the centre of a stamp, providing it cannot be seen on the front, would reduce an otherwise fine King George VI stamp to around half catalogue, or quarter catalogue if it were mounted as well. Earlier stamps would require similar discounting but toned examples of more modern issues should be considered almost valueless. Similarly, any stamp with extensive or more disfiguring brown marks should be avoided, especially as the fault can 'migrate' to other stamps.

Fugitive inks were used for many colonial middle and high values

Cancellation quality

When describing the postmarks of the nineteenth century, the word 'obliteration' is synonymous with 'cancellation' – because, of course, that was what they were designed to do – to 'obliterate' the stamp in such a way as to prevent any opportunity for reuse. The Maltese cross is an attractive cancellation, especially when applied in red or one of the 'fancy' colours, but many early Great Britain line-engraved adhesives are heavily cancelled by over-inked black crosses, which detract considerably from the beauty of the stamps. A 'fine' cancellation should be lightly applied, if possible leaving a substantial part of the design – ideally including the Queen's profile – clear of the cancellation. Also desirable are well centred examples displaying all, or nearly all of the cancellation on the stamp. This is particularly true where the cancellation is more significant than the stamp, such as a Wotton-under-Edge Maltese cross. Here, you would want to have as full a cancellation as possible, although it would still be preferable to have it lightly applied.

The Maltese cross is an attractive cancellation, especially when applied in red

Where the cancellation is more important than the stamp it should be clear, upright and lightly applied

This rule remains valid after the arrival of the '1844' numeral cancellation. The duplex postmark, incorporating a circular datestamp alongside the numeral obliterator, was not introduced in London until early 1853, so for nine years nearly every stamp continued to be 'obliterated' by a barred numeral. On the odd occasion where another form of cancellation was used, such as the circular 'Town' marks or 'Penny Post' handstamps, the postmark has become more desirable than the stamp anyway. For stamps used during those nine years, therefore, lightly applied postmarks which leave a significant part of the design clear continue to be desirable and stamps which fall short of this will not be categorised as 'fine'.

Other countries followed the practices established by the British Post Office, using 'anonymous' cancels which can only be identified by individual peculiarities, or numeral postmarks of one form or another.

Numeral postmarks which leave a significant part of the design clear are desirable

Line-engraved stamps cancelled only by the datestamp would be rated 'superb'

Again, stamps with lightly applied cancellations should be sought out for preference, although it is necessary to bear in mind the current postal practices in the country or at the individual post office concerned. In spite of the fact that pen cancellations are not generally popular among collectors, where this was a normal method of cancellation, as on the first issue of St Helena, for example, they would be acceptable, although in practice most such examples have since been cleaned in an attempt to make them appear unused. Indeed, early GB stamps with manuscript cancels, such as the hand-drawn 'Maltese cross' of Dunnet, often fetch high prices at auction if their provenance is sound.

Circular datestamps

With the arrival of the Duplex cancellation, the possibility that a stamp might receive the circular dated portion of the handstamp increases, although this was not supposed to happen. Here, we should perhaps return to the statement in the front of the Stanley Gibbons catalogue, that: 'The prices are ... for examples in fine condition for the issue concerned. Superb examples are worth more, those of a lower quality, considerably less'. Thus, a postally used stamp cancelled by a lightly applied numeral portion of the postmark would generally be considered 'fine', while one which showed only the dater portion would be rated as 'superb', especially where that datestamp is upright, well-centred and lightly but clearly applied. A stamp in this condition could rate two or three times the price of a fine example, all other factors being equal.

Squared circles are collectable in their own right

As Duplex postmarks were replaced by new forms of cancellation such as squared circle handstamps and various forms of machine cancellation, new criteria come into play, but essentially the aim is the same, to find stamps which have been attractively cancelled. Squared circles were designed to combine the date and place of posting (in the central circle) and the obliteration (in the form of the corner bars) in one small and convenient handstamp. Their adoption by many postal administrations around the world would seem to indicate what a good idea the were felt to be at the time. In the case of squared circles it is necessary to make your own judgement, heavily inked bars obscuring the main feature of a stamp's design would not be 'fine', but a light but legible postmark which allows the design to show through would be. Of course, once again, squared circles are very collectable in their own right, so a clear complete (or almost complete) cancellation would almost certainly outweigh the 'marking down' which might normally be applied because the stamp itself was almost obscured.

'Socked on the nose' cancellations have become more popular, especially if they show something significant like the misspelling 'MAURITUS'

Just as in the case of wing margins and perfins, discussed above, fashions are changing in relation to cancellations. In the past, the aim was to find stamps on which the cancellation fell across just one corner of the design, leaving the major part of it clear. Today, interest in exactly where and when the stamp was cancelled, not to mention the possibility that such partial cancellations may have been forged, have made clear, centrally applied or 'socked-on-the-nose' cancellations much more desirable – although, again, they do need to be lightly applied.

Towards the end of the nineteenth century, rubber packet, newspaper and parcel cancellers began to appear. These, inevitably, obliterated more of the stamp's design than a steel datestamp and any stamp cancelled in this way would fall well short of 'fine'. The rectangular parcel cancellations which replaced the old parcel labels in the twentieth century are also shunned by all, other than postal historians seeking particular markings

Manuscript cancellations

We have briefly touched upon this issue already, but it is worth pursuing in greater depth. The reason why many collectors eschew stamps cancelled by pen marks is that they very often suggest fiscal, rather than postal, use. Fiscally used stamps are normally much cheaper than postally used examples, even with the significant increase in interest in revenue stamps which has taken place in the last decade. However, individual post offices in a number of countries have resorted to this form of cancellation from time to time and examples are sometimes even more desirable than the same stamp with a clear dated postmark. On the other hand, Australian postage due stamps are often found correctly cancelled in manuscript, rather than by a dated postmark. Although these are perfectly collectable, they are certainly nowhere near as desirable as similar examples with a 'proper' postmark and would probably rate no more than 20 per cent of catalogue, if that.

Individual post offices have resorted to manuscript cancellations from time to time, the Gold Coast stamp was used in Dodowah

Returning to fiscal cancellations, these take a number of forms and, since the stamps concerned are often of high face value, some are more desirable than others. The early 'Arms' high values of Rhodesia are relatively common fiscally used, cancelled by rubber handstamps in a variety of colours and often perfined as well. Such examples would rate barely 5 per cent of the catalogue price of postally used examples. The New Zealand 'long' Queen Victoria and 'Arms' high values were designed for both postal and fiscal use and the prices given for them in the catalogue are for examples with clear postal cancellations. However, some revenue cancels are similar in form to postal ones, so it is important that sufficient of the cancel falls on the stamp to guarantee postal use. Again, fiscally used examples would generally rate only 5 per cent or so of the price of postally used ones, while, among stamps which have seen revenue use, clear black 'Stamp Office' and other similar types are much more desirable than purple rubber handstamps, embossed cancels, manuscript markings and stamps which have been perforated through.

Early 'Arms' high values of Rhodesia are relatively common fiscally used

It is important that sufficient of the cancel falls on the stamp to guarantee postal use

Telegraphic postmarks

Generally speaking, just as stamp collectors prefer stamps which have not been fiscally used, they are also not keen on those which have identifiable telegraphic cancellations. Often, the same canceller was used for both purposes, in which case a stamp, once removed from a telegraph form would be indistinguishable from a postally used example and would therefore be equally acceptable. However, Indian high values that have been used telegraphically can often be identified by their cancellations which have three concentric arcs in the segments of the postmark immediately above and below the band across the centre of the cancellation which contains the date of sending. It is noted in the catalogue, for example, that India SG 147, the Edward VII 25r., can be supplied at one third of the price quoted in the catalogue (currently £1500), with a telegraphic cancellation. Other values should be similarly discounted.

1s. greens from plates 5 and 6 are not worth a premium

In light of this, it may seem strange that Great Britain Queen Victoria high values which were almost exclusively used for telegraphic or accounting purposes should be more highly priced than any which were used postally, simply because the quality of cancellation was vastly superior and, here, the prices quoted in the catalogue would be for telegraphically used examples, since this would be the only way of obtaining 'fine used'. Probably, the vast majority of fine used middle values, from 4d. to 2s. were also once attached to telegraph forms and many are relatively common in this form; notably the 1s. green from plates 5 and 6, which would not be worth a premium over catalogue in this condition, while others, notably the 2½d. rosy mauve or any 9d. value would merit the premiums, sometimes substantial premiums, quoted in the catalogue for 'well centred, lightly used'.

It has sometimes been remarked upon that some GB surface-printed issues are more highly priced in the main GB listing than they are in some of the 'used abroad' sections. An 1873-80 2½d. rosy mauve (SG 141), for example, is priced at £80 in the GB listing, but £28 used in Suez, £24 used in Constantinople, £21 used in Gibraltar and just £17 used in Malta. This is not because there is less interest in GB used abroad, but because the prices are for 'fine condition for the issue concerned'. GB stamps used in Malta are generally fairly heavily cancelled by the 'A25' obliterator and the price quoted would be for an example in this form, whereas the price in the GB listing would be for a considerably better stamp. The two conclusions which can be drawn from this are that, firstly, a British stamp with a light Malta c.d.s. should be priced according to the GB listing, where that price is higher, and, secondly, that one should expect to pay very considerably less than the price in the GB section of the catalogue for a stamp with an 'average' numeral cancellation, which would only rate between 10 and 20 percent of catalogue, depending on the scarcity of the stamp and the extent to which it is obliterated by the postmark.

A British stamp with light Malta c.d.s. should be priced according to the GB listing

Wartime Malay States stamps should have identifiable pre-occupation datestamps (left), not post-war cancellations, such as that on the 6c. (right)

It is worth mentioning at this point that, to be worth full catalogue price, a stamp also needs to be used 'in period'. There are notes in the catalogue (such as that below Perak No. 121 or Muscat No. O10) indicating that the price shown is for a stamp with clearly identifiable contemporary cancellation. Stamps used later, in the case of Malayan States after the Japanese occupation had ended, are worth much less than catalogue price, even though they were still valid for postage in the early post-war period.

Collectors should be wary of any stamp with a non-contemporary cancellation, however fine it may appear in all other respects, and expect to pay proportionately less for it. It must be remembered, of course, that some stamps were in normal use over prolonged periods, so it pays to be aware of the 'correct' postmark types for all stamps.

Be wary of stamps with non-contemporary cancellations, however attractive they may seem

Forged cancellations

The problem of forged cancellations has gained much greater prominence in the last few years. This is at least partly due to the increased demand for fine quality insofar as mint stamps are concerned. Heavily mounted or toned stamps are, as commented earlier in this series, worth only a small fraction of catalogue price, so there is clearly an opportunity for the unscrupulous to turn them into 'fine used', in order to enhance their value. Fiscally used stamps may also have had their cancellations removed and any remains of them covered up by forged postmarks, while a great many stamps simply command a higher price used than they do mint, having been little used at the time they were current.

The upshot is that we all need to be aware of stamps which, at first sight, appear to be used, but bear cancellations which cannot be identified. A nice clean ring across the corner of a stamp, an apparently smeared c.d.s. on which neither the place of posting nor the date can be seen, or a general black smudge, reminiscent of many modern British Post Office operational postmarks, should all be avoided, unless they are known to be typical of the place and period concerned.

Fiscally used stamps may have their cancellations removed and covered up

'Madame Joseph' cancellations are becoming very collectable

Such stamps are really of 'spacefiller' status only and would usually not merit a price of more than one tenth of catalogue, if that.

More sophisticated forged cancellations also exist, of course and it is fair to say that the extent of this problem has only recently been recognised. Some of them are becoming collectable in their own right. However, these have now become of such interest that a stamp catalogued at less than about £10 is often of greater value with a clear Madame Joseph cancellation than it would be genuinely used. Higher value stamps would be discounted, though, but would still rate around one third of the price of a genuine example, taking the cheaper of the used or unused prices. Thus, a 1933 Falkland Islands Centenary £1 with the famous Port Stanley, '6 JA 33' forged postmark sells for about £750. Other forged cancellations are of less interest, especially more modern ones and those which have been drawn in by hand!

Look out for forged cancellations which have been drawn by hand!

'Chops' and manuscript endorsements bring down the value of a used stamp

While on the subject of 'drawn in by hand', collectors in the past – including some very eminent ones – were in the habit of 'enhancing' slightly unclear postal markings by drawing over them in Indian ink. Less expensive stamps are seriously devalued in this condition, especially if the postmark is a heavy or disfiguring one. Major rarities would be less devalued in percentage terms, however, and could still rate up to about one third the price of an 'unenhanced' stamp with the same cancellation.

Many businesses in Asian countries, especially forwarding agents, were in the habit of cancelling their stamps with 'chops', while individuals frequently wrote across them in manuscript in order to discourage theft. Catalogue prices are for stamps without such endorsements, with a neat bandstamped 'chop' reducing the price by at least one third and a handwritten one by around two thirds.

Cancelled to order

Prices in the catalogue are, generally, for fine postally used, but for many modern issues they relate to cancelled to order examples. This does not refer to the selling of cancelled stamps for less than face value for the making up of stamp packets, as was the practice in many Eastern European countries between the 1950s and 1990s, and in North Borneo up to 1912 or Ghana in the 1950s. These latter examples are noted in the catalogue, with separate prices for the North Borneo stamps, while it is noted that catalogue prices for Ghana refer to cancelled to order, properly postally used stamps being worth a little more.

As the volume of worldwide stamp issues has escalated in the last 30 years and the cost of having postally used stamps removed from envelopes, soaked, dried and sorted has risen, it is no longer practicable for the stamp trade to supply fine postally used examples of most modern issues. They are therefore supplied cancelled by the postal administration concerned at the same price as mint examples, although as new issues they may be slightly more expensive, owing to the extra handling costs involved. Catalogue price is therefore for stamps 'cancelled to order', although fine postally used examples would merit the same price. Unfortunately, as collectors in Britain and the USA are aware, 'fine' and 'postally used' are two expressions which are rarely used together when discussing modern issues, since our respective postal administrations have deliberately returned to the philosophy of their Victorian predecessors and 'obliterated', rather than 'cancelled', any stamp being used to prepay postage. In the circumstances, therefore, catalogue price for used twentieth century GB refers to stamps cancelled by a light circular or oval datestamp. Rubber packet or parcel handstamps, slogan postmarks or wavy lines are worthy only of a small proportion of catalogue, the size of that proportion depending, once again, on the appearance of the stamp and its relative scarcity.

Modern GB prices are for c.d.s. used, wavy lines are worth only a small proportion of catalogue

That, indeed, encapsulates the relationship between condition and price. In this article we have reviewed the various aspects of 'condition' and how they can vary from country to country and from issue to issue. The catalogue price is for 'fine for the issue concerned', meaning fine in every respect, although a better than fine cancellation might outweigh a slight deficiency in centring, to allow a stamp to still be classified as 'fine'.

The end result is that, when buying, it is vitally important to carefully consider the condition of the item as well as its price and whether or not you want it and, when satisfied on all three counts, make your purchase – before anyone else gets in first!

This is an updated version of a series of articles published in Gibbons Stamp Monthly in 2003 under the title of "Defining 'Fine'".

General Philatelic Information and Guidelines to the Scope of Stanley Gibbons Commonwealth catalogues

These notes reflect current practice in compiling the Stanley Gibbons Commonwealth Catalogues.

The Stanley Gibbons Stamp Catalogue has a very long history and the vast quantity of information it contains has been carefully built up by successive generations through the work of countless individuals. Philately is never static and the Catalogue has evolved and developed over the years. These notes relate to the current criteria upon which a stamp may be listed or priced. These criteria have developed over time and may have differed somewhat in the early years of this catalogue. These notes are not intended to suggest that we plan to make wholesale changes to the listing of classic issues in order to bring them into line with today's listing policy, they are designed to inform catalogue users as to the policies currently in operation.

PRICES

The prices quoted in this Catalogue are the estimated selling prices of Stanley Gibbons Ltd at the time of publication. They are, unless it is specifically stated otherwise, for examples in fine condition for the issue concerned. Superb examples are worth more; those of a lower quality considerably less.

All prices are subject to change without prior notice and Stanley Gibbons Ltd may from time to time offer stamps below catalogue price. Individual low value stamps sold at 399 Strand are liable to an additional handling charge. Purchasers of new issues should note the prices charged for them contain an element for the service rendered and so may exceed the prices shown when the stamps are subsequently catalogued. Postage and handling charges are extra.

No guarantee is given to supply all stamps priced, since it is not possible to keep every catalogued item in stock. Commemorative issues may, at times, only be available in complete sets and not as individual values.

Quotation of prices. The prices in the left-hand column are for unused stamps and those in the right-hand column are for used.

A dagger (†) denotes that the item listed does not exist in that condition and a blank, or dash, that it exists, or may exist, but we are unable to quote a price.

Prices are expressed in pounds and pence sterling. One pound comprises 100 pence (£1 = 100p).

The method of notation is as follows: pence in numerals (e.g. 10 denotes ten pence); pounds and pence, up to £100, in numerals (e.g. 4.25 denotes four pounds and twenty-five pence); prices above £100 are expressed in whole pounds with the '£' sign shown.

Unused stamps. Great Britain and Commonwealth: the prices for unused stamps of Queen Victoria to King George V are for lightly hinged examples. Unused prices for King Edward VIII, King George VI and Queen Elizabeth issues are for unmounted mint.

Some stamps from the King George VI period are often difficult to find in unmounted mint condition. In such instances we would expect that collectors would need to pay a high proportion of the price quoted to obtain mounted mint examples. Generally speaking lightly mounted mint stamps from this reign, issued before 1945, are in considerable demand.

Used stamps. The used prices are normally for stamps postally used but may be for stamps cancelled-to-order where this practice exists.

A pen-cancellation on early issues can sometimes correctly denote postal use. Instances are individually noted in the Catalogue in explanation of the used price given.

Prices quoted for bisects on cover or large piece are for those dated during the period officially authorised.

Stamps not sold unused to the public (e.g. some official stamps) are priced used only.

The use of 'unified' designs, that is stamps inscribed for both postal and fiscal purposes, results in a number of stamps of very high face value. In some instances these may not have been primarily intended for postal purposes, but if they are so inscribed we include them. We only price such items used, however, where there is evidence of normal postal usage.

Cover prices. To assist collectors, cover prices are quoted for issues up to 1945 at the beginning of each country.

The system gives a general guide in the form of a factor by which the corresponding used price of the basic loose stamp should be multiplied when found in fine average condition on cover.

Care is needed in applying the factors and they relate to a cover which bears a single of the denomination listed; if more than one denomination is present the most highly priced attracts the multiplier and the remainder are priced at the simple figure for used singles in arriving at a total.

The cover should be of non-philatelic origin; bearing the correct postal rate for the period and distance involved and cancelled with the markings normal to the offices concerned. Purely philatelic items have a cover value only slightly greater than the catalogue value for the corresponding used stamps. This applies generally to those high-value stamps used philatelically rather than in the normal course of commerce. Low-value stamps, e.g. ¼d. and ½d., are desirable when used as a single rate on cover and merit an increase in 'multiplier' value.

First day covers in the period up to 1945 are not within the scope of the system and the multiplier should not be used. As a special category of philatelic usage, with wide variations in valuation according to scarcity, they require separate treatment.

Oversized covers, difficult to accommodate on an album page, should be reckoned as worth little more than the corresponding value of the used stamps. The condition of a cover also affects its value. Except for 'wreck covers', serious damage or soiling reduce the value where the postal markings and stamps are ordinary ones. Conversely, visual appeal adds to the value and this can include freshness of appearance, important addresses, old-fashioned but legible hand-writing, historic town-names, etc.

The multipliers are a base on which further value would be added to take account of the cover's postal historical importance in demonstrating such things as unusual, scarce or emergency cancels, interesting routes, significant postal markings, combination usage, the development of postal rates, and so on.

Minimum price. The minimum catalogue price quoted is 10p. For individual stamps prices between 10p. and 95p. are provided as a guide for catalogue users. The lowest price charged for individual stamps or sets purchased from Stanley Gibbons Ltd is £1

Set prices. Set prices are generally for one of each value, excluding shades and varieties, but including major colour changes. Where there are alternative shades, etc., the cheapest is usually included. The number of stamps in the set is always stated for clarity. The prices for sets containing *se-tenant* pieces are based on the prices quoted for such combinations, and not on those for the individual stamps.

Varieties. Where plate or cylinder varieties are priced in used condition the price quoted is for a fine used example with the cancellation well clear of the listed flaw.

Specimen stamps. The pricing of these items is explained under that heading.

Stamp booklets. Prices are for complete assembled booklets in fine condition with those issued before 1945 showing normal wear and tear. Incomplete booklets and those which have been 'exploded' will, in general, be worth less than the figure quoted.

Repricing. Collectors will be aware that the market factors of supply and demand directly influence the prices quoted in this Catalogue. Whatever the scarcity of a particular stamp, if there is no one in the market who wishes to buy it cannot be expected to achieve a high price. Conversely, the same item actively sought by numerous potential buyers may cause the price to rise.

All the prices in this Catalogue are examined during the preparation of each new edition by the expert staff of Stanley Gibbons and repriced as necessary. They take many factors into account, including supply and demand, and are in close touch with the international stamp market and the auction world.

Commonwealth cover prices and advice on postal history material originally provided by Edward B Proud.

GUARANTEE

All stamps are guaranteed originals in the following terms:

If not as described, and returned by the purchaser, we undertake to refund the price paid to us in the original transaction. If any stamp is certified as genuine by the Expert Committee of the Royal Philatelic Society, London, or by BPA Expertising Ltd, the purchaser shall not be entitled to make any claim against us for any error, omission or mistake in such certificate.

Consumers' statutory rights are not affected by the above guarantee.

The recognised Expert Committees in this country are those of the Royal Philatelic Society, 41 Devonshire Place, London W1G, 6JY, and BPA Expertising Ltd, PO Box 1141, Guildford, Surrey GU5 0WR. They do not undertake valuations under any circumstances and fees are payable for their services.

CONDITION GUIDE

To assist collectors in assessing the true value of items they are considering buying or in reviewing stamps already in their collections, we now offer a more detailed guide to the condition of stamps on which this catalogue's prices are based.

For a stamp to be described as 'Fine', it should be sound in all respects, without creases, bends, wrinkles, pin holes, thins or tears. If perforated, all perforation 'teeth' should be intact, it should not suffer from fading, rubbing or toning and it should be of clean, fresh appearance.

Margins on imperforate stamps: These should be even on all sides and should be at least as wide as half the distance between that stamp and the next. To have one or more margins of less than this width, would normally preclude a stamp from being described as 'Fine'. Some early stamps were positioned very close together on the printing plate and in such cases 'Fine' margins would necessarily be narrow. On the other hand, some plates were laid down to give a substantial gap between individual stamps and in such cases margins would be expected to be much wider.

An 'average' four-margin example would have a narrower margin on one or more sides and should be priced accordingly, while a stamp with wider, yet even, margins than 'Fine' would merit the description 'Very Fine' or 'Superb' and, if available, would command a price in excess of that quoted in the catalogue.

Gum: Since the prices for stamps of King Edward VIII, King George VI and Queen Elizabeth are for 'unmounted' or 'never hinged' mint, even stamps from these reigns which have been very lightly mounted should be available at a discount from catalogue price, the more obvious the hinge marks, the greater the discount.

Catalogue prices for stamps issued prior to King Edward VIII's reign are for mounted mint, so unmounted examples would be worth a premium. Hinge marks on 20th century stamps should not be too obtrusive, and should be at least in the lightly mounted category. For 19th century stamps more obvious hinging would be acceptable, but stamps should still carry a large part of their original gum—'Large part o.g.'—in order to be described as 'Fine'.

Centring: Ideally, the stamp's image should appear in the exact centre of the perforated area, giving equal margins on all sides. 'Fine' centring would be close to this ideal with any deviation having an effect on the value of the stamp. As in the case of the margins on imperforate stamps, it should be borne in mind that the space between some early stamps was very narrow, so it was very difficult to achieve accurate perforation, especially when the technology was in its infancy. Thus, poor centring would have a less damaging effect on the value of a 19th century stamp than on a 20th century example, but the premium put on a perfectly centred specimen would be greater.

Cancellations: Early cancellation devices were designed to 'obliterate' the stamp in order to prevent it being reused and this is still an important objective for today's postal administrations. Stamp collectors, on the other hand, prefer postmarks to be lightly applied, clear, and to leave as much as possible of the design visible. Dated, circular cancellations have long been 'the postmark of choice', but the definition of a 'Fine' cancellation will depend upon the types of cancellation in use at the time a stamp was current—it is clearly illogical to seek a circular datestamp on a Penny Black.

'Fine', by definition, will be superior to 'Average', so, in terms of cancellation quality, if one begins by identifying what 'Average' looks like, then one will be half way to identifying 'Fine'. The illustrations will give some guidance on mid-19th century and mid-20th century cancellations of Great Britain, but types of cancellation in general use in each country and in each period will determine the appearance of 'Fine'.

As for the factors discussed above, anything less than 'Fine' will result in a downgrading of the stamp concerned, while a very fine or superb cancellation will be worth a premium.

Combining the factors: To merit the description 'Fine', a stamp should be fine in every respect, but a small deficiency in one area might be made up for in another by a factor meriting an 'Extremely Fine' description.

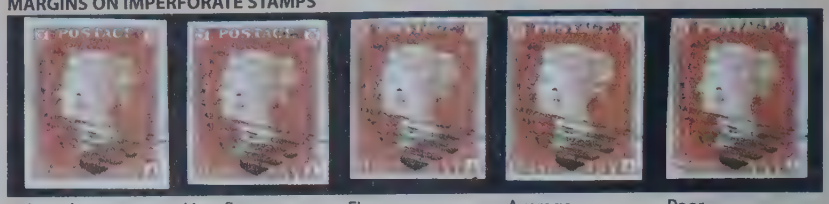
Some early issues are so seldom found in what would normally be considered to be 'Fine' condition, the catalogue prices are for a slightly lower grade, with 'Fine' examples being worth a premium. In such cases a note to this effect is given in the catalogue, while elsewhere premiums are given for well-centred, lightly cancelled examples.

Stamps graded at less than fine remain collectable and, in the case of more highly priced stamps, will continue to hold a value. Nevertheless, buyers should always bear condition in mind.

Contents. The Catalogue is confined to adhesive postage stamps, including miniature sheets. For particular categories the rules are:

(a) Revenue (fiscal) stamps are listed only where they have been expressly authorised for postal duty.
(b) Stamps issued only precancelled are included, but normally issued stamps available additionally with precancel have no separate precancel listing unless the face value is changed.
(c) Stamps prepared for use but not issued, hitherto accorded full listing, are nowadays foot-noted with a price (where possible).
(d) Bisects (trisects, etc.) are only listed where such usage was officially authorised.
(e) Stamps issued only on first day covers or in presentation packs and not available separately are not listed but may be priced in a footnote.
(f) New printings are only included in this Catalogue where they show a major philatelic variety, such as a change in shade, watermark or paper. Stamps which exist with or without imprint dates are listed separately; changes in imprint dates are mentioned in footnotes.
(g) Official and unofficial reprints are dealt with by footnote.
(h) Stamps from imperforate printings of modern issues which occur perforated are covered by footnotes, but are listed where widely available for postal use.

MARGINS ON IMPERFORATE STAMPS



Superb | Very fine | Fine | Average | Poor

GUM

Unmounted | Very lightly mounted | Lightly mounted | Mounted/large part original gum (o.g.). | Heavily mounted small part o.g

CENTRING

Superb | Very fine | Fine | Average | Poor

CANCELLATIONS

Superb | Very fine | Fine | Average | Poor

Superb | Very fine

Fine | Average | Poor

Exclusions. The following are excluded:
(a) non-postal revenue or fiscal stamps;
(b) postage stamps used fiscally (although prices are now given for some fiscally used high values);
(c) local carriage labels and private local issues;
(d) bogus or phantom stamps;
(e) railway or airline letter fee stamps, bus or road transport company labels or the stamps of private postal companies operating under licence from the national authority;
(f) cut-outs;
(g) all types of non-postal labels and souvenirs;
(h) documentary labels for the postal service, e.g. registration, recorded delivery, air-mail etiquettes, etc.;
(i) privately applied embellishments to official issues and privately commissioned items generally;
(j) stamps for training postal officers.

Full listing. 'Full listing' confers our recognition and implies allotting a catalogue number and (wherever possible) a price quotation.

In judging status for inclusion in the catalogue broad considerations are applied to stamps. They must be issued by a legitimate postal authority, recognised by the government concerned, and must be adhesives valid for proper postal use in the class of service for which they are inscribed. Stamps, with the exception of such categories as postage dues and officials, must be available to the general public, at face value, in reasonable quantities without any artificial restrictions being imposed on their distribution.

For errors and varieties the criterion is legitimate (albeit inadvertent) sale through a postal administration in the normal course of business. Details of provenance are always important; printers' waste and deliberately manufactured material are excluded.

Certificates. In assessing unlisted items due weight is given to Certificates from recognised Expert Committees and, where appropriate, we will usually ask to see them.

Date of issue. Where local issue dates differ from dates of release by agencies, 'date of issue' is the local date. Fortuitous stray usage before the officially intended date is disregarded in listing.

Catalogue numbers. Stamps of each country are catalogued chronologically by date of issue. Subsidiary classes are placed at the end of the country, as separate lists, with a distinguishing letter prefix to the catalogue number, e.g. D for postage due, O for official and E for express delivery stamps.

The catalogue number appears in the extreme left-column. The boldface Type numbers in the next column are merely cross-references to illustrations.

A catalogue number with a suffix will normally relate to the main number, so 137a will be a variant of No. 137, unless the suffix appears as part of the number in the left-hand column such as Great Britain No. 20*a*, in which case that should be treated as the main number. A number with multiple suffixes will relate to the first letter or letters of that suffix, so 137ab will be a variant of 137a and 137aba a variant of 137ab. The exception is an "aa" suffix, which will precede an "a" and always refers to the main number, so 137aa relates to 137, not 137a.

Once published in the Catalogue, numbers are changed as little as possible; really serious renumbering is reserved for the occasions when a complete country or an entire issue is being rewritten. The edition first affected includes cross-reference tables of old and new numbers.

Our catalogue numbers are universally recognised in specifying stamps and as a hallmark of status.

Illustrations. Stamps are illustrated at three-quarters linear size. Stamps not illustrated are the same size and format as the value shown, unless otherwise indicated. Stamps issued only as miniature sheets have the stamp alone illustrated but sheet size is also quoted. Overprints, surcharges, watermarks and postmarks are normally actual size. Illustrations of varieties are often enlarged to show the detail. Stamp booklet covers are illustrated half-size, unless otherwise indicated.

Designers. Designers' names are quoted where known, though space precludes naming every individual concerned in the production of a set. In particular, photographers supplying material are usually named only where they also make an active contribution in the design stage; posed photographs of reigning monarchs are, however, an exception to this rule.

CONTACTING THE CATALOGUE EDITOR

The editor is always interested in hearing from people who have new information which will improve or correct the Catalogue. As a general rule he must see and examine the actual stamps before they can be considered for listing; photographs or photocopies are insufficient evidence.

Submissions should be made in writing to the Catalogue Editor, Stanley Gibbons Publications at the Ringwood office. The cost of return postage for items submitted is appreciated, and this should include the registration fee if required.

Where information is solicited purely for the benefit of the enquirer, the editor cannot undertake to reply if the answer is already contained in these published notes or if return postage is omitted. Written communications are greatly preferred to enquiries by telephone or e-mail and the editor regrets that he or his staff cannot see personal callers without a prior appointment being made. Correspondence may be subject to delay during the production period of each new edition.

The editor welcomes close contact with study circles and is interested, too, in finding reliable local correspondents who will verify and supplement official information in countries where this is deficient.

We regret we do not give opinions as to the genuineness of stamps, nor do we identify stamps or number them by our Catalogue.

TECHNICAL MATTERS

The meanings of the technical terms used in the catalogue will be found in our *Philatelic Terms Illustrated*.

References below to (more specialised) listings are to be taken to indicate, as appropriate, the Stanley Gibbons *Great Britain Specialised Catalogue* in five volumes or the *Great Britain Concise Catalogue*.

1. Printing

Printing errors. Errors in printing are of major interest to the Catalogue. Authenticated items meriting consideration would include: background, centre or frame inverted or omitted; centre or subject transposed; error of colour; error or omission of value; double prints and impressions; printed both sides; and so on. Designs *tête-bêche*, whether intentionally or by accident, are listable. *Se-tenant* arrangements of stamps are recognised in the listings or footnotes. Gutter pairs (a pair of stamps separated by blank margin) are not included in this volume. Colours only partially omitted are not listed. Stamps with embossing omitted are reserved for our more specialised listings.

Printing varieties. Listing is accorded to major changes in the printing base which lead to completely new types. In recess-printing this could be a design re-engraved; in photogravure or photolithography a screen altered in whole or in part. It can also encompass flat-bed and rotary printing if the results are readily distinguishable.

To be considered at all, varieties must be constant.

Early stamps, produced by primitive methods, were prone to numerous imperfections; the lists reflect this, recognising re-entries, retouches, broken frames, misshapen letters, and so on. Printing technology has, however, radically improved over the years, during which time photogravure and lithography have become predominant. Varieties nowadays are more in the nature of flaws and these, being too specialised for this general catalogue, are almost always outside the scope.

In no catalogue, however, do we list such items as: dry prints, kiss prints, doctor-blade flaws, colour shifts or registration flaws (unless they lead to the complete omission of a colour from an individual stamp), lithographic ring flaws, and so on. Neither do we recognise fortuitous happenings like paper creases or confetti flaws.

"Varieties of the varieties". We no longer provide individual listings for combinations of two or more varieties; thus a plate variety or overprinting error will not be listed for various watermark orientations.

Overprints (and surcharges). Overprints of different types qualify for separate listing. These include overprints in different colours; overprints from different printing processes such as litho and typo; overprints in totally different typefaces, etc. Major errors in machine-printed overprints are important and listable. They include: overprint inverted or omitted; overprint double (treble, etc.); overprint diagonal; overprint double, one inverted; pairs with one overprint omitted, e.g. from a radical shift to an adjoining stamp; error of colour; error of type fount; letters inverted or omitted, etc. If the overprint is handstamped, few of these would qualify and a distinction is drawn. We continue, however, to list pairs of stamps where one has a handstamped overprint and the other has not.

Albino prints or double prints, one of them being albino (i.e. showing an uninked impression of the printing plate) are listable unless they are particularly common in this form (see the note below Travancore No. 32fa, for example). We do not, however, normally list reversed albino overprints, caused by the accidental or deliberate folding of sheets prior to overprinting (British Levant Nos. 51/8).

Varieties occurring in overprints will often take the form of broken letters, slight differences in spacing, rising spaces, etc. Only the most important would be considered for listing or footnote mention.

Sheet positions. If space permits we quote sheet positions of listed varieties and authenticated data is solicited for this purpose.

De La Rue plates. The Catalogue classifies the general plates used by De La Rue for printing British Colonial stamps as follows:

VICTORIAN KEY TYPE

Die I

1. The ball of decoration on the second point of the crown appears as a dark mass of lines.
2. Dark vertical shading separates the front hair from the bun.
3. The vertical line of colour outlining the front of the throat stops at the sixth line of shading on the neck.
4. The white space in the coil of the hair above the curl is roughly the shape of a pin's head.

Die II

1. There are very few lines of colour in the ball and it appears almost white.
2. A white vertical strand of hair appears in place of the dark shading.
3. The line stops at the eighth line of shading.
4. The white space is oblong, with a line of colour partially dividing it at the left end.

Plates numbered 1 and 2 are both Die I. Plates 3 and 4 are Die II.

GEORGIAN KEY TYPE

Die I

A. The second (thick) line below the name of the country is cut slanting, conforming roughly to the shape of the crown on each side.
B. The labels of solid colour bearing the words "POSTAGE" and "& REVENUE" are square at the inner top corners.
C. There is a projecting "bud" on the outer spiral of the ornament in each of the lower corners.

Die II

A. The second line is cut vertically on each side of the crown.
B. The labels curve inwards at the top.
C. There is no "bud" in this position.

Unless otherwise stated in the lists, all stamps with watermark Multiple Crown CA (w **8**) are Die I while those with watermark Multiple Crown Script CA (w **9**) are Die II. The Georgian Die II was introduced in April 1921 and was used for Plates 10 to 22 and 26 to 28. Plates 23 to 25 were made from Die I by mistake.

2. Paper

All stamps listed are deemed to be on (ordinary) paper of the wove type and white in colour; only departures from this are normally mentioned.

Types. Where classification so requires we distinguish such other types of paper as, for example, vertically and horizontally laid; wove and laid bâtonné; card(board); carton; cartridge; glazed; granite; native; pelure; porous; quadrillé; ribbed; rice; and silk thread.

Wove paper Laid paper

Granite paper Quadrillé paper

Burelé band

The various makeshifts for normal paper are listed as appropriate. The varieties of double paper and joined paper are recognised. The security device of a printed burelé band on the back of a stamp, as in early Queensland, qualifies for listing.

Descriptive terms. The fact that a paper is handmade (and thus probably of uneven thickness) is mentioned where necessary. Such descriptive terms as "hard" and "soft"; "smooth" and "rough"; "thick", "medium" and "thin" are applied where there is philatelic merit in classifying papers.

Coloured, very white and toned papers. A coloured paper is one that is coloured right through (front and back of the stamp). In the Catalogue the colour of the paper is given in italics, thus: black/*rose* = black design on rose paper.

Papers have been made specially white in recent years by, for example, a very heavy coating of chalk. We do not classify shades of whiteness of paper as distinct varieties. There does exist, however, a type of paper from early days called toned. This is off-white, often brownish or buffish, but it cannot be assigned any definite colour. A toning effect brought on by climate, incorrect storage or gum staining is disregarded here, as this was not the state of the paper when issued.

"Ordinary" and "Chalk-surfaced" papers. The availability of many postage stamps for revenue purposes made necessary some safeguard against the illegitimate re-use of stamps with removable cancellations. This was at first secured by using fugitive inks and later by printing on paper surfaced by coatings containing either chalk or china clay, both of which made it difficult to remove any form of obliteration without damaging the stamp design.

This catalogue lists these chalk-surfaced paper varieties from their introduction in 1905. Where no indication is given, the paper is "ordinary".

The "traditional" method of indentifying chalk-surfaced papers has been that, when touched with a silver wire, a black mark is left on the paper, and the listings in this catalogue are based on that test. However, the test itself is now largely discredited, for, although the mark can be removed by a soft rubber, some damage to the stamp will result from its use.

The difference between chalk-surfaced and pre-war ordinary papers is fairly clear: chalk-surfaced papers being smoother to the touch and showing a characteristic sheen when light is reflected off their surface. Under good magnification tiny bubbles or pock marks can be seen on the surface of the stamp and at the tips of the perforations the surfacing appears "broken". Traces of paper fibres are evident on the surface of ordinary paper and the ink shows a degree of absorption into it.

Initial chalk-surfaced paper printings by De La Rue had a thinner coating than subsequently became the norm. The characteristics described above are less pronounced in these printings.

During and after the Second World War, substitute papers replaced the chalk-surfaced papers, these do not react to the silver test and are therefore classed as "ordinary", although differentiating them without recourse to it is more difficult, for, although the characteristics of the chalk-surfaced paper remained the same, some of the ordinary papers appear much smoother than earlier papers and many do not show the watermark clearly. Experience is the only solution to identifying these, and comparison with stamps whose paper type is without question will be of great help.

Another type of paper, known as "thin striated" was used only for the Bahamas 1s. and 5s. (Nos. 155a, 156a, 171 and 174) and for several stamps of the Malayan states. Hitherto these have been described as "chalk-surfaced" since they gave some reaction to the silver test, but they are much thinner than usual chalk-surfaced papers, with the watermark showing clearly. Stamps on this paper show a slightly 'ribbed' effect when the stamp is held up to the light. Again, comparison with a known striated paper stamp, such as the 1941 Straits Settlements Die II 2c. orange (No. 294) will prove invaluable in separating these papers.

Glazed paper. In 1969 the Crown Agents introduced a new general-purpose paper for use in conjunction with all current printing processes. It generally has a marked glossy surface but the degree varies according to the process used, being more marked in recess-printing stamps. As it does not respond to the silver test this presents a further test where previous printings were on chalky paper. A change of paper to the glazed variety merits separate listing.

Green and yellow papers. Issues of the First World War and immediate postwar period occur on green and yellow papers and these are given separate Catalogue listing. The original coloured papers (coloured throughout) gave way to surface-coloured papers, the stamps having "white backs"; other stamps show one colour on the front and a different one at the back. Because of the numerous variations a grouping of colours is adopted as follows:

Yellow papers

(1) The original *yellow* paper (throughout), usually bright in colour. The gum is often sparse, of harsh consistency and dull-looking. Used 1912–1920.
(2) The *white-backs*. Used 1913–1914.
(3) A bright lemon paper. The colour must have a pronounced greenish tinge, different from the "yellow" in (1). As a rule, the gum on stamps using this lemon paper is plentiful, smooth and shiny, and the watermark shows distinctly. Care is needed with stamps printed in green on yellow paper (1) as it may appear that the paper is this lemon. Used 1914–1916.
(4) An experimental *orange-buff* paper. The colour must have a distinct brownish tinge. It is not to be confused with a muddy yellow (1) nor the misleading appearance (on the surface) of stamps printed in red on yellow paper where an engraved plate has been insufficiently wiped. Used 1918–1921.
(5) An experimental *buff* paper. This lacks the brownish tinge of (4) and the brightness of the yellow shades. The gum is shiny when compared with the matt type used on (4). Used 1919–1920.
(6) A *pale yellow* paper that has a creamy tone to the yellow. Used from 1920 onwards.

Green papers

(7) The original "green" paper, varying considerably through shades of blue-green and yellow-green, the front and back sometimes differing. Used 1912–1916.
(8) The *white backs*. Used 1913–1914.
(9) A paper blue-green on the surface with *pale olive* back. The back must be markedly paler than the front and this and the pronounced olive tinge to the back distinguish it from (7). Used 1916–1920.
(10) Paper with a vivid green surface, commonly called *emerald-green*; it has the olive back of (9). Used 1920.
(11) Paper with *emerald-green* both back and front. Used from 1920 onwards.

3. Perforation and Rouletting

Perforation gauge. The gauge of a perforation is the number of holes in a length of 2 cm. For correct classification the size of the holes (large or small) may need to be distinguished; in a few cases the actual number of holes on each edge of the stamp needs to be quoted.

Measurement. The Gibbons *Instanta* gauge is the standard for measuring perforations. The stamp is viewed against a dark background with the transparent gauge put on top of it. Though the gauge measures to decimal accuracy, perforations read from it are generally quoted in the Catalogue to the nearest half. For example:

Just over perf 12¾ to just under 13¼ = perf 13
Perf 13¼ exactly, rounded up = perf 13½
Just over perf 13¼ to just under 13¾ = perf 13½
Perf 13¾ exactly, rounded up = perf 14

However, where classification depends on it, actual quarter-perforations are quoted.

Notation. Where no perforation is quoted for an issue it is imperforate. Perforations are usually abbreviated (and spoken) as follows, though sometimes they may be spelled out for clarity. This notation for rectangular stamps (the majority) applies to diamond shapes if "top" is read as the edge to the top right.

P 14: perforated alike on all sides (read: "perf 14").
P 14×15: the first figure refers to top and bottom, the second to left and right sides (read: "perf 14 by 15"). This is a compound perforation. For an upright triangular stamp the first figure refers to the two sloping sides and second to the base. In inverted triangulars the base is first and the second figure to the sloping sides.
P 14–15: perforation measuring anything between 14 and 15: the holes are irregularly spaced, thus the gauge may vary along a single line or even along a single edge of the stamp (read: "perf 14 to 15").
P 14 *irregular*: perforated 14 from a worn perforator, giving badly aligned holes irregularly spaced (read: "irregular perf 14").

P *comp(ound)* 14×15: two gauges in use but not necessarily on opposite sides of the stamp. It could be one side in one gauge and three in the other; or two adjacent sides with the same gauge. (Read: "perf compound of 14 and 15".) For three gauges or more, abbreviated as "P 12, 14½, 15 *or compound*" for example.

P 14, 14½: perforated approximately 14¼ (read: "perf 14 or 14½"). It does *not* mean two stamps, one perf 14 and the other perf 14½. This obsolescent notation is gradually being replaced in the Catalogue.

Imperf: imperforate (not perforated)

Imperf×P 14: imperforate at top ad bottom and perf 14 at sides.

P 14×*imperf*: perf 14 at top and bottom and imperforate at sides.

Such headings as "P 13×14 (*vert*) and P 14×13 (*horiz*)" indicate which perforations apply to which stamp format—vertical or horizontal.

Some stamps are additionally perforated so that a label or tab is detachable; others have been perforated for use as two halves. Listings are normally for whole stamps, unless stated otherwise.

Imperf×perf

Other terms. Perforation almost always gives circular holes; where other shapes have been used they are specified, e.g. square holes; lozenge perf. Interrupted perfs are brought about by the omission of pins at regular intervals. Perforations merely simulated by being printed as part of the design are of course ignored. With few exceptions, privately applied perforations are not listed.

In the 19th century perforations are often described as clean cut (clean, sharply incised holes), intermediate or rough (rough holes, imperfectly cut, often the result of blunt pins).

Perforation errors and varieties. Authenticated errors, where a stamp normally perforated is accidentally issued imperforate, are listed provided no traces of perforation (blind holes or indentations) remain. They must be provided as pairs, both stamps wholly imperforate, and are only priced in that form.

Stamps imperforate between stamp and sheet margin are not listed in this catalogue, but such errors on Great Britain stamps will be found in the *Great Britain Specialised Catalogue*.

Pairs described as "imperforate between" have the line of perforations between the two stamps omitted.

Imperf between (horiz pair): a horizontal pair of stamps with perfs all around the edges but none between the stamps.

Imperf between (vert pair): a vertical pair of stamps with perfs all around the edges but none between the stamps.

Imperf between (vertical pair)

Imperf horizontally (vertical pair)

Where several of the rows have escaped perforation the resulting varieties are listable. Thus:

Imperf vert (horiz pair): a horizontal pair of stamps perforated top and bottom; all three vertical directions are imperf—the two outer edges and between the stamps.

Imperf horiz (vert pair): a vertical pair perforated at left and right edges; all three horizontal directions are imperf—the top, bottom and between the stamps.

Straight edges. Large sheets cut up before issue to post offices can cause stamps with straight edges, i.e. imperf on one side or on two sides at right angles. They are not usually listable in this condition and are worth less than corresponding stamps properly perforated all round. This does not, however, apply to certain stamps, mainly from coils and booklets, where straight edges on various sides are the manufacturing norm affecting every stamp. The listings and notes make clear which sides are correctly imperf.

Malfunction. Varieties of double, misplaced or partial perforation caused by error or machine malfunction are not listable, neither are freaks, such as perforations placed diagonally from paper folds, nor missing holes caused by broken pins.

Types of perforating. Where necessary for classification, perforation types are distinguished. These include:

Line perforation from one line of pins punching single rows of holes at a time.

Comb perforation from pins disposed across the sheet in comb formation, punching out holes at three sides of the stamp a row at a time.

Harrow perforation applied to a whole pane or sheet at one stroke.

Rotary perforation from toothed wheels operating across a sheet, then crosswise.

Sewing machine perforation. The resultant condition, clean-cut or rough, is distinguished where required.

Pin-perforation is the commonly applied term for pin-roulette in which, instead of being punched out, round holes are pricked by sharp-pointed pins and no paper is removed.

Mixed perforation occurs when stamps with defective perforations are re-perforated in a different gauge.

Punctured stamps. Perforation holes can be punched into the face of the stamp. Patterns of small holes, often in the shape of initial letters, are privately applied devices against pilferage. These (perfins) are outside the scope except for Australia, Canada, Cape of Good Hope, Papua and Sudan where they were used as official stamps by the national administration. Identification devices, when officially inspired, are listed or noted; they can be shapes, or letters or words formed from holes, sometimes converting one class of stamp into another.

Rouletting. In rouletting the paper is cut, for ease of separation, but none is removed. The gauge is measured, when needed, as for perforations. Traditional French terms descriptive of the type of cut are often used and types include:

Arc roulette (percé en arc). Cuts are minute, spaced arcs, each roughly a semicircle.

Cross roulette (percé en croix). Cuts are tiny diagonal crosses.

Line roulette (percé en ligne or *en ligne droite)*. Short straight cuts parallel to the frame of the stamp. The commonest basic roulette. Where not further described, "roulette" means this type.

Rouletted in colour or coloured roulette (percé en lignes colorées or *en lignes de coleur)*. Cuts with coloured edges, arising from notched rule inked simultaneously with the printing plate.

Saw-tooth roulette (percé en scie). Cuts applied zigzag fashion to resemble the teeth of a saw.

Serpentine roulette (percé en serpentin). Cuts as sharply wavy lines.

Zigzag roulette (percé en zigzags). Short straight cuts at angles in alternate directions, producing sharp points on separation. US usage favours "serrate(d) roulette" for this type.

Pin-roulette (originally *percé en points* and now *perforés trous d'epingle*) is commonly called pin-perforation in English.

4. Gum

All stamps listed are assumed to have gum of some kind; if they were issued without gum this is stated. Original gum (o.g.) means that which was present on the stamp as issued to the public. Deleterious climates and the presence of certain chemicals can cause gum to crack and, with early stamps, even make the paper deteriorate. Unscrupulous fakers are adept in removing it and regumming the stamp to meet the unreasoning demand often made for "full o.g." in cases where such a thing is virtually impossible.

The gum normally used on stamps has been gum arabic until the late 1960s when synthetic adhesives were introduced. Harrison and Sons Ltd for instance used polyvinyl alcohol known to philatelists as PVA. This is almost invisible except for a slight yellowish tinge which was incorporated to make it possible to see that the stamps had been gummed. It has advantages in hot countries, as stamps do not curl and sheets are less likely to stick together. Gum arabic and PVA are not distinguished in the lists except that where a stamp exists in both forms this is indicated in the footnotes. Our more specialised catalogues provide separate listing of gums for Great Britain

5. Watermarks

Stamps are on unwatermarked paper except where the heading to the set says otherwise.

Detection. Watermarks are detected for Catalogue description by one of four methods: (1) holding stamps to the light; (2) laying stamps face down on a dark background; (3) adding a few drops of petroleum ether 40/60 to the stamp laid face down in a watermark tray; (4) by use of the Stanley Gibbons Detectamark, or other equipment, which work by revealing the thinning of the paper at the watermark. (Note that petroleum ether is highly inflammable in use and can damage photogravure stamps.)

Listable types. Stamps occurring on both watermarked and unwatermarked papers are different types and both receive full listing.

Single watermarks (devices occurring once on every stamp) can be modified in size and shape as between different issues; the types are noted but not usually separately listed. Fortuitous absence of watermark from a single stamp or its gross displacement would not be listable.

To overcome registration difficulties the device may be repeated at close intervals *(a multiple watermark)*, single stamps thus showing parts of several devices. Similarly, a *large sheet watermark* (or *all-over watermark*) covering numerous stamps can be used. We give informative notes and illustrations for them. The designs may be such that numbers of stamps in the sheet automatically lack watermark: this is not a listable variety. Multiple and all-over watermarks sometimes undergo modifications, but if the various types are difficult to distinguish from single stamps notes are given but not separate listings.

Papermakers' watermarks are noted where known but not listed separately, since most stamps in the sheet will lack them. Sheet watermarks which are nothing more than officially adopted papermakers' watermarks are, however, given normal listing.

Marginal watermarks, falling outside the pane of stamps, are ignored except where misplacement has caused the adjoining row to be affected, in which case they may be footnoted.

They usually consist of straight or angled lines and double-lined capital letters, they are particularly prevalent on some Crown CC and Crown CA watermark stamps.

Watermark errors and varieties. Watermark errors are recognised as of major importance. They comprise stamps intended to be on unwatermarked paper but issued watermarked by mistake, or stamps printed on paper with the wrong watermark. Varieties showing letters omitted from the watermark are also included, but broken or deformed bits on the dandy roll are not listed unless they represent repairs.

Watermark positions. The diagram shows how watermark position is described in the Catalogue. Paper has a side intended for printing and watermarks are usually impressed so that they read normally when looked through from that printed side. However, since philatelists customarily detect watermarks by looking at the back of the stamp the watermark diagram also makes clear what is actually seen.

Illustrations in the Catalogue are of watermarks in normal positions (from the front of the stamps) and are actual size where possible.

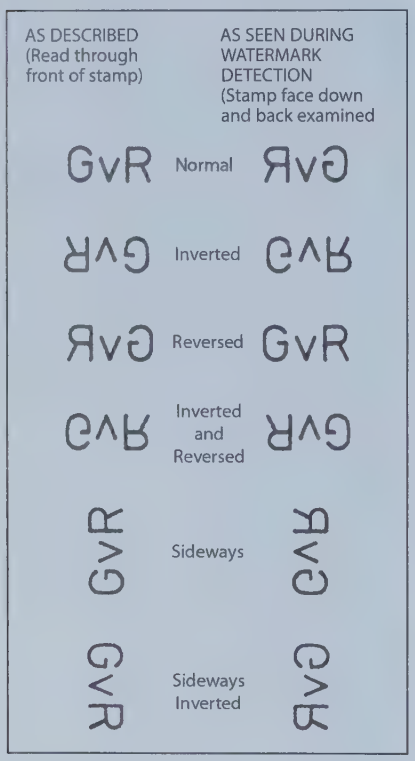
Differences in watermark position are collectable varieties. This Catalogue now lists inverted, sideways inverted and reversed watermark varieties on Commonwealth stamps from the 1860s onwards except where the watermark position is completely haphazard or, due to the method of printing, appear in equal quantities, upright and inverted (e.g. Papua Nos. 47/83). In such cases it should be assumed that the price is the same, either way.

Great Britain inverted and sideways inverted watermarks can be found in the *Great Britain Specialised Catalogue* and the *Great Britain Concise Catalogue*.

Where a watermark comes indiscriminately in various positions our policy is to cover this by a general note: we do not give separate listings because the watermark position in these circumstances has no particular philatelic importance.

As shown in the diagram, a watermark described as 'sideways' will normally show the top of the watermark (as shown in its illustration), pointing to the left of the stamp, as seen from the front and to the right as seen from the back.

For clarification, or in cases where the 'normal' watermark is 'sideways inverted' a note is generally provided at the foot of the relevant listing, particularly where sideways and sideways inverted varieties exist.



Standard types of watermark. Some watermarks have been used generally for various British possessions rather than exclusively for a single colony. To avoid repetition the Catalogue classifies 11 general types, as under, with references in the headings throughout the listings being given either in words or in the form ("W w **9**") (meaning "watermark type w **9**"). In those cases where watermark illustrations appear in the listings themselves, the respective reference reads, for example, W **153**, thus indicating that the watermark will be found in the normal sequence of illustrations as (type) **153**.

The general types are as follows, with an example of each quoted.

W	*Description*	*Example*
w **1**	Large Star	St. Helena No. 1
w **2**	Small Star	Turks Is. No. 4
w **3**	Broad (pointed) Star	Grenada No. 24
w **4**	Crown (over) CC, small stamp	Antigua No. 13
w **5**	Crown (over) CC, large stamp	Antigua No. 31
w **6**	Crown (over) CA, small stamp	Antigua No. 21
w **7**	Crown CA (CA over Crown), large stamp	Sierra Leone No. 54
w **8**	Multiple Crown CA	Antigua No. 41
w **9**	Multiple Script CA	Seychelles No. 158
w **9***a*	do. Error	Seychelles No. 158a
w **9***b*	do. Error	Seychelles No. 158b
w **10**	V over Crown	N.S.W. No. 327
w **11**	Crown over A	N.S.W. No. 347

CC in these watermarks is an abbreviation for "Crown Colonies" and CA for "Crown Agents". Watermarks w **1**, w **2** and w **3** are on stamps printed by Perkins, Bacon; w **4** onwards on stamps from De La Rue and other printers.

w **1**
Large Star

w **2**
Small Star

w **3**
Broad-pointed Star

Watermark w **1**, *Large Star*, measures 15 to 16 mm across the star from point to point and about 27 mm from centre to centre vertically between stars in the sheet. It was made for long stamps like Ceylon 1857 and St. Helena 1856.

Watermark w **2**, *Small Star* is of similar design but measures 12 to 13½mm from point to point and 24 mm from centre to centre vertically. It was for use with ordinary-size stamps such as Grenada 1863–71.

When the Large Star watermark was used with the smaller stamps it only occasionally comes in the centre of the paper. It is frequently so misplaced as to show portions of two stars above and below and this eccentricity will very often help in determining the watermark.

Watermark w **3**, *Broad-pointed Star*, resembles w **1** but the points are broader.

w **4**
Crown (over) CC

w **5**
Crown (over) CC

Two *Crown (over) CC* watermarks were used: w **4** was for stamps of ordinary size and w **5** for those of larger size.

w **6**
Crown (over) CA

w **7**
CA over Crown

Two watermarks of *Crown CA* type were used, w **6** being for stamps of ordinary size. The other, w **7**, is properly described as *CA over Crown*. It was specially made for paper on which it was intended to print long fiscal stamps: that some were used postally accounts for the appearance of w **7** in the Catalogue. The watermark occupies twice the space of the ordinary Crown CA watermark, w **6**. Stamps of normal size printed on paper with w **7** watermark show it *sideways*; it takes a horizontal pair of stamps to show the entire watermark.

w **8**
Multiple Crown CA

w **9**
Multiple Script CA

Multiple watermarks began in 1904 with w **8**, *Multiple Crown CA*, changed from 1921 to w **9**, *Multiple Script CA*. On stamps of ordinary size portions of two or three watermarks appear and on the large-sized stamps a greater number can be observed. The change to letters in script character with w **9** was accompanied by a Crown of distinctly different shape.

It seems likely that there were at least two dandy rolls for each Crown Agents watermark in use at any one time with a reserve roll being employed when the normal one was withdrawn for maintenance or repair.

Both the Mult Crown CA and the Mult Script CA types exist with one or other of the letters omitted from individual impressions. It is possible that most of these occur from the reserve rolls as they have only been found on certain issues. The MCA watermark experienced such problems during the early 1920s and the Script over a longer period from the early 1940s until 1951.

During the 1920s damage must also have occurred on one of the Crowns as a substituted Crown has been found on certain issues. This is smaller than the normal and consists of an oval base joined to two upright ovals with a circle positioned between their upper ends. The upper line of the Crown's base is omitted, as are the left and right-hand circles at the top and also the cross over the centre circle.

Substituted Crown

The *Multiple Script CA* watermark, w **9**, is known with two errors, recurring among the 1950–52 printings of several territories. In the first a crown has fallen away from the dandy-roll that impresses the watermark into the paper pulp. It gives w **9a**, *Crown missing*, but this omission has been found in both "Crown only" (*illustrated*) and "Crown CA" rows. The resulting faulty paper was used for Bahamas, Johore, Seychelles and the postage due stamps of nine colonies

w **9a**: Error, Crown missing

w **9b**: Error, St. Edward's Crown

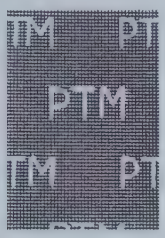
When the omission was noticed a second mishap occurred, which was to insert a wrong crown in the space, giving w **9b**, St. Edward's Crown. This produced varieties in Bahamas, Perlis, St. Kitts-Nevis and Singapore and the incorrect crown likewise occurs in (Crown only) and (Crown CA) rows.

w **10**
V over Crown

w **11**
Crown over A

Resuming the general types, two watermarks found in issues of several Australian States are: w **10**, *V over Crown*, and w **11**, *Crown over A*.

w **12**
Multiple St. Edward's Crown Block CA



w **13**
Multiple PTM

The *Multiple St. Edward's Crown Block CA* watermark, w **12**, was introduced in 1957 and besides the change in the Crown (from that used in Multiple Crown Script CA, w **9**) the letters reverted to block capitals. The new watermark began to appear sideways in 1966 and these stamps are generally listed as separate sets.

The watermark w **13**, *Multiple PTM*, was introduced for new Malaysian issues in November 1961.

6. Colours

Stamps in two or three colours have these named in order of appearance, from the centre moving outwards. Four colours or more are usually listed as multicoloured.

In compound colour names the second is the predominant one, thus:

orange-red = a red tending towards orange;
red-orange = an orange containing more red than usual.

Standard colours used. The 200 colours most used for stamp identification are given in the Stanley Gibbons Stamp Colour Key. The Catalogue has used the Stamp Colour Key as standard for describing new issues for some years. The names are also introduced as lists are rewritten, though exceptions are made for those early issues where traditional names have become universally established.

Determining colours. When comparing actual stamps with colour samples in the Stamp Colour Key, view in a good north daylight (or its best substitute; fluorescent "colour matching" light). Sunshine is not recommended. Choose a solid portion of the stamp design; if available, marginal markings such as solid bars of colour or colour check dots are helpful. Shading lines in the design can be misleading as they appear lighter than solid colour. Postmarked portions of a stamp appear darker than normal. If more than one colour is present, mask off the extraneous ones as the eye tends to mix them.

Errors of colour. Major colour errors in stamps or overprints which qualify for listing are: wrong colours; one colour inverted in relation to the rest; albinos (colourless impressions), where these have Expert Committee certificates; colours completely omitted, but only on unused stamps (if found on used stamps the information is footnoted) and with good credentials, missing colours being frequently faked.

Colours only partially omitted are not recognised. Colour shifts, however spectacular, are not listed.

Shades. Shades in philately refer to variations in the intensity of a colour or the presence of differing amounts of other colours. They are particularly significant when they can be linked to specific printings. In general, shades need to be quite marked to fall within the scope of this Catalogue; it does not favour nowadays listing the often numerous shades of a stamp, but chooses a single applicable colour name which will indicate particular groups of outstanding shades. Furthermore, the listings refer to colours as issued; they may deteriorate into something different through the passage of time.

Modern colour printing by lithography is prone to marked differences of shade, even within a single run, and variations can occur within the same sheet. Such shades are not listed.

Aniline colours. An aniline colour meant originally one derived from coal-tar; it now refers more widely to colour of a particular brightness suffused on the surface of a stamp and showing through clearly on the back.

Colours of overprints and surcharges. All overprints and surcharges are in black unless stated otherwise in the heading or after the description of the stamp.

7. Specimen Stamps

Originally, stamps overprinted SPECIMEN were circulated to postmasters or kept in official records, but after the establishment of the Universal Postal Union supplies were sent to Berne for distribution to the postal administrations of member countries.

During the period 1884 to 1928 most of the stamps of British Crown Colonies required for this purpose were overprinted SPECIMEN in various shapes and sizes by their printers from typeset formes. Some locally produced provisionals were handstamped locally, as were sets prepared for presentation. From 1928 stamps were punched with holes forming the word SPECIMEN, each firm of printers using a different machine or machines. From 1948 the stamps supplied for UPU distribution were no longer punctured.

Stamps of some other Commonwealth territories were overprinted or handstamped locally, while stamps of Great Britain and those overprinted for use in overseas postal agencies (mostly of the higher denominations) bore SPECIMEN overprints and handstamps applied by the Inland Revenue or the Post Office.

Some of the commoner types of overprints or punctures are illustrated here. Collectors are warned that dangerous forgeries of the punctured type exist.

The *Stanley Gibbons Commonwealth Catalogues* record those Specimen overprints or perforations intended for distribution by the UPU to member countries. In addition the Specimen overprints of Australia and its dependent territories, which were sold to collectors by the Post Office, are also included.

Various Perkins Bacon issues exist obliterated with a "CANCELLED" within an oval of bars handstamp.

Perkins Bacon "CANCELLED" Handstamp

This was applied to six examples of those issues available in 1861 which were then given to members of Sir Rowland Hill's family. 75 different stamps (including four from Chile) are recorded with this handstamp although others may possibly exist. The unauthorised gift of these "CANCELLED" stamps to the Hill family was a major factor in the loss of the Agent General for the Crown Colonies (the forerunner of the Crown Agents) contracts by Perkins Bacon in the following year. Where examples of these scarce items are known to be in private hands the catalogue provides a price.

For full details of these stamps see *CANCELLED by Perkins Bacon* by Peter Jaffé (published by Spink in 1998).

All other Specimens are outside the scope of this volume.

Specimens are not quoted in Great Britain as they are fully listed in the Stanley Gibbons *Great Britain Specialised Catalogue*.

In specifying type of specimen for individual high-value stamps, "H/S" means handstamped, "Optd" is overprinted and "Perf" is punctured. Some sets occur mixed, e.g. "Optd/Perf". If unspecified, the type is apparent from the date or it is the same as for the lower values quoted as a set.

Prices. Prices for stamps up to £1 are quoted in sets; higher values are priced singly. Where specimens exist in more than one type the price quoted is for the cheapest. Specimen stamps have rarely survived even as pairs; these and strips of three, four or five are worth considerably more than singles.

8. Luminescence

Machines which sort mail electronically have been introduced in recent years. In consequence some countries have issued stamps on flourescent or phosphorescent papers, while others have marked their stamps with phosphor bands.

The various papers can only be distinguished by ultraviolet lamps emitting particular wavelengths. They are separately listed only when the stamps have some other means of distinguishing them, visible without the use of these lamps. Where this is not so, the papers are recorded in footnotes or headings.

For this catalogue we do not consider it appropriate that collectors be compelled to have the use of an ultraviolet lamp before being able to identify stamps by our listings. Some experience will also be found necessary in interpreting the results given by ultraviolet. Collectors using the lamps, nevertheless, should exercise great care in their use as exposure to their light is potentially dangerous to the eyes.

Phosphor bands are listable, since they are visible to the naked eye (by holding stamps at an angle to the light and looking along them, the bands appear dark). Stamps existing with or without phosphor bands or with differing numbers of bands are given separate listings. Varieties such as double bands, bands omitted, misplaced or printed on the back are not listed.

Detailed descriptions appear at appropriate places in the listings in explanation of luminescent papers; see, for example, Australia above No.363, Canada above Nos. 472 and 611, Cook Is. above 249, etc.

For Great Britain, where since 1959 phosphors have played a prominent and intricate part in stamp issues, the main notes above Nos. 599 and 723 should be studied, as well as the footnotes to individual listings where appropriate. In general the classification is as follows.

Stamps with phosphor bands are those where a separate cylinder applies the phosphor after the stamps are printed. Issues with "all-over" phosphor have the "band" covering the entire stamp. Parts of the stamp covered by phosphor bands, or the entire surface for "all-over" phosphor versions, appear matt. Stamps on phosphorised paper have the phosphor added to the paper coating before the stamps are printed. Issues on this paper have a completely shiny surface.

Further particularisation of phosphor – their methods of printing and the colours they exhibit under ultraviolet – is outside the scope of this catalogue. The more specialised listings should be consulted for this information.

9. Coil Stamps

Stamps issued only in coil form are given full listing. If stamps are issued in both sheets and coils the coil stamps are listed separately only where there is some feature (e.g. perforation or watermark sideways) by which singles can be distinguished. Coil stamps containing different stamps *se-tenant* are also listed.

Coil join pairs are too random and too easily faked to permit listing; similarly ignored are coil stamps which have accidentally suffered an extra row of perforations from the claw mechanism in a malfunctioning vending machine.

10. Stamp Booklets

Stamp booklets are now listed in this catalogue.

Single stamps from booklets are listed if they are distinguishable in some way (such as watermark or perforation) from similar sheet stamps.

Booklet panes are listed where they contain stamps of different denominations *se-tenant*, where stamp-size labels are included, or where such panes are otherwise identifiable. Booklet panes are placed in the listing under the lowest denomination present.

Particular perforations (straight edges) are covered by appropriate notes.

The majority of stamps booklets were made up from normal sheets and panes may be bound upright or inverted and booklets may be stapled or stitched at either the left or right-hand side. Unless specifically mentioned in the listings, such variations do not command a price premium.

11. Miniature Sheets and Sheetlets

We distinguish between "miniature sheets" and "sheetlets" and this affects the catalogue numbering. An item in sheet form that is postally valid, containing a single stamp, pair, block or set of stamps, with wide, inscribed and/or decorative margins, is a miniature sheet if it is sold at post offices as an indivisable entity. As such the Catalogue allots a single MS number and describes what stamps make it up. The sheetlet or small sheet differs in that the individual stamps are intended to be purchased separately for postal purposes. For sheetlets, all the component postage stamps are numbered individually and the composition explained in a footnote. Note that the definitions refer to post office sale—not how items may be subsequently offered by stamp dealers.

12. Forgeries and Fakes

Forgeries. Where space permits, notes are considered if they can give a concise description that will permit unequivocal detection of a forgery. Generalised warnings, lacking detail, are not nowadays inserted, since their value to the collector is problematic.

Forged cancellations have also been applied to genuine stamps. This catalogue includes notes regarding those manufactured by "Madame Joseph", together with the cancellation dates known to exist. It should be remembered that these dates also exist as genuine cancellations.

For full details of these see *Madame Joseph Forged Postmarks* by Derek Worboys (published by the Royal Philatelic Society London and the British Philatelic Trust in 1994) or *Madame Joseph Revisited* by Brian Cartwright (published by the Royal Philatelic Society London in 2005).

Fakes. Unwitting fakes are numerous, particularly "new shades" which are colour changelings brought about by exposure to sunlight, soaking in water contaminated with dyes from adherent paper, contact with oil and dirt from a pocketbook, and so on. Fraudulent operators, in addition, can offer to arrange: removal of hinge marks; repairs of thins on white or coloured papers; replacement of missing margins or perforations; reperforating in true or false gauges; removal of fiscal cancellations; rejoining of severed pairs, strips and blocks; and (a major hazard) regumming. Collectors can only be urged to purchase from reputable sources and to insist upon Expert Committee certification where there is any kind of doubt.

The Catalogue can consider footnotes about fakes where these are specific enough to assist in detection.

(†) = Does not exist
(–) (or blank price column) = Exists, or may exist, but no market price is known.
/ between colours means "on" and the colour following is that of the paper on which the stamp is printed.

Colours of Stamps

Bl (blue); blk (black); brn (brown); car, carm (carmine); choc (chocolate); clar (claret); emer (emerald); grn (green); ind (indigo); mag (magenta); mar (maroon); mult (multicoloured); mve (mauve); ol (olive); orge (orange); pk (pink); pur (purple); scar (scarlet); sep (sepia); turq (turquoise); ultram (ultramarine); verm (vermilion); vio (violet); yell (yellow).

Colour of Overprints and Surcharges

(B.) = blue, (Blk.) = black, (Br.) = brown,
(C.) = carmine, (G.) = green, (Mag.) = magenta, (Mve.) = mauve, (Ol.) = olive, (O.) = orange,
(P.) = purple, (Pk.) = pink, (R.) = red, (Sil.) = silver, (V.) = violet, (Vm.) or (Verm.) = vermilion,
(W.) = white, (Y.) = yellow.

Arabic Numerals

As in the case of European figures, the details of the Arabic numerals vary in different stamp designs, but they should be readily recognised with the aid of this illustration.

٠	١	٢	٣	٤	٥	٦	٧	٨	٩
0	1	2	3	4	5	6	7	8	9

Select Bibliography

The literature on British Commonwealth stamps is vast, but works are often difficult to obtain once they are out of print. The selection of books below has been made on the basis of authority together with availability to the general reader, either as new or secondhand. Very specialised studies, and those covering aspects of postal history to which there are no references in the catalogue, have been excluded.

The following abbreviations are used to denote publishers:

CRL Christie's Robson Lowe;
HH Harry Hayes;
PB Proud Bailey Co. Ltd. and Postal History Publications Co.;
PC Philip Cockrill;
RPSL Royal Philatelic Society, London;
SG Stanley Gibbons Ltd.

Where no publisher is quoted, the book is published by its author.

GENERAL

Encylopaedia of British Empire Postage Stamps. Vols 1-6. Edited Robson Lowe. (CRL, 1951–1991)
Specimen Stamps of the Crown Colonies 1857-1948. Marcus Samuel. (RPSL, 1976 and 1984 Supplement)

Great Britain

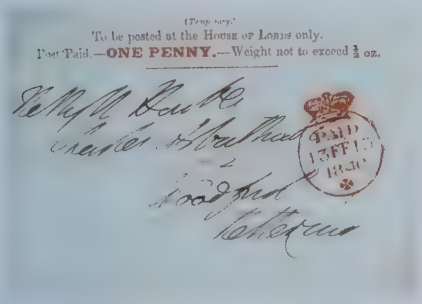
STAMPS ON COVER. Prices are quoted, as a third price column, for those Victorian and Edwardian issues usually found used on cover. In general these prices refer to the cheapest version of each basic stamp with other shades, plates or varieties, together with unusual frankings and postmarks, being worth more.

UNITED KINGDOM OF GREAT BRITAIN AND IRELAND

QUEEN VICTORIA
20 June 1837—22 January 1901

PARLIAMENTARY ENVELOPES. When the Uniform Penny Postage was introduced on 10 January 1840 the free franking privileges of Members of Parliament were abolished. During the same month, special envelopes were introduced for mail posted from the Houses of Parliament and these remained in use until the introduction of stamps and the Mulready stationery in May 1840. Envelopes are priced in used condition only.



Inscribed "Houses of Parliament" in black (16 Jan 1840)

PE2	1d. envelope	*from*	£18000
PE3	2d. envelope	*from*	£45000
PE4	4d. envelope	*from*	

Inscribed "House of Lords" in vermilion (Jan 1840)

PE5	1d. envelope	*from*	£25000
PE8	2d. envelope		

Inscribed "House of Commons" in black (Jan 1840)

PE9	1d. envelope	*from*	£6000

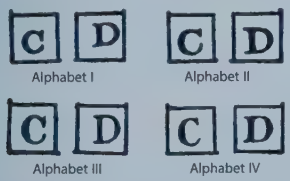
MULREADY ENVELOPES AND LETTER SHEETS, so called from the name of the designer, William Mulready, were issued concurrently with the first British adhesive stamps

	1d. black	
Envelopes.	£350 *unused*;	£550 *used*.
Letter Sheets:	£325 *unused*;	£525 *used*.

	2d. blue	
Envelopes.	£450 *unused*;	£2500 *used*.
Letter Sheets:	£425 *unused*;	£2400 *used*.

LINE-ENGRAVED ISSUES
GENERAL NOTES

Brief notes on some aspects of the line-engraved stamps follow, but for further information and a full specialist treatment of these issues collectors are recommended to consult Volume 1 of the Stanley Gibbons *Great Britain Specialised Catalogue*.



Alphabet I Alphabet II

Alphabet III Alphabet IV

Typical Corner Letters of the four Alphabets

Alphabets. Four different styles were used for the corner letters on stamps prior to the issue with letters in all four corners, these being known to collectors as:

Alphabet I. Used for all plates made from 1840 to the end of 1851. Letters small.

Alphabet II. Plates from 1852 to mid-1855. Letters larger, heavier and broader.

Alphabet III. Plates from mid-1855 to end of period. Letters tall and more slender.

Alphabet IV. 1861. 1d. Die II, Plates 50 and 51 only. Letters were hand-engraved instead of being punched on the plate. They are therefore inconsistent in shape and size but generally larger and outstanding.

While the general descriptions and the illustrations of typical letters given above may be of some assistance, only long experience and published aids can enable every stamp to be allocated to its particular Alphabet without hesitation, as certain letters in each are similar to those in one of the others.

Blued Paper. The blueing of the paper of the earlier issues is believed to be due to the presence of prussiate of potash in the printing ink, or in the paper, which, under certain conditions, tended to colour the paper when the sheets were damped for printing. An alternative term is bleuté paper.

Corner Letters. The corner letters on the early British stamps were intended as a safeguard against forgery, each stamp in the sheet having a different combination of letters. Taking the first 1d. stamp, printed in 20 horizontal rows of 12, as an example, the lettering is as follows:

Row 1.	A A,	A B,	A C,	etc. to	A L.
Row 2.	B A,	B B,	B C,	etc. to	B L.
		and so on to			
Row 20.	T A,	T B,	T C,	etc. to	T L.

On the stamps with four corner letters, those in the upper corners are in the reverse positions to those in the lower corners. Thus in a sheet of 240 (12 × 20) the sequence is:

Row 1.	A A	B A	C A		L A
	A A	A B	A C	etc. to	A L
Row 2.	A B	B B	C B		L B
	B A	B B	B C	etc. to	B L
		and so on to			
Row 20.	A T	B T	C T	etc. to	L T
	T A	T B	T C		T L

Placing letters in all four corners was not only an added precaution against forgery but was meant to deter unmarked parts of used stamps being pieced together and passed off as an unused whole.

Dies. The first die of the 1d. was used for making the original die of the 2d., both the No Lines and White Lines issues. In 1855 the 1d. Die I was amended by retouching the head and deepening the lines on a transferred impression of the original. This later version, known to collectors as Die II, was used for making the dies for the 1d. and 2d. with letters in all four corners and also for the 1½d.

The two dies are illustrated above No. 17 in the catalogue.

Double letter

Guide line in corner

Guide line through value

Double Corner Letters. These are due to the workman placing his letter-punch in the wrong position at the first attempt, when lettering the plate, and then correcting the mistake; or to a slight shifting of the punch when struck. If a wrong letter was struck in the first instance, traces of a wrong letter may appear in a corner in addition to the correct one. A typical example is illustrated.

Guide Lines and Dots. When laying down the impressions of the design on the early plates, fine vertical and horizontal guidelines were marked on the plates to assist the operative. These were usually removed from the gutter margins, but could not be removed from the stamp impressions without damage to the plate, so that in such cases they appear on the printed stamps, sometimes in the corners, sometimes through "POSTAGE" or the value. Typical examples are illustrated.

Guide dots or cuts were similarly made to indicate the spacing of the guide lines. These too sometimes appear on the stamps.

Ivory Head

"Ivory Head." The so-called "ivory head" variety is one in which the Queen's Head shows white on the back of the stamp. It arises from the comparative absence of ink in the head portion of the design, with consequent absence of blueing. (*See* "Blued Paper" note above.)

Line-engraving. In this context "line-engraved" is synonymous with recess-printing, in which the engraver cuts recesses in a plate and printing (the coloured areas) is from these recesses. "Line-engraved" is the traditional philatelic description for these stamps; other equivalent terms found are "engraving in *taille-douce*" (French) or in "*intaglio*" (Italian).

Plates. Until the introduction of the stamps with letters in all four corners, the number of the plate was not indicated in the design of the stamp, but was printed on the sheet margin. By long study of identifiable blocks and the minor variations in the design, coupled with the position of the corner letters, philatelists are now able to allot many of these stamps to their respective plates. Specialist collectors often endeavour to obtain examples of a given stamp printed from its different plates and our catalogue accordingly reflects this depth of detail.

Maltese Cross

Type of Town postmark

Type of Penny Post cancellation

Example of 1844 type postmark

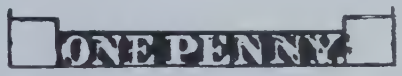
Postmarks. The so-called "Maltese Cross" design was the first employed for obliterating British postage stamps and was in use from 1840 to 1844. Being hand-cut, the obliterating stamps varied greatly in detail and some distinctive types can be allotted to particular towns or offices. Local types, such as those used at Manchester, Norwich, Leeds, etc., are keenly sought. A red ink was first employed, but was superseded by black, after some earlier experiments, in February 1841. Maltese Cross obliterations in other colours are rare.

Obliterations of this type, numbered 1 to 12 in the centre, were used at the London Chief Office in 1843 and 1844.

Some straight-line cancellations were in use in 1840 at the Penny Post receiving offices, normally applied on the envelope, the adhesives then being obliterated at the Head Office. They are nevertheless known, with or without Maltese Cross, on the early postage stamps.

In 1842 some offices in S.W. England used dated postmarks in place of the Maltese Cross, usually on the back of the letter since they were not originally intended as obliterators. These town postmarks have likewise been found on adhesives.

In 1844 the Maltese Cross design was superseded by numbered obliterators of varied type, one of which is illustrated. They are naturally comparatively scarce on the first 1d. and 2d. stamps. Like the Maltese Cross they are found in various colours, some of which are rare.



Re-entry

"Union Jack" re-entry

Re-entries. Re-entries on the plate show as a doubling of part of the design of the stamp generally at top or bottom. Many re-entries are very slight while others are most marked. A typical one is illustrated.

The "*Union Jack" re-entry*, so called owing to the effect of the re-entry on the appearance of the corner stars (*see illustration*) occurs on stamp L K of Plate 75 of the 1d. red, Die I.

T A (T L)

M A (M L)

Varieties of Large Crown Watermark

I

II

Two states of Large Crown Watermark

Watermarks. Two watermark varieties, as illustrated, consisting of crowns of entirely different shape, are found in sheets of the Large Crown paper and fall on stamps lettered M A and T A (or M L and T L when the paper is printed on the wrong side). Both varieties are found on the 1d. rose-red of 1857, while the M A (M L) variety comes also on some plates of the 1d. of 1864 (Nos. 43, 44) up to about Plate 96. On the 2d. the T A (T L) variety is known on plates 8 and 9, and the M A (M L) on later prints of plate 9. These varieties may exist inverted, or inverted reversed, on stamps lettered A A and A L and H A and H L, and some are known.

In 1861 a minor alteration was made in the Large Crown watermark by the removal of the two vertical strokes, representing *fleurs-de-lis*, which projected upwards from the uppermost of the three horizontal curves at the base of the Crown. Hence two states are distinguishable, as illustrated.

CONDITION—IMPERFORATE LINE-ENGRAVED ISSUES

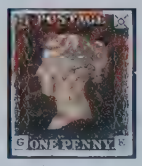
The prices quoted for the 1840 and 1841 imperforate Line-engraved issues are for "fine" examples. As condition is most important in assessing the value of a stamp, the following definitions will assist collectors in the evaluation of individual examples.

Four main factors are relevant when considering quality.
(a) **Impression**. This should be clean and the surface free of any rubbing or unnatural blurring which would detract from the appearance.
(b) **Margins**. This is perhaps the most difficult factor to evaluate. Stamps described as "fine", the standard adopted in this catalogue for pricing purposes, should have margins of the recognised width, defined as approximately one half of the distance between two adjoining unsevered stamps. Stamps described as "very fine" or "superb" should have margins which are proportionately larger than those of a "fine" stamp. Examples with close margins should not, generally, be classified as "fine".
(c) **Cancellation**. On a "fine" stamp this should be reasonably clear and not noticeably smudged. A stamp described as "superb" should have a neat cancellation, preferably centrally placed or to the right.
(d) **Appearance**. Stamps, at the prices quoted, should always be without any tears, creases, bends or thins and should not be toned on either the front or back. Stamps with such defects are worth only a proportion of the catalogue price.

Good

Fine

Very Fine



Superb

The above actual size illustrations of 1840 1d. blacks show the various grades of quality. When comparing these illustrations it should be assumed that they are all from the same plate and that they are free of any hidden defects.

PRINTERS. Nos. 1/53*a* were recess-printed by Perkins, Bacon & Petch, known from 1852 as Perkins, Bacon & Co.

1

1a

2 Small Crown

(Eng Charles and Frederick Heath)

1840 (6 May). Letters in lower corners. Wmk Small Crown. W **2**. Imperf.

			Un	Used	Used on cover
1	**1**	1d. intense black	£17500	£525	
2		1d. black	£12500	£375	£750
3		1d. grey-black (worn plate)	£16500	£500	
4	**1a**	2d. deep full blue	£45000	£1150	
5		2d. blue	£38000	£900	£2500
6		2d. pale blue	£48000	£1000	

The 1d. stamp in black was printed from Plates 1 to 11. Plate 1 exists in two states (known to collectors as 1a and 1b), the latter being the result of extensive repairs.

Repairs were also made to Plates 2, 5, 6, 8, 9, 10 and 11, and certain impressions exist in two or more states.

The so-called "Royal reprint" of the Id. black was made in 1864, from Plate 66, Die II, on paper with Large Crown watermark, inverted. A printing was also made in carmine, on paper with the same watermark, normal.

For 1d. black with "VR" in upper corners *see* No. VI under Official Stamps.

The 2d. stamps were printed from Plates 1 and 2.

Plates of 1d. black

10		1d. deep red-brown	£900	45·00	
11		1d. lake-red	£5250	£800	
12		1d. orange-brown	£2000	£275	

Error. No letter "A" in right lower corner (Stamp B(A), *Plate 77)*

12*a*	**1**	1d. red-brown	—	£24000	

The error "No letter A in right corner" was due to the omission to insert this letter on stamp B A of Plate 77. The error was discovered some months after the plate was registered and was then corrected.

There are innumerable variations in the colour and shade of the 1d. "red" and those given in the above list represent colour groups each covering a wide range.

Varieties of 1d. red-brown, etc.

Stamps with thick outer frame to the design are from plates on which the frame-lines have been strengthened or recut, particularly Plates 76 and 90.

For "Union Jack" re-entry *see* General Notes to Line-engraved Issues.

In "P converted to R" the corner letter "R" is formed from the "P", the distinctive long tail having been hand-cut.

1841 (Apr). Trial printing (unissued) on Dickinson silk-thread paper. No wmk. Imperf.

16	**1**	1d. red-brown (Plate 11)	£7750

Eight sheets were printed on this paper, six being gummed, two ungummed, but we have only seen examples without gum.

1848. Wmk Small Crown, W **2**. Rouletted approx 11½ by Henry Archer.

16*a*	**1**	1d. red-brown (Plates 70, 71)	£25000

1850. Wmk Small Crown, W **2**. P 16 by Henry Archer.

			Un	*Used*	*Used on cover*
16*b*	**1**	1d. red-brown (Alph 1) (from Plates 90-101) ... *from*	£3500	£625	£2000

Stamps on cover dated prior to February 1854 are worth a premium of 50% over the price on cover quoted above.

1853. Government Trial Perforation. Wmk Small Crown. W **2**.

			Un	*Used*
16*c*	**1**	1d. red-brown (P 16) (Alph II) (*on cover*)	†	

SEPARATION TRIALS. Although the various trials of machines for rouletting and perforating were unofficial, Archer had the consent of the authorities in making his experiments, and sheets so experimented upon were afterwards used by the Post Office.

As Archer ended his experiments in 1850 and plates with corner letters Alphabet II did not come into issue until 1852, perforated stamps with corner letters of Alphabet I may safely be assumed to be Archer productions, if genuine.

The Government trial perforation is believed to have been done on Archer's machines after they had been purchased in 1853. As Alphabet II was by that time in use, the trials can only be distinguished from the perforated stamps listed below by being dated prior to 24 February 1854, the date when the perforated stamps were officially issued.

Die I Alphabet I, stamps from plates 74 and 113 perforated 14 have been recorded for many years, but it is now generally recognised that the type of comb machine used, producing one extension hole in the side margins, cannot be contemporary with other trials of this period.

Die I

Die II

4 Large Crown

Die I: The features of the portrait are lightly shaded and consequently lack emphasis.

Die II: (Die I retouched): The lines of the features have been deepened and appear stronger.

The eye is deeply shaded and made more lifelike. The nostril and lips are more clearly defined, the latter appearing much thicker. A strong downward stroke of colour marks the corner of the mouth. There is a deep indentation of colour between lower lip and chin. The band running from the back of the ear to the chignon has a bolder horizontal line below it than in Die I.

The original die (Die I) was used to provide roller dies for the laying down of all the line-engraved stamps from 1840 to 1855. In that year a new master die was laid down (by means of a Die I roller die) and the impression was retouched by hand engraving by William Humphrys. This retouched die, always known to philatelists as Die II, was from that time used for preparing all new roller dies.

One Penny. The numbering of the 1d. plates recommenced at 1 on the introduction of Die II. Plates 1 to 21 were Alphabet II from which a scarce plum shade exists. Corner letters of Alphabet III appear on Plate 22 and onwards.

As an experiment, the corner letters were engraved by hand on Plates 50 and 51 in 1856, instead of being punched (Alphabet IV), but punching was again resorted to from Plate 52 onwards. Plates 50 and 51 were not put into use until 1861.

Two Pence. Unlike the 1d. the old sequence of plate numbers continued. Plates 3 and 4 of the 2d. had corner letters of Alphabet I, Plate 5 Alphabet II and Plate 6 Alphabet III. In Plate 6 the white lines are thinner than before.

1854–57. Paper more or less blued.

42	**1**	1d. rose-red (Die II) (Plates 50 and 51)	£250	40·00	70·00
		a. Imperf	—	£5750	

*36/42a **For well-centred, lightly used +125%.**

In both values, varieties may be found as described in the preceding issues—ivory heads, inverted watermarks, re-entries, and double letters in corners.

The change of perforation from 16 to 14 was decided upon late in 1854 since the closer holes of the former gauge tended to cause the sheets of stamps to break up when handled, but for a time both gauges were in concurrent use. Owing to faulty alignment of the impressions on the plates and to shrinkage of the paper when damped, badly perforated stamps are plentiful in the line-engraved issues.

The following plate numbers are also known imperf and used (No. 44a); 72, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 90, 91, 92, 93, 96, 97, 98, 100, 101, 102, 103, 104, 105, 107, 108, 109, 112, 113, 114, 116, 117, 120, 121, 122, 136, 137, 142, 146, 148, 158, 162, 164, 166, 171, 174, 191 and 202.

The numbering of this series of 1d. red plates follows after that of the previous 1d. stamp, last printed from Plate 68.

Plates 69, 70, 75, 126 and 128 were prepared for this issue but rejected owing to defects, and stamps from these plates do not exist, so that specimens which appear to be from these plates (like many of those which optimistic collectors believe to be from Plate 77) bear other plate numbers. Owing to faulty engraving or printing it is not always easy to identify the plate number. Plate 77 was also rejected but some stamps printed from it were used. One specimen is in the Tapling Collection and six or seven others are known. Plates 226 to 228 were made but not used.

Specimens from most of the plates are known with inverted watermark. The variety of watermark described in the General Notes to this section occurs on stamp M A (or M L) on plates up to about 96 (Prices from £110 used). Re-entries in this issue are few, the best being on stamps M K and T K of Plate 71 and on S L and T L, Plate 83.

Selling Your Stamps?

Warwick and Warwick have an expanding requirement for world collections, single country collections, single items, covers, proof material and specialised collections, with G.B. material being particularly in demand. Our customer base is increasing dramatically and we need an ever-larger supply of quality material to keep pace with demand. The market has never been stronger and if you are considering the sale of your collection, now is the time to act.

Free Valuations

We will provide a free, professional and without obligation valuation of your collection. Either we will make you a fair, binding private treaty offer, or we will recommend inclusion of your property in our next specialist public auction.

Free Transportation

We can arrange insured transportation of your collection to our Warwick offices completely free of charge. If you decline our offer, we ask you to cover the return carriage costs only.

Free Visits

Visits by our valuers are possible anywhere in the country or abroad, usually within 48 hours, in order to value larger collections. Please telephone for details.

Advisory Days

We are staging a series of advisory days across the country. Please visit our website or telephone for further details.

Excellent Prices

Because of the strength of our customer base we are in a position to offer prices that we feel sure will exceed your expectations.

Act Now

Telephone or email Ian Hunter today with details of your property.

Warwick & Warwick

Plates 10 and 11 of the 2d. were prepared but rejected. Plates 13 to 15 were laid down from a new roller impression on which the white lines were thinner.

There are some marked re-entries and repairs, particularly on Plates 7, 8, 9 and 12. Stamps with inverted watermark may be found and also the T A (T L) and M A (M L) watermark varieties (see General Notes to this section).

Though the paper is normally white, some printings showed blueing and stamps showing the "ivory head" may therefore be found.

		Plate 14	£120	25·00	
		Plate 15	£175	42·00	
		Plate 19	£300	60·00	
		Plate 20	£350	80·00	

***49/9a** **For well-centred, lightly used +200%.**

The ½d. was printed in sheets of 480 (24 × 20) so that the check letters run from to A A / A A to X T / T X

Plates 2, 7, 16, 17 and 18 were not completed while Plates 21 and 22, though made, were not used.

Owing to the method of perforating, the outer side of stamps in either the A or X row (ie the left or right side of the sheet) is imperf.

Stamps may be found with watermark inverted or reversed, or without watermark, the latter due to misplacement of the paper when printing.

8

Position of plate Number

1870 (1 Oct). Wmk W **4**. P 14.

51	**8**	1½d. rose-red	£500	75·00	£275
52		1½d. lake-red	£600	75·00	
		a. Imperf (Plates 1 and 3) *from*	£9500	†	
		Plate (1)	£725	£100	
		3	£500	75·00	
		Error of lettering. OP–PC for CP–PC *(Plate 1)*			
53	**8**	1½d. rose-red	£28000	£2000	£7500
		Prepared for use in 1860 but not issued; blued paper			
53*a*	**8**	1½d. rosy mauve (Plate 1)	£8500	—	
		b. Error of lettering, OP-PC for CP-PC	—	†	

***51/3** **For well-centred, lightly used +125%.**

Owing to a proposed change in the postal rates, 1½d. stamps were first printed in 1860, in rosy mauve, No. 53*a*, but the change was not approved and the greater part of the stock was destroyed, although three or four postally used examples have been recorded.

In 1870 a 1½d. stamp was required and was issued in rose-red.

Plate 1 did not have the plate number in the design of the stamps, but on stamps from Plate 3 the number will be found in the frame as shown above.

Plate 2 was defective and was not used.

The error of lettering OP-PC on Plate 1 was apparently not noticed by the printers, and therefore not corrected.

EMBOSSED ISSUES

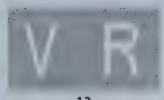
Volume 1 of the Stanley Gibbons *Great Britain Specialised Catalogue* gives further detailed information on the embossed issues.

PRICES. The prices quoted are for cut-square stamps with average to fine embossing. Stamps with exceptionally clear embossing are worth more.

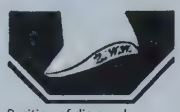
10

11

12



13



Position of die number

(Primary die engraved at the Royal Mint by William Wyon. Stamps printed at Somerset House)

1847–54. Imperf. (For paper and wmk see footnote.)

			Un	*Used*	*Used on Cover*
54	**10**	1s. pale green (11.9.47)	£22500	£1000	£1900
55		1s. green	£22500	£1000	
56		1s. deep green	£27500	£1200	
		Die 1 (1847)	£22500	£1000	
		Die 2 (1854)	£25000	£1100	
57	**11**	10d. brown (6.11.48)	£11500	£1500	£3200
		Die 1 (1848)	£12000	£1500	
		Die 2 (1850)	£11500	£1500	
		Die 3 1853)	£11500	£1500	
		Die 4 (1854)	£13000	£1750	
58	**12**	6d. mauve (1.3.54)	£18500	£1000	
59		6d. dull lilac	£18500	£1000	£1900
60		6d. purple	£18500	£1000	
61		6d. violet	£30000	£4000	

The 1s. and 10d. are on "Dickinson" paper with "silk" threads (actually a pale blue twisted cotton yarn). The 6d. is on paper watermarked V R in single-lined letters, W 13, which may be found in four ways—upright, inverted, upright reversed, and inverted reversed, upright reversed being the most common.

The die numbers are indicated on the base of the bust. Only Die 1 (1 WW) of the 6d. was used for the adhesive stamps. The 10d. is from Die 1 (W.W.1 on stamps), and Dies 2 to 4 (2 W.W., 3 W.W. and, 4 W.W.) but the number and letters on stamps from Die 1 are seldom clear and many specimens are known without any trace of them. Because of this the stamp we previously listed as "No die number" has been deleted. That they are from Die I is proved by the existence of blocks showing stamps with and without the die number. The 1s. is from Dies 1 and 2 (W.W.1, W.W.2).

The normal arrangement of the "silk" threads in the paper was in pairs running down each vertical row of the sheet, the space between the threads of each pair being approximately 5 mm and between pairs of threads 20 mm. Varieties due to misplacement of the paper in printing show a single thread on the first stamp from the sheet margin and two threads 20 mm apart on the other stamps of the row. Faulty manufacture is the cause of stamps with a single thread in the middle.

Through bad spacing of the impressions, which were handstruck, all values may be found with two impressions more or less overlapping. Owing to the small margin allowed for variation of spacing, specimens with good margins on all sides are not common. Double impressions are known of all values.

Later printings of the 6d. had the gum tinted green to enable the printer to distinguish the gummed side of the paper.

SURFACE-PRINTED ISSUES

GENERAL NOTES

Volume 1 of the Stanley Gibbons *Great Britain Specialised Catalogue* gives further detailed information on the surface-printed issues.

"Abnormals". The majority of the great rarities in the surface-printed group of issues are the so-called "abnormals", whose existence is due to the practice of printing six sheets from every plate as soon as made, one of which was kept for record purposes at Somerset House, while the others were perforated and usually issued. If such plates were not used for general production or if, before they came into full use, a change of watermark or colour took place, the six sheets originally printed would differ from the main issue in plate, colour or watermark and, if issued, would be extremely rare.

The abnormal stamps of this class listed in this Catalogue and distinguished, where not priced, by an asterisk (*), are:

No.		
78	3d.	Plate 3 (with white dots)
152	4d.	vermilion, Plate 16
153	4d.	sage-green, Plate 17
109	6d.	mauve, Plate 10
124/*a*	6d.	chestnut and 6d. pale chestnut, Plate 12
145	6d.	pale buff, Plate 13
88	9d.	Plate 3 (hair lines) 989d. Plate 5 (*see* footnote to No. 98)
113	10d.	Plate 2 911s. Plate 3 ("Plate 2")
148/50	1s.	green, Plate 14
120	2s.	blue, Plate 3

Those which may have been issued, but of which no specimens are known, are 2½d. wmk Anchor, Plates 4 and 5; 3d. wmk Emblems, Plate 5; 3d. wmk Spray, Plate 21; 6d. grey, wmk Spray, Plate 18; 8d. orange, Plate 2; 1s. wmk Emblems, Plate 5; 5s. wmk Maltese Cross, Plate 4.

The 10d. Plate 1, wmk Emblems (No. 99), is sometimes reckoned among the abnormals, but was an error, due to the use of the wrong paper.

Corner Letters. With the exception of the 4d., 6d. and 1s. of 1855–57, the ½d., 1½d., 2d. and 5d. of 1880, the 1d. lilac of 1881 and the £5 (which had letters in lower corners only, and in the reverse order to the normal), all the surface-printed stamps issued prior to 1887 had letters in all four corners, as in the later line-engraved stamps. The arrangement is the same, the letters running in sequence right across and down the sheets, whether these were divided into ones or not. The corner letters existing naturally depend on the number of stamps in the sheet and their arrangement.

Imprimaturs and Imperforate Stamps. The Post Office retained in their records (now in the National Postal Museum) one imperforate sheet from each plate, known as the Imprimatur (or officially approved) sheet. Some stamps were removed from time to time for presentation purposes and have come on to the market, but these imperforates are not listed as they were not issued. Full details can be found in Volume I of the *Great Britain Specialised Catalogue*.

However, other imperforate stamps are known to have been issued and these are listed where it has been possible to prove that they do not come from the Imprimatur sheets. It is therefore advisable to purchase these only when acccompanied by an Expert Committee certificate of genuineness.

Plate Numbers. All stamps from No. 75 to No. 163 bear in their designs either the plate number or, in one or two earlier instances, some other indication by which one plate can be distinguished from another. With the aid of these and of the corner letters it is thus possible to "reconstruct" a sheet of stamps from any plate of any issue or denomination.

Surface-printing. In this context the traditional designation "surface-printing" is synonymous with typo(graphy)—a philatelic term—or letterpress—the printers' term—as meaning printing from (the surface of) raised type. It is also called relief-printing, as the image is in relief (in French, *en épargne*), unwanted parts of the design having been cut away. Duplicate impressions can be electrotyped or stereotyped from an original die, the resulting *clichés* being locked together to form the printing plate.

Wing Margins. As the vertical gutters (spaces) between the panes, into which sheets of stamps of most values were divided until the introduction of the Imperial Crown watermark, were perforated through the centre with a single row of holes, instead of each vertical row of stamps on the inner side of the panes having its own line of perforation as is now usual, a proportion of the stamps in each sheet have what is called a "wing margin" about 5 mm wide on one or other side.

The stamps with "wing margins" are the watermark Emblems and Spray of Rose series (3d., 6d., 9d., 10d., 1s. and 2s.) with letters D, E, H or I in S.E. corner, and the watermark Garter series (4d. and 8d.) with letters F or G in S.E. corner. Knowledge of this lettering will enable collectors to guard against stamps with wing margin cut down and reperforated, but note that wing margin stamps of Nos. 62 to 73 are also to be found re-perforated.

'Used' Prices. In the case of high value surface-printed issues, used prices refer to stamps bearing telegraphic cancellations.

PRINTERS. The issues of Queen Victoria, Nos. 62/214, were typo by Thomas De La Rue & Co.

PERFORATIONS. All the surface-printed issues of Queen Victoria are Perf 14, with the exception of Nos. 126/9.

***75/91** **For well-centred, lightly used +125%.**

The 3d. as Type 21, but with network background in the spandrels which is found overprinted SPECIMEN, was never issued.

The plates of this issue may be distinguished as follows:

3d.	Plate 2.	No white dots.
	Plate 3.	White dots as Illustration A.
4d.	Plate 3.	No hair lines. Roman I next to lower corner letters.
	Plate 4.	Hair lines in corners. (Illustration B.). Roman II.
6d.	Plate 3.	No hair lines.
	Plate 4.	Hair lines in corners.
9d.	Plate 2.	No hair lines.
	Plate 3.	Hair lines in corners. Beware of faked lines.
1s.	Plate 2.	Numbered 1 on stamps.
	Plate 3.	Numbered 2 on stamps and with hair lines.

*One used example on piece has been recorded, cancelled by a Glasgow Duplex postmark dated 06.1.1863.

The 9d. on azure paper (No. 87a) is very rare, only one confirmed example being known.

The variety "K" in circle, No. 90a, is believed to be due to a damaged letter having been cut out and replaced. It is probable that the punch was driven in too deeply, causing the flange to penetrate the surface, producing an indentation showing as an uncoloured circle.

The watermark variety "three roses and a shamrock" illustrated in W **20a** was evidently due to the substitution of an extra rose for the thistle in a faulty watermark bit. It is found on stamp TA of Plate 4 of the 3d., Plates 1 (No. 70c), 3, 5 and 6 of the 6d., Plate 4 of the 9d. and Plate 4 of the 1s.

Similar problems occurred on stamp TF of the 6d. and 9d. Here the shamrock emblem became detached and a used example of the 6d. (No. 84) is known showing it omitted. It was replaced by a third rose (W **20b**) and this variety exists on the 6d. (Nos. 84/5 and 97) and 9d. (Nos. 87 and 98).

***92/101c** **For well-centred, lightly used +100%.**

From mid-1866 to about the end of 1871 4d. stamps of this issue appeared generally with watermark inverted.

Unused examples of No. 98 from Plate 5 exist, but this was never put to press and all evidence points to such stamps originating from a portion of the Imprimatur sheet which was perforated by De La Rue in 1887 for insertion in albums to be presented to members of the Stamp Committee (*Price* £18000 *un*).

The 10d. stamps, No. 99, were printed in error on paper watermarked "Emblems" instead of on "Spray of Rose".

Broken frames, Plate 2

1884 (1 Apr). Wmk Three Imperial Crowns, W **49**.

185	**61**	£1 brown-lilac	£32000	£2800
		a. Frame broken	£60000	£5000

1888 (Jan). Wmk Three Orbs, W **48**.

186	**61**	£1 brown-lilac	£72000	£4250
		a. Frame broken	£140000	£9000

***185/6a For well-centred, lightly used +50%.**

The December 1887 printing of the £1 brown-lilac was produced on paper watermarked Three Orbs in error. The decision was taken to issue date stamps for normal postal use and the earliest recorded postmark is 6 January 1888 at Leadenhall Street, London EC.

The broken-frame varieties, Nos. 185a and 186a, are on Plate 2 stamps JC and TA, as illustrated. See also No. 212a.

		a. Imperf	£8750		

***187/96 For well-centred, lightly used +100%**

The above prices are for stamps in the true dull green colour. Stamps which have been soaked, causing the colour to run, are virtually worthless.

Stamps of the above set and No. 180 are also found perf 12; these are official perforations, but were never issued. A second variety of the 5d. is known with a line instead of a stop under the "d" in the value; this was never issued and is therefore only known unused (*Price* £28000).

The ½d., No. 213, in bright blue, is a colour changeling caused by a constituent of the ink used for some months in 1900.

KING EDWARD VII
22 January 1901–6 May 1910

PRINTINGS. Distinguishing De La Rue printings from the provisional printings of the same values made by Harrison & Sons Ltd. or at Somerset House may prove difficult in some cases. For very full guidance Volume 2 of the Stanley Gibbons *Great Britain Specialised Catalogue* should prove helpful.

Note that stamps perforated 15×14 must be Harrison; the 2½d., 3d. and 4d. in this perforation are useful reference material, their shades and appearance in most cases matching the Harrison perf 14 printings.

Except for the 6d. value, all stamps on chalk-surfaced paper were printed by De La Rue.

Of the stamps on ordinary paper, the De La Rue impressions are usually clearer and of a higher finish than those of the other printers. The shades are markedly different except in some printings of the 4d., 6d. and 7d. and in the 5s., 10s. and £1.

Used stamps in good, clean, unrubbed condition and with dated postmarks can form the basis of a useful reference collection, the dates often assisting in the assignment to the printers.

USED STAMPS. For well-centred, lightly used examples of King Edward VII stamps, add the following percentages to the used prices quoted below:

De La Rue printings (Nos. 215/66)—3d. values +35%, 4d. orange + 100%, 6d. +75%, 7d. and 1s. +25%, all other values + 50%.

Harrison printings (Nos. 267/86)—all values and perforations +75%.

Somerset House printings (Nos. 287/320)—1s. values +25%, all other values +50%.

KING GEORGE V

6 May 1910–20 January 1936

Further detailed information on the issues of King George V will be found in Volume 2 of the Stanley Gibbons *Great Britain Specialised Catalogue*.

PRINTERS. Types **98** to **102** were typographed by Harrison & Sons Ltd, with the exception of certain preliminary printings made at Somerset House and distinguishable by the controls "A.11 ", B.11" or "B.12" (the Harrison printings do not have a full stop after the letter). The booklet stamps, Nos. 334/7 and 344/5 were printed by Harrisons only.

WATERMARK VARIETIES. Many British stamps to 1967 exist without watermark owing to misplacement of the paper, and with either inverted, reversed, or inverted and reversed watermarks. A proportion of the low-value stamps issued in booklets have the watermark inverted in the normal course of printing.

Low values with *watermark sideways* are normally from stamp rolls used in machines with sideways delivery or, from June 1940, certain booklets.

STAMPS WITHOUT WATERMARK. Stamps found without watermark, due to misplacement of the sheet in relation to the dandy roll, are not listed here, but will be found in the *Great Britain Specialised Catalogue*.

The 1½d. and 5d. 1912–22, and 2d. and 2½d., 1924–26, listed here, are from *whole* sheets completely without watermark.

98

99

For type differences with T **101/2** *see* notes below the latter.

Die A

Die B

Dies of Halfpenny

Die A. The three upper scales on the body of the right hand dolphin form a triangle; the centre jewel of the cross inside the crown is suggested by a comma.

Die B. The three upper scales are incomplete; the centre jewel is suggested by a crescent.

Die A

Die B

Dies of One Penny

Die A. The second line of shading on the ribbon to the right of the crown extends right across the wreath; the line nearest to the crown on the right hand ribbon shows as a short line at the bottom of the ribbon.

Die B. The second line of shading is broken in the middle; the first line is little more than a dot.

(Des Bertram Mackennal and G. W. Eve. Head from photograph by W. & D. Downey. Die eng J. A. C. Harrison)

1911–12. Wmk Imperial Crown, W **49**. P 15×14.

396		1s. bistre-brown	35·00	12·00
351/95 *Set of* 15			£250	95·00

Imperf stamps of this issue exist but may be war-time colour trials.

† The impression of No. 361a is set sideways and is very pale.

Nos. 362a and 364a occur on Plates 12 and 29 and are known from Controls L18, M18, M19, O19 and Q21. The flaws were corrected by 1921.

*No. 373 comes from Control O20 and also exists on toned paper. No. 373a comes from Control R21 and also exists on toned paper, but both are unlike the rare Prussian blue shade of the 1935 2½d. Jubilee issue.

See also Nos. 418/29.

For the 2d., T 106 bisected, see note under Guernsey, War Occupation Issues.

1913 (1 Aug). Wmk Royal Cypher ("Multiple"). W **103**. P 15×14.

397	**105**	½d. bright green	£150	£180
		a. Wmk sideways	†	£18000
398	**104**	1d. dull scarlet	£225	£225

Both these stamps were originally issued in rolls only. Subsequently sheets were found, so that horizontal pairs and blocks are known but are of considerable rarity.

Philately Understood

What everybody ought to know about collecting and buying and selling stamps

Advance Notification of upcoming NEW 'Stamp Tips of the Trade' + 'Case Studies'

Some *Plain Talk* about the simple business of stamps which often seems complicated

Why is my business publishing this information?

I can remember the day I found my Father's stamp collection in the bottom drawer of the bureau in the dining room more than 45 years ago. Aged 11, I was excited travelling the world through his stamps. In those days every school had a stamp club and mine was no exception. I took the collection to school and joined the stamp club. When Mr. Armitage (the Chemistry Teacher who ran the club) asked what stamps we collected I said "Wurttemberg" – much to everybody's surprise. In fact they were from Austria and the page was misclassified. They were those imperforate 1920's Austrian Newspaper stamps which fascinated me and as everybody now knows are hardly worth anything … but probably they helped me get started in stamps.

Over following years I found little help in understanding stamps, so much had to be learned the hard-way, which is why my company UPA publishes what I dare to hope are useful articles about collecting and buying and selling stamps. It is my hope that these prove valuable to you and that we may serve you if you decide to contact us …

There are several different types of stamp businesses

In fact no two stamp dealers are alike. What a truism that is. Once in Amsterdam I made the mistake of admitting to the owner of the stamp shop I was visiting that I was a dealer. In almost perfect English **"We Don't sell to Dealers"** and he turned his back. So did I - as I left his shop. But over the years I discovered that the only way to succeed in stamps was to create a business of stamp selling systems and join them all together. This is what allows us to handle stamps from literally every single country in the world. Recently in coming articles which I shall call ***'Case Studies'*** the strength of this business model has become apparent.

"We Don't sell to Dealers" and he turned his back

How can UPA help you?

If You are Collecting You can Request …

1. **Auction**: Take £55 OFF Your 1st purchase (UK clients + selected countries) Offer: Request your Next Free UPA auction catalogue worth £15 comprising 20,000+/- lots from £'s to £1,000's. Apart from £55 OFF you'll benefit from UPA's Unique combination of features to collector colleagues – NO Buyer's Premium – Reducing Estimate System till sold or given away – All lots Guaranteed - Modest shipping + Free Insurance. **Request now – contact us in any way today**
2. **Approvals:** Take £25 OFF Your 1st Approvals purchase (UK clients + selected countries): Individually identified and priced stamp selections of stamps from most countries in the world sent to you on approval. You select those you want and return the rest with payment. Established 56 years. **Request now – contact us in any way today**
3. **OFF-paper WORLD / Country Mixtures** – Unit priced – buy those you want, return those you don't – UK clients SEND £6.45 – over 100,000 bags supplied. **Request now – contact us in any way today**
4. **On-line?** E-Bay clients – hundreds of lots starting 1p auctions though to £20,000 collections on-line. Visit www.upastampauctions.co.uk for links to eBay account ID's: upa-global, universalphilatelic, upa-collectables, upa-online
5. **PRIVATE TREATY:** A new UPA selling system – valuable collections sold / matched to clients on a commission basis. Modest fees, No sale, No charge. British Empire collections required to £250,000, GB collections to £500,000, Collections / Postal History / Foreign from £2,000 upwards

If You are Selling Please Contact Andrew / Elaine at UPA:

Valuable Collections wanted: We can use and have clients who require GB collections to £500,000, British Empire / British Commonwealth to £250,000 and Foreign required. **Telephone, Fax or E-mail now.**

Why does UPA make Promotional Offers?

Unlike most other stamp companies we believe in giving before hoping to receive. We believe in proving to YOU that your trust in dealing with UPA is well founded. Proving to YOU in advance of asking you to purchase from us is much of our model. Most collector colleagues stay with UPA which is why we can make you such an extraordinary offer. 1,959 different collectors (and some dealers) bid in our latest auction, 90% of whom won lots. Without pernicious buyer's premium average regular collector bidders save £250 a year at UPA. ***Client loyalty is the reason why we can offer*** 1st time buyers aged over 18 (!) £55 OFF your 1st auction purchase whether you spend more than £55 or not. '

Advance Notification of NEW 'Stamp Tips of the Trade' and 'Case Studies' to follow

We're going to be publishing more articles in the coming months. If you would like to know more about how my company may serve you … **Please contact us in any way today...** if you are really interested please do it **NOW, don't forget to Request My 'Tips of the Trade' FREE booklet too!**

Looking forward to hearing from you.
Thank you for reading

399/417 *Set of* 4			£4000	£1500

*413a/17 **For well-centred, lightly used +35%.**

DISTINGUISHING PRINTINGS. Note that the £1 value was only printed by Waterlow.

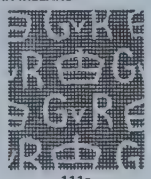
Waterlow and De La Rue stamps measure exactly 22 mm vertically. In the De La Rue printings the gum is usually patchy and yellowish, and the colour of the stamp, particularly in the 5s., tends to show through the back. The holes of the perforation are smaller than those of the other two printers, but there is a thick perforation tooth at the top of each vertical side.

In the Bradbury Wilkinson printings the height of the stamp is 22¾ or 23 mm due to the use of curved plates. On most of the 22¾ mm high stamps a minute coloured guide dot appears in the margin just above the middle of the upper frame-line.

For (1934) re-engraved Waterlow printings *see* Nos. 450/2.

UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND

111



111a

Block Cypher

The watermark Type **111a**, as compared with Type **111**, differs as follows: Closer spacing of horizontal rows (12½ *mm* instead of 14½ *mm*). Letters shorter and rounder. Watermark thicker.

(Typo by Waterlow & Sons, Ltd (all values except 6d.) and later, 1934–35, by Harrison & Sons, Ltd (all values). Until 1934 the 6d. was printed at Somerset House where a printing of the 1½d. was also made in 1926 (identifiable only by control E.26). Printings by Harrisons in 1934–35 can be identified, when in mint condition, by the fact that the gum shows a streaky appearance vertically, the Waterlow gum being uniformly applied, but Harrisons also used up the balance of the Waterlow "smooth gum" paper)

1924 (Feb)–**26**. Wmk Block Cypher, W **111**. P 15×14.

418	**105**	½d. green	1·00	1·00

424		4d. grey-green (23.10.24)	12·00	2·50
		a. Printed on the gummed side		†
425	**107**	5d. brown (17.10.24)	20·00	3·00
426		6d. reddish purple (*chalk-surfaced paper*) (9.24)	12·00	2·50
426*a*		6d. purple (6.26)	4·00	1·50
427	**108**	9d. olive-green (11.11.24)	12·00	3·50
428		10d. turquoise-blue (28.11.24)	40·00	40·00
429		1s. bistre-brown (10.24)	22·00	3·00
418/29 *Set of* 12			£110	60·00

There are numerous shades in this issue.

The 6d. on both chalk-surfaced and ordinary papers was printed by both Somerset House and Harrisons. The Harrisons printings have streaky gum, differ slightly in shade, and that on chalk-surfaced paper is printed in a highly fugitive ink. The prices quoted are for the commonest (Harrison) printing in each case.

The dandy roll to produce watermark Type **111a** was provided by Somerset House in connection with experiments in paper composition undertaken during 1924–25. These resulted in a change from rag only paper to that made from a mixture including esparto and sulphite.

		a. Double impression	—	†
439/49 *Set of* 11			50·00	20·00

Owing to the need for wider space for the perforations the size of the designs of the ½d. and 2d. were once, and the 1d. and 1½d. twice, reduced from that of the first printings.

There are also numerous minor variations, due to the photographic element in the process.

The ½d. imperf three sides, No. 439b, is known in a block of four, from a sheet, to which the bottom pair is imperf at top and sides.

For No. 442 bisected, see Guernsey, War Occupation Issues.

See also Nos. 595/8a and 759/62.

On 1 January 1958 the contract for printing the high values, T **166** to **169** was transferred to De La Rue & Co, Ltd.

The work of the two printers is very similar, but the following notes will be helpful to those attempting to identify Waterlow and De La Rue stamps of the W **165** issue.

The De La Rue sheets are printed in pairs and have a ⊣ or ⊢ shaped guide-mark at the centre of one side-margin, opposite the middle row of perforations, indicating left- and right-hand sheets respectively.

The Waterlow sheets have a small circle (sometimes crossed) instead of a "⊢" and this is present in both side-margins opposite the 6th row of stamps, though one is sometimes trimmed off. Short dashes are also present in the perforation gutter between the marginal stamps marking the middle of the four sides and a cross is at the centre of the sheet. The four corners of the sheet have two lines forming a right-angle as trimming marks, but some are usually trimmed off. All these gutter marks and sheet-trimming marks are absent in the De La Rue printings.

De La Rue used the Waterlow die and no alterations were made to it, so that no difference exists in the design or its size, but the making of new plates at first resulted in slight but measurable variations in the width of the gutters between stamps, particularly the horizontal, as follows:

	W.	D.L.R.
Horiz gutters, mm	3.8 to 4.0	3.4 to 3.8

Later D.L.R. plates were however less distinguishable in this respect.

For a short time in 1959 the D.L.R. 2s.6d. appeared with one dot in the bottom margin below the first stamp.

It is possible to sort singles with reasonable certainty by general characteristics. The individual lines of the D.L.R. impression are cleaner and devoid of the whiskers of colour of Waterlow's, and the whole impression lighter and softer.

Owing to the closer setting of the horizontal rows the strokes of the perforating comb are closer; this results in the topmost tooth on each side of De La Rue stamps being narrower than the corresponding teeth in Waterlow's which were more than normally broad.

Shades also help. The 2s.6d. D.L.R. is a warmer, more chocolate shade than the blackish brown of W.; the 5s a lighter red with less carmine than W's; the 10s. more blue and less ultramarine; the £1 less intense black.

The paper of D.L.R. printings is uniformly white, identical with that of W. printings from February 1957 onwards, but earlier W. printings are on paper which is creamy by comparison.

In this and later issues of T **166/9** the dates of issue given for changes of watermark or paper are those on which supplies were first sent by the Supplies Department to Postmasters.

1955–58. W **165**. P 15×14.

540/56 *Set of* 18			£160	27·00

The dates given for Nos. 540/556 are those on which they were first issued by the Supplies Dept to postmasters.

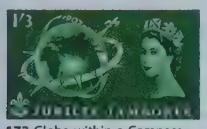
In December 1956 a completely imperforate sheet of No. 543*b* was noticed by clerks in a Kent post office, one of whom purchased it against P.O. regulations. In view of this irregularity we do not consider it properly issued.

Types of 2½d. in this issue, in 1957, Type II formerly only found in stamps from booklets began to replace Type I on sheet stamps.

*BOOKLET ERRORS. Those listed as "imperf panes" show one row of perforations either at top or bottom of the booklet pane; those as "part perf panes" have one row of 3 stamps imperf on three sides.

170 Scout Badge and "Rolling Hitch"

171 "Scouts coming to Britain"



172 Globe within a Compass

(Des Mary Adshead (2½d.), P. Keely (4d.), W. H. Brown (1s.3d.))

570/86 *Set of* 17			9·00	4·25

*BOOKLET ERRORS. See note after No. 556.

††This "shade" was brought about by making more deeply etched cylinders, resulting in apparent depth of colour in parts of the design. There is no difference in the colour of the ink.

Sideways watermark. The 2d., 2½d., 3d. and 4d. come from coils and the ½d., 1d., 1½d., 2½d., 3d. and 4d. come from booklets. In *coil* stamps the sideways watermark shows the top of the watermark to the left *as seen from the front of the stamp*. In the *booklet* stamps it comes equally to the left or right.

Nos. 570k and 574k only come from 2s. "Holiday Resort" Experimental undated booklets issued in 1963, in which one page contained 1×2½d. *se-tenant* with 3×½d. (*See* No. 570m).

No. 574l comes from coils, and the "Holiday Resort" Experimental booklets dated "1964" comprising four panes each containing two of these 2½d. stamps *se-tenant* vertically with two ½d. No. 570a (*See* No. 570n).

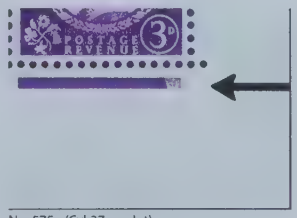
2½d. imperf No. 574a comes from a booklet with watermark upright. No. 574ea is from a coil with sideways watermark.

No. 574f comes from *sheets* bearing cylinder number 42 and is also known on vertical delivery coils.

Phantom "R" varieties

Nos. 575d and 615a (Cyl 41 no dot)

No. 575Eda



No. 575e (Cyl 37 no dot)

Nos. 575d and 615a occurred below the last stamp of the sheet from Cyl 41 (no dot), where an incomplete marginal rule revealed an "R". The cylinder was later twice retouched. The stamps listed show the original, unretouched "R". The rare variety, No. 575d, is best collected in a block of 4 or 6 with full margins in order to be sure that it is not No. 615a with phosphor lines removed.

No. 575e is a similar variety but from Cyl. 37 (no dot). The marginal rule is much narrower and only a very small part of the" R" is revealed. The cylinder was later retouched. The listed variety is for the original, unretouched state.

No. 575 is known imperforate and *tête-bêche*. These came from booklet sheets which were not issued (*price £25 per pair*).

WHITER PAPER. On 18 May 1962 the Post Office announced that a whiter paper was being used for the current issue (including Nos. 595/8). This is beyond the scope of this catalogue, but the whiter papers are listed in Vol. 3 of the Stanley Gibbons *Great Britain Specialised Catalogue*.

1958 (24 Nov)–**61**. Graphite-lined issue. Two graphite lines on the back, except 2d. value, which has one line. W **179**. P 15×14.

587Wi	**154**	½d. orange-red (15.6.59)†	3·25	4·00
588		1d. ultramarine (18.12.58)	2·00	1·50
		a. Misplaced graphite lines (7.61)*	80	1·20
589Wi		1½d. green (4.8.59)†	75·00	60·00
590		2d. light red-brown (24.11.58)	10·00	3·50
		a. Band at extreme left as seen from back	£975	
591	**155**	2½d. carmine-red (Type II) (9.6.59)	12·00	10·00
592		3d. deep lilac (24.11.58)	90	65
		a. Misplaced graphite lines (5.61)*	£550	£425
593	**156**	4d. ultramarine (29.4.59)	5·50	5·00
		a. Misplaced graphite lines (1961)*	£2400	
594		4½d. chestnut (3.6.59)	6·50	5·00
587/94 *Set of* 8			£110	70·00

Nos. 587/9 were only issued in booklets or coils (587/8).

*No. 588a (in coils), and Nos. 592a and 593a (both in sheets) result from the use of a residual stock of graphite-lined paper. As the use of graphite lines had ceased, the register of the lines in relation to the stamps was of no importance and numerous misplacements occurred—two lines close together, one line only, etc. No. 588a refers to two lines at left or at right; No. 592a refers to stamps with two lines only at left and both clear of the perforations and No. 593a to stamps with two lines at left (with left line down perforations) and traces of a third line down the opposite perforations.

†The prices quoted are for stamps with the watermark inverted (*Prices for upright watermark ½d. £9 un, £9 us; 1½d. £90 un, £80 us.*)

(Recess D.L.R. (until 31.12.62), then B. W.)

1959–68. W **179**. P 11×12.

595	**166**	2s.6d. black-brown (22.7.59)	10·00	75
		a. B.W. printing (1.7.63)	35	40
		k. Chalk-surfaced paper (30.5.68)	50	1·50
596	**167**	5s. scarlet-vermilion (15.6.59)	45·00	2·00
		a. B. W. ptg. Red (*shades*) (3.9.63)	1·20	50
		ab. Printed on the gummed side	£1600	
597	**168**	10s. blue (21.7.59)	55·00	5·00
		a. B.W. ptg. *Bright ultramarine* (16.10.63)	4·50	4·50
598	**169**	£1 black (23.6.59)	£120	12·00
		a. B. W. printing (14.11.63)	13·00	8·00
		k. Chalk-surfaced paper	£5250	
595/8 *Set of* 4			£195	17·00
595a/8a *Set of* 4			15·00	11·00

The B.W. printings have a marginal Plate Number. They are generally more deeply engraved than the D.L.R., showing more of the Diadem detail and heavier lines on Her Majesty's face. The vertical perf is 11.9 to 12 as against D.L.R. 11.8.

See also Nos. 759/62.

PHOSPHOR BAND ISSUES. These are printed on the front and are wider than graphite lines. They are not easy to see but show as broad vertical bands at certain angles to the light.

Values representing the rate for printed papers (and when this was abolished in 1968 for second class mail) have one band and others two, three or four bands as stated, according to the size and format.

In the small size stamps the bands are on each side with the single band at left (*except where otherwise stated*). In the large-size commemorative stamps the single band may be at left, centre or right, varying in different designs. The bands are vertical on both horizontal and vertical designs *except where otherwise stated*.

The phosphor was originally applied typographically but later usually by photogravure and sometimes using flexography, a typographical process using rubber cylinders.

Three different types of phosphor have been used, distinguishable by the colour emitted under an ultra-violet lamp, the first being green, then blue and later violet. Different sized bands are also known. All these are fully listed in Vol. 3 of the Stanley Gibbons *Great Britain Specialised Catalogue*.

Varieties. Misplaced and missing phosphor bands are known but such varieties are beyond the scope of this Catalogue.

1959 (18 Nov). Phosphor-Graphite issue. Two phosphor bands on front and two graphite lines on back, except 2d. value, which has one band on front and one line on back. P 15×14.

(a) W **165**

599	**154**	½d. orange-red	4·00	3·75
600		1d. ultramarine	11·00	11·00
601		1½d. green	4·00	4·00

(b) W **179**

605	**154**	2d. light red-brown (1 band)	6·00	4·25
		a. Error. W **165**	£200	£175
606	**155**	2½d. carmine-red (Type II)	22·00	18·00
607		3d. deep lilac	12·00	8·00
608	**156**	4d. ultramarine	20·00	16·00
609		4½d. chestnut	30·00	20·00
599/609 *Set of 8*			90·00	70·00

Examples of the 2½d., No. 606, exist showing watermark W **165** in error. It is believed that phosphor-graphite stamps of this value with this watermark were not used by the public for postal purposes.

1960 (22 June)–**67**. Phosphor issue. Two phosphor bands on front, except where otherwise stated. W **179**. P 15×14.

610/18*a Set of 17*			10·50	8·00

The automatic facing equipment was brought into use on 6 July 1960 but the phosphor stamps may have been released a few days earlier

The stamps with watermark sideways are from booklets except Nos. 613ab and 615ea which are from coils. No. 616ab comes from both booklets and coils.

No. 615aa. See footnote after No. 586.

*No. 614 with two bands on the creamy paper was originally from cylinder 50 dot and no dot. When the change in postal rates took place in 1965 it was reissued from cylinder 57 dot and no dot on the whiter paper. Some of these latter were also released in error in districts of S. E. London in September 1964. The shade of the reissue is slightly more carmine.

***This comes from the bottom row of a sheet which is imperf at bottom and both sides.

††Booklet pane No. 611n comes from 2s. booklets of January and March 1968. The two bands on the 3d. stamp were intentional because of the technical difficulties in producing one band and two band stamps *se-tenant*.

Unlike previous one-banded phosphor stamps. No. 615c has a broad band extending over two stamps so that alternate stamps have the band at left or right (same prices either way).

180 Postboy of 1660

181 Posthorn of 1660

(Des R. Stone (3d.), Faith Jaques (1s.3d.))

1960 (7 July). Tercentenary of Establishment of General Letter Office. W **179** (sideways on 1s.3d.). P 15×14 (3d.) or 14×15 (1s.3d.)

619	**180**	3d. deep lilac	50	50
620	**181**	1s.3d. green	3·75	4·25

182 Conference Emblem

(Des R. Stone (emblem, P. Rahikainen))

1960 (19 Sept). First Anniv of European Postal and Telecommunications Conference. Chalk-surfaced paper. W **179**. P 15×14.

621	**182**	6d. bronze-green and purple	2·00	50
622		1s.6d. brown and blue	9·50	5·00

183 Thrift Plant

184 "Growth of Savings"

185 Thrift Plant

(Des P. Gauld (2½d.), M. Goaman (others))

1961 (28 Aug). Centenary of Post Office Saving Bank. Chalk-surfaced paper. W **179** (sideways on 2½d.). P 14×15 (2½d.) or 15×14 (others).

A. "Timson" Machine

623A	**183**	2½d. black and red	25	25
		a. Black omitted	£27000	
624A	**184**	3d. orange-brown and violet	20	20
		a. Orange-brown omitted	£600	
625A	**185**	1s.6d. red and blue	2·50	2·25
623A/5A *Set of 3*			2·75	2·50

B. "Thrissell" Machine

623B	**183**	2½d. black and red	2·25	2·25
624B	**184**	3d. orange-brown and violet	40	40
		a. Orange-brown omitted	£1600	

2½d. TIMSON. Cyls 1E–1F. Deeply shaded portrait (brownish black). 2½d. THRISSELL. Cyls 1D–1B or 1D (dot)–1B (dot). Lighter portrait (grey-black).

3d. TIMSON. Cyls 3D–3E. Clear, well-defined portrait with deep shadows and bright highlights. 3d. THRISSELL. Cyls 3C–3B or 3C (dot)–3B (dot). Dull portrait, lacking in contrast.

Sheet marginal examples without single extension perf hole on the short side of the stamp are always "Timson", as are those with large punch-hole *not* coincident with printed three-sided box guide mark.

The 3d. "Timson" perforated completely through the right-hand side margin comes from a relatively small part of the printing perforated on a sheet-fed machine.

Normally the "Timsons" were perforated in the reel, with three large punch-holes in both long margins and the perforations completely through both short margins. Only one punch-hole coincides with the guide-mark.

The "Thrissells" have one large punch-hole in one long margin, coinciding with guide-mark and one short margin imperf (except sometimes for encroachments).

219 Forth Road Bridge

220 Forth Road and Railway Bridges

(Des A. Restall)

1964 (4 Sept). Opening of Forth Road Bridge. Chalk-surfaced paper. W **179**. P 15×14.

659	**219**	3d. black, blue and reddish violet	10	10
		p. Three phosphor bands	1·00	1·50
660	**220**	6d. blackish lilac, light blue and carmine-red	40	40
		a. Light blue omitted	£7500	
		p. Three phosphor bands	4·50	4·75

221 Sir Winston Churchill

(Des D. Gentleman and Rosalind Dease, from photograph by Karsh)

1965 (8 July). Churchill Commemoration. Chalk-surfaced paper. W **179**. P 15×14.

		I. "REMBRANDT" Machine		
661	**221**	4d. black and olive-brown	15	10
		p. Three phosphor bands	25	25
		II. "TIMSON" Machine		
661*a*	**221**	4d. black and olive-brown	35	35
		III. "L. & M. 4" Machine		
662	–	1s.3d. black and grey	45	40
		p. Three phosphor bands	2·50	3·00

The 1s.3d. shows a closer view of Churchill's head.

4d. REMBRANDT. Cyls 1A–1B dot and no dot. Lack of shading detail on Churchill's portrait. Queen's portrait appears dull and coarse. This is a rotary machine which is sheet-fed.
4d. TIMSON. Cyls 5A–6B no dot. More detail on Churchill's portrait—furrow on forehead, his left eyebrow fully drawn and more shading on cheek. Queen's portrait lighter and sharper. This is a reel-fed, two-colour 12-in, wide rotary machine and the differences in impression are due to the greater pressure applied by this machine.
1s.3d. Cyls 1A–1B no dot. The "Linotype and Machinery No. 4" machine is an ordinary sheet-fed rotary press machine. Besides being used for printing the 1s.3d. stamps it was also employed for overprinting the phosphor bands on both values.

Two examples of the 4d. value exist with the Queen's head omitted, one due to something adhering to the cylinder and the other due to a paper fold. The stamp also exists with Churchill's head omitted, also due to a paper fold.

222 Simon de Montfort's Seal

223 Parliament Buildings (after engraving by Hollar, 1647)

(Des S. Black (6d.), R. Guyatt (2s.6d.))

1965 (19 July). 700th Anniv of Simon de Montfort's Parliament. Chalk-surfaced paper. W **179**. P 15×14.

663	**222**	6d. olive-green	20	20
		p. Three phosphor bands	60	1·00
664	**223**	2s.6d. black, grey and pale drab	80	1·50

224 Bandsmen and Banner

225 Three Salvationists

(Des M. Farrar-Bell (3d.), G. Trenaman (1s.6d.))

1965 (9 Aug). Salvation Army Centenary. Chalk-surfaced paper. W **179**. P 15×14.

pk. Magenta and green (Nos. 705p/10p)	75·00

The prices quoted are for each stamp.

Nos. 705 and 709, with grey and blue omitted, have been seen commercially used, posted from Middleton-in-Teesdale.

Three examples of No. 712 in a right-hand top corner block of ten (2×5) are known with the Queen's head omitted as a result of a double paper fold prior to die-stamping The perforation is normal. Of the other seven stamps, four have the Queen's head misplaced and three are normal.

MISSING GOLD HEADS. The 6d and 1s.3d. were also issued with the die-stamped gold head omitted but as these can also be removed by chemical means we are not prepared to list them unless a way is found of distinguishing the genuine stamps from the fakes which will satisfy the Expert Committees.

The same remarks apply to Nos. 713/14.

272 King of the Orient

273 Snowman

(Des Tasveer Shemza (3d.), J. Berry (1s.6d.) (winners of children's design competition). Photo, Queen's head die-stamped)

717p/22p *Set of* 6 ..... 1·00 2·00

*The double impression of the grey printing affects the Queen's head, value and inscription.

†No. 720d was caused by something obscuring the face value on R. 14/6 during the printing of one sheet.

PHOSPHOR BANDS. Issues from No. 723 are normally with phosphor bands only, except for the high values. However, most stamps have appeared with the phosphor bands omitted in error, but they are outside the scope of this catalogue. They are listed in Volumes 3, 4 and 5 of the Stanley Gibbons *Great Britain Specialised Catalogue* and in the *Great Britain Concise Catalogue*.

See also further notes after No. X1058.

PHOSPHORISED PAPER. Following the adoption of phosphor bands the Post Office started a series of experiments involving the addition of the phosphor to the paper coating before the stamps were printed. No. 743c was the first of these experiments to be issued for normal postal use. See also notes after No. X1058.

PVA GUM. Polyvinyl alcohol was introduced by Harrisons in place of gum Arabic in 1968. As it is almost invisible a small amount of pale yellowish colouring was introduced to make it possible to check that the stamps had been gummed. Such gum varieties are outside the scope of this catalogue, but they are listed in the *Great Britain Concise Catalogue*. See further notes *re* gum after Nos. 744 and 762.

282

282a

I II

Two types of the 2d.

I. Value spaced away from left side of stamp (cylinders 1 no dot and dot).

II. Value close to left side from new multipositive used for cylinders 5 no dot and dot onwards. The portrait appears in the centre, thus conforming to the other values

(Des after plaster cast by Arnold Machin)

723/44 *Set of* 16 ..... 7·00 8·00

*BOOKLET ERRORS. See note after No. 556.

**Uncoated paper. This does not respond to the chalky test, and may be further distinguished from the normal chalk-surfaced paper by the fibres which clearly show on the surface, resulting in the printing impression being rougher, and by the screening dots which are not so evident. The 1d., 4d. and 5d. come from the £1 "Stamps for Cooks" Booklet (1970); and the 3d. and 10d. from sheets (1969). The 20p. and 50p. high values (Nos. 830/1) exist with similar errors.

†No. 724a occurs in a vertical strip of four, top stamp perforated on three sides, bottom stamp imperf three sides and the two middle stamps completely imperf.

††No. 735c comes from the original state of cylinder 15 which is identifiable by the screening dots which extend through the gutters of the stamps and into the margins of the sheet. This must not be confused with imperforate stamps from cylinder 10, a large quantity of which was stolen from the printers early in 1970.

The 1d. with centre band (725) only came in the September 1968 booklets (PVA gum) and the coil strip (725m) (gum arabic); the 2d. with centre band (728) was only issued in the coil strip (725m); the 3d. (No. 730) appeared in booklets on 6.4.68 from coils during December 1968 and from sheets in January 1969; and the 4d. with one side band (734) only in 10s. (band at left) and £1 (band at left or right) booklets.

Gum. The 1d. (725), 3d. (729), 4d. (731 and 733), 9d., 1s., 1s.6d. and 1s.9d. exist with gum arabic as well as the PVA gum; the 2d. (728) and coil strip (725m) exist only with gum arabic; and the remainder exist with PVA gum only.

The 4d. (731) in shades of washed-out grey are colour changelings which we understand are caused by the concentrated solvents used in modern dry cleaning methods.

For decimal issue, see Nos. X841, etc.

283 "Master Lambton" (Sir Thomas Lawrence)

284 "Mares and Foals in a Landscape" (George Stubbs)

285 "Children Coming Out of School" (L. S. Lowry)

(Des S. Rose)

		b. Ultramarine omitted	£850	
		c. Lemon omitted	£20000	
756/8 *Set of 3*			30	30

Distinct shades exist of the 3d. and 4d. values but are not listable as there are intermediate shades. For the 4d. stamps from one machine show a darker background and give the appearance of the yellow colour being omitted, but this is not so and these should not be confused with the true missing yellow No. 757c.

No. 757b comes from stamps in the first vertical row of a sheet.

The 3d. and 4d. values are known imperforate. They are of proof status.

(Recess Bradbury, Wilkinson)

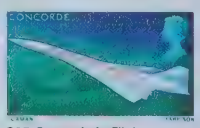
780	**311**	9d. ochre, brown, black and grey	10	25
781	**312**	9d. ochre, brown, black and grey	10	25
782	**313**	1s. brown, black, grey, green and greenish yellow	40	35
		a. Pair. Nos. 782/3	1·30	1·50
		ab. Greenish yellow omitted	£4800	
783	**314**	1s. red, black, brown, carmine and grey	40	35
		a. Carmine (hull overlay) omitted	£40000	
		b. Red (funnels) omitted	£30000	
		c. Carmine and red omitted	£30000	
778/83 *Set of 6*			2·40	2·80

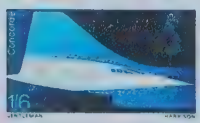
The 9d. and 1s. values were arranged in horizontal strips of three and pairs respectively throughout the sheet.

No. 779ab is known only with the phosphor also omitted.



315 Concorde in Flight

316 Plan and Elevation Views



317 Concorde's Nose and Tail

(Des M. and Sylvia Goaman (4d.), D. Gentleman (9d., 1s.6d.))

1969 (3 Mar). First Flight of Concorde. Chalk-surfaced paper. Two phosphor bands. P 15×14.

784	**315**	4d. yellow-orange, violet, greenish blue, blue-green and pale green	25	25
		a. Violet (value, etc.) omitted	£850	
		b. Yellow-orange omitted	£850	
785	**316**	9d. ultramarine, emerald, red and grey-blue	55	75
		a. Face value and inscr omitted	£40000	
786	**317**	1s.6d. deep blue, silver-grey and lt blue	75	1·00
		a. Silver-grey omitted	£850	
784/6 *Set of 3*			1·00	1·50

No. 785a is caused by a colour shift of the grey-blue. On the only known example the top of the Queen's head appears across the perforations at foot.

No. 786a affects the Queen's head which appears in the light blue colour.

318 Queen Elizabeth II.
(See also Type **357**)

334 H.R.H. The Prince of Wales (after photo by G. Argent)

(Des D. Gentleman)

1969 (1 July). Investiture of H.R.H. The Prince of Wales. Chalk-surfaced paper. Two phosphor bands. P 14×15.

802	**330**	5d. deep olive-grey, light olive-grey, deep grey, light grey, red, pale turquoise-green, black and silver	10	15
		a. Strip of 3. Nos. 802/4	50	1·00
		b. Black (value and inscr) omitted	£750	
		c. Red omitted*	£1700	
		d. Deep grey omitted*	£575	
		e. Pale turquoise-green omitted	£1600	
		f. Light grey omitted	£14000	
803	**331**	5d. deep olive-grey, light olive-grey, deep grey, light grey, red, pale turquoise-green, black and silver	10	15
		b. Black (value and inscr) omitted	£750	
		c. Red omitted*	£1700	
		d. Deep grey omitted**	£575	
		e. Pale turquoise-green omitted	£1600	
		f. Light grey (marks on walls, window frames, etc) omitted	£14000	£8000
804	**332**	5d. deep olive-grey, light olive-grey, deep grey, light grey, red, pale turquoise-green, black and silver	10	15
		b. Black (value and inscr) omitted	£750	
		c. Red omitted*	£1700	
		d. Deep grey omitted**	£575	
		e. Pale turquoise-green omitted	£16000	
		f. Light grey omitted	£14000	
805	**333**	9d. deep grey, light grey, black and gold	15	30
806	**334**	1s. blackish yellow-olive and gold	15	30
802/6 *Set of 5*			75	1·40

The 5d. values were issued together, *se-tenant*, in strips of three throughout the sheet.

*The 5d. value is also known with the red misplaced downwards and where this occurs the red printing does not take very well on the silver background and in some cases is so faint that it could be mistaken for a missing red. However, the red can be seen under a magnifying glass and caution should therefore be exercised when purchasing copies of Nos. 802/4c.

**The deep grey affects the dark portions of the windows and doors. No. 803f is only known commercially used on cover.

335 Mahatma Gandhi

(Des B. Mullick)

824/8 *Set of 5*			90	1·80

*No 827c (unlike No. 827b) comes from a sheet on which the colour was only partially omitted so that, although No. 827 was completely without the light greenish blue colour, it was still partially present on No. 826.

The 1s.6d. is known with embossing omitted.

Essays exist of Nos. 824/7 showing the Queen's head in silver and with different inscriptions.

357 (Value redrawn)

(Des after plaster cast by Arnold Machin. Recess B.W.)

1970 (17 June)–**72**. Decimal Currency. Chalk-surfaced paper or phosphorised paper (10p.). P 12.

829	**357**	10p. cerise	50	75
830		20p. olive-green	60	25
831		50p. deep ultramarine	1·50	40
831*b*		£1 bluish black (6.12.72)	3·50	80
829/31*b* *Set of 4*			5·50	2·00

The 20p. and 50p. exist on thinner, uncoated paper and are listed in the *Great Britain Concise Catalogue*.

A whiter paper was introduced in 1973. The £1 appeared on 27 Sept. 1973, the 20p. on 30 Nov. 1973 and the 50p. on 20 Feb. 1974.

The 50p. was issued on 1 Feb. 1973 on phosphorised paper. This cannot be distinguished from No. 831 with the naked eye.

The £1, T **318**, was also issued, on 17 June 1970, in sheets of 100 (10×10) instead of panes of 40 (8×5) but it is not easy to distinguish from No. 790 in singles. It can be readily differentiated when in large strips or marginal pieces showing sheet markings or plate numbers.

		a. Salmon omitted	£220	
		b. Ochre omitted	£140	
838/40 *Set of 3*			50	50

The 4d. and 5d. are known with embossing omitted, and the 1s.6d. is known with embossing and phosphor omitted.

REGIONAL ISSUES

For Regional issues of Guernsey and Jersey, *see* after Great Britain Postal Fiscals

Printers (£ s. d. stamps of all regions);—Photo Harrison & Sons. Portrait by Dorothy Wilding Ltd.

DATES OF ISSUE. Conflicting dates of issue have been announced for some of the regional issues, partly explained by the stamps being released on different dates by the Philatelic Bureau in Edinburgh or the Philatelic Counter in London and in the regions. We have adopoted the practice of giving the earliest known dates, since once released the stamps could have been used anywhere in the U.K.

S3	S **2**	6d. deep claret (29.9.58)	25	25
		p. Two phosphor bands (29.1.63)	25	25
S4		9d. bronze-green (2 phosphor bands) (1.3.67)	35	40
S5	S **3**	1s.3d. green (29.9.58)	40	40
		p. Two phosphor bands (29.1.63)	40	40
S6		1s.6d. grey-blue (2 phosphor bands) (1.3.67)	60	60

The one phosphor band on No. S1pa was produced by printing broad phosphor bands across alternate vertical perforations. Individual stamps show the band at right or left (same prices either way).

1967–70. No wmk. Chalk-surfaced paper. One centre phosphor band (S7, S9/10) or two phosphor bands (others). P 15×14.

S7	S **1**	3d. deep lilac (16.5.68)	10	15
S8		4d. deep bright blue (28.11.67)	30	30
S9		4d. olive-sepia (4.9.68)	10	10
S10		4d. bright vermilion (26.2.69)	10	10
S11		5d. royal blue (4.9.68)	25	25
S12	S **2**	9d. bronze-green (28.9.70)	6·00	6·00
S13	S **3**	1s.6d. grey-blue (12.12.68)	1·75	1·50

Nos. S7/8 exist with both gum arabic and PVA gum; others with PVA gum only.

IV. WALES

From the inception of the Regional stamps, the Welsh versions were tendered to members of the public at all Post Offices within the former County of Monmouthshire but the national alternatives were available on request. By August 1961 the policy of "dual stocking" of definitive stamps was only maintained at Abergavenny, Chepstow, Newport and Pontypool. Offices with a Monmouthshire postal address but situated outside the County, namely Beachley, Brockweir, Redbrook, Sedbury, Tutshill, Welsh Newton and Woodcroft, were not supplied with the Welsh Regional stamps.

The 2p. was bisected at Exeter on 25 October 1977.

OFFICIAL STAMPS

In 1840 the 1d. black (Type **1**), with "V R" in the upper corners, was prepared for official use, but never issued for postal purposes. Obliterated specimens are those which were used for experimental trials of obliterating inks, or those that passed through the post by oversight.

V 1

1840. Prepared for use but not issued; "V" "R" in upper corners. Imperf.

			Un	Used	Used on cover
V1	V **1**	1d. black	£32000	£35000	

The following Official stamps would be more correctly termed Departmental stamps as they were exclusively for the use of certain government departments. Until 1882 official mail used ordinary postage stamps purchased at post offices, the cash being refunded once a quarter. Later the government departments obtained Official stamps by requisition. Official stamps were on sale to the public for a short time at Somerset House but they were not sold from post offices. The system of only supplying the Government departments was open to abuse so that all Official stamps were withdrawn on 13 May 1904.

OVERPRINTS, PERFORATIONS, WATERMARKS. All Official stamps were overprinted by Thomas De La Rue & Co. and are perf 14. They are on Crown watermarked paper unless otherwise stated.

INLAND REVENUE

These stamps were used by revenue officials in the provinces, mail to and from Head Office passing without a stamp. The London Office used these stamps only for foreign mail.

O52	6d. pale dull purple (12.03)	£3000	£1600	

GOVERNMENT PARCELS

These stamps were issued to all departments, including the Head Office, for use on parcels weighing over 3 lb. Below this weight government parcels were sent by letter post to avoid the 55% of the postage paid from accruing to the railway companies, as laid down by parcel-post regulations. Most government parcels stamps suffered heavy postmarks in use.

Stamps of various issues perforated with a Crown and initials ("H.M.O.W.", "O.W.", "B.T." or "S.O.") or with initials only ("H.M.S.O." or "D.S.I.R.") have also been used for official purposes, but these are outside the scope of the catalogue.

POSTAL FISCAL STAMPS

PRICES. Prices in the used column are for stamps with genuine postal cancellations dated from the time when they were authorised for use as postage stamps. Beware of stamps with fiscal cancellations removed and fraudulent postmarks applied.

VALIDITY. The 1d. Surface-printed stamps were authorised for postal use from 1 June 1881 and at the same time the 1d. postage issue, No. 166, was declared valid for fiscal purposes. The 3d. and 6d. values, together with the Embossed issues were declared valid for postal purposes by another Act effective from 1 January 1883.

ISSUES EMBOSSED IN COLOUR

(Made at Somerset House)

The embossed stamps were struck from dies not appropriated to any special purpose on paper which had the words "INLAND REVENUE" previously printed, and thus became available for payment of any duties for which no special stamps had been provided.

The die letters are included in the embossed designs and holes were drilled for the insertion of plugs showing figures indicating dates of striking.

F58	2s.6d. vermilion (Die O)	£1000	£775

Although specimen overprints of Nos. F55/7 are known there is some doubt if these values were issued.

The sale of Inland Revenue stamps up to the 2s. value ceased from 30 December 1882 and stocks were called in and destroyed. The 2s.6d. value remained on sale until 2 July 1883 when it was replaced by the 2s.6d. "Postage & Revenue" stamp. Inland Revenue stamps still in the hands of the public continued to be accepted for revenue and postal purposes.

TELEGRAPH STAMPS. A priced listing of the Post Office telegraph stamps appears in Volume 1 of the Stanley Gibbons *Great Britain Specialised Catalogue* and in the *Great Britian Concise Catalogue*. The last listing for the private telegraph companies in the Part 1 Catalogue was in the 1940 edition. For military telegraph stamps, see under Bechuanaland, Egypt and British Field Offices in South Africa.

GUERNSEY
WAR OCCUPATION ISSUES

Stamps issued under the authority of the Guernsey States during the German Occupation

BISECTS. On 24 December 1940 authority was given, by Post Office notice, that prepayment of penny postage could be effected by using half a British 2d. stamp, diagonally bisected. Such stamps were first used on 27 December 1940.

The 2d. stamps generally available were those of the Postal Centenary issue, 1940 (S.G. 482) and the first colour of the King George VI issue (S.G. 465). These are listed under Nos. 482a and 465b. A number of the 2d. King George V, 1912–22, and of the King George V photogravure stamp (S.G. 442) which were in the hands of philatelists, were also bisected and used.

The dates given for the shades of Nos. 1/3 are the months in which they were printed as indicated on the printer's imprints. Others are issue dates.

REGIONAL ISSUES

DATES OF ISSUE. Conflicting dates of issue have been announced for some of the regional issues, partly explained by the stamps being released on different dates by the Philatelic Bureau in Edinburgh or the Philatelic Counter in London and in the regions. We have adopted the practice of giving the earliest known dates, since once released the stamps could have been used anywhere in the U.K.

13/28a *Set of* 16			24·00	27·00

The booklet panes consist of single perforated stamps with wide margins all round intended to fit automatic machines designed for the Great Britain 2s. booklets. They are therefore found with three margins when detached from booklets or four margins when complete.

There was no postal need for the ½d. and 1½d. values as the ½d. coin had been withdrawn prior to their issue in anticipation of decimalisation. These values were only on sale at the Philatelic Bureau and the Crown Agents as well as in the U.S.A.

Nos. 14*b* and 23*b* are known only on thin paper and Nos. 13, 14, 16, 17, 20, 21, 22, 23, 24 and 25 also exist on thin paper.

19 Isaac Brock as Colonel

23 H.M.S. *L103* (landing craft) entering St. Peter's Harbour

(Litho Format)

1969 (1 Dec). Birth Bicentenary of Sir Isaac Brock. T **19** and similar multicoloured designs. P 13½×14 (2s.6d.) or 14×13½ (others).

British Post Offices Abroad

The origins of the network of Post Offices, Postal Agencies and Packet Agents can be recognised from the 18th century, but the system did not become established until the expansion of trade, following the end of the Napoleonic Wars in 1815.

Many offices were provided in newly acquired dependent territories, and were then, eventually, transferred from the control of the British Post Office to the evolving local administrations.

Those in foreign countries, nearly always based on existing British Consular appointments, were mostly connected to the network of British Packet lines which had been re-established in 1814. They tended to survive until the country in which they were situated established its own efficient postal service or joined the U.P.U. The term "Post Office Agent" was employed by the British G.P.O. and "Packet Agent" by the shipping lines to describe similar functions.

Listed in this section are the Crowned-circle handstamps and G.B. stamps used in the Post Offices and Agencies situated in foreign countries. Those for the territories within the scope of this catalogue will be found under the following headings:

		Page

Prices. Catalogue prices quoted in this section, and throughout the volume, covering stamps of Great Britain used abroad are for used examples with the cancellation or handstamp clearly legible. Poor impressions of the cancellations and handstamps are worth much less than the prices quoted.

They also take into account the fact that many identifiable cancellations of the post offices abroad render the stamps they obliterate in less than 'fine' condition. As a result, some stamps listed in this section are priced at less than the same items used in Great Britain, where the prices are for fine examples. Lightly cancelled stamps used in offices abroad would be worth a premium over the prices quoted.

CROWNED-CIRCLE HANDSTAMPS

Following the introduction, in 1840, of adhesive stamps in Great Britain there was considerable pressure from a number of the dependent territories for the British Post Office to provide something similar for their use.

Such suggestions were resisted, however, because of supposed operational problems, but the decision was taken, in connection with an expansion of the Packet Service, to issue a uniform series of handstamps and date stamps to the offices abroad, both in the dependent territories and in foreign countries.

Under the regulations circulated in December 1841, letters and packets forwarded through these offices to the United Kingdom or any of its territories were to be sent unpaid, the postage being collected on delivery. Where this was not possible, for example from a British colony to a foreign colony or between two foreign ports, then a *crowned-circle handstamp* was to be applied with the postage, paid in advance, noted alongside in manuscript.

Examples of these handstamps were supplied over 20 years from 1842, but many continued to fulfil other functions long after the introduction of adhesive stamps in the colony concerned.

Our listings cover the use of these handstamps for their initial purpose and the prices quoted are for examples used on cover during the pre-adhesive period.

In most instances the dates quoted are those on which the handstamp appears in the G.P.O. Record Books, but it seems to have been normal for the handstamps to be sent to the office concerned immediately following this registration. The only known examples of certain hanstamps are those in The Record Books; these include St. Michaels (Azores), Cobija (Bolivia), St Vincent (Cape Verde Islands), Cartagena (CC1) and Chagres (Colombia), Cap Haitien (Haiti), Greytown (Nicaragua), Corunna (Spain), and Charleston, Mobile, New Orleans and Savannah (United States of America).

Many of the handstamps were individually cut by hand, so that each has its own characteristics, but for the purposes of the listing they have been grouped into nine Types as shown in the adjacent column. No attempt has been made to identify them by anything but the most major differences, so that minor differences in size and in the type of the crown have been ignored.

GREAT BRITAIN STAMPS USED ABROAD

Prices quoted are for single stamps not on cover unless otherwise stated. Stamps on cover are worth considerably more in most cases.

In many instances obliterators allocated to post offices abroad were, at a later date re-allocated to offices at home. Postmarks on issues later than those included in our lists can therefore safely be regarded as *not* having been "used abroad".

ARGENTINE REPUBLIC

BUENOS AYRES

The first regular monthly British mail packet service was introduced in 1824, replacing a private arrangement which had previously existed for some years.

Great Britain stamps were used from 1860 until the office closed at the end of June 1873. Until 1878 the British Consul continued to sell stamps which were used in combination with an Argentine value prepaying the internal rate. The British stamps on such covers were cancelled on arrival in England.

CROWNED-CIRCLE HANDSTAMPS

CC1 CC **7** BUENOS AYRES (Black or B.) (5.1.1851) ..... *Price on cover* £850

Stamps of GREAT BRITAIN *cancelled* "B 32" *as Types* **2**, **12** *or* **13** *in black or blue.*

A "B 32" obliteration was later used by Mauritius on its own stamps.

AZORES

ST. MICHAELS (SAN MIGUEL)

A British Postal Agency existed at Ponta Delgada, the chief port of the island, to operate with the services of the Royal Mail Steam Packet Company.

CROWNED-CIRCLE HANDSTAMPS

CC1 CC **1b** ST. MICHAELS (27.5.1842) .....

Although recorded in the G.P.O. Proof Books, no example of No. CC1 is known on cover.

BOLIVIA

COBIJA

It is believed that the British Postal Agency opened in 1862. The stamps of Great Britain were used between 1865 and 1878. They can be found used in combination with Bolivia adhesive stamps paying the local postage. The Agency closed in 1881, the town having been occupied by Chile in 1879

CROWNED-CIRCLE HANDSTAMPS

CC1 CC **4** COBIJA (29.3.1862) .....

Although recorded in the G.P.O. Proof Books, no example of No. CC1 is known on cover.

Stamps of GREAT BRITAIN *cancelled* "C 39" *as Types* **4**, **8** or **12**.

1865–78.

Z11	2s. blue (1867)	£1100
Z12	5s. rose (1867–74) (Plate No. 2)	£2000

BRAZIL

The first packets ran to Brazil in 1808 when the Portuguese royal family went into exile at Rio de Janeiro. The Agencies at Bahia and Pernambuco did not open until 1851. All three agencies used the stamps of Great Britain from 1866 and these can be found used in combination with Brazil adhesive stamps paying the local postage. The agencies closed on 30 June 1874

Z92 1½d. Venetian red £150

COLOMBIA

The system of British Postal Agencies in the area was inaugurated by the opening of the Carthagena office in 1825. In 1842 agencies at Chagres, Panama and Santa Martha were added to the system. A further office opened at Colon in 1852, this port also being known as Aspinwall. During 1872 the system was further enlarged by an office at Savanilla, although this agency was later, 1878, transferred to Barranquilla.

Stamps of Great Britain were supplied to Carthagena, Panama and Santa Martha in 1865, Colon in 1870 and Savanilla in 1872. Combination covers with Colombia stamps paying the local postage are known from Santa Martha and Savanilla as are similar covers from Panama showing Costa Rica and El Salvador stamps.

All offices, except Chagres which had ceased to operate in 1855, closed for public business on 30 June 1881. Colon and Panama continued to exist as transit offices to deal with the mail across the isthmus. Both finally closed on 31 March 1921.

CUBA

The British Postal Agency at Havana opened in 1762, the island then being part of the Spanish Empire. A further office, at St. Jago de Cuba, was added in 1841.

Great Britain stamps were supplied to Havana in 1865 and to St. Jago de Cuba in 1866. They continued in use until the offices closed on 30 May 1877.

DANISH WEST INDIES

ST. THOMAS

The British Postal Agency at St. Thomas opened in January 1809 and by 1825 was the office around which many of the packet routes were organised.

Great Britain stamps were introduced on 3 July 1865 and can be found used in combination with Danish West Indies adhesives paying the local postage.

Following a hurricane in October 1867 the main British packet office was moved to Colon in Colombia.

The British Post Office at St. Thomas closed to the public on I September 1877, but continued to operate as a transit office for a further two years

DOMINICAN REPUBLIC

British Postal Agencies may have existed in the area before 1867, but it is only from that year that details can be found concerning offices at Porto Plata and St. Domingo. Both were closed in 1871, but re-opened in 1876.

Although postmarks were supplied in 1866 it seems likely that Great Britain stamps were not sent until the offices re-opened in 1876.

Covers exist showing Great Britain stamps used in combination with those of Dominican Republic with the latter paying the local postage. Both agencies finally closed in 1881.

ECUADOR

GUAYAQUIL

The first British Postal Agent in Guayaquil was appointed in 1848.

Great Britain stamps were supplied in 1865 and continued to be used until the agency closed on 30 June 1880. They can be found used in combination with stamps of Ecuador with the latter paying the local postage.

Stamps of GREAT BRITAIN *cancelled* "C 41" *as Type* **4**.

FERNANDO PO

The British government leased naval facilities on this Spanish island from 1827 until 1834. A British Consul was appointed in 1849 and a postal agency was opened on 1 April 1858.

The use of Great Britain stainps was authorised in 1858, but a cancellation was not supplied until 1874. The office remained open until 1877.

CROWNED-CIRCLE HANDSTAMPS

GUADELOUPE

A British Packet Agency was established on Guadeloupe on 1 October 1848 and continued to function until 1874.

No. CC1 is often found used in conjunction with French Colonies (General Issues) adhesive stamps.

A similar packet agency existed on Martinique from 1 October 1848 until 1879, but no crowned-circle handstamp was issued for it.

CROWNED-CIRCLE HANDSTAMPS

CC1	CC **1** GUADALOUPE (R., B. or Black) (9.3.1849) *Price on cover*	£2250

HAITI

The original British Postal Agencies in Haiti date from 1830 when it is known a Packet Agency was established at Jacmel. An office at Port-au-Prince followed in 1842, both these agencies remaining in operation until 30 June 1881.

During this period short-lived agencies also operated in the following Haitian towns: Aux Cayes (1848 to 1863, Cap Haitien (1842

to 1863), Gonaives (1849 to 1857) and St. Marc (1854 to 1861). A further agency may have operated at Le Mole around the year 1841.

Great Britain stamps were supplied to Jacmel in 1865 and to Port-au-Prince in 1869.

CAP HAITIEN

MACAO

A British Consular Post Office opened in 1841. It had been preceded by the Macao Boat Office, possibly a private venture, which operated in the 1830s. The office closed when the consulate closed on 30 September 1845, but was back in operation by 1854.

The Agency continued to function, in conjunction with the Hong Kong Post Office, until 28 February 1884 when Portugal joined the U.P.U.

CROWNED-CIRCLE HANDSTAMPS

Z 2

CC1 – PAID AT MACAO (crowned-oval 20 mm wide) (R.) (1844)..... *Price on cover* £32500

CC2 Z **2** Crown and Macao (1881).....

No. CC2 with the Crown removed was used by the Portuguese post office in Macao as a cancellation until 1890.

A locally-cut mark, as Type CC **2**, inscribed "PAGO EM MACAO" is known on covers between 1870 and 1877. It was probably used by the Portuguese postmaster to send letters via the British Post Office (*Price* £10000).

MADEIRA

The British Packet Agency on this Portuguese island was opened in 1767 and was of increased importance from 1808 following the exile of the Portuguese royal family to Brazil. The South American packets ceased to call in 1858. It appears to have closed sometime around 1860.

CROWN-CIRCLE HANDSTAMPS

CC1 CC **1b** MADEIRA (R.) (28.2.1842)..... *Price on cover* £17500

MEXICO

The British Postal Agency at Vera Cruz opened in 1825, following the introduction of the Mexican Packet service. No handstamps were supplied, however, until 1842, when a similar agency at Tampico was set up.

Great Britain stamps were used at Tampico from 1867, but, apparently, were never sent to the Vera Cruz office. Combination covers exist showing the local postage paid by Mexican adhesives. The Agency at Vera Cruz closed in 1874 and that at Tampico in 1876.

TAMPICO

CROWNED-CIRCLE HANDSTAMPS

CC1 CC **1b** TAMPiCO (R.) (13.11.1841)..... *Price on cover* £1800

No. CC1 may be found on cover, used in conjunction with Mexico adhesive stamps.

Stamps of GREAT BRITAIN *cancelled* "C 63" *as Type* **4**.

VERA CRUZ

CROWNED-CIRCLE HANDSTAMPS

CC2 CC **1b** VERA CRUZ (R.) (13.11.1841) ..... *Price on cover* £2250

CC3 VERA CRUZ (Black) (*circa* 1845). *Price on cover* £1000

NICARAGUA

GREYTOWN

British involvement on the Mosquito Coast of Nicaragua dates from 1655 when contacts were first made with the indigenous Misquito Indians. A formal alliance was signed in 1740 and the area was considered as a British dependency until the Spanish authorities negotiated a withdrawal in 1786.

The Misquitos remained under British protection, however, and, following the revolutionary period in the Spanish dominions, this eventually led to the appropriation, by the Misquitos with British backing, of the town of San Juan del Norte, later renamed Greytown.

The port was included in the Royal West Indian Mail Steam Packet Company's mail network from January 1842, forming part of the Jamaica District. This arrangement only lasted until September of that year, however, although packets were once again calling at Greytown by November 1844. Following the discovery of gold in California the office increased in importance, owing to the overland traffic, although the first distinctive postmark is not recorded in use until February 1856.

A subsidiary agency, without its own postmark, operated at Bluefields from 1857 to 1863.

The British Protectorate over the Misquitos ended in 1860, but the British Post Office at Greytown continued to operate, being supplied with Great Britain stamps in 1865. These are occasionally found used in combination with Nicaragua issues, which had only internal validity.

The British Post Office at Greytown closed on 1 May 1882 when the Republic of Nicaragua joined the U.P.U.

CROWNED-CIRCLE HANDSTAMPS

CC1 C **4** GREYTOWN (R.) (14.4.1859).....

Although recorded in the G.P.O. Proof Books, no example of No. CC1 is known on cover.

Stamps of GREAT BRITAIN *cancelled* "C 57" *as in Types* **4** (*issued* 1865), **14A** (*issued* 1875), *or with circular postmark as Type* **16** (*issued* 1864).

PERU

British Agencies in Peru date from 1846 when offices were established at Arica and Callao. The network was later expanded to include agencies at Paita (1848), Pisco (1868) and Iquique and Islay (both 1869). This last office was transferred to Mollendo in 1877.

It is believed that a further agency existed at Pisagua, but no details exist.

Great Britain stamps were supplied from 1865 and are often found in combination with Peru adhesives which paid the local postal tax.

The Postal Agency at Pisco closed in 1870 and the remainder in 1879, the towns of Arica, Iquique and Pisagua passing to Chile by treaty in 1883.

ARICA

CROWNED-CIRCLE HANDSTAMPS

CC1 CC **1** ARICA (Black) (5.11.1850) ..... *Price on cover* £4750

Z124 1s. green (1867) (Plate No. 4) .....
Z125 2s. blue (1867) £2400

PORTO RICO

A British Postal Agency operated at San Juan from 1844. On 24 October 1872 further offices were opened at Aguadilla, Arroyo, Mayaguez and Ponce, with Naguabo added three years later.

Great Britain stamps were used from 1865 to 1877, but few letters appear to have used the San Juan postal agency between 1866 and 1873 due to various natural disasters and the hostile attitude of the local authorities. All the British Agencies closed on 1 May 1877.

AGUADILLA

Stamps of GREAT BRITAIN *cancelled* "F 84" *as Type* **8**.

On 12 March 1854 Britain, France and Turkey signed an alliance against Russia. A British force arrived in Constantinople in April 1854 and the Anglo-French Black Sea Fleet based itself at Varna, Bulgaria, the following month. "Crown between Stars" obliterators were supplied for use at Army Field Post Offices at Constantinople and Varna from July 1854 and in the Crimea, following the arrival of Allied Forces, on 14 September 1854. The "Star between Cyphers" obliterator was in use from March 1855 in the Crimea and at the British barracks at Scutari, near Constantinople.

SPAIN

Little is known about the operation of British Packet Agencies in Spain, other than the dates recorded for the various postal markings in the G.P.O. Proof Books. The Agency at Corunna is said to date from the late 17th century when the Spanish packets for South America were based there. No. CC1 was probably issued in connection with the inauguration of the P. & O. service to Spain in 1843. The Spanish port of call was changed to Vigo in 1846 and the office at Corunna was then closed. Teneriffe became a port-of-call for the South American packets in 1817 and this arrangement continued until 1858.

CORUNNA

CROWNED-CIRCLE HANDSTAMPS

CC1 CC **1b** CORUNNA (28.2.1842)

Although recorded in the G.P.O. Proof Books no example of No. CC1 on cover is known.

TENERIFFE (CANARY ISLANDS)

CROWNED-CIRCLE HANDSTAMPS

CC2 CC **7** TENERIFFE (6.1.1851) *Price on cover* £3750
CC3 CC **4** TENERIFFE (23.10.1857) *Price on cover* £3750

No. CC2/3 can be found used on covers from Spain to South America with the rate from Spain to Teneriffe paid in Spanish adhesive stamps.

UNITED STATES OF AMERICA

The network of British Packet Agencies, to operate the trans-Atlantic Packet system, was re-established in 1814 after the War of 1812.

The New York Agency opened in that year to be followed by further offices at Boston, Charleston (South Carolina), New Orleans, Savannah (Georgia) (all in 1842), Mobile (Alabama) (1848) and San Francisco (1860). Of these agencies Charleston and Savannah closed the same year (1842) as did New Orleans, although the latter was re-activated from 1848 to 1850. Mobile closed 1850, Boston in 1865, New York in 1882 and San Francisco, for which no postal markings have been recorded, in 1883.

Although recorded in the G.P.O. Proof Books no actual examples of the Crowned-circle handstamps for Charleston, Mobile, New Orleans and Savannah are known on cover.

The G.P.O. Proof Books record, in error, a Crowned-circle handstamp for St. Michaels, Maryland. This handstamp was intended for the agency on San Miguel in the Azores.

CHARLESTON

Although recorded in the G.P.O Proof Books, no examples of Nos. CC1/4 or CC6 are known on cover.

URUGUAY

MONTEVIDEO

British packets commenced calling at Montevideo in 1824 on passage to and from Buenos Aires.

Great Britain stamps were in use from 1864. Combination covers exist with the local postage paid by Uruguay adhesive stamps. The agency was closed on 31 July 1873.

VENEZUELA

British Postal Agencies were initially opened at La Guayra and Porto Cabello on 1 January 1842. Further offices were added at Maracaibo in 1842 and Ciudad Bolivar during January 1868. Porto Cabello closed in 1858 and Maracaibo was also short-lived. The remaining offices closed at the end of 1879 when Venezuela joined the U.P.U.

Great Britain stamps were used at La Guayra from 1865 and at Ciudad Bolivar from its establishment in 1868. They can be found used in combination with Venezuela adhesives paying the local postage.

PORTO CABELLO

CROWNED-CIRCLE HANDSTAMPS

CC3 CC **1b** PORTO-CABELLO (R.) (15.12.1841) *Price on cover* £3500

MAIL BOAT OBLITERATIONS

The following cancellations were supplied to G.P.O. sorters operating on ships holding mail contracts from the British Post Office. They were for use on mail posted on board, but most examples occur on letters from soldiers and sailors serving overseas which were forwarded to the mailboats without postmarks.

P. & O. MEDITERRANEAN AND FAR EAST MAILBOATS

The first such cancellation, "A 17" as Type **2**, was issued to the Southampton–Alexandria packet in April 1858, but no examples have been recorded.

The G.P.O. Proof Book also records "B 16", in Type **2**, as being issued for marine sorting in November 1859, but this postmark was subsequently used by the Plymouth and Bristol Sorting Carriage.

Sorting on board P. & O. packets ceased in June 1870 and many of the cancellation numbers were subsequently reallocated using Types **9**, **11** or **12**.

ALLAN LINE ATLANTIC MAILBOATS

British G.P.O. sorters worked on these Canadian ships between November 1859 and April 1860. Cancellations as Type **2** numbered "B 17", "B 18", "B 27", "B 28", "B 29" and "B 30" were issued to them, but have not been reported used on Great Britain stamps during this period. All were subsequently reallocated to British post offices.

SPANISH WEST INDIES MAILBOATS

"D 26" was supplied for use by British mail clerks employed on ships of the Herrara Line operating between St. Thomas (Danish West Indies), Cuba, Dominican Republic and Porto Rico.

Stamps of GREAT BRITAIN *cancelled* "D 26" *as Type* **12**.

Abu Dhabi

1964. 100 Naye Paise = 1 Rupee 1966. 1000 Fils = 1 Dinar

Abu Dhabi is the largest of the former Trucial States on the Persian Gulf, which are now combined to form the United Arab Emirates. The others, which all issued stamps, are Ajman (with Manama), Dubai, Fujeira, Ras al Khaima, Sharjah and Umm al Qiwain. They were known as the Trucial States because in May 1853 they all signed the Perpetual Maritime Truce Agreement with the United Kingdom, under which they undertook to give up piracy and the slave trade.

Shaikh Shakhbut bin Sultan
1928–6 August 1966

BRITISH POSTAL ADMINISTRATION

The postal service was established on 30 March 1963 and the stamps of the British Postal Agencies in Eastern Arabia (see *British Postal Agencies in Eastern Arabia* in this catalogue) were used until 29 March 1964.

15/25 *Set of* 11			£300	£275

The 40f., 50f. and 75f. are surcharged "Fils" only, as in Type **8**. The remainder have the new value expressed in figures also. On the 1d. the old value is obliterated by bars.

No. 18a was quickly corrected. Only five sheets with the error are believed to have been sold.

The Abu Dhabi Post Department took over the postal services on 1 January 1967. Later stamp isssues will be found in Part 19 (*Middle East*) of this catalogue.

Aden

The first post office in Aden opened during January 1839, situated in what became known as the Crater district. No stamps were initially available, but, after the office was placed under the Bombay Postal Circle, stocks of the 1854 ½a. and 1a. stamps were placed on sale in Aden from 10 October 1854. Supplies of the 2a. and 4a. values did not arrive until December. Most Indian issues from the 1854 lithographs up to 1935 Silver Jubilee set can be found with Aden postmarks.

During January 1858 a further office, Aden Steamer Point, was opened in the harbour area and much of the business was transferred to it by 1869. The original Aden post office, in Crater, was renamed Aden Cantonment, later to be changed again to Aden Camp.

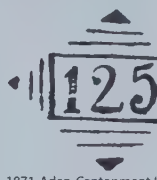
The first cancellation used with the Indian stamps was a plain diamond of dots. This type was also used elsewhere so that attribution to Aden is only possible when on cover. Aden was assigned "124" in the Indian postal number system, with the sub-office at Aden Steamer Point being "132". After a short period "124" was used at both offices, cancellations being identifiable by the spacing and shape of the numerals. It is possible that "132" was also used at an office in India.

1858 "124" Cancellation

1870 Aden Duplex

1872 Aden Steamer Point Duplex

Both post offices used "124" until 1871 when Aden Cantonment was assigned "125", only to have this swiftly amended to "124A" in the same year.



1871 Aden Cantonment "125" Cancellation

1871 Aden Cantonment "124A" Cancellation

Cancellations inscribed "Aden Steamer Point" disappear after 1874 and this office was then known simply as Aden. Following this change the office was given number "B-22" under the revised Indian P.O. scheme and this number appears as a major part of the cancellations from 1875 to 1886, either on its own or as part of a duplex. Aden Camp, the alternative name for the Cantonment office, became "B-22/1".

1875 Aden Duplex

Squared-circle types for Aden and Aden Cantonment were introduced in 1884 and 1888 to be in turn replaced by standard Indian double and single circle from 1895 onwards.

A number of other post offices were opened between 1891 and 1937:

Dthali (*opened* 1903, *initially using* "EXPERIMENTAL P.O. B-84" *postmark*; *closed* 1907)
Kamaran (*opened c* 1915, *but no civilian postmarks known before* 1925)
Khormaksar (*opened* 1892; *closed* 1915; *reopened* 1925)
Maalla (*opened* 1923; *closed* 1931)
Nobat-Dakim (*opened* 1904, *initially using* "EXPERIMENTAL P.O. B-84" *postmark*; *closed* 1905)
Perim (*opened* 1915; *closed* 1936)
Sheikh Othman (*opened* 1891; *closed* 1915; *reopened* 1922; *closed* 1937)

Aitutaki see Cook Islands

Anguilla

Following the grant of Associated Statehood to St. Christopher, Nevis and Anguilla, on 27 February 1967, the Island Council of Anguilla declared the island independent and the St. Kitts-Nevis authorities left the island on 30 May 1967. Mail communications, which had all been via St. Kitts, were severed for four weeks and when they were resumed, via St. Thomas in the U.S. Virgin Islands, prepayment was denoted by a rectangular handstamp in violet with the postage rate incorporated within it. Nos. 1/16 were subsequently issued by the Island Council and were accepted for international mail. On 7 July 1969 the Anguilla post office was officially recognised by the Government of St. Christopher, Nevis and Anguilla and normal postal communications via St. Christopher were resumed. By the Anguilla Act of 21 July 1971, Anguilla was restored to direct British control.

A degree of internal self-government with an Executive Council was introduced on 10 February 1976 and the links with St. Kitts-Nevis were officially severed on 18 December 1980.

Antigua

It is believed that the first postmaster for Antigua was appointed under Edward Dummer's scheme in 1706. After the failure of his service, control of the overseas mails passed to the British G.P.O. Mail services before 1850 were somewhat haphazard, until St. John's was made a branch office of the British G.P.O. in 1850. A second office, at English Harbour, opened in 1857.

The stamps of Great Britain were used between May 1858 and the end of April 1860, when the island postal service became the responsibility of the local colonial authorities. In the interim period, between the take-over and the appearance of Antiguan stamps, the crowned-circle handstamps were again utilised and No. CC1 can be found used as late as 1869.

For illustrations of the handstamp and postmark types see BRITISH POST OFFICES ABROAD notes, following GREAT BRITAIN.

Nos. 25 and 26 postmarked "A 12" in place of "A 02" were used in St. Christopher.

2½ 2½ 2½
A B C

The variety "Large '2' in '2½' with slanting foot" occurs on R. 7/1 of the duty plate on all printings. At this position the "NN" of "PENNY" also sustained damage in about 1886, leaving three vertical strokes shortened. A and B (above) represent two states of the flaw at R. 7/1. Head plate 2, first used for Antigua in 1886, was a double-pane plate of 120, but the same 60-set duty plate remained in use, the variety thus occurring on R. 7/1 of each pane. A very similar flaw (C above) appeared at R. 3/1 of the duty plate (on which the "NN" was undamaged) early in the life of No. 27 and thus occurs on both panes of that stamp.

From 31 October 1890 until July 1903 Leeward Islands general issues were used. Subsequently both general issues and the following separate issues were in concurrent use until July 1956, when the general Leeward Islands stamps were withdrawn.

Ascension

DEPENDENCY OF ST. HELENA

Ascension, first occupied in 1815, was retained as a Royal Navy establishment from 1816 until 20 October 1922 when it became a dependency of St. Helena by Letters Patent.

Under Post Office regulations of 1850 (ratings) and 1854 (officers) mail from men of the Royal Navy serving abroad had the postage prepaid in Great Britain stamps, supplies of which were issued to each ship. Great Britain stamps used on Ascension before 1860 may have been provided by the naval officer in charge of the postal service.

The British G.P.O. assumed responsibility for such matters in 1860, but failed to send any stamps to the island until January 1867.

Until about 1880 naval mail, which made up most early correspondence, did not have the stamps cancelled until arrival in England. The prices quoted for Nos. Z1/3 and Z6 are for examples on cover showing the Great Britain stamps cancelled on arrival and an Ascension postmark struck elsewhere on the front of the envelope.

The use of British stamps ceased in December 1922.

The following postmarks were used on Great Britain stamps from Ascension:

Z 1

Z 2

Z 3

Z 4

Z 5

Postmark Type	*Approx Period of Use*	*Diameter*	*Index Letter*
Z **1**	1862	20 mm	A
Z **2**	1864–1872	20 mm	A
	1872–1878	21½ mm	A
	1879–1889	19½ mm	A
	1891–1894	21½ mm	C
	1894–1902	22 mm	A
	1903–1907	20½ mm	A
	1908–1920	21 mm	A or none
	1909–1920	23 mm	C sideways (1909), none (1910–11), B (1911–20)
Z **3**	1920–1922	24 mm	none
Z **4**	1897–1903 Reg'd	23 mm	none
Z **5**	1900–1902 Reg'd	28 mm	C
	1903–1904 Reg'd	29 mm	A

Postmark Type Z **1** appears in the G.P.O. proof book for 1858, but the first recorded use is 3 November 1862.

Forged postmarks exist. Those found most frequently are genuine postmarks of the post-1922 period with earlier date slugs fraudulently inserted, namely a 20 mm postmark as Type Z **2** (because of the shape of the "O" in "ASCENSION" this is often known as the "Square O" postmark) and a 24 mm postmark as Type Z **3** but with the index letter A.

Stamps of GREAT BRITAIN cancelled with Types Z **2/5**. *Prices quoted for Nos. Z1/6 are for complete covers.*

Line-engraved issues.

Nos. 1, 4 and 6/8 are on special printings which were not issued without overprint.

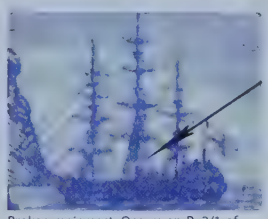
Examples of all values are known showing a forged Ascension postmark dated "MY 24 23".

PLATE FLAWS ON THE 1924–33 ISSUE. Many constant plate varieties exist on both the vignette and duty plates of this issue.

The major varieties are illustrated and listed below.

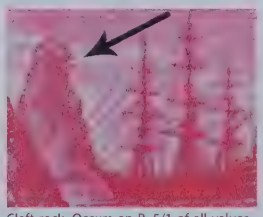
This issue utilised the same vignette plate as the St. Helena 1922–37 set so that these flaws occur there also.

2 Badge of St. Helena



Broken mainmast. Occurs on R. 2/1 of all values.

Torn flag. Occurs on R. 4/6 of all values except the 5d. Retouched on sheets of ½d., 1d. and 2d. printed after 1927.



Cleft rock. Occurs on R. 5/1 of all values.

Broken scroll. (R. 1/4)

1½d. line through "c" (R. 1/6)

8d. "Shamrock" flaw (R. 4/1)

(Typo D.L.R.)

SB1 10s.6d. booklet containing 1d., 1½d., 2d., 3d., 6d. and 1s.6d. (Nos. 70/3, 75, 79), each in block of 4 ..... 70·00

Australia

The Australian colonies of New South Wales, Queensland, South Australia, Tasmania, Victoria and Western Australia produced their own issues before federation in 1901. Stamps inscribed for the individual states continued in use after federation until the end of December 1912.

WATERMARK VARIETIES. Some stamp printers in the Australian colonies paid little attention to the position of the watermark in the sheets they produced so that some entire printings had the watermark inverted, some 50% upright and 50% inverted while on others the inverted watermarks were restricted to odd sheets. Reversed, inverted and reversed, and on stamps with sideways watermarks, sideways inverted and sideways inverted and reversed watermarks, are frequently encountered, especially on the stamps of New South Wales and the later issues of Tasmania, Victoria and Western Australia. In such circumstances it is impossible to provide adequate prices for such items, so, generally, only those watermark varieties occurring on stamps printed in Great Britain are included in the following listings.

DOUBLE PRINTS. Numerous examples of "double prints," also "printed double, one albino" varieties are found on the locally printed line-engraved stamps of the Australian colonies. These are particularly prevalent in the stamps of South Australia and Tasmania. We no longer list such varieties.

EMBOSSED LETTER SHEETS AND ENVELOPES. From 1 November 1838 the Sydney G.P.O. supplied letter sheets pre-stamped with an albino embossing, as illustrated, at 1½d. each or 1s.3d. per dozen. From January 1841 the price was reduced to 1s. per dozen. The public were also able to present their own stationery for embossing. The circular design measures approximately 29 mm in diameter, and examples are known on laid or wove paper of varying colours. Embossing continued until 1 May 1852 after which the Post Office refused to carry mail which was not franked with postage stamps. The die was used for reprints in 1870 and 1898 before it was destroyed later the same year.

A 1

PRINTERS. The early issues of New South Wales were printed on a press supervised by the Inspector of Stamps, Charles Kay. On 1 January 1857 this responsibility passed to the Government printer who produced all subsequent issues, *unless otherwise stated.*

SPECIMEN OVERPRINTS. Those listed are from U.P.U. distributions between 1892 and 1903. Further "Specimen" overprints exist, but these were used for other purposes. From 1891 examples of some of these Specimens, together with cancelled stamps, were sold to collectors by the N.S.W. Post Office.

NEW SOUTH WALES USED IN NEW CALEDONIA. From October 1859 mail for Europe from New Caledonia was routed via Sydney and franked with New South Wales stamps in combination with local issues. Such N.S.W. stamps were cancelled on arrival in Sydney.

13	1d. carmine	£14000	£700
14	1d. vermilion	£15000	£650
	a. No trees on hill (R. 2/2)	—	£1200
	b. Hill unshaded (R. 2/3)	—	£1200
	c. Without clouds (R. 3/5)	—	£1200

The varieties quoted with the letters "a", "b", "c" of course exist in each shade; the prices quoted are for the commonest shade, and the same applies to the following portions of this list.

Nos. 1/14 were printed in sheets of 25 (5×5).

LAID PAPER. Nos. 13/14, 34/5, 38 and 43*d*/*e* can be found showing parts of the papermaker's watermark (T. H. SAUNDERS 1847 in double-lined capitals and the figure of Britannia seated in an oval beneath a crown).

4

A (Pl I)

Illustrations A, B, C and D are sketches of the lower part of the inner circular frame, showing the characteristic variations of each plate.

(Eng John Carmichael)

1850 (1 Jan). Plate I. Vertical-lined background. T **3**.

(a) Early impressions, full details of clouds, etc

15	2d. greyish blue	£17000	£550
16	2d. deep blue	—	£650
	a. Double lines on bale (R. 2/7)	—	£1100

(b) Intermediate impressions

16*b*	2d. greyish blue	£9000	£325
16*c*	2d. deep blue	£9500	£400

(c) Later impressions, clouds, etc., mostly gone, T **4**

17	2d. greyish blue	£7000	£190
18	2d. dull blue	£7000	£180

(d) Stamps in the lower row partially retouched (end Jan)

19	2d. greyish blue	£8000	£300
20	2d. dull blue	£8500	£350

5

B (Pl II)

C (Pl III)

(Plate entirely re-engraved by Henry C. Jervis)

1850 (Apr–July). T **5**. Plate II. Horizontal-lined background. Bale on left side supporting the seated figure, dated. Dot in centre of the star in each corner.

(a) Early impressions

21	2d. indigo	£12000	£350
22	2d. lilac-blue	—	£1300
23	2d. grey-blue	£12000	£300
24	2d. bright blue	£12000	£300
	a. Fan as in Pl III, but with shading outside (R. 1/1)	—	£550
	b. Fan as in Pl III, but without shading, and inner circle intersects the fan (R. 1/2)	—	£600
	c. Fan as B, but inner circle intersects fan (R. 1/3)	—	£600
	d. No whip and inner circle intersects fan (R. 1/4)	—	£600
	e. No whip (R. 1/8, 2/8)	—	£475
	f. Pick and shovel omitted (R. 1/10)	—	£600
	g. "CREVIT" omitted (R. 2/1)	—	£950

(b) Worn impressions

25	2d. dull blue	£7000	£170
26	2d. Prussian blue	£7000	£200
	a. Fan as in Pl III, but with shading outside (R. 1/1)	—	£425
	b. Fan as in Pl III, but without shading, and inner circle intersects the fan (R. 1/2)	—	£425
	c. Fan as B, but inner circle intersects fan (R. 1/3)	—	£425
	d. No whip and inner circle intersects fan (R. 1/4)	—	£425
	e. No whip (R. 1/8, 2/8)	£9500	£350
	f. Pick and shovel omitted (R. 1/10)	—	£425
	g. "CREVIT" omitted (R. 2/1)	£12000	£650

(c) Bottom row retouched with dots and dashes in lower spandrels (from July)

27	2d. Prussian blue	£8000	£325
28	2d. dull blue	£8000	£225
	e. No whip (R. 2/8)	—	£375
	g. "CREVIT" omitted (R. 2/1)	—	£550

(Plate re-engraved a second time by Henry C. Jervis)

1850 (Sept). Plate III. Bale not dated and single-lined, except on No. 30c which is doubled-lined. No dots in stars.

29	2d. ultramarine	£8000	£225
30	2d. deep blue	£8000	£225
	a. No whip (R. 2/3, 2/7)	—	£375
	b. Fan with 6 segments (R. 2/8)	—	£500
	c. Double lines on bale (R. 1/7, 1/10, 1/12)	—	£350

(Plate re-engraved a third time by Henry C. Jervis)

1851 (Jan). Plate IV. Double-lined bale, and circle in centre of each star.

(a) Hard bluish grey wove paper

31	2d. ultramarine	£7500	£200
32	2d. Prussian blue	£7500	£170
33	2d. bright blue	£7500	£190
	a. Hill not shaded (R. 1/12)	—	£325
	b. Fan with 6 segments (R. 2/8)	—	£325
	c. No clouds (R. 2/10)	—	£325
	d. Retouch (R. 2/1)	—	£400
	e. No waves (R. 1/9, 2/5)	—	£275

(b) Stout yellowish vertically laid paper

34	2d. ultramarine	£8500	£250
35	2d. Prussian blue	£9500	£275
	a. Hill not shaded (R. 1/12)	—	£425
	b. Fan with 6 segments (R. 2/8)	—	£425
	c. No clouds (R. 2/10)	—	£425
	d. Retouch (R. 2/1)	—	£500
	e. No waves (R. 1/9, 2/5)	—	£375
	f. "PENOE" (R. 1/10, 2/12)	—	£450

The retouch, Nos. 33d and 35d., occurs outside the left margin line on R. 2/1.

6

D (Pl V)

7

(Plate re-engraved a fourth time by Henry C. Jervis)

1851 (Apr). T **6**. Plate V. Pearl in fan.

(a) Hard greyish wove paper

36	2d. ultramarine	£7500	£180
37	2d. dull blue	£7500	£180
	a. Pick and shovel omitted (R. 2/5)	—	£375
	b. Fan with 6 segments (R. 2/8)	—	£375

(b) Stout yellowish vertically laid paper

38	2d. dull ultramarine	£11000	£425
	a. Pick and shovel omitted (R. 2/5)	—	£650
	b. Fan with 6 segments (R. 2/8)	—	£650

Nos. 15/38 were printed in sheets of 24 (12×2), although the existence of an inter-panneau *tête-bêche* pair from Plate II indicates that the printer applied two impressions of the plate to each sheet of paper. The two panes were normally separated before issue. The original Plate I was re-cut four times to form Plates II to V. An interesting variety occurs on R. 1/9-11 and 2/7 in all five plates. It consists of ten loops of the engine-turning on each side of the design instead of the normal nine loops.

(Eng Henry C. Jervis)

1850 (1 Jan)–**51**. T **7**.

(a) Soft yellowish wove paper

39	3d. yellow-green	£9000	£325
40	3d. myrtle green	£19000	£1400
41	3d. emerald-green	£10000	£350
	a. No whip (R. 4/3–4)	—	£500
	b. "SIGIIIUM" for "SIGILLUM" (R. 5/3)	—	£700

(b) Bluish to grey wove paper (July 1850)

42	3d. yellow-green	£8500	£275
43	3d. emerald-green	£9500	£275
	b. No whip (R. 4/3–4)	—	£400
	c. "SIGIIIUM" for "SIGILLUM" (R. 5/3)	—	£600

(c) Yellowish to bluish laid paper (Jan 1851)

43*d*	3d. bright green	£14000	£600
43*e*	3d. yellowish green	£12000	£500
	f. No whip (R. 4/3–4)	—	£850
	g. "SIGIIIUM " for "SIGILLUM" (R. 5/3)	—	£1200

Nos. 39/43e were printed in sheets of 25 (5×5).

		a. Error, Wmk "**2**"	—	£3750

(b) Lithographic transfer of Plate I

118	**16**	2d. pale blue (3.8.59)	—	£800
		a. Retouched	—	£2500

For further examples of Type **16** on different watermarks see Nos. 131/40, 154/8, 171/2, 211/12, 226/8 and 327/8.

Two plates were used for the 2d. The 2d. Plate I was retouched, on a total of ten positions, Nos. 112a and 133a refer to the third retouch of R. 2/12 and R. 9/8. Earlier retouches of these exist. Stamps from Plate II are wider apart and are more regularly spaced. There is also a white patch between "A" of "WALES" and the back of the Queen's head on later printings from Plate II, but this is not obvious on the early printings.

On the 3d. the value is in block letters on a white background. No. 112c comes from a printing made when supplies of the "2" paper were unavailable. There are only two known of No. 112b one of which is in the Royal Collection. Two used examples are known with "8" watermark, both of which are in museum collections.

The 1d. exists privately rouletted 10, a used pair of which is known postmarked 15 May 1861.

No. 114 was mainly used at post offices in Queensland.

The lithographic retouches (No. 118a) occur on the three stamps at the left of the bottom row of the sheet and consist of strong horizontal lines below "TWO PENCE".

STAMPS WITH STRAIGHT EDGES. Stamps between Nos. 119 and 244 and also Nos. 327/9 can be found with one or two sides imperforate. These come from the outside rows which were not perforated between the stamps and the sheet margins. Being from the edge of the sheet such stamps are often found without watermark or showing portions of the double-lined "NEW SOUTH WALES" marginal watermark.

1860 (Feb)–**63**. For Registered Letters.

172		2d. dull blue (1.62)	£2250	£180

No. 133 was made by perforating a small remaining stock of No. 113. Nos. 137/8 were printed from the original plate after its return from London, where it had been repaired.

No. 136b refers to the second retouch on R. 5/9. Other retouches to plate II exist.

Nos. 157a, 158a and 165a/b come from printings made when supplies of paper with the correct face value were unavailable.

The Royal Philatelic Collection contains examples of Nos. 131 and 168 in imperf between pairs.

For later printings in these types, with different watermarks and perforations, see Nos. 195, 211/2, 215, 218, 226/8, 231/3, 236, 269/70 and 327/9.

Stamps from this series without watermark are from the edge of the sheet.

A used horizontal pair of the 2d. Prussian-blue imperf vertically, is in the Royal Philatelic Collection.

Nos. 211b and 211e were printed in 1902 on wmk **36** paper, left over when it was superseded by wmk **40**.

Collectors should note that for issues prior to 1888 (other than those specifically described as "Perf 11×12, comb" our classification of perforations follows the long-standing convention whereby "Perf 12" denotes a perforation of 11½, 12 and "Perf 13" denotes one of 12½, 13.

BISECTS. Between 1887 and 1913 various 1d. and 2d. stamps can be found vertically or diagonally bisected. This was unauthorised.

		a. Perf 12×11½	4·75	55
		b. Perf 12	4·75	40
		c. Imperf three sides (left stamp of horiz pair). Perf 12×11½	£1700	
273		½d. bluish green, P 11×12 (1.99)	8·00	40
		a. Perf 12×11½	2·00	80
		b. Perf 12	8·00	1·50

The perforations 11×12, 12×11½, 12, are from comb machines.

The die for Type **58** was constructed from an electro taken from the die of the De La Rue 1d., Type **26**, with "ONE" replaced by "HALF" and two "½" plugs added to the bottom corners. These alterations proved to be less hard-wearing than the remainder of the die and defects were visible by the 1905 plate of No. 333. It seems likely that repairs were undertaken before printing from the next plate in late 1907 which produced stamps as Type II.

SB3	2s. booklet containing 11×½d. (No. 333), either in block of 6 plus block of 5 or block of 11, and 18×1d. (No. 334), either in three blocks of 6 or block of 6 plus block of 12	£7000

Unsold stock of No. SB3 was uprated with one additional ½d. in May 1911.

1911 (Aug). Red on pink cover as No. SB3. Stapled.

SB4	2s. booklet containing 12×½d. (No. 333), either in two blocks of 6 or block of 12, and 18 1d. (No. 334) either in three blocks of 6 or 1 block of 6 plus block of 12	£6000

OFFICIAL STAMPS

O s O s O s

(O **1**) (O **2**) (O **3**)

The space between the letters is normally 7 mm as illustrated, except on the 5d. and 8d. (11–11½ *mm*), 5s. (12 *mm*) and 20s. (14 *mm*). Later printings of the 3d., W **40**, are 5½ mm, and these are listed. A wide (8.5 *mm*) variety exists at R. 4/4 on all values other than the 3d., 5d., 8d., 5s., 10s. and 20s.

Varieties of Type O **1** exist with "O" sideways.

Nos. O1/35 overprinted with Type O **1**

New South Wales became part of the Commonwealth of Australia on 1 January 1901

QUEENSLAND

The area which later became Queensland was previously part of New South Wales known as the Moreton Bay District. The first post office, at Brisbane, was opened in 1834 and the use of New South Wales stamps from the District became compulsory from 1 May 1854.

Queensland was proclaimed a separate colony on 10 December 1859, but continued to use New South Wales issues until 1 November 1860.

Post Offices opened in the Moreton Bay District before 10 December 1859, and using New South Wales stamps, were

		a. Imperf between (horiz pair)	†	£17000
		b. Imperf between (vert pair)	†	—
		s. Handstamped "SPECIMEN"	50·00	

The top or bottom row of perforations was sometimes omitted from the sheet, resulting in stamps perforated on three sides only.

Prior to the plates being printed from in Brisbane, damage occurred to the 6d. plate in the form of a scratch across two adjoining stamps. The position of the pair in the plate is not yet recorded. One joined pair is known.

This flaw was not corrected until around 1869 when, after plate cleaning, only faint traces remain. These are hard to see.

The Royal Philatelic Collection contains an example of No. 22 imperf between (horizontal pair), used.

		(b) P 12½×13 rough (1863–67)		
30	1	1d. orange-vermilion	£120	32·00
31		2d. blue	£110	20·00
32		3d. brown	£130	26·00
		a. Re-entry	—	£130

		a. Line through design at right		
		b. Line through design at left		
36		1s. grey	£550	40·00
		a. Imperf between (horiz pair)		

This paper was used again for a very limited printing in 1867 which can be properly regarded as the First Government Printing. The perforations were now clean-cut. The designs and the background to the head are very well defined, the plates having been cleaned when transferred to the Government Printing Office.

		(c) P 13 Clean-cut (1867)		
37		1d. orange-vermilion	£120	28·00
38		2d. blue	90·00	11·00
40		6d. apple green	£225	19·00
41		6d. yellow-green	£225	23·00
42		6d. deep green		

Previously listed and then removed, the significance of this issue has been reassessed and it is now re-listed under this paper.

Copies of the 3d. and 1s. have been identified with these characteristics but there are no records of them being printed at this time.

1864–65. W **3**.

		(a) P 13

50	1	1d. orange-vermilion	£160	80·00
50*a*		2d. deep blue	£275	80·00

The "REGISTERED" stamp was reprinted in 1895. See note below No. 82.

1866 (24 Jan). Wmk "QUEENSLAND/POSTAGE — POSTAGE/STAMPS — STAMPS" in three lines in script capitals with double wavy lines above and below the wmk and single wavy lines with projecting sprays between each line of words. There are ornaments ("fleurons") between "POSTAGE" "POSTAGE" and between "STAMPS" "STAMPS". Single stamps only show a portion of one or two letters of this wmk.

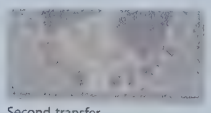
		(a) P 13		
51	1	1d. orange-vermilion	£200	45·00
52		2d. blue	£100	17·00
		(b) P 12½×13		
52*a*	1	1d. orange-vermilion	£275	75·00
52*b*		2d. blue	£275	75·00

First transfer

Double transfer

1866–67. Lithographed on thick paper. No wmk. P 13.

	(a) First Transfer (Sept 1866) "FOUR" in taller thin letters		
53	4d. reddish lilac (*shades*)	£400	27·00
	a. Re-entry	—	£130
	b. Double transfer	£5500	£2500
54	4d. grey-lilac (*shades*)	£400	27·00
	a. Re-entry	—	£130
	b. Double transfer	—	£2500



Second transfer

	(b) Second Transfer (Feb 1867) "FOUR" in shorter letters		
55	4d. lilac (*shades*)	£400	20·00
	a. Retouch (R. 2/8)	—	£120
	b. "FOUR" missing	—	£550
56	4d. grey-lilac (*shades*)	£400	20·00
	a. Retouch (R. 2/8)	—	£120
	b. "FOUR" missing	—	£600
	s. Handstamped "SPECIMEN"	55·00	
57	5s. bright rose	£1200	£170
58	5s. pale rose	£1100	£130
	a. Imperf between (vert pair)	†	£8500
	s. Handstamped "SPECIMEN"	70·00	

The 4d. was lithographed from two separate transfers from the 3d. plate and the 5s. was taken from the 1s. plate.

The alterations in values were made by hand on the stones and there are minor varieties in the shape and position of the letters.

4

2d. Pl II. Dot by "U"

2d. Pl II. Dots near arabesque

1868–74. Wmk small truncated Star, W **4** on each stamp, and the word "QUEENSLAND" in single-lined Roman capitals four times in each sheet. A second plate of the 2d. denomination was sent by Perkins, Bacon to the Colony in 1872 and it was first printed from in August of that year. The new plate is helpful in separating many of the 2d. printings up to 1879. P 13.

59	1	1d. orange-vermilion (18.1.71)	95·00	7·50
60		2d. pale blue (3.4.68) (Pl I)	80·00	5·00

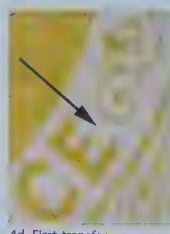
81		2d. blue (Pl II)	£1600	45·00
82		3d. greenish grey	—	£350

Plate II of the 2d. may be identified by a smudged dot to the left of "U" in "QUEEN" and tiny dots near the lower curl of the right arabesque.

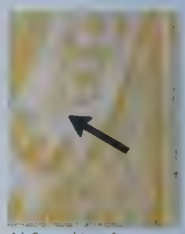
Reprints were made in 1895 of all five values on Wmk W **4**, and perforated 13; the colours are:—1d. orange and brownish orange, 2d. deep dull blue (Pl II), 3d. brown, 6d green, 1s. red-violet and dull violet. The "Registered" was also reprinted with these on the same paper, but perforated 12. One sheet of the 2d. reprint is known to have had the perforations missing between the fourth and fifth vertical rows.

5

6



4d. First transfer



4d. Second transfer

The first transfer of the 4d. was taken from the 3d. plate, identified by the lack of the curl at the foot of the arabesque, the second was from Plate II of the 2d. On the first transfer the "P" of "POSTAGE" is to the right of the centre of the Queen's necklace, on the second transfer it is to the left of it.

(4d., litho. Other values recess)

1868–78. Wmk Crown and Q. W **5**.

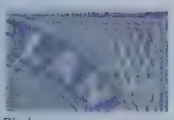
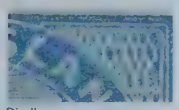
Of the 2s. and 20s. stamps there are five types of each, and of the other values ten types of each.

Beware of fiscally used copies that have been cleaned and provided with forged postmarks.

7



Die I



Die II

Dies I and II often occur in the same sheet.

Die I. The white horizontal inner line of the triangle in the upper right-hand corner merges into the outer white line of the oval above the "L".

Die II. The same line is short and does not touch the inner oval.

1879–81. Typo. P 12.

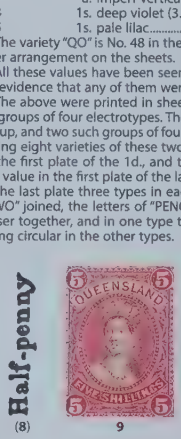
145		1s. pale lilac	£160	14·00

The variety "QO" is No. 48 in the first arrangement, and No. 44 in a later arrangement on the sheets.

All these values have been seen imperf and unused, but we have no evidence that any of them were used in this condition.

The above were printed in sheets of 120, from plates made up of 30 groups of four electrotypes. There are four different types in each group, and two such groups of four are known of the 1d. and 2d., thus giving eight varieties of these two values. There was some resetting of the first plate of the 1d., and there are several plates of the 2d.; the value in the first plate of the latter value is in thinner letters, and in the last plate three types in each group of four have the "TW" of "TWO" joined, the letters of "PENCE" are larger and therefore much closer together, and in one type the "O" of "TWO" is oval, that letter being circular in the other types.



(8) 9 10

1880 (21 Feb). Surch with T **8**.

151	7	½d. on 1d. (No. 134) (Die I)	£325	£180

177		2d. blue	£550	85·00
178		1s. mauve	£275	80·00

The above were printed from plates made up of groups of four electrotypes as previously. In the 1d. the words of value are followed by a full stop. There are four types of the 4d., 6d. and 1s., eight types of the 1d., and 12 types of the 2d.

No. 169c is from a sheet used at Roma post office and comes cancelled with the "46" numeral postmark.

1887 (5 May)–**89**. W **6**.

		(a) P 12		
179	12	1d. vermilion-red	16·00	1·00
180		2d. blue	16·00	1·00
		a. Oval white flaw on Queen's head behind diadem (R. 12/5)	70·00	9·00
181		2s. deep brown (12.3.89)	80·00	70·00
182		2s. pale brown	70·00	60·00
		(b) P 9½×12		
183	12	2d. blue	£425	80·00

These are from new plates; four types of each value grouped as before. The 1d. is without stop. In all values No. 2 in each group of four has the "L" and "A" of "QUEENSLAND" joined at the foot, and No. 3 of the 2d. has "P" of word "PENCE" with a long downstroke.

The 2d. is known bisected and used as a 1d. value.

197	12	2s. red-brown	42·00	48·00
198		2s. pale brown	50·00	55·00

This Issue is perforated by a new vertical comb machine, gauging about 12¾×12¾. The 3d. is from a plate similar to those of the last issue, No. 2 in each group of four types having "L" and "A" joined at the foot. The ½d. and 2½d. are likewise in groups of four types, but the differences are very minute. In the retouched plate of the 2d. the letters "L" and "A" no longer touch in No. 2 of each group and the "P" in No. 3 is normal.

28

QUEENSLAND A

QUEENSLAND B

TWO TYPES OF "QUEENSLAND". Three different duty plates, each 120 (12 x 10), were produced for Type **28.** The first contained country inscriptions as Type A and was only used for No. 265. The second duty plate used for Nos. 265/6 and 282/4 contained 117 examples as Type B and 3 as Type A occurring on R. 1/6, R. 2/6 and R. 3/6. The third plate, used for Nos. 266, 283, 284 and 285 had all inscriptions as Type B.

32

Redrawn types of T **21**

T **30**. The head is redrawn, the top of the crown is higher and touches the frame, as do also the back of the chignon and the point of the bust. The forehead is filled in with lines of shading, and the figures in the corners appear to have been redrawn also.

T **32**. The forehead is plain (white instead of shaded), and though the top of the crown is made higher, it does not touch the frame; but the point of the bust and the chignon still touch. The figure in the right lower corner does not touch the line below, and has not the battered appearance of that in the first redrawn type. The stamps are very clearly printed, the lines of shading being distinct.

1907–11. W **33.**

(a) P 12½, 13 (comb)

286	**26**	½d. deep green	2·00	4·50
287		½d. deep blue-green	2·00	4·50
288	**21**	1d. vermilion	3·00	30
		a. Imperf (pair)	£400	
289	**30**	2d. dull blue	29·00	3·50
289*a*		2d. bright blue (3.08)	26·00	17·00
290	**32**	2d. bright blue (4.08)	3·75	30
291	**21**	3d. pale brown (8.08)	20·00	2·75
292		3d. bistre-brown	12·00	3·75
293		4d. yellow (Die I)	11·00	4·50
		a. Die II	40·00	14·00
294		4d. grey-black (Die I) (4.09)	23·00	6·50
		a. Die II	48·00	15·00
295	**23**	5d. dull brown	32·00	18·00
295*a*		5d. sepia (12.09)	19·00	22·00
296	**21**	6d. yellow-green	20·00	4·25
297		6d. bright green	18·00	8·00
298	**24**	1s. violet (1908)	20·00	3·50
299		1s. bright mauve	19·00	3·50
300	**25**	2s. turquoise-green (8.08)	35·00	42·00

Stamps of this issue also exist with the irregular line perforation 12½, 13. This was used when the comb perforation was under repair.

(b) P 13×11 to 12½ (May 1911)

301	**26**	½d. deep green	7·00	13·00

302	**21**	1d. vermilion	7·50	7·00
303	**32**	2d. blue	10·00	9·00
304	**21**	3d. bistre-brown	18·00	25·00
305		4d. grey-black	70·00	90·00
		a. Die II	£140	£160
306	**23**	5d. dull brown	26·00	70·00
307	**21**	6d. yellow-green	38·00	55·00
308	**23**	1s. violet	60·00	85·00

The perforation (*b*) is from a machine introduced to help cope with the demands caused by the introduction of penny postage. The three rows at top (or bottom) of the sheet show varieties gauging 13×11½, 13×11, and 13×12, respectively, these are obtainable in strips of three showing the three variations.

(Litho Govt Ptg Office, Brisbane)

1907 (Oct)–**11**. W **33** (twice sideways). P 12½, 13 (irregular line).

309	**9**	2s.6d. vermilion	42·00	50·00
		a. Dull orange (1910)	75·00	90·00
		b. Reddish orange (1911)	£180	£225
310		5s. rose (12.07)	80·00	65·00
		a. Deep rose (1910)	£100	90·00
		b. Carmine-red (1911)	£250	£275
311		10s. blackish brown	£140	75·00
		a. Sepia (1911)	£425	£300
312		£1 bluish green	£400	£130
		a. Re-entry (R. 1/2)	£800	£300
		b. Retouch (R. 6/4)	£800	£300
		c. Deep bluish green (1910)	£550	£350
		ca. Re-entry (R. 1/2)	£1200	£700
		cb. Retouch (R. 6/4)	£1200	£700
		d. Deep yellowish green (1911)	£1800	£1400
		da. Re-entry (R. 1/2)	£4250	£2750
		db. Retouch (R. 6/4)	£4250	£2750

The 1911 printings are on thinner, whiter paper.

The lithographic stones used for Nos. 272/4 and 309/12 took the full sheet of 30 so the varieties on the £1 recess-printed version also appear on the stamps printed by lithography.

1911. W **33**. Perf irregular compound, 10½ to 12½.

313	**21**	1d. vermilion	£1500	£700

This was from another converted machine, formerly used for perforating Railway stamps. The perforation was very unsatisfactory.

STAMP BOOKLETS

There are very few surviving examples of Nos. SB1/4. Listings are provided for those believed to have been issued with prices quoted for those known to still exist.

1904 (1 Jan)–**09**. Black on a red cover as No. SB1 of New South Wales. Stapled.

SB1	£1 booklet containing 240 1d. in four blocks of 30 and two blocks of 60	
	a. Red on pink cover (1909)	
	b. Blue on pink cover	£15000

1904 (1 Jan). Black on grey cover as No. SB1. Stapled.

SB2	£1 booklet containing 120 2d. in four blocks of 30	

1910 (May). Black on cream cover as Type B **1** of New South Wales. Stapled.

SB3	2s. booklet containing 11 ½d. (No. 301), either in block of 6 plus block of 5 or block of 11 and 18 1d. (No 302), either in three blocks of 6 or block of 6 plus block of 12	

Unsold stock of No. SB3 was uprated with one additional ½d. in May 1911.

1911 (Aug). Red on pink cover as No. SB3. Stapled.

SB4	2s. booklet containing 12 ½d. (No. 301), either in two blocks of 6 or block of 12, and 18 1d. (No. 302), either in three blocks of 6 or block of 6 plus block of 12	£6000
	a. Red on white cover	£5500

POSTAL FISCALS

Authorised for use from 1 January 1880 until 1 July 1892

CANCELLATIONS. Beware of stamps which have had pen-cancellations cleaned off and then had faked postmarks applied. Used prices quoted are for postally used examples between the above dates.

		d. Imperf between (horiz pair)		

Stamps as Type F **5** may not have been issued until after 1 July 1892 when the proper use of duty stamps for postal service was terminated but there are several examples which appear to have genuinely passed through the post during the 1890's. Unless they are dated during 1892 their postal use was certainly unauthorised although they may have been accepted.

Queensland became part of the Commonwealth of Australia on 1 January 1901.

SPECIMEN OVERPRINTS. Those listed are from U.P.U. distributions between 1889 and 1895. Further "Specimen" overprints exist, but these were used for other purposes.

PERKINS BACON "CANCELLED". For notes on these handstamps, showing "CANCELLED" between horizontal bars forming an oval, see Catalogue Introduction.

1

2 Large Star

(Eng Wm Humphrys. Recess P.B.)

1855 (1 Jan–Oct). Printed in London. W **2**. Imperf.

1	**1**	1d. dark green (Oct 1855) (H/S "CANCELLED" in oval £12000)	£9500	£500
2		2d. rose-carmine (*shades*) (H/S "CANCELLED" in oval £11000)	£800	85·00
3		6d. deep blue (Oct 1855) (H/S "CANCELLED" in oval £10000)	£4000	£170
		Prepared and sent to the Colony, but not issued		
4	**1**	1s. violet (H/S "CANCELLED" in oval £20000)	£25000	

A printing of 500,000 of these 1s. stamps was delivered, but, as the colour was liable to be confused with that of the 6d. stamp, this stock was destroyed on 5 June 1857. It is believed that surviving examples of No. 4 come from Perkins Bacon remainders which came on to the market in the late 1890s.

Proofs of the 1d. and 6d. without wmk exist, and these are found with forged star watermarks added, and are sometimes offered as originals.

For reprints of the above and later issues, see note after No. 194.

1856–58. Printed by Printer of Stamps, Adelaide, from Perkins, Bacon plates. W **2**. Imperf.

5	**1**	1d. deep yellow-green (15.6.58)	£9500	£550
6		1d. yellow-green (11.10.58)	£8500	£650

57		6d. Prussian blue (30.7.67)	£850	19·00
		a. Printed on both sides		
58		6d. indigo (1.8.69)	£950	26·00
59	4	10d. on 9d. yellow (B.) (2.2.69)	£1400	35·00
		a. Printed on both sides	—	£1200
60	1	1s. chestnut (April 1868)	£450	20·00
61		1s. lake-brown (3.3.69)	£450	20·00

NOTE. The stamps perf 11½, 12½, or compound of the two, are here combined in one list, as both perforations are on the one machine, and all the varieties may be found in each sheet of stamps. This method of classifying the perforations by the machines is by far the most simple and convenient.

3-PENCE (6) — 7 (=Victoria W **19**)

		a. Printed on both sides	†	£750

No. 68c comes from two sheets on which, it is believed, some stamps showed the surcharge omitted and others the surcharge double. One of the used examples of No. 68c is known postmarked in 1875 and many of the others in 1879.

No. 78a was a trial printing made to test the perforating machine on the new D.L.R. paper.

A used example of No. 70 in imperf between horiz pair is in the Royal Philatelic Collection.

NOTE. Stamps perf 10 all round were produced by a new rotary machine, introduced early in 1870. This machine was not large enough to perforate entire sheets, and perforation therefore had to be completed with the perf 11½-12½ line machine, giving rise to the compound perforations listed as Nos. 99/110.

REPRINTS. In 1884, and in later years, reprints on paper wmkd Crown SA, W **10**, were made of Nos. 1, 2, 3, 4, 12, 13, 14, 15, 19, 24, 27, 28, 32, 33, 34, 35, 36, 37, 38, 40, 43, 44, 49a, 53, 65, 67, 67 with surcharge in red, 70, 71, 72, 73, 78, 79, 81, 83, 86, 90, 118, 119, 120, 121, 122, 155, 158, 159, 164, 181, 182. They are overprinted "REPRINT".

In 1889 examples of the reprints for Nos. 1/3, 12, 15, 19, 27, 32/8, 44, 67, 67 surcharged in red, 70/1, 73, 83, 86, 118, 121/2, 158/9, 164 and 181/2, together with No. 141 overprinted "SPECIMEN", were supplied to the U.P.U. for distribution.

195s/208s		Optd "SPECIMEN" *Set of 14**	£1200	

Variations exist in the length of the words and shape of the letters of the value inscription.

The 2s.6d. dull violet, 5s. rose-pink, 10s., £1 and £5 brown exist perf 11½–12½ with either large or small holes; the 2s.6d. aniline, 5s. rose-carmine, 15s., £2 and 50s. with large holes only and the remainder only with small holes.

Stamps perforated 11½–12½ small holes, are, generally speaking, rather rarer than those with the 1895 (large holes) gauge.

Stamps perf 10 were issued on 20 Dec 1886. Stamps perf 11½–12½ (small holes) are known with earliest dates covering the period from June 1890 to Feb 1896. Earliest dates of stamps with large holes range from July 1896 to May 1902.

*The listing of the "SPECIMEN" set distributed by the UPU comprises stamps with W **13**, perf 10, with an overprint 12¼ mm long, except No. 205 which is perf 11½–12½, with an overprint 15¼ mm long. These should not be confused with the same values with other "SPECIMEN" overprints, usually on stamps perf 11½–12½, and often with W **10**, which were prepared for presentation purposes and for inclusion in sets for sale to collectors.

1891 (1 Jan)–**93**. T **17/18** surch with T **20/1**. W **13**.

277		5s. rose (17.10.02)	£120	75·00
278		10s. green (1.11.02)	£200	90·00
279		£1 blue (1.11.02)	£475	£250
		(b) P 12		
280		3d. olive-green (20 *mm*) (15.4.04)	30·00	3·50
		a. "POSTAGE" omitted; value below "AUSTRALIA"	£4250	
281		4d. orange-red (17½–18 *mm*) (18.2.03)	23·00	2·50
282		6d. blue-green (15 *mm*) (14.11.03)	26·00	14·00
283		9d. rosy lake (2.12.03)	£120	26·00

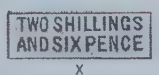
No. 280a comes from the bottom row of the sheet. Other stamps show the value below "AUSTRALIA" with "POSTAGE" over the bottom frame (*Price £950, unused*).

A used example of No. 273 in imperf between horiz pair is in the Royal Philatelic Collection.

PRINTER. Stamp printing in Adelaide ceased in 1909 when the Printer of Stamps, J. B. Cooke, was appointed head of the Commonwealth Stamp Printing Branch in Melbourne. From 9 March 1909 further printings of current South Australia stamps were made in Melbourne.

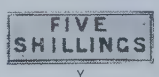
26

V



X

In Type X the letters in the bottom line are slightly larger than in Type V, especially the "A", "S" and "P".



Y

Z

In Type Z the letters "S" and "G" are more open than in Type Y.

Nos. 196/a and 277 are similar to Type Y with all letters thick and regular and the last "S" has the top curve rounded instead of being slightly flattened.

1904–11. As T **19**, but top tablet as T **26** (thick "POSTAGE"). W **13**. P 12.

284		6d. blue-green (27.4.04)	38·00	3·00
		a. Imperf between (vert pair)	£4750	
285		8d. bright ultramarine (4.7.05)	16·00	8·50
		a. Value closer (15¼ *mm*)	65·00	28·00
		b. Dull ultramarine (2.4.08)	24·00	6·50
		ba. Ditto. Value closer (15¼ *mm*)	£100	20·00
286		9d. rosy lake (17–17¼ *mm*) (18.7.04)	22·00	6·50
		a. Value 16½–16¾ mm (2.06)	65·00	7·50
		b. Brown-lake. Perf 12½ small holes (11.3.11)	16·00	24·00
287		10d. dull yellow (8.07)	17·00	23·00
		a. Imperf between (horiz pair)	£2750	£3000
		b. Imperf between (vert pair)	£4000	
288		1s. brown (12.4.04)	30·00	4·00
		a. Imperf between (vert pair)	£2500	
		b. Imperf between (horiz pair)	£2750	
289		2s.6d. bright violet (V.) (14.7.05)	75·00	38·00
		a. Dull violet (X) (8.06)	75·00	27·00
290		5s. rose-scarlet (Y) (13.7.04)	75·00	48·00
		a. Scarlet (Z) (8.06)	75·00	48·00
		b. Pale rose. Perf 12½ (small holes) (Z) (6.10)	£120	70·00
291		10s. green (26.8.08)	£200	£150
292		£1 blue (29.12.04)	£325	£170
		a. Perf 12½ (small holes) (6.10)	£225	£160

The "value closer" variety on the 8d. occurs six times in the sheet of 60. The value normally measures 16½ mm but in the variety it is 15¼ mm.

The 9d., 5s. and £1, perf 12½ (small holes), are late printings made in 1910–11 to use up the Crown SA paper.

No. 286*b* has the value as Type C of the 9d. on Crown over A paper.

27

1905–12. W **27**. P 12×11½ (new comb machine).

293	**24**	½d. pale green (4.07)	15·00	1·25
		a. Yellow-green	8·50	1·25
		b. Thin ready gummed paper (1912)	6·00	8·00
		ba. Mixed perf 12×11½ and 12½	£850	
294	**11**	1d. rosine (2.12.05)	6·50	20
		a. Scarlet (4.11)	4·00	1·25
295	**12**	2d. bright violet (2.2.06)	25·00	30
		aa. Imperf three sides (horiz pair)	£3000	
		a. Mauve (4.08)	7·50	30
296	**22**	2½d. indigo-blue (14.9.10)	9·00	13·00
297	**23**	5d. brown-purple (11.3.08)	28·00	6·50

No. 295aa is perforated at foot.

Three types of the 9d., perf 12½, distinguishable by the distance between "NINE" and "PENCE".

A. Distance 1¾ mm. B. Distance 2¼ mm. C. Distance 2½ mm.

1906–12. T **19** ("POSTAGE" thick as T **26**). W **27**. P 12 or 12½ (small holes).

298		3d. sage-green (19 *mm*) (26.6.06)	15·00	5·50
		a. Imperf between (horiz pair)	†	£5500
		b. Perf 12½. *Sage-green* (17 *mm*) (9.12.09)	16·00	10·00
		c. Perf 12½. *Deep olive* (20 *mm*) (7.10)	75·00	11·00
		d. Perf 12½. *Yellow-olive* (19 *mm*) (16.12.11)	80·00	60·00
		da. Perf 12½. *Bright olive-green* (19–19¾ *mm*) Thin ready gummed paper (8.9.11)	12·00	24·00
		e. Perf 11 (17 *mm*) (1910)	£1000	£700
299		4d. orange-red (10.9.06)	12·00	3·00
		a. Orange	12·00	3·00
		b. Perf 12½. *Orange*	23·00	8·50
		c. Thin ready gummed paper (19.8.12)	23·00	28·00

		a. Perf 12½ (21.4.10)	8·00	9·00
		ab. Perf 12½. Imperf between (vert pair)	£2250	£2500
		b. Thin ready gummed paper (3.12)	10·00	17·00
301		8d. bright ultramarine (P 12½) (8.09)	10·00	21·00
		a. Value closer (8.09)	45·00	85·00
302		9d. brown-lake (3.2.06)	21·00	5·50
		aa. Imperf between (horiz strip of three)	£4750	
		a. Imperf between (vert pair)	£2000	
		b. Deep lake (9.5.08)	48·00	9·00
		c. Perf 12½. *Lake* (A) (5.9.09)	11·00	9·50
		d. Perf 12½. *Lake* (B) (7.09)	40·00	9·50
		e. Perf 12½. *Brown-lake*	40·00	9·50
		ea. Perf 12½. *Deep lake*. Thin paper (C)	32·00	9·50
		f. Perf 11 (1909)	†	£1500
303		1s. brown (30.5.06)	12·00	5·00
		aa. Imperf between (vert pair)	£3250	
		a. Imperf between (horiz pair)	£3500	
		b. Perf 12½ (10.3.10)	10·00	7·50
		c. Thin ready gummed paper (4.8.11)	14·00	14·00
304		2s.6d. bright violet (X) (10.6.09)	75·00	30·00
		a. Perf 12½. *Pale violet* (X) (6.10)	75·00	35·00
		ab. Perf 12½. *Deep purple* (X) Thin ready gummed paper (15.11.12)	£120	£110
305		5s. bright rose (P 12½) (Z) Thin ready gummed paper (24.4.11)	£130	£130

The "value closer" variety of the 8d. occurred 11 times in the sheet of 60 in the later printing only. On No. 301 the value measures 16½ mm while on No. 301a it is 15¼ mm.

The 1s. brown, perf compound of 11½ and 12½, formerly listed is now omitted, as it must have been perforated by the 12 machine, which in places varied from 11½ to 13. The 4d. has also been reported with a similar perforation.

STAMP BOOKLETS

There are very few surviving examples of Nos. SB1/4. Listings are provided for those believed to have been issued with prices quoted for those known still to exist.

1904 (1 Jan)–**09**. Black on red cover as No. SB1 of New South Wales. Stapled.

SB1	£1 booklet containing 240 1d. in four blocks of 30 and two blocks of 60	
	a. Red on pink cover (1909)	
	b. Blue on pink cover	£15000

1904 (1 Jan). Black on grey cover as No. SB1. Stapled.

SB2	£1 booklet containing 120 2d. in four blocks of 30	

1910 (May). Black on cream cover as Type B **1** of New South Wales. Stapled.

SB3 2s. booklet containing 11 ½d. (No. 241), either in block of 6 plus block of 5 or block of 11, and 18 1d. (No. 176a), either in three blocks of 6 or block of 6 plus block of 12 . ...

Unsold stock of No. SB3 was uprated with one additional ½d. in May 1911.

1911 (Aug). Red on pink cover as No. SB3. Stapled.

SB4 2s. booklet containing 12 ½d. (No. 241), either in two blocks of 6 or block of 12, and 18 1d. (No. 176a), either in three blocks of 6 or block of 6 plus block of 12 ..... £7000

OFFICIAL STAMPS

A. Departmentals

Following suspected abuses involving stamps supplied for official use it was decided by the South Australian authorities that such supplies were to be overprinted with a letter, or letters, indicating the department of the administration to which the stamps had been invoiced.

The system was introduced on 1 April 1868 using overprints struck in red. Later in the same year the colour of the overprints was amended blue, and, during the latter months of 1869, to black.

In 1874 the Postmaster-General recommended that this some-what cumbersome system be replaced by a general series of "O.S." overprints with the result that the separate accounting for the Departmentals ceased on 30 June of that year. Existing stocks continued to be used, however, and it is believed that much of the residue was passed to the Government Printer to pay postage on copies of the *Government Gazette*.

We are now able to provide a check list of these most interesting issues based on the definitive work. *The Departmental Stamps of South Australia* by A. R. Butler, FRPSL, RDP, published by the Royal Philatelic Society, London in 1978.

No attempt has been made to assign the various overprints to the catalogue numbers of the basic stamps, but each is clearly identified by both watermark and perforation. the colours are similar to those of the contemporary postage stamps, but there can be shade variations. Errors of overprint are recorded in footnotes, but not errors occurring on the basic stamps used.

Most departmental overprints are considered to be scarce to rare in used condition, with unused examples, used multiples and covers being regarded as considerable rarities.

Forgeries of a few items do exist, but most can be readily identified by comparison with genuine examples. A number of forged overprints on stamps not used for the genuine issues also occur.

The 6d. and 1s. (W **2**. Roul) with red overprint are known showing the error "G" for "C".

C.Sgn. (Colonial Surgeon)

Optd in red. W **2**. 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul)

Optd in black. (*a*) W **2**. 2d. D.L.R. (Roul), 4d. (P 10), 4d. (P 10×11½–12½), 6d. (Roul), 6d. (P 11½–12½×Roul) 6d. (P 11½–12½)

(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 11½–12½×Roul), 2d. (P 10×Roul), 2d. D.L.R. (P 10)

Two types of overprint exist on the 2d. D.L.R., the second type having block capitals instead of the serifed type used for the other values.

D.B. (Destitute Board)

Optd in red. W **2**. 1d. (Roul), 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul), 1s. (Roul)

Optd in blue. (*a*) W **2**. 2d. D.L.R. (Roul), 4d. (P 11½–12½), 6d. (Roul)

(*b*) W **10**. Roul. 2d. D.L.R.

Optd in black. (*a*) W **2**. 1d. (P 11½–12½), 4d. (P 11½–12½), 4d. (P 10), 6d. (P 10×11½–12½) 1s (P 10)

(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 11½–12½), 2d. D.L.R. (P 10), 2d. D.L.R. (P 10×11½–12½)

The 2d. D.L.R. (W **10**. P 10) with black overprint is known showing the stop omitted after "D".

D.R. (Deeds Registration)

Optd in red. W **2**. Roul, 2d., 6d.

E. (Engineer)

Optd in red. W **2**. 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul), 1s. (Roul)

Optd in blue. (*a*) W **2**. Roul. 1s.

(*b*) W **10**. Roul. 2d. D.L.R.

Optd in black. (*a*) W **2**. 4d. (P 11½–12½), 4d. (P 10), 4d. (P 10×11½–12½), 6d. (P 11½–12½), 1s. (P 11½–12½×Roul), 1s. (P 11½–12½), 1s. (P 10×11½–12½)

(*b*) W **7**. P 10. 4d.

(*c*) W **10**. P 10. 2d. D.L.R.

E.B. (Education Board)

Optd in red. W **2**. 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul)

Optd in blue. (*a*) W **2**. Roul. 4d., 6d.

(*b*) W **10**. Roul. 2d. D.L.R.

Optd in black. (*a*) W **2**. 2d. D.L.R. (Roul), 4d (Roul), 4d. (P 11½–12½), 4d. (P 10), 6d. (P 11½–12½×Roul), 6d. (P 11½×12½)

(*b*) W **7**. P 10. 2d. D.L.R.

(*c*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10), 2d. D.L.R. (P 10×11½–12½)

G.F. (Gold Fields)

Optd in black. (*a*) W **2**. Roul. 6d.

(*b*) W **10**. 2d. D.L.R. (P 10×Roul), 2d. D.L.R. (P 10)

G.P. (Government Printer)

Optd in red. W **2**. Roul. 1d., 2d., 6d., 1s.

Optd in blue. (*a*) W **2**. Roul. 1d., 6d., 1s., 2s.

(*b*) W **10**. Roul. 2d. D.L.R.

Optd in black. (*a*) W **2**. 1d. (Roul), 1d. (P 11½–12½×Roul), 1d. (P 11½–12½) 1d. (P 10) 1d. (P 10×11½–12½), 6d. (P 11½–12½×Roul), 1s. (P 10×11½–12½), 2s. (Roul), 2s. (P 11½–12½) 2s. (P 10×11½–12½)

(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10)

The 1d. and 1s. (W **2**. Roul) with red overprint are known showing "C.P." instead of "G.P.".

G.S. (Government Storekeeper)

Optd in red. W **2**. Roul. 2d.

G.T. (Goolwa Tramway)

Optd in red. W **2**. 1d. (Roul), 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul), 1s. (Roul)

Optd in black. (*a*) W **2**. 2d. D.L.R. (Roul), 4d. (P 11½–12½)

(*b*) W **10**. Roul. 2d. D.L.R.

The 2d. and 6d. (both W **2**. Roul) with red overprint are known showing the stop omitted after "T". The 6d, and 1s. (W **2**. Roul) with red overprint are known showing "C.T." instead of "G.T.".

H. (Hospitals)

Optd in black. (*a*) W **2**. P 10×11½–12½. 4d.

(*b*) W **7**. P 10. 2d. D.L.R.

(*c*) W **10**. 2d. D.L.R. (P 10), 2d. D.L.R. (P 10×11½–12½)

H.A. (House of Assembly)

Optd in red. W **2**. 1d. (Roul), 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul), 1s. (Roul)

Optd in black. (*a*) W **2**. 1d. (P 11½–12½), 1d. (P 10) 1d. (P 10×11½–12½), 4d. (P 11½–12½), 4d. (P 10) 6d. (Roul), 6d. (P 11½–12½) 1s. (P 11½–12½×Roul), 1s. (P 11½–12½)

(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10)

I.A. (Immigration Agent)

Optd in red. W **2**. 1d. (Roul), 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul)

I.E. (Intestate Estates)

Optd in black. W **10**. P 10. 2d. D.L.R.

I.S. (Inspector of Sheep)

Optd in red. W **2**. Roul. 2d., 6d.

Optd in blue. W **2**. P 11½–12½. 6d.

Optd in black. (*a*) W **2**. 2d. D.L.R. (Roul), 6d. (P 11½–12½×Roul)

(*b*) W **10**. 2d. D.L.R. (Roul). 2d. D.L.R. (P 10)

L.A. (Lunatic Asylum)

Optd in red. W **2**. 1d. (Roul), 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul), 1s. (Roul)

Optd in black. (*a*) W **2**. 4d. (P 11½–12½), 4d. (P 10), 4d. (P 10×11½–12½), 6d. (P 11½–12½), 1s. (P 11½–12½), 2s. (Roul)

(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10)

L.C. (Legislative Council)

Optd in red. W **2**. Roul. 2d., 6d.

Optd in black. (*a*) W **2**. Roul. 6d.

(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10×Roul)

The 2d. and 6d. (both W **2**. Roul) with red overprint are known showing the stop omitted after "C".

L.L. (Legislative Librarian)

Optd in red. W **2**. 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul)

Optd in black. (*a*) W **2**. P 11½–12½. 6d.

(*b*) W **10**. P 10. 2d. D.L.R.

The 2d. and 6d. (both W **2**. Roul) with red overprint are known showing the stop omitted from between the two letters.

L.T. (Land Titles)

Optd in red. W **2**. 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul), 1s. (Roul)

Optd in blue. W **10**. Roul. 2d. D.L.R.

Optd in black. (*a*) W **2**. 4d. (P 11½–12½), 4d. (P 10), 4d. (P 10×11½–12½), 6d. (P 11½–12½×Roul), 6d. (P 11½–12½), 6d. (P 10), 6d. (P 10×11½–12½)

(*b*) W **7**. P 10. 2d. D.L.R.

(*c*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10)

The 2d. and 6d. (both W **2**. Roul) with red overprint are known showing the stop omitted after "T".

M. (Military)

Optd in red. W **2**. Roul. 2d., 6d., 1s.

Optd in black. W **2**. 6d. (P 11½–12½×Roul), 1s. (P 11½–12½×Roul), 2s. (Roul)

M.B. (Marine Board)

Optd in red. W **2**. 1d. (Roul), 2d. (Roul), 4d. (Roul), 4d. (P 11½–12½), 6d. (Roul), 1s. (Roul)

Optd in black. (*a*) W **2**. 1d. (Roul), 1d. (P 11½–12½), 2d. D.L.R. (Roul), 4d. (P 11½–12½×Roul), 4d. (P 11½–12½), 4d. (P 10), 4d. (P 10×11½–12½), 6d. (Roul), 6d. (P 11½–12½), 6d. (P 10), 6d. (P 10×11½–12½), 1s. (P 11½–12½×Roul), 1s. (P 11½–12½) 1s. (P 10), 1s. (P 10×11½–12½)

(*b*) W **7**. P 10. 4d.

(*c*) W **10**. Roul. 2d. D.L.R.

M.R. (Manager of Railways)

Optd in red. W **2**. Roul. 2d., 6d.

Optd in black. (*a*) W **2**. 1d. (P 11½–12½), 1d. (P 10), 2d. D.L.R. (Roul), 4d. (Roul), 4d. (P 11½–12½), 6d. (P 11½–12½×Roul), 1s. (P 11½–12½×Roul), 2s. (P 11½–12½ 1, 2s. (P 10×11½–12½)

(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10), 2d. D.L.R. (P 10×11½–12½)

M.R.G. (Main Roads Gambierton)

Optd in red without stops. W **2**. Roul. 2d., 6d.

Optd in blue without stops. W **10**. Roul. 2d. D.L.R.

Optd in black without stops. W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (Roul 10)

Optd in black with stops. W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (Roul 10)

The 2d. D.L.R. (W **10**. P 10) with black overprint is known showing the stops omitted after "M" and "R".

N.T. (Northern Territory)

Optd in black (*a*) W **2**. P 11½–12½. 1d., 3d. on 4d., 6d., 1s.

(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10)

O.A. (Official Assignee)

Optd in red. W **2**. 2d. (Roul), 4d. (P 11½–12½)

Optd in blue. W **10**. Roul. 2d. D.L.R.

Optd in black. (*a*) W **2**. P 10. 4d.

(*b*) W **7**. P 10. 2d. D.L.R.

(*c*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10×roul), 2d. D.L.R. (P 10)

P. (Police)

Optd in blue. (*a*) W **2**. Roul. 6d.
(*b*) W **10**. Roul. 2d. D.L.R.
Optd in black. (*a*) W **2**. 6d. (P 11½–12½×Roul), 6d. (P 11½–12½), 6d. (P 10)
(*b*) W **7**. P 10. 2d. D.L.R.
(*c*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 11½–12½), 2d. D.L.R. (P 11½–12½×Roul), 2d. D.L.R. (P 10×Roul), 2d. D.L.R. (P 10), 2d. D.L.R. (P 10×11½–12½)

P.A. (Protector of Aborigines)

Optd in red. W **2**. Roul. 2d., 6d.
Optd in black. (*a*) W **2**. P. 2d. D.L.R., 6d.
(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10)

P.O. (Post Office)

Optd in red. W **2**. Roul. 1d., 2d., 6d., 1s.
Optd in blue. (*a*) W **2**. Roul. 2d.
(*b*) W **10**. Roul. 2d. D.L.R.
Optd in black. (*a*) W **2**. 1d. (P 10×11½–12½), 2d. D.L.R. (Roul), 2d. D.L.R. (P 11½–12½×Roul), 4d. (P 11½–12½), 6d. (Roul), 6d. (P 11½×12½), 1s. (P 11½–12½×Roul, 1s. (P 11½×12½) 1s. (P 11½–12½), 1s. (P 10) 1s. (P 10×11½–12½)
(*b*) W **10**. 2d. D.L.R. (Roul), 2d. (P 11½–12½×Roul), 2d. D.L.R. (P 10×Roul), 2d. D.L.R. (P 10)
The 4d. (W **2**. P 11½–12½) with black overprint is known showing the stop omitted after "O".

P.S. (Private Secretary)

Optd in red. W **2**. 1d. (Roul), 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul), 1s. (Roul)

P.W. (Public Works)

Optd in red without stop after "W". W **2**. Roul. 2d., 6d., 1s.
Optd in black. (*a*) W **2**. 2d. D.L.R. (Roul), 4d. (P 10), 6d. (Roul), 6d. (P 11½–12½), 1s. (P 11½–12½×Roul)
(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10)

R.B. (Road Board)

Optd in red. W **2**. 1d. (Roul), 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul), 1s. (Roul)
Optd in blue without stops. W **10**. Roul. 2d D.L.R
Optd in black. (*a*) W **2**. 1d. (P 11½–12½×Roul), 1d. (P 10), 4d. (Roul), 4d. (P 10), 6d. (P 10), 2s. (Roul)
(*b*) W **7**. P 10. 2d. D.L.R.
(*c*) W **10**. 2d. D.L.R. (Roul), 2d. (D.L.R.) (P 10×Roul), 2d. D.L.R. (P 10)
The 6d. (W **2**. Roul) with red overprint is known showing the stop omitted after "B".

R.G. (Registrar-General)

Optd in red. W **2**. Roul. 2d., 6d., 1s.
Optd in blue. (*a*) W **2**. P 11½–12½×Roul. 6d.
(*b*) W **10*.** 2d. D.L.R. (Roul), 2d. D.L.R. (P 11½–12½×Roul)
Optd in black. (*a*) W **2*.** 2d. D.L.R. (Roul), 6d. (P 10), 6d. (P 10×11½–12½), 1s. (P 11½–12½×Roul), 1s. (P 10)
(*b*) W **7**. P 10. 2d. D.L.R.
(*c*) W **10*.** 2d. D.L.R. (Roul), 2d. D.L.R. (P 10×Roul), 2d. D.L.R. (P 10), 2d. D.L.R. (P 10×11½–12½)
The 2d. (W **2*.** Roul) with red overprint is known showing "C" for "G".

S. (Sheriff)

Optd in red. W **2**. Roul. 2d., 6d.
Optd in blue. W **10**. Roul. 2d. D.L.R.
Optd in black. (*a*) W **2**. 6d. (Roul), 6d. (P 11½–12½×Roul), 6d. (P 11½–12½), 6d. (P 10)
(*b*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10×Roul), 2d. D.L.R. (P 10)

S.C. (Supreme Court)

Optd in red. W **2**. Roul. 2d. 6d.
Optd in black. W **10**. P 10. 2d. D.L.R.

S.G. (Surveyor-General)

Optd in red. W **2*.** 2d. (Roul), 4d. (P 11½–12½), 6d. (Roul)
Optd in blue. (*a*) W **2**. Roul. 4d.
(*b*) W **10**. Roul. 2d. D.L.R.
Optd in black. (*a*) W **2**. 2d. D.L.R. (Roul), 4d. (P 11½–12½), 4d. (P 10) 4d. (P 10×11½–12½), 6d. (P 11½–12½×Roul), 6d. (P 11½–12½), 6d. (P 10), 6d. (P 10×11½–12½)
(*b*) W **7**. P 10. 2d. D.L.R.
(*c*) W **10*.** 2d. D.L.R. (Roul), 2d. D.L.R. (P 11½–12½), 2d. D.L.R. (P 10×Roul), 2d. D.L R (P 10)
The 2d. (W **7** and W **10**. P 10) with black overprint are known showing "C" for "G".

S.M. (Stipendiary Magistrate)

Optd in red. W **2**. Roul. 1d., 2d., 4d., 6d., 1s.
Optd in blue. (*a*) W **2**. Roul. 2d., 4d., 6d.
(*b*) W **10**. Roul. 2d. D.L.R.
Optd in black. (*a*) W **2**. 1d. (P 11½–12½), 1d. (P 10), 2d. D.L.R. (Roul), 4d. (Roul), 4d. (P 11½–12½×Roul), 4d. (P 11½–12½), 4d. (P 10), 4d. (P 10×11½–12½), 6d. (P 11½–12½×Roul), 6d. (P 11½–12½), 6d. (P 10), 6d. (P 10×11½–12½), 1s. (P 11½–12½×Roul)
(*b*) W **7**. P 10. 2d. D.L.R.
(*c*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 11½–12½), 2d. D.L.R. (P 10×Roul) 2d. D.L.R. (P 10), 2d D.L.R. (P 10×11½–12½)
The 2d. and 4d. (both W **2**. Roul) with red overprint are known showing the stop omitted after "M".

S.T. (Superintendent of Telegraphs)

Optd in red. W **2**. Roul. 2d., 6d.
Optd in blue. W **10**. Roul. 2d. D.L.R.
Optd in black. (*a*) W **2**. Roul. 2d. D.L.R., 6d.
(*b*) W **7**. P 10. 2d. D.L.R.
(*c*) W **10*.** 2d. D.L.R. (Roul), 2d. D.L.R. (P 10×Roul), 2d. D.L.R. (P 10)
The 2d. and 6d. (both W **2**. Roul) with red overprint are known showing the stop omitted after "T".

T. (Treasury)

Optd in red. W **2*.** 1d. (Roul), 2d. (Roul), 4d. (P 11½–12½×Roul), 6d. (Roul), 1s. (Roul)
Optd in blue. (*a*) W **2**. Roul. 1d., 4d., 6d.
(*b*) W **10**. Roul. 2d. D.L.R.
Optd in black. (*a*) W **2**. 1d. (P 10), 2d. D.L.R. (Roul), 4d. (Roul), 4d. (P 11½–12½), 4d. (P 10), 6d. (Roul), 6d. (P 11½–12½), 1s. (P 11½–12½×Roul), 1s. (P 10×11½–12½), 2s. (Roul), 2s. (P 11½–12½), 2s. (P 10×11½–12½)
(*b*) W **7**. P 10. 2d. D.L.R.
(*c*) W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10)

T.R. (Titles Registration)

Optd in black. (*a*) W **2**. 4d. (P 11½–12½), 4d. (P 10×11½–12½), 6d. (P 11½–12½), 1s. (P 11½–12½)
(*b*) W **10*.** P 10. 2d. D.L.R.

V. (Volunteers)

Optd in black. (*a*) W **2*.** 4d. (P 10×11½–12½), 6d. (P 11½–12½), 1s. (P 11½–12½)
(*b*) W **10*.** P 10. 2d. D.L.R.
(*c*) W **10*.** 2d. D.L.R. (Roul), 2d. D.L.R. (P 10×Roul), 2d. D.L.R. (P 10)
The 2d. (W **10*.** P 10×Roul) overprinted in black is only known showing the stop omitted after "V".

VA. (Valuator of Runs)

Optd in black without stop after "V". (*a*) W **2*.** Roul. 4d.
(*b*) W **10*.** P 10. 2d. D.L.R.

VN. (Vaccination)

Optd in black without stop after "V". W **2*.** 4d. (P 10), 4d. (P 10×11½–12½)

W. (Waterworks)

Optd in red. W **2**. Roul. 2d.
Optd in black. W **10**. 2d. D.L.R. (Roul), 2d. D.L.R. (P 10)
The 2d. (W **2**. Roul) with red overprint is known showing the stop omitted after "W".

B. General

O.S. (O 1) **O.S.** (O 2)

1874–77. Optd with Type O **1**. W **2**.

		(a) P 10

SPECIMEN OVERPRINTS. Those listed are from U.P.U. distributions between 1892 and 1904. Further "Specimen" overprints exist, but these were used for other purposes.

1 2 3

(Eng C.W. Coard. Recess H. and C. Best at the *Courier* newspaper, Hobart)

1853 (1 Nov). 24 varieties in four rows of six each. No wmk. Imperf.

		(a) Medium soft yellowish paper with all lines clear and distinct		
1	**1**	1d. pale blue	£11000	£1500
2		1d. blue	£11000	£1500
		(b) Thin hard white paper with lines of the engraving blurred and worn		
3	**1**	1d. pale blue	£10000	£1300
4		1d. blue	£10000	£1300

1853 (1 Nov). No wmk. Imperf. In each plate there are 24 varieties in four rows of six each.

		(a) Plate I. Finely engraved. All lines in network and background thin, clear, and well defined		
		(i) First state of the plate, brilliant colours		
5	**2**	4d. bright red-orange	£8500	£1000
6		4d. bright brownish orange	—	£1300
		(ii) Second state of plate, with blurred lines and worn condition of the central background		
7	**2**	4d. red-orange	£6000	£475
8		4d. orange	£5500	£450
9		4d. pale orange	—	£450
		(b) Plate II. Coarse engraving, lines in network and background thicker and blurred		
10	**2**	4d. orange	£5500	£425
11		4d. dull orange	£5500	£375
12		4d. yellowish orange	£5500	£375

In the 4d. Plate I, the outer frame-line is thin all round. In Plate II it is, by comparison with other parts, thicker in the lower left angle.

The 4d. is known on vertically laid paper from proof sheets. Examples from Plate I have the lines close together and those from Plate II wide apart (Price £10,000 *unused*).

In 1879 reprints were made of the 1d. in blue and the 4d., Plate I, in brownish yellow, on thin, tough, white wove paper, and perforated 11½. In 1887, a reprint from the other plate of the 4d. was made in reddish brown and black on thick white paper, imperforate, and in 1889 of the 1d. in blue and in black, and of the 4d. (both plates) in yellow and in black on white card, imperforate. As these three plates were defaced after the stamps had been superseded, all these reprints show two, or three thick strokes across the Queen's head.

All three plates were destroyed in July 1950.

PERKINS BACON "CANCELLED". For notes on these handstamps, showing "CANCELLED" between horizontal bars forming an oval, see Catalogue Introduction.

(Eng W. Humphrys, after water-colour sketch by E. Corbould. Recess P.B.)

1855 (17 Aug–16 Sept). Wmk Large Star. W w **1**. Imperf.

14	**3**	1d. carmine (16.9) (H/S "CANCELLED" in oval £12000)	£10000	£900
15		2d. deep green (16.9)	£5500	£550
16		2d. green (16.9) (H/S "CANCELLED" in oval £13000)	£5500	£450
17		4d. deep blue	£4750	£130
18		4d. blue (H/S "CANCELLED" in oval £12000)	£4750	£130

Proofs of the 1d. and 4d. on thick paper, *without watermark*, are sometimes offered as the issued stamps. The 6d. dull lilac on this watermark was prepared, but not issued. Examples exist from a creased proof sheet (*Price £750 unused*).

(Recess H. and C. Best, Hobart, from P.B. plates)

1856 (Apr)–**57**. No wmk. Imperf.

		(a) Thin white paper		
19	**3**	1d. pale brick-red (4.56)	£13000	£650
20		2d. dull emerald-green (1.57)	£16000	£950

22		4d. blue (5.57)	£2500	£130
23		4d. pale blue (5.57)	—	£170
		(b) Pelure paper		
24	**3**	1d. deep red-brown (11.56)	£8000	£750

4 7 8

(Recess H. Best (August 1857–May 1859), J. Davies (August 1859–March 1862), J. Birchall (March 1863), M. Hood (October 1863–April 1864), Govt Printer (from July 1864), all from P.B. plates)

1857 (Aug) - **67**. Wmk double-lined numerals "1", "2" or "4" as W **4** on appropriate value. Imperf.

25	**3**	1d. deep red-brown	£1000	50·00
26		1d. pale red-brown	£600	40·00
27		1d. brick-red (1863)	£425	40·00
28		1d. dull vermilion (1865)	£350	35·00
29		1d. carmine (1867)	£350	30·00
30		2d. dull emerald-green	—	£130
31		2d. green	—	60·00
32		2d. yellow-green	£900	£110
33		2d. deep green (1858)	£850	70·00
34		2d. slate-green (1860)	£375	85·00
35		4d. deep blue	—	85·00
36		4d. pale blue	£400	26·00
37		4d. blue	£400	28·00
38		4d. bright blue	£400	28·00
		a. Printed on both sides	†	—
39		4d. cobalt-blue	—	85·00

Printings before July 1864 were all carried out at the *Courier* printing works which changed hands several times during this period.

CANCELLATIONS. Beware of early Tasmanian stamps with pen-cancellations cleaned off and faked postmarks applied.

(Recess P.B.)

1858. Wmk double-lined numerals "6" or "12" as W **4**. Imperf.

40	**7**	6d. dull lilac (H/S "CANCELLED" in oval £13000)	£1200	90·00
41	**8**	1s. vermilion (*shades*) (H/S "CANCELLED" in oval £12000)	£800	80·00

(Recess J. Davies (March 1860), J. Birchall (April 1863), Govt Printer (from February 1865), all from P.B. plates)

1860 (Mar)–**67**. Wmk double-lined "6" as W **4**. Imperf.

44	**7**	6d. dull slate-grey	£800	85·00
45		6d. grey	—	90·00
46		6d. grey-violet (4.63)	£700	85·00
47		6d. dull cobalt (2.65)	£1100	£140
48		6d. slate-violet (2.65)	£800	75·00
49		6d. reddish mauve (4.67)	£1100	£180

In 1871 reprints were made of the 6d. (in mauve) and the 1s. on white wove paper, and perforated 11½. They are found with or without "REPRINT". In 1889 they were again reprinted on white card, imperforate. These later impressions are also found overprinted "REPRINT" and perforated 11½.

PERFORATED ISSUES. From 1 October 1857 the Tasmania Post Office only supplied purchasers requiring five or more complete sheets of stamps. The public obtained their requirements, at face value, from licensed stamp vendors, who obtained their stocks at a discount from the Post Office.

From 1863 onwards a number of the stamp vendors applied their own roulettes or perforations. The Hobart firm of J. Walch & Sons achieved this so successfully that they were given an official contract in July 1869 to perforate sheets for the Post Office. The Government did not obtain a perforating machine until late in 1871.

1863–71. Double-lined numeral watermarks. Various unofficial roulettes and perforations.

96	7	6d. grey-violet	—	£1500

(e) Oblique roulette 14–15, probably at Cleveland (1867–69)

97	3	1d. brick-red	—	£1000
98		1d. dull vermilion	—	£1000
99		1d. carmine	—	£1000
100		2d. yellow-green	—	£1400
101		4d. pale blue	—	£1000
102	7	6d. grey-violet	—	£1800
103	8	1s. vermilion	—	£2250

(f) Pin-perf 5½ to 9½ at Longford (1867)

104	3	1d. carmine	£1000	£300
105		2d. yellow-green		
106		4d. bright blue	—	£550
107	7	6d. grey-violet	—	£550
108		6d. reddish mauve	—	£1200
109	8	1s. vermilion		

(g) Pin-perf 12 at Oatlands (1867)

110	3	4d. blue		

(h) Pin-perf 13½ to 14½ (1867)

111	3	1d. brick-red	—	£700
112		1d. dull vermilion	—	£700
113		1d. carmine		
114		2d. yellow-green	—	£1200
115		4d. pale blue	—	£600
116	7	6d. grey-violet	—	£1200
117	8	1s. vermilion		

(j) Serrated perf 19 at Hobart (1868–69)

118	3	1d. carmine (*pen-cancel* £20)	£750	£225
119		2d. yellow-green	—	£750
120		4d. deep blue	£1700	£225
121		4d. cobalt-blue	—	£225
122	7	6d. slate-violet	—	£1000
123	8	1s. vermilion		

(k) Roul 4½, possibly at Macquarie River (1868)

124	3	4d. blue		
125	7	6d. reddish mauve		
126	8	1s. vermilion		

An example of the 1d. carmine is known perforated 10 on three sides and serrated 19 on the fourth.

These local separations (Nos. 91/126) were sometimes applied only between the horizontal rows or vertical columns of sheets, so that pairs can be found 'imperforate vertically' or 'imperforate horizontally'.

For stamps perforated 11½ or 12 by the Post Office see Nos. 134a/43.

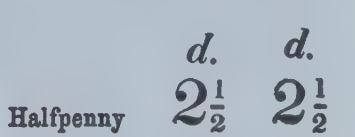
SPECIMEN AND PRESENTATION REPRINTS OF TYPE 11. In 1871 the 1d., 2d., 3d., 4d. blue, 9d., 10d. and 5s. were reprinted on soft white wove paper to be followed, in 1879, by the 4d. yellow and 8d. on rough white wove. Both these reprintings were perforated 11½. In 1886 it was decided to overprint remaining stocks with the word "REPRINT".

In 1889 Tasmania commenced sending sample stamps to the U.P.U. in Berne and a further printing of the 4d. blue was made, imperforate, on white card. This, together with the 5s. in mauve on white card, both perforated 11½ and overprinted "REPRINT", were included in presentation sets supplied to members of the states' legislatures in 1901.



(17) (18) (2¼ *mm* between "d", and "2") (19) (3½ *mm* between "d" and "2")

DIFFERENCES BETWEEN LITHOGRAPHED AND TYPOGRAPHED PRINTINGS OF TYPES 22/9

LITHOGRAPHED	TYPOGRAPHED
General appearance fine.	*Comparatively crude and coarse appearance.*
½d. All "V over Crown" wmk.	All "Crown over A" wmk.
1d. The shading on the path on the right bank of the river consists of very fine dots. In printings from worn stones the dots hardly show.	The shading on the path is coarser, consisting of large dots and small patches of colour.
The shading on the white mountain is fine (or almost absent in many stamps).	The shading on the mountain is coarse, and clearly defined.
2d. Three rows of windows in large building on shore, at extreme left, against inner frame.	Two rows of windows.
3d. Clouds very white.	Clouds dark.
Stars in corner ornaments have long points.	Stars have short points.
Shading of corner ornaments is defined by a coloured outer line.	Shading of ornaments terminates against white background.
4d. Lithographed only.	—
6d. No coloured dots at base of waterfall.	Coloured dots at base of waterfall.
Outer frame of value tablets is formed by outer line of design.	Thick line of colour between value tablets and outer line.
	Small break in inner frame below second "A" of "TASMANIA".

(Litho, using transfers from D.L.R. plates, Victoria Government Printing Office, Melbourne)

1902 (Jan)–**05**. Wmk V over Crown, W w **10** (sideways on ½d., 2d.). P 12½.

		d. Deep rose-lilac (4.05)	18·00	1·75
		da. Perf 11	10·00	2·50
		db. Perf comp of 12½ and 11	£225	£100
		s. Optd "SPECIMEN"	£130	

As the V and Crown paper was originally prepared for stamps of smaller size, portions of two or more watermarks appear on each stamp.

We only list the main groups of shades in this and the following issues. There are variations of shade in all values, particularly in the 2d. where there is a wide range, also in the 1d. in some issues.

(Typo, using electrotyped plates, Victoria Govt Ptg Office, Melbourne)

1902 (Oct)–**04**. Wmk V over Crown, W w **10**. P 12½.

		a. Perf 11	95·00	9·00
		b. Perf comp of 12½ and 11	£500	£500

Stamps with perf compound of 12½ and 12 or 11 and 12 are found on sheets which were sent from Melbourne incompletely perforated along the outside edge of the pane or sheet. The missing perforations were applied in Hobart using a line machine measuring 12 (11.8 is the exact gauge). This perforation can only occur on one side of a stamp.

(Typo, using electrotyped plates, Victoria Govt Ptg Office, Melbourne).

1905 (Aug)–**11**. Wmk Crown over A, W w **11** (sideways on horiz designs). P 12½.

		c. Perf comp of 12½ and 12	£250	
258		10s. mauve and brown (1906)	£275	£275
		a. Perf 11	£450	£450
		b. Perf comp of 12½ and 12	£750	

The note after No. 248 re perfs compound with perf 12, also applies here.

(Typo, using stereotyped plates, Commonwealth Stamp Ptg Branch, Melbourne)

1911 (Jan). Wmk Crown over A, W w **11** (sideways). P 12½.

259	**24**	2d. bright violet	19·00	7·00
		a. Wmk upright	45·00	12·00
		b. Perf 11	9·50	5·50
		ba. Wmk upright	40·00	10·00
		c. Perf comp of 12½ and 11	£130	38·00
		d. Perf comp of 12½ and 12	£475	

Stamps from this stereotyped plate differ from No. 251 in the width of the design (33 to 33¾ *mm*, against just over 32 *mm*), in the taller, bolder letters of "TASMANIA", in the slope of the mountain in the left background, which is clearly outlined in white, and in the outer vertical frame-line at left, which appears "wavy". Compare Nos. 260, etc, which are always from this plate.

1912 (Oct). No. 259 surch with T **32**. P 12½.

(d) On No. 225

F39	**20**	£1 green and yellow	£250	£200
		a. Opt double, one vertical	£450	£425

It was not intended that stamps overprinted with Type F **6** should be used for postal purposes, but an ambiguity in regulations permitted such usage until all postal fiscal stamps were invalidated for postal purposes on 30 November 1900.
F38 is known with "REVENUE" inverted, fiscally used.
Printings of some of the above with different watermarks, together with a 2d. as Nos. F36/8, did not appear until after the stamps had become invalid for postal purposes.

Tasmania became part of the Commonwealth of Australia on 1 January 1901.

Nos. D9/10	—
Nos. D11/37	*from* × 30

During the expansion of the Australian settlements in the fourth decade of the nineteenth century the growing population of the Port Phillip District in the south of New South Wales led to a movement for its creation as a separate colony. This aspiration received the approval of the British Government in 1849, but the colony of Victoria, as it was to be called, was not to be created until 1 July 1851.

In the meantime the New South Wales Legislative Council voted for the introduction of postal reforms, including the use of postage stamps, from 1 January 1850, and this act was also to apply to the Port Phillip District where stamps inscribed "VICTORIA" would predate the creation of that colony by eighteen months.

Until the end of 1859 the stamps of Victoria, with the exception of Nos. 40 and 73, were produced by local contractors working under the supervision of the colonial administration.

SPECIMEN OVERPRINTS. Those listed are from U.P.U. distributions in 1892 and 1897. Further "Specimen" overprints exist, but these were used for other purposes.

HAM PRINTINGS. The first contractor was Thomas Ham of Melbourne. He was responsible for the initial printings of the "Half-Length" 1d., 2d. and 3d., together with the replacement "Queen-on-Throne" 2d. The first printings were produced from small sheets of 30 (5×6) laid down directly from the engraved die which showed a single example of each value. Subsequent printings, of which No. 4*a* was the first, were in sheets of 120 (two panes of 60) laid down using intermediate stones of various sizes. Impressions from the first printings were fine and clear, but the quality deteriorated when intermediate stones were used.

1 Queen Victoria ("Half Length")

(Lithographed by Thomas Ham, Melbourne)

1850 (3 Jan)–**53**. Imperf.

1d. Thin line at top

2d. Fine border and background

3d. White area to left of orb

(a) Original state of dies: 1d. (tops of letters of "VICTORIA" reach to top of stamp); 2d. (fine border and background); 3d. (thicker white outline around left of orb, central band of orb does not protrude at left). No frame-lines on dies

1	**1**	1d. orange-vermilion	£32000	£10000
		a. Orange-brown	†	£2250
		b. Dull chocolate-brown	£20000	£2500
2		2d. lilac-mauve (*shades*) (Stone A)	£15000	£1000
3		2d. brown-lilac (*shades*) (Stone B)	£13000	£500
		a. Grey-lilac	—	£550
4		3d. bright blue (*shades*)	£8000	£600
		a. Blue (*shades*)	£7000	£450
		ab. Retouched (between Queen's head and right border) (No. 11 in transfer group) (8 varieties)	—	£600
		ac. Retouched (under "V") (No. 10 in transfer group)	£14000	£1000

With the exception of No. 4*a* the above were printed from small stones of 30 (5×6) laid down directly from the engraved die which showed a single example of each value. There were two stones of the 2d. and one for each of the other values. No. 4*a* is the second printing of the 3d. for which the sheet size was increased to 120, the printing stone being constructed from an intermediate stone of 15 (5×3).

1d. Thick line at top

2d. Coarse background

3d. White area small and band protruding to left of orb

(b) Second state of dies: 1d. (more colour over top of letters of "VICTORIA"); 2d. (fine border as (a) but with coarse background); 3d. (thinner white outline around left of orb, central band of orb protrudes at left)

5	**1**	1d. red-brown (*shades*) (2.50)	£9500	£450
		a. Pale dull red-brown	£8000	£450
6		2d. grey-lilac (*shades*) (1.50)	£7000	£200
		a. Dull grey	£13000	£225
7		3d. blue (*shades*) (6.51)	£4750	£190
		a. Retouched (22 varieties) *from*	£6000	£350

Printed in sheets of 120 (10×12) with the printing stones constructed from intermediate stones of 30 (5×6) for the 1d. and 2d. or 10 (5×2) for the 3d. It is believed that the use of the smaller intermediate stone for the latter resulted in the many retouches.

Frame-lines added

(c) Third state of dies: As in (b) but with frame-lines added, very close up, on all four sides

8	1	1d. dull orange-vermilion (11.50)	£5500	£650
		a. Dull red (shades)	£4750	£200
9		1d. deep red-brown (5.51)	£12000	£1200
		a. Brownish red (shades)	£4500	£180
		b. Dull rose (shades)	£4500	£180
10		2d. grey (*shades*) (8.50)	£8000	£200
		a. Olive-grey (shades)	£8500	£200
11		3d. blue (*shades*) (12.52)	£2750	90·00
		a. Deep blue (shades)	£3250	90·00
		b. Pale greenish blue (shades)	£4000	£170

Printed in sheets of 120 (12×10) produced from intermediate stones of 30 (6×5) for No. 8 and 12 (6×2) for the others.

White veil

(d) As (c) but altered to give, for the 1d. and 3d., the so-called "white veils", and for the 2d., the effect of vertical drapes to the veil

12	1	1d. reddish brown (6.51)	£7000	£170
		a. Bright pinky red (shades)	£2250	£170
13		2d. drab (1.51)	£8000	£190
		a. Grey-drab	£8000	£180
		b. Lilac-drab	£8000	£180
		c. Red-lilac	—	£1300
		d. Void lower left corner	†	£22000
14		3d. blue (*shades*) (1.53)	£1200	80·00
		a. Deep blue (shades)	£1300	80·00
		b. Greenish blue (shades)	£1600	85·00
		c. Retouched (9 varieties)	£2750	£180

Printed in sheets of 120 (12×10) produced from intermediate stones of 12 (6×2) on which the details of the veil were amended as described above.

The "void corner" error occurred on the printing stone. It is believed that only four examples still exist.

2d. Coarse border and background

(e) Fourth state of 2d. die only: Coarse border and background. Veil details as in original die

15	1	2d. red-lilac (*shades*) (5.50)	£7500	£325
		a. Lilac	£7500	£350
		b. Grey	£9500	£425
		c. Dull brownish lilac	£7500	£180
		d. Retouched lower label—value omitted ..... *from*	†	£15000
		e. Other retouches (17 varieties) ..... *from*	£9500	£350

Printed in sheets of 120 (12×10) produced from an intermediate stone of 30 (6×5).

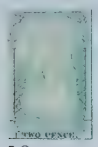
(f) 2d. as (e), but with veils altered to give effect of vertical drapes

16	1	2d. lilac-grey (1.51)	£5500	£170
		a. Deep grey	£6500	£170
		b. Brown-lilac (shades)	£5000	£110
17		2d. cinnamon (*shades*) (2.51)	£3500	£170
		a. Drab (shades)	£3750	95·00
		b. Pale dull brown (shades)	£3500	£120
		c. Greenish grey	£3500	£110
		d. Olive-drab (shades)	£3750	£190
		e. Buff	£12000	£250

Printed in sheets of 120 (12×10) produced from two successive intermediate stones of 30 (6×5) on which the details of the veil were amended as described above.

This was the final printing of the 2d. "Half Length" as the die for this value had been damaged. A replacement 2d. design was ordered from Thomas Ham.

For the later printings of the 1d. and 3d. in this design see Nos. 23/4, 26/31, 48/9 and 78/9.



2 Queen-on-Throne

3

(Recess-printed by Thomas Ham)

1852 (27 Dec). Imperf.

18	2	2d. reddish brown	£550	27·00
		a. Chestnut	—	£140
		b. Purple-brown	£650	27·00

Printed in sheets of 50 (10×5) from a hand-engraved plate of the same size. Each stamp in the sheet had individual corner letters made-up of various combinations, none of which contained the letter "J".

Reprints were made in 1891 using the original plate, on paper wmk V over Crown, both imperf and perf 12½.

For later printings of this design see Nos. 19/22 and 36/9.

CAMPBELL & CO PRINTINGS. In May 1853 the Victoria postal authorities placed an order for 1d. and 6d. stamps in the "Queen-on-Throne" design with Perkins, Bacon in London. These would not arrive for some time, however, and supplies of Ham's printings were rapidly becoming exhausted. Local tenders were, therefore, solicited for further supplies of the 1d. and 3d. "Half Lengths" and the 2d. "Queen-on-Throne". That received from J. S. Campbell & Co was accepted. The stamps were produced by lithography, using transfers from either the "Half Length" engraved die or the 2d. "Queen-on-Throne" engraved plate of 50. Stamps from the Campbell & Co printings can be distinguished from later printings in lithography by the good quality paper used.

(Lithographed by J. S. Campbell & Co, Melbourne, using transfers taken from Ham's engraved plate)

1854 (Jan–Jul). Good quality white or toned paper. Imperf.

(a) Clear impressions with details around back of throne generally complete

19	2	2d. brownish purple	£500	35·00
		a. Grey-brown	£650	35·00
		b. Purple-black	—	35·00
		c. Dull lilac-brown (toned paper only)	£700	48·00

(b) Poor impressions with details around back of throne not fully defined

20	2	2d. violet-black (2.54)	£650	42·00
		a. Grey-black	£700	42·00
		b. Grey-lilac	£650	42·00
		c. Dull brown (on toned)	£650	42·00
		ca. Substituted transfer (in pair)	—	£3000

(c) Weak impressions with background generally white without details. Toned paper only

21	2	2d. grey-purple (7.54)	£450	32·00
		a. Purple-black	£450	32·00

(d) Printings using an intermediate stone. Impression flat and blurred. Background details usually complete. Toned paper only

22	2	2d. grey-drab (*shades*) (5.54)	£600	35·00
		a. Black	—	£140

Nos. 19/21 were produced using transfers taken directly from the original Ham engraved plate. It is believed that the different strengths of the impressions were caused by the amount of pressure exerted when the transfers were taken. The stamps were printed in sheets of 100 (2 panes 10×5). On one stone a block of four at bottom left, lettered "FL GM" over "QV RW", was damaged and the stone was repaired by using a block of four substituted transfers. These were lettered "VZ WA" over "FL GM". No. 20ca covers any one of these substituted transfers in pair with normal. As horizontal pairs these are lettered "WA HN" or "GM SX" and as vertical "VZ" over "VZ" or "WA" over "WA".

For No. 22 an intermediate stone was used to produce a printing stone of 300 (6 panes 10×5). The insertion of a further stage into the process caused the blurred appearance of stamps from this printing. No. 22*a* is believed to come from proof sheets issued to post offices for normal use. Examples are usually cancelled with Barred Oval 108 and Barred Numerals 1 and 2.

(Lithographed by J.S. Campbell & Co, Melbourne)

1854 (Feb–June). Good quality wove paper. Imperf.

23	1	1d. orange-red (*shades*)	£3000	£140
		a. Rose	£6500	£750
24		3d. blue (*shades*) (6.54)	£1100	50·00
		a. Retouched under "C" of "VICTORIA"	—	£150

The 1d. was produced in sheets of 192 (two panes of 96 (12×8)) and the 3d. in sheets of 320 (two panes of 160 (18×9)). Both printing stones were constructed from transfers taken from intermediate stones of 24 (6×4). The spacing between stamps is far wider than on the Ham printings. The 3d. panes of 160 were constructed using six complete transfers of 24 and three of 6 with the final impression in the bottom two rows removed.

The 1d. Campbell printings have the frame lines almost completely absent due to lack of pressure when taking transfers.

The 3d. retouch, No. 24a, occurs on R. 3/5 of the intermediate stone.

CAMPBELL AND FERGUSSON PRINTINGS. Increased postal rates in early 1854 led to a requirement for a 1s. value and in April a contract for this stamp was awarded to Campbell and Fergusson (the new corporate style of J. S. Campbell & Co). Further contracts to print the 1d. and 3d. "Half Lengths" and the 2d. "Queen-on-Throne" followed. All were produced by lithography with the two "Half Lengths" using transfers from the original engraved die and the 2d. "Queen-on-Throne" transfers from Ham's original engraved plate.

All Campbell and Fergusson printings were on paper of a poorer quality than that used for the earlier contract.

(Lithographed by Campbell & Fergusson)

1854 (6 Jul). Poorer quality paper. Imperf.

25	3	1s. blue (*shades*)	£950	38·00
		a. Greenish blue	£1200	38·00
		b. Indigo-blue	—	£180

No. 25 was produced in sheets of 100 (8×12 with an additional stamp appearing at the end of rows 6 to 9). The printing stones used each contained four such sheets. They were constructed from an intermediate stone of 40 (8×5) taken from a single engraved die. Each pane of 100 showed two complete transfers of 40, one of 20, and one of a vertical strip of 4.

For this stamp rouletted or perforated see Nos. 54 and 81.

(Lithographed by Campbell & Fergusson)

1854 (Jul)–**57**. Poorer quality paper. Imperf.

26	1	1d. brown (*shades*)	£3000	£130
		a. Brick-red (shades)	£3250	£110
		b. Dull red (shades)	£3500	£110
27		1d. *Orange-brown* (*shades*) (8.55)	£3250	£140
		a. Dull rose-red (shades)	£3750	80·00
		b. Bright rose-pink	£6000	£160
		c. Retouched (6 varieties)	£6000	£450
28		1d. pink (*shades*) (2.55)	£1400	48·00
		a. Rose (shades)	£1400	48·00
		b. Lilac-rose (shades)	£1500	48·00
		c. Dull brown-red (shades)	£1700	£140
		d. Retouched (8 varieties)	£2500	£325
29		3d. bright blue (*shades*) (7.57)	£2250	70·00
		a. Greenish blue (shades)	£1900	55·00
		b. Retouch under "C" of "VICTORIA"	£3000	£130
30		3d. *Prussian blue* (*shades*) (11.56)	£3000	95·00
		a. Milky blue	£3750	£150
		b. Retouch under "C" of "VICTORIA"	—	£275
31		3d. steel-blue (*shades*) (heavier impression) (5.55)	—	65·00
		a. Greenish blue (shades)	£1800	48·00
		b. Blue (shades)	£1800	48·00
		c. Deep blue (shades)	£1500	48·00
		d. Indigo (shades)	—	55·00

The 1d. was produced in sheets of 400 (2 panes 20×10) constructed from transfers originating from the J. S. Campbell & Co intermediate stone. Each pane contained six complete transfers of 24, three of 12, two of 8 and one of 4.

The 3d. was produced in sheets of 320 (2 panes of 160) (No. 29), 200 (No. 30) or 400 (2 panes of 200) (No. 31.) The stone for No. 29 was constructed from transfers taken from the J. S. Campbell intermediate stone with the retouch on R. 3/5 still present. The panes of 160 contained six transfers of 24 and three of 6 with the last impression in both rows 8 and 9 removed. Quality of impression is generally poor. The stone for No. 30, once again taken from the Campbell intermediate stone, was laid down in the same combination of transfers as the 1d. value. Impressions from it were, however, so poor that transfers from a new intermediate stone were used for No. 31. Impressions from this stone, on which the panes of 200 were in a similar layout to the 1d. were much further apart than those on the stones used to produce Nos. 29/30.

The Campbell and Fergusson printings of the "Half Lengths" are listed in the order in which they were printed.

CALVERT PRINTINGS. Contracts for the provision of other values required by the postal rate changes in 1853 were placed with Samuel Calvert of Melbourne who used typography as the printing process. Calvert continued to print, and later roulette, stamps for the Victoria Post Office until March 1858 when it was discovered that he had placed some of the stock in pawn.

4 5 6

(Typographed from woodblocks by Samuel Calvert)

1854 (1 Sep)–**55**. Imperf.

32	4	6d. reddish brown (13.9.54)	£1000	75·00
		a. Dull orange	£550	19·00
		b. Orange-yellow	£550	19·00
33	5	6d. ("TOO LATE") lilac and green (1.1.55)	£2750	£250
34	6	1s. ("REGISTERED") rose-pink and blue (1.12.54)	£3500	£200
35	4	2s. dull bluish green/*pale yellow*	£3750	£200

No. 33 was provided to pay the additional fee on letters posted after the normal closure of the mails. This service was only available in the larger towns; examples are usually postmarked Castlemaine, Geelong or Melbourne. The service was withdrawn on 30 June 1857 and remaining stocks of the "TOO LATE" stamps were used for normal postal purposes.

No. 34 was issued to pay the registration fee and was so used until 5 January 1858 after which remaining stocks were used for normal postage.

These four values were produced from individually-engraved boxwood woodblocks. The 6d. was in sheets of 100 printed by two impressions from two plates of 25. The 2s. was in sheets of 50 from a single plate of 25. The bicoloured "TOO LATE" and "REGISTERED" stamps are unusual in that Calvert used a common woodblock "key" plate of 25 for both values combined with "duty" plates made up from metal stereos. Both values were originally in sheets of 50, but the "REGISTERED" later appeared in sheets of 100 for which a second "key" plate of 25 was utilised.

For these stamps rouletted or perforated see Nos. 53, 55/8, 60/1 and 82.

(Lithographed by Campbell & Fergusson)

1855 (Mar)–**56**. Poorer quality paper. Imperf.

(a) Printings from stones which were not over-used; background around top of throne generally full and detail good

36	2	2d. lilac (*shades*) (7.55)	£450	30·00
		a. Purple (shades)	£450	30·00
		b. "TVO" for "TWO"	£9000	£1200

(b) Early printings from stones which were over-used. Similar characteristics to those above, though detail is not quite so full. Distinctive shades

37	2	2d. brown	—	80·00
		a. Brown-purple	£475	27·00
		b. Warm purple	—	27·00
		c. Rose-lilac	—	27·00
		d. Substituted transfer (pair)	—	£750

(c) Later printings from the same stones used for No. 37 when in a worn condition. Impressions heavy, coarse and overcoloured; details blurred; generally white background around top of throne

38	2	2d. dull lilac-mauve (1856)	£475	50·00
		a. Dull mauve	£475	50·00
		b. Grey-violet	—	50·00
		c. Red-lilac	—	50·00
		d. Substituted transfer (pair)	—	£750

(d) Printings from a stone giving blotchy and unpleasing results, with poor definition. Mainly shows in extra colour patches found on most stamps

39	2	2d. dull purple (7.55)	—	70·00
		a. Dull grey-lilac	£500	70·00
		b. On thick card paper	—	£650

The Campbell and Fergusson 2d. "Queen-on-Throne" printings were in sheets of 200 (4 panes 10×5) constructed from transfers taken from the original Ham engraved plate.

Four separate stones were used. On Stone A a creased transfer running through R. 4/8, 4/9 and 5/8 caused the "TVO" variety on the stamp from the bottom row of one pane. On Stone C the impression in the first vertical row of one pane were found to be so faulty that they were replaced by substituted transfers taken from elsewhere on the sheet causing abnormal horizontal pairs lettered "UY BF", "TX MQ", "DI WA", "SW GM" and "CH RW". The vertical pairs from the substituted transfers are lettered "UY" over "TX" and "DI" over "SW".

PERKINS BACON "CANCELLED". For notes on this handstamp, showing "CANCELLED" between horizontal bars forming an oval, see Catalogue Introduction.

7 Queen-on-Throne

8 "Emblems"

(Recess Perkins, Bacon & Co, London)

1856 (23 Oct). Wmk Large Star. Imperf.

40	7	1d. yellow-green (H/S "CANCELLED" in oval £12000)	£275	40·00

Supplies of this stamp, and the accompanying 6d. which was only issued rouletted (see No. 73), arrived in the colony at the end of 1854, but the 1d. was not placed on sale until almost two years later.

No. 40 was reprinted from the original plate in 1891. Examples, in either dull yellow-green or bright blue-green, are imperforate and on V over Crown watermarked paper.

(Typographed from electrotypes by Calvert)

1857 (26 Jan–6 Sept). Imperf.

(a) Wmk Large Star, W w **1**

41	**8**	1d. yellow-green (18 Feb)	£225	26·00
		a. Deep green	£325	40·00
		b. Printed on both sides	†	£2750
42		4d. vermilion	£500	11·00
		a. Brown-vermilion	£475	9·50
		b. Printed on both sides	†	£2750
43		4d. dull red (20 July)	£375	8·50
44		4d. dull rose (6 Sept)	£475	8·50

(b) No wmk. Good quality medium wove paper

45	**8**	2d. pale lilac (25 May)	£600	11·00
		a. Grey-lilac	£600	11·00

Nos. 41/5 were produced in sheets of 120, arranged as four panes of 30 (6×5) (1d. and 4d.) or twelve panes of 10 (2×5) (2d.), using electrotypes taken from a single engraved die of each value.

The setting of the 4d. was rearranged before the printing of Nos. 43/4.

Only two examples of No. 41b and No. 42b have been recorded.

For this printing rouletted or perforated see Nos. 46/7, 50/2, 59, 74 and 77.

ROULETTES AND PERFORATIONS. In August 1857 a rouletting machine was provided at the G.P.O., Melbourne, to enable the counter clerks to separate stamp stocks before sale to the public. This machine produced roulettes of 7½–9 in one direction across six rows at a time. There was also a single wheel device which gauged 7–7½. Both were in use between the earliest known date of 12 August and the end of 1857.

Calvert was granted a separate contract in October 1857 to roulette the stamps he printed, but only Nos. 57/61 had been produced when it was found, in April 1858, that he had pawned a quantity of the sheets. His contracts were terminated and his successor, F. W. Robinson, used a roulette machine of a different gauge before switching to a gauge 12 perforating machine in January 1859.

1857 (12 Aug–Sept). Rouletted 7–9 by counter clerks at G.P.O., Melbourne.

46	**8**	1d. yellow-green (No. 41)	£650	£110
47		2d. pale lilac (No. 45)	—	50·00
		a. Grey-lilac	—	50·00
48	**1**	3d. blue (*shades*) (No. 24)	£3250	£250
		a. Retouch under "C" of "VICTORIA"	†	£475

		a. Greenish blue (shades)	£3250	£225
		b. Retouch under "C" of "VICTORIA"	†	£600
50	**8**	4d. vermilion (No. 42)	—	£100
51		4d. dull red (No. 43)	—	42·00
52		4d. dull rose (No. 44) (Sept)	—	28·00
53	**4**	6d. reddish brown (No. 32)	—	£100
		a. Dull orange	—	60·00
		b. Orange-yellow	—	70·00
54	**3**	1s. blue (*shades*) (No. 25)	—	£110
		a. Greenish blue	—	£110
55	**6**	1s. ("REGISTERED") rose-pink and blue (No. 34)	£8500	£400
56	**4**	2s. dull bluish green/*pale yellow* (No. 35)	£7500	£650

With the exception of the 1s., Nos. 54/a, these stamps are normally found rouletted on one or two sides only.

1857 (Oct). Rouletted by Calvert.

(a) Rouletted 7–9 on all four sides and with finer points than No. 53b

57	**4**	6d. orange-yellow (No. 32*b*)	—	95·00

(b) Serpentine roulette 10–10½

58	**4**	6d. orange-yellow (No. 32*b*)	£3000	£170

(c) Serrated 18–19

59	**8**	2d. grey-lilac (No. 45*a*)	£1400	£600
60	**4**	6d. orange-yellow (No. 32*b*)	—	£150

(d) Compound of serrated 18–19 and serpentine 10–10½

61	**4**	6d. orange-yellow (No. 32*b*)	—	£600

No. 59 was not covered by the contract given to Calvert, but it is believed to be a test run for the rouletting machine. No. 61 always shows serrated 18–19 on three sides and the serpentine roulette at the top or bottom of the stamp.

(Typo from electrotypes by Calvert)

1858 (14 Jan–Apr). Good quality white wove paper. No wmk.

(a) Rouletted 7–9 on all four sides

62	**8**	1d. pale emerald	£550	29·00
		a. Emerald-green	£550	29·00
63		4d. rose-pink (18 Jan)	£425	6·00
		a. Bright rose	£425	6·00
		b. Reddish pink	—	11·00
		c. Imperf horiz (vert pair)	†	£650

(b) Imperf (Apr)

64	**8**	1d. pale emerald	£425	20·00
		a. Emerald-green	—	23·00
65		4d. rose-pink	£500	23·00
		a. Bright rose	—	23·00
		b. Reddish pink	—	30·00

Nos. 62/5 were produced in sheets of 120, arranged as four panes of 30 (6×5).

The Royal Collection contains a used horizontal pair of the 4d. showing the vertical roulettes omitted.

The majority of Nos. 64/5 were issued in April after Calvert's contracts had been terminated, although there is some evidence that imperforate sheets of the 4d., at least, were issued earlier.

For the 1d. of this issue perforated see No. 75.

ROBINSON PRINTINGS. Calvert's contracts were cancelled in April 1858 and the work was then placed with F. W. Robinson, who had unsuccessfully tendered in 1856. The same electrotypes were used, but a perforating machine was introduced from January 1859. Robinson continued to print and perforate stamps under contract until the end of 1859 when the Victoria Post Office purchased his equipment to set up a Stamp Printing Branch and appointed him Printer of Postage Stamps.

Nos. 66/72 were produced in sheets of 120, arranged as four panes of 30 (6×5).

For stamps of this issue perforated see Nos. 76 and 80.

(Recess Perkins, Bacon & Co, London)

1858 (1 Nov). Wmk Large Star, W w **1**. Rouletted 5½–6½.

73	**7**	6d. bright blue	£450	18·00
		a. Light blue	£475	28·00

No. 73 was received from London at the same time as the 1d., No. 40, but was kept in store until November 1858 when the stock was rouletted by Robinson. When issued the gum was in a poor state.

Imperforate examples exist from Perkins Bacon remainders. Examples are known handstamped "CANCELLED" in oval of bars. *Price* £11000.

Imperforate reprints, in shades of indigo, were made from the original plate in 1891 on V over Crown watermarked paper.

1859 (Jan–May). P 12 by Robinson.

STAMP PRINTING BRANCH. On 1 January 1860 F. W. Robinson was appointed Printer of Postage Stamps and his equipment purchased by the Post Office to establish the Stamp Printing Branch. All later Victoria issues were printed by the Branch which became part of the Victoria Government Printing Office in December 1885. In 1909 the Commonwealth Stamp Printing Office under J. B. Cooke was established in Melbourne and produced stamps for both the states and Commonwealth until 1918.

90	**9**	3d. pale blue (1.61)	£275	7·00
		a. Bright blue (10.61)	£275	8·50
		b. Blue (4.63)	£275	6·00
		c. Deep blue (4.64)	£300	6·00
		d. "TRREE" for "THREE" in wmk	—	£700
91		3d. maroon (13.2.66)	£325	30·00
		a. Perf 13	£325	32·00
92		4d. rose-pink (1.8.60)	—	9·50
		a. Rose-red	£160	4·75
		b. Rose-carmine	—	9·50
		c. Dull rose	£160	4·75
		d. Printed on "FIVE SHILLINGS" diagonal wmk paper (11.9.62)	£3500	23·00
93		6d. orange (25.10.60)	£7500	£450
94		6d. black (20.8.61)	£375	8·50
		a. Grey-black	£375	8·50

(c) On paper made by De La Rue wmkd with the appropriate value as a single-lined numeral as W **11**

95	**9**	4d. dull rose-pink (9.10.62)	£190	6·00
		a. Dull rose	£200	6·50
		b. Rose-red	—	6·00
		c. Roul 8 (28.7.63)	£2250	£250
		d. Imperf (25.7.63)	—	75·00
		e. Perf 12½×12		
		f. Perf 12½		

All three values were produced in sheets of 120, initially as four panes of 30 (6×5). Printings of the 3d. from 1864 were in a changed format of six panes of 20 (4×5).

The "TRREE" watermark error comes from early printings of No. 90 on R. 10/7.

Two examples of the 4d. on Saunders paper are known bisected in 1863, but such use was unauthorised.

Nos. 95c/d were issued during July and August 1863 when the normal perforating machine had broken down. They are best collected used on piece and cancelled within the period (July-September 1863).

Nos. 95e/f were perforated or part-perforated with a machine gauging 12¼-12½, borrowed from the Government Printer in 1863, while the perf 12 machine was being repaired.

Reprints, from new plates, were made of the 3d. and 4d. in 1891 on "V over Crown" paper and perforated 12½.

1860 (Apr)–**63**. P 12.

		a. Grey-black	£190	20·00
		b. Jet-black	£200	22·00

(b) On paper made by De La Rue. Wmk single-lined "6" as W **11**

107	**13**	6d. grey (p 12) (18.6.63)	£160	7·00
		a. Jet-black	—	9·00
		b. Grey-black	£160	7·50
		c. Perf 13. *Jet-black*	£170	9·00
		ca. Grey-black	£170	9·00

Printings before August 1863 were in sheets of 120 containing four panes of 30 (6×5). For subsequent printings of No. 107 the format was changed to six panes of 20 (4×5).

Reprints from new plates were made in 1891 on paper watermarked "V over Crown" and perforated 12½.

SINGLE-LINED NUMERAL WATERMARK PAPERS. The first consignment of this paper, showing watermarks as W **11**, arrived in Victoria during October 1862. Five further consignments followed, all but the last supplied by De La Rue.

The complexity of the scheme for different watermarks for each value, together with the time required to obtain further supplies from Great Britain, resulted in the emergency use of paper obtained from Tasmania and of the wrong numeral watermark on certain printings.

The final order for this paper was placed, in error with the firm of T. H. Saunders of London. Although the actual watermarks are the same (the dandy rolls were the property of the Victoria Government and supplied to each firm in turn) there are considerable differences between the two types of paper. That manufactured by Saunders is of a more even quality and is smoother, thicker, less brittle and less white than the De La Rue type.

De La Rue supplied white paper watermarked "1", "2", "4", "6" and "8", blue paper watermarked "1" and green paper watermarked "2". The Saunders consignment of October 1865 contained white paper watermarked "1", "4" and "6", blue paper watermarked "1", green paper watermarked "2" and pink paper watermarked "10".

It is helpful for comparison purposes to note that all white paper watermarked "2" or "8" can only be De La Rue and all pink paper watermarked "10" can only be Saunders.

		ab. Perf 13	—	16·00
		b. Indigo-blue/blue (P 12) (9.73)	—	11·00
		ba. Perf 13	£140	6·00

(e) Emergency printings on Saunders paper as W **11**, *but showing incorrect single-lined numeral. P 13*

125	**14**	1d. bright yellow-green (wmkd "4") (6.3.67)	£200	45·00
126		1d. bright yellow-green (wmkd "6") (6.67)	£300	55·00
127		2d. grey (wmkd "4") (21.2.67)	£225	8·50
128		2d. grey (wmkd "6") (13.5.67)	£350	9·00

The 1d., 2d., 4d. and 8d. were originally produced in sheets of 120 containing eight panes of 15 (3×5). The 3d. and 6d. were in sheets of 120 (12×10) and the 1d. (from February 1866), 2d. (from July 1866) and 4d. (from April 1866) subsequently changed to this format. The 10d. was in sheets of 120 containing twenty panes of 6 (2×3). The 1s. was originally in sheets of 60 containing three panes of 20 (4×5), but this changed to 120 (12×10) in April 1866.

Nos. 108a, 109ab/ac and 110cb were perforated or part-perforated with a machine gauging 12½, borrowed from the Government Printer in September 1864, while the perf 12 machine was being repaired.

Only single examples are thought to exist of Nos. 110a, 110ca and 113ab and two of No. 108ca.

For later emergency printings on these papers see Nos. 153/66.

(Typo from composite woodblock and electrotype plate)

20

V OVER CROWN WATERMARKS. The changeover from the numeral watermarks to a general type to be used for all values was first suggested at the end of 1865, but the first supplies did not reach Melbourne until April 1867. Five different versions were used before the V over Crown watermark was superseded by the Commonwealth type in 1905. The five versions are listed as follows:

Type **19** De La Rue paper supplied 1867 to 1882. Shows four points at the top of the crown with the left and right ornaments diamond-shaped

Type **33** De La Rue paper supplied 1882 to 1895. No points at the top of the crown with the left and right ornaments oval-shaped

Type **82** Waterlow paper supplied 1896 to 1899. Wide base to crown

Type **85** Waterlow paper used for postal issues 1899 to 1905. Wide top to crown

Type **104** James Spicer and Sons paper used for postal issues August and September 1912. Narrow crown

(Type from electrotypes)

1867–81. Wmk. V over Crown. W **19**.

The same electrotypes as the previous issues were used for this series with the exception of the 5s. which was a new value. The 1d., 2d., 3d., 4d., 6d. and 1s. plates were arranged to print sheets of 120 (12×10) and the 8d. conformed to this when reintroduced in 1877. New plates for the 1d. (1868), 2d. (1869) and 6d. (1875) were constructed by Robinson's successor, J. P. Atkinson, using the improved facilities then available.

Atkinson was also responsible for the printing of the 5s. value. The original printings in blue on yellow paper were produced in sheets of 25, or possibly 50, using a vertical strip of five electrotypes. Due to its size the 5s. did not exactly fit the watermarked paper and, to avoid a preprinted sheet number, a proportion of the printing was made on the back of the paper creating the reversed watermark variety, No. 139a. These varieties occur in the first printing only as Atkinson created a plate of 25 for the second printing in March 1868.

Two Types of the 5s.: Printings of the 5s. bicoloured to April 1880 were made from electrotypes taken from the monocoloured plate. These showed a blue line beneath the crown (Type I). In early 1881 this plate was found to be too worn for further use and a new die was made from which a plate of 100 was constructed. Stamps from this plate are without the blue line beneath the crown (Type II).

PERFORATIONS 1859-1883. Collectors should note that our descriptions of perforations follow a longstanding convention.

"Perf 12" (1859 to mid–1866 and mid–1871 to 1883)–line perf machines perforating between 11½ and 12.

"Perf 13" (1864 to 1881)–line perf machines generally gauging between 12½ and 12¾, two of which were converted to comb perforation in 1871. It should be noted that, following a repair in 1879, one of these machines produced an irregular gauge varying between 12¼ and13½.

"Perf 12½" (1863 and 1864)–a line perforating machine borrowed from the Government Printer while the perf 12 machine was being repaired. Stamps perforated (or part–perforated) on this machine were Nos. 95e/f, 108a, 109ab/ac and 110cb. All are rare.

"Perf 12½" (late 1879 onwards)–line or comb machines gauging exactly 12½.

"Mixed perforations"–this description covers stamps where both gauges are present on the same side or sides of the stamp, as a result of reperforation.

(d) Saunders single-lined numeral "4" as W 11

168	**16**	6d. dull blue (21.5.70)	†	£2250

The supply of paper was so short during 1868 that many odds and ends were utilised. Nos. 161 (five known) and 168 (ten known) are the rarest of these emergency printings.

The 2d. slate-grey is known watermarked "SIX PENCE". The single example is in the Royal Philatelic Collection.

		a. Mixed perfs 12 and 13		
200		2d. dull violet-mauve/*brown* (21.3.78)	£300	38·00

There was a shortage of white V over Crown, W **19**, watermarked paper in the early months of 1878 and various coloured papers were used for printings of the ½d., 1d. and 2d. values until fresh stocks of white paper were received.

No. 198 is often misidentified. It can be confused with discoloured examples of Nos. 178/b, and has often been faked.

Reprints were made in 1891 of the "Laureated" 1d., 2d., 3d. (in yellow), 4d., 6d., 8d. (in orange-yellow), 10d. (in greenish slate) and 5s. (in blue and red), of the Bell ½d., 1d., 2d. (Die II), 9d. and 1s. and of the Naish 2d. (in brown), 4d. (in pale red) and 2s. With the exception of the Bell 9d., which was watermarked W **19**, all were watermarked W **33** and perforated 12½. Some were from new plates.

THE POST OFFICE ACT OF 1883. Following official concern as to the number of different series of adhesive stamps, both fiscal and postal, used in Victoria it was decided that the system should be unified to the extent that the postage stamps, Stamp Statute fiscals and Stamp Duty fiscals should be replaced by a single series valid for all three purposes. As the Stamp Duty series contained the largest number of values it was adopted as the basis of the new range.

The regulations for the changeover were detailed in the Post Office Act of 1883 which came into force on 1 January 1884. From that date all existing Stamp Statute (first produced in 1871) and Stamp Duty

(first produced in 1879) issues became valid for postal purposes, and the previous postage stamps could be used for fiscal fees.

Until matters could be organised printings of some of the existing postage values continued and these will be found included in the listings above.

Printing of the Stamp Statute series was discontinued in early 1884.

The existing Stamp Duty range was initially supplemented by postage stamps overprinted "STAMP DUTY" for those values where the available fiscal design was considered to be too large to be easily used on mail. These overprints were replaced by smaller designs inscribed "STAMP DUTY".

Stamp Statute and Stamp Duty values which became valid for postal purposes on 1 January 1884 have previously been listed in this catalogue as Postal Fiscals. Under the circumstances this distinction appears somewhat arbitrary and all such stamps are now shown in the main listing. Used prices quoted are for examples with postal cancellations. In some instances prices are also provided for fiscally used and these are marked "F.C.".

> Nos. 215/92 were extensively used for fiscal purposes. Collectors are warned against the many examples of these stamps which have been cleaned and provided with fake gum or forged cancels.
>
> In practice, many of these stamps are not known to exist in genuine unused or postally used condition and only fiscally cancelled examples are available. This applies especially to stamps of high face value such as Nos. 249/52.

HALF
(38)

1884 (1 Jan*). No. 220 surch with T **38** in red.

234	½d. on 1d. pale green	£110	£100

*The dates quoted are those on which the stamps became valid for postal purposes. The ½d., 1d., 4d., 6d., 1s., 5s. and £1 were issued for fiscal purposes on 26 April 1871. The 10s. was added to the series in June 1871, the £5 in September 1871, the 2s.6d. in July 1876 and the 3d. in October 1879.

All values of the Stamp Statute series were reprinted in 1891 on paper watermarked W **19** (5s., 10s., £1) or W **33** (others). The £5 was pulled from the original plate, but the others were produced from new electrotypes taken from the original dies.

*This is the date on which the stamps became valid for postal use. The 1d., 6d., 1s., 1s.6d., 2s., 3s., 4s., 5s., 10s., 15s., £1, £1.10s., £2, £5 and £10 were issued for fiscal purposes on 18 December 1879 with the £1.5s., 35s., 45s., £6 and £9 added to the range later the same month and the 6s., £7 and £8 in January 1880.

Used prices for the £1.5s., £1.10s., £2 (No. 276a), 45s. and £10 watermarked W **33** are for examples from the cancelled-to-order sets sold to collectors by the Victoria postal authorities between September 1900 and 30 June 1902.

Similar Stamp Duty designs were prepared for 7s., 8s., 9s., 11s., 12s., 13s., 14s., 16s., 17s., 18s., and 19s., but were never issued.

The two different 1d. designs were reprinted in 1891 on W **33** paper.

For these designs with later watermarks see Nos. 345/50 and 369/71.

The plates for the 1d., 6d., 1s. and 2s. were derived from the dies of the 2d. (1s.), 3d. (1d. and 6d.) and 8d. (2s.). In each instance lead moulds of six impressions were taken from the original die and the face values altered by hand creating six slightly different versions.

Two states of the 2d. die exist with the second showing a break in the top frame line near the right-hand corner. This damaged die was used for seven impressions on Plate 1 and all 120 on Plate 2.

No. 300b occurred during the December 1886 printing of the 4d. when about fifty sheets were printed in the colour of the 2d. by mistake. The sheets were issued to Melbourne post offices and used examples are known postmarked between 21 December 1886 and 4 March 1887. Nine unused are also believed to exist.

Reprints of the ½d., 1d., 2d., 4d., 6d. and 1s. values were made in 1891 from the existing plates. The 1s. was watermarked W **19** and the remainder W **33**.

For some of these values used with later watermarks see Nos. 336, 343, 361 and 369.

(69)

1885 (Feb–Nov). Optd with T **69**. P 12½.

†The used prices provided for these stamps are for cancelled-to-order examples.

Unauthorised reprints of the ½d. lilac-grey and 1s.6d. pale blue were made in 1894–95 on W **33** paper and perforated 12½. These differ in shade from the originals and have rougher perforations. It should be noted that the original printing of No. 322 does not occur with inverted watermark, but the reprint does.

A single example of No. 314e is known postmarked "737" (Foster). A second, postmarked "249" (Mortlake), was reported in 1892. It is known that an imperforate sheet was sold at Mortlake P.O. in 1890. Other examples are believed to be clandestine.

Later printings of the £5 to £9 values, as No. 324/8 but on W **85** paper perforated 12½ or 11, were not valid for postal use (*Unused prices, £275 for £5 value, from £400 for £6 to £9 values*).

A £10 value as Type **80** was prepared, but not issued.

1891 (17 Jun). W **19**. P 12½.

329	**72**	1d. orange-brown/*pink*	16·00	4·25

No. 329 was an emergency printing during a shortage of white W **33** paper.

From 1 July 1901 stamps inscribed "STAMP DUTY" could only be used for fiscal purposes.

86 Victoria Cross

87 Australian Troops in South Africa

(Des Sands and MacDougall (1d.), J. Sutherland (2d.). Dies eng S. Reading. Typo from electrotyped plates)

1900 (22 May). Anglo-Boer War Patriotic Fund. W **85** (sideways). P 12½.

374	**86**	1d. (1s.) olive-brown	£150	85·00
375	**87**	2d. (2s.) emerald-green	£275	£225

These stamps were sold at 1s. and 2s., but only had postal validity for 1d. and 2d. with the difference going to the Fund.

FEDERATION. The six Australian colonies were federated as the Commonwealth of Australia on 1 January 1901. Under the terms of the Post and Telegraph Act their postal services were amalgamated on 1 March 1901, but other clauses to safeguard the financial position of the individual States provided them with a large degree of independence until 13 October 1910 when issues of each state could be used throughout Australia. Postage stamps for the Commonwealth of Australia did not appear until January 1913.

It was agreed in 1901 that stamp printing should be centralised at Melbourne under J. B. Cooke of South Australia who was appointed Commonwealth Stamp Printer. By 1909 the Commonwealth Stamp Printing Branch in Melbourne was producing stamps for Papua, South Australia, Tasmania and Western Australia in addition to those of Victoria.

On federation it was decided to separate postal and fiscal stamp issues so Victoria needed urgent replacements for the current Stamp Duty series which reverted to fiscal use only on 30 June 1901.

1901 (29 Jan). Re-use of previous designs without "POSTAGE" inscr. W **82** (2s.) or W **85** (others) (sideways on ½d.). P 12×12½.

I II III

Three die states of ½d.:

I. Outer vertical line of colour to left of "V" continuous except for a break opposite the top of "V". Triangles either end of "VICTORIA" are more or less solid colour.

II. Die re-engraved. Three breaks in outer line of colour left of "V". White lines added to left triangle.

III. Die re-engraved. As II, but equivalent triangle at right also contains white lines.

I

II

III

I and II

III

Three die states of 1d.:

I. Thick lines fill top of oval above Queen's head.

II. Die re-engraved. Lines thinner, showing white space between.

III. Die re-engraved. As II, but with bottom left value tablet recut to show full point separated from both "1" and the circular frame.

Two die states of 2d.:

I. Frame line complete at top right corner. Bottom right corner comes to a point.

II. Break in right frame line just below the top corner. Bottom right corner is blunted.

Two types of 1s.:

A. "POSTAGE" 6 mm long (produced by a hand punch applied twice to each impression on the previous 1s. electrotyped plate. Slight variations in position occur).

B. "POSTAGE" 7 mm long (produced from new electrotyped plates incorporating the "POSTAGE" inscriptions).

(Eng S. Reading after photo by W. Stuart (£1, £2))

		ac. Wmk sideways	35·00	28·00
455	**91**	2d. lilac (II) (1910)	40·00	2·25

The original Crown over A watermark paper used by Victoria was of medium thickness and had toned gum applied after printing. Stocks of this paper lasted until 1912 when further supplies were ordered from a new papermakers, probably W. Joynson and Son. This paper was much thinner and was supplied with white gum already applied. The first delivery arrived in June 1912 and a second in September of the same year.

The rotary comb perforating machine gauging 11½×12¼ was transferred from South Australia in 1909 when J. B. Cooke moved to Melbourne.

Examples of the 1d. perforated 12½ or 11 exist with two black lines across the face of the stamp. These were prepared in connection with stamp-vending machine trials.

ONE PENNY
(103) 104

1912 (29 Jun). No. 455 surch with T **103** in red.

456	**91**	1d. on 2d. lilac (II)	1·00	60

1912 (1 Aug–Sept). W **104**.

(a) P 12½ (½d.) or 12×12½

457	**88**	½d. bluish green (III)	3·00	9·00

(c) Compound perfs of 12×12½ or 12½ and 11

464	**97**	9d. rose-carmine	†	£1700

Nos. 457/64 were emergency printings caused by the non-arrival of stocks of the thin, ready gummed Crown over A watermarked paper. Paper watermarked W **104** had been introduced in 1911 and was normally used for Victoria fiscal stamps. This watermark can be easily distinguished from the previous W **85** by its narrow crown.

STAMP BOOKLETS

There are very few surviving examples of Nos. SB1/4. Listings are provided for those believed to have been issued with prices quoted for those known to still exist.

1904 (Mar)–**09**. Black on red cover as No. SB1 of New South Wales. Stapled.

SB1	£1 booklet containing 240 1d. in four blocks of 30 and two blocks of 60	
	a. Red on pink cover (1909)	£22000
	b. Blue on pink cover	£20000

1904 (Mar). Black on grey cover as No. SB1. Stapled.

SB2	£1 booklet containing 120 2d. in four blocks of 30	

1910 (May). Black on white cover as Type B **1** of New South Wales. Stapled.

SB3	2s. booklet containing 11 ½d. (No. 426), either in block of 6 plus block of 5 or block of 11, and 18 1d. (No. 427), either in three blocks of 6 or block of 6 plus block of 12	£5500
	a. Black on pale green cover	£6000

Unsold stock of No. SB3 was uprated with one additional ½d. in May 1911.

1911 (1 Aug). Red on pink cover as No. SB3. Stapled.

SB4	2s. Booklet containing 12 ½d. (No. 426), either in two blocks of 6 or block of 12, and 18 1d. (No. 427), either in three blocks of 6 or block of 6 plus block of 12	£6000

ANDREW PROMOTING PHILATELY ON THE ALAN TITCHMARSH SHOW ITV

Selling Your Stamps?

Summary Tip #18:
When it comes to Selling – all collections are Not created Equal

by Andrew McGavin

Dear Colleague,

I will return to the surprisingly large subject of 'certificates' in another article – but this article is prompted by developments we have observed over the past few years when purchasing private stamp collections.

Traditionally there are 5 different ways to sell your stamps:

1. The Stamp Dealer or Stamp Auction buying on their own account.
2. Dealers 'runners'.
3. Private Treaty – the idea of Private Treaty is that collectors 'place' their collection with a dealer or auction that charges a small commission (or the buyer a commission) to purchase the collection outright. Historically 'Private Treaty' has acquired notoriety as an excuse for the company handling the transaction to 'buy-in' the collection for themselves. Fortunately things are more transparent now.
4. Selling through auction on your own account – the auction house charges you a commission and handling costs.
5. Finally – the internet now permits you to sell your stamps on-line upon your own account via internet giants such as 'eBay'.

In selling your stamps there are two principles to understand. Collectors want to buy stamps that are missing in their collections: this is why Dealers exist. Dealers buy collections to 'break-down' into usually smaller units that collectors need for their collections: generally speaking breaking down for sale into small/smaller units adds 'value' and profit for the dealer.

Some collectors are 'hoarders' and will buy general lots – other collectors will buy intermediate sized collections in order to 'extract' the stamps they want ... and then 'turn' the balance back for resale to dealer or auction. The idea that collectors will buy large complete intact collections at retail prices is quaint and outmoded. In almost 40 years of dealing I have seen few intact collections purchased by collectors and continued by new collectors. Collectors enjoy creating their own collections. Few collectors have the budget to purchase a substantial intact collection and develop it still further.

Know your 'strengths' – (know the strength of your collection).

Choosing who is best to approach to sell your stamps or handle them depends upon your knowing the 'strength' and merits of your collection. For example ... on a basic level – if your collection consists of all different modern British sets that you have bought from the Post Office at 'face value' ... the last thing you want to do is send this collection to auction. All you will be doing is paying an auction's commissions – up to 35% for them to sell your stamps, most probably, to a dealer below 'face value' – who will use a fair percentage of them upon commercial correspondence.

A few phone calls to dealers will elicit the percentage of 'face value' that the trade is paying for stamps that there are too many of – because the Post Office has recently printed and sold them.

Just don't forget to ask if there is anything 'better' in the period that you are selling – that may command a higher price.

In our next article we'll focus on the merits of the 5 different ways to sell your stamps ... and which may be best for you.

Happy collecting from us all,

PS. If you find this 'tip' interesting please forward it to a philatelic friend.

		b. Grey-brown (1.55)	£650	£375
		c. Pale brown (10.55)	£475	£325
		(b) Rouletted 7½ to 14 and compound		
5	**2**	4d. pale blue	£3500	£650
		a. Blue	—	£650
		b. Slate-blue (1855)	—	£2500
6	**3**	1s. grey-brown (1.55)	£6500	£1200
		a. Pale brown (10.55)	£6000	£1000

Both values are also known pin-perforated.

The 4d. value was prepared by Horace Samson from the Perkins, Bacon 1d. plate. A block of 60 (5×12, cols 16-20) was taken as a "plate to stone" transfer and each frame was then erased. A new lithographic frame, drawn on stone, was transferred 60 times to make up the intermediate stone.

There were a number of transfer varieties, one of the most prominent being the "T" of "POSTAGE" shaved at foot (No. 3d).

Four transfers were taken from the intermediate stone to make printing stone No. I with 240 impressions. Samson printed the initial supply of 100 sheets in deep dull blue (No. 3b) in July 1854.

Printing stone No. 1 had three scarce creased transfers whose positions in the sheet have yet to be established (Nos. 3e/g).

Further supplies were printed in January 1855 by Alfred Hillman, Samson's successor. A severe interruption to printing, almost certainly a broken stone, occurred when the fourth sheet was being pulled. On examining the intermediate stone preparatory to making a new printing stone it was found that the frame of R. 8/1 had been damaged and needed replacing.

This was done, but in so doing, Hillman accidentally produced the transfer error "Inverted Frame" (No. 3h). Printing Stone No. 2 was made as before and bore a range of transfer varieties (Nos. 3j/w) along with four "Inverted Frames". This printing was in blue (No. 3a). Some time after completion of the required 97 sheets, the "Inverted Frame" was corrected on each of the four positions to make printing stone No. 2A. All four corrections are identifiable and on two of them, traces of the inverted frame remain visible (Nos. 3x/y).

Printing stone No. 2A was used for the third printing undertaken in October 1855, producing 175 sheets of slate-blue (No. 3c.) stamps and for the fourth and final printing, totalling 1500 sheets in pale blue (No. 3), undertaken in December 1855.

The 1s. value was produced in much the same way, based on a transfer of cols. 10-14 from the Perkins, Bacon 1d. plate.

46		1s. deep green (H/S "CANCELLED" in oval £11000)	£4000	£375

Perkins, Bacon experienced considerable problems with their perforating machine during the production of these stamps.

The initial printing showed intermediate perforation 14–16. Further supplies were then sent, in late December 1860, to Somerset House to be perforated on their comb 14 machine. The Inland Revenue Board were only able to process the three lower values, although the 6d. purple-brown and 1s. yellow-green are known from this perforation overprinted "SPECIMEN".

The Perkins, Bacon machine was repaired the following month and the 6d., 1s. and a further supply of the 2d. were perforated on it to give a clean-cut 14-16 gauge.

A final printing was produced in July 1861, but by this time the machine had deteriorated so that it produced a very rough 14–16.

(Recess D.L.R. from P.B. plates)

1863 (16 Dec)–**64**. No wmk. P 13.

49	**1**	1d. carmine-rose	75·00	4·00
50		1d. lake	75·00	4·00
51		6d. deep lilac (15.4.64)	£300	50·00
51*a*		6d. dull violet (15.4.64)	£375	55·00

Both values exist on thin and on thick papers, the former being the scarcer.

Both grades of paper show a marginal sheet watermark, "T H SAUNDERS 1860" in double-lined large and small capitals, but parts of this watermark rarely occur on the stamps.

		a. Thin bar	£110	£160
		w. Wmk crown to right of CA	28·00	42·00
90		½d. on 1d. yellow-ochre (No. 82)	16·00	28·00
		w. Wmk crown to right of CA	16·00	28·00

Inverted or double surcharges are forgeries made in London about 1886.

The "Thin bar" varieties occur on R. 12/3, R. 12/8, R. 12/13 and R. 12/18, and show the bar only 0.2 mm thick.

1885 (May). Nos. 63/*a* surch, in green, by Govt Printer.

		(a) Thick "1" with slanting top, T **10** *(Horizontal Rows 1/5)*		
91		1d. on 3d. pale brown	90·00	29·00
		a. Cinnamon	85·00	28·00
		b. Vert pair. Nos. 91/2	£375

The normal sideways watermark shows Crown to left of CA, *as seen from the back of the stamp.*

(Recess D.L.R. from P.B. plates)

1888 (Mar–Apr). Wmk Crown CA (sideways). P 14.

103	**1**	1d. carmine-pink	30·00	3·50
104		2d. grey	85·00	1·25
		w. Wmk Crown to right of CA	£120	
		y. Wmk Crown to right of CA and reversed	£180	
105		4d. red-brown (April)	80·00	30·00
		x. Wmk sideways reversed	£120	
103s/5s H/S "SPECIMEN." *Set of 3*			£275	

The watermark shows Crown to right of CA on No. 103 and to the left of CA on 104/5, *as seen from the back of the stamp.*

ONE PENNY **Half-penny**
(16) (17)

1893 (Feb). Surch with T **16**, in green, by Govt Printer.

107	**7**	1d. on 3d. pale brown (No. 63)	15·00	8·50
108		1d. on 3d. cinnamon (No. 63*a*)	15·00	8·50
		a. Double surcharge	£2000	
109		1d. on 3d. pale brown (No. 86)	85·00	13·00

1895 (21 Nov). Surch with T **17** by Govt Printer.

		(a) In green		
110	**7**	½d. on 3d. pale brown (No. 63)	10·00	38·00
110*a*		½d. on 3d. cinnamon (No. 63*a*)	10·00	38·00
		b. Surcharge double	£1600	
		(b) In red and in green		
111*a*	**7**	½d. on 3d. cinnamon (No. 63*a*)	£110	£300
111*b*		½d. on 3d. red-brown (No. 87)	85·00	£180

Green was the adopted surcharge colour but a trial had earlier been made in red on stamps watermarked Crown CC. As they proved unsatisfactory they were given another surcharge in green. The trial stamps were inadvertently issued and, to prevent speculation, a further printing of the duplicated surcharge was made, but on both papers, Crown CC (No. 111*a*) and Crown CA (No. 111*b*).

STAMP BOOKLETS

There are very few surviving examples of Nos. SB1/4. Listings are provided for those believed to have been issued with prices quoted for those known to still exist.

1904 (1 Jan)–**09**. Black on red cover as No. SB1 of New South Wales. Stapled.

SB1	£1 booklet containing 240 1d. in four blocks of 30 and two blocks of 60	
	a. Red on pink cover (1909)	£20000
	b. blue on pink cover	

1904 (1 Jan). Black on grey cover as No. SB1. Stapled.

SB2	£1 Booklet containing 120 2d. in four blocks of 30	

1910 (May). Black on cream cover as Type B **1** of New South Wales. Stapled.

SB3	2s. booklet containing 11 ½d. (No. 138), either in block of 6 plus block of 5 or block of 11, and 18 1d. (No. 139) either in three blocks of 6 or block 6 plus block of 12	£7500

Unsold stock of No. SB3 was uprated with one additional ½d. in May 1911.

1911 (1 Aug). Red on pink cover as No. SB3. Stapled.

SB4	2s. Booklet containing 12 ½d. (No. 138), either in two blocks of 6 or block of 12, and 18 1d. (No. 139), either in three blocks of 6 or block of 6 plus block of 12	£7500

POSTAL FISCAL STAMPS

By the Post and Telegraph Act of 5 September 1893 the current issue of fiscal stamps up to and including the 1s. value, Nos. F11/15, was authorised for postal use.

These stamps had been initially supplied, for fiscal purposes, in February 1882 and had been preceded by a series of "I R" surcharges and overprints on postage stamps which were in use for a period of about six months. Examples of these 1881–82 provisionals can be found postally used under the terms of the 1893 Act but, as they had not been current for fiscal purposes for over eleven years, we no longer list them.

F 3

(Typo D.L.R.)

1893 (5 Sep). Definitive fiscal stamps of Feb 1882. Wmk CA over Crown. P 14.

F11	F **3**	1d. dull purple	28·00	6·00
F12		2d. dull purple	£325	80·00
F13		3d. dull purple	£110	9·00
F14		6d. dull purple	£150	14·00
F15		1s. dull purple	£250	24·00

The 1s. value is as Type F **3** but with rectangular outer frame and circular frame surrounding swan.

Higher values in this series were not validated by the Act for postal use.

Two varieties of watermark exist on these stamps. Initial supplies showed an indistinct watermark with the base of the "A" 4 mm wide. From 1896 the paper used showed a clearer watermark on which the base of the "A" was 5 mm wide.

1897. Wmk W Crown A, W **18**. P 14.

F19	F **3**	1d. dull purple	30·00	6·00
F20		3d. dull purple	£110	9·00
F21		6d. dull purple	£140	10·00
F22		1s. dull purple	£250	35·00

The above were invalidated for postal purposes from 1 January 1901.

TELEGRAPH STAMPS

T 1

1879 (9 Apr). Wmk Crown CC. P 14.

T1	T **1**	1d. bistre	85·00	18·00
		a. Perf 12½	85·00	18·00
T2		6d. lilac	£500	£225

The 1d. Telegraph Stamps were authorised for postal purposes from 25 October 1886. The 6d. is also known postally used but such use was unauthorised.

OFFICIAL STAMPS

From 1 August 1862 stamps of various issues were punched with a circular hole, the earlier size being about 3 mm. in diameter and the latter 4 mm. These were used on official correspondence by the Commissariat and Convict Department, branches of the Imperial administration separate from the colonial government. This system of punching ceased in March 1886. Subsequently many stamps between Nos. 94 and 148 may be found punctured, "PWD", "WA" or "OS".

Western Australia became part of the Commonwealth of Australia on 1 January 1901.

COMMONWEALTH OF AUSTRALIA

On 1 March 1901 control of the postal service passed to the federal administration although it was not until 13 October 1910 that the issues of the various states became valid for use throughout Australia. Postal rates were standardised on 1 May 1911.

The first national postage due stamps appeared in July 1902, but it was not until January 1913 that postage stamps inscribed "AUSTRALIA" were issued.

PRINTERS. Except where otherwise stated, all Commonwealth stamps to No. 581 were printed under Government authority at Melbourne. Until 1918 there were two establishments (both of the Treasury Dept)—the Note Printing Branch and the Stamp Printing Branch. The former printed T **3** and **4**.

In 1918 the Stamp Printing Branch was closed and all stamps were printed by the Note Printing Branch. In 1926 control was transferred from the Treasury to the Commonwealth Bank of Australia, and on 14 January 1960 the branch was attached to the newly established Reserve Bank of Australia.

Until 1942 stamps bore in the sheet margin the initials or names of successive managers and from 1942 to March 1952 the imprint "Printed by the Authority of the Government of the Commonwealth of Australia". After November 1952 (or Nos. D129/31 for Postage Dues) imprints were discontinued.

SPECIMEN OVERPRINTS. These come from Specimen sets, first made available to the public on 15 December 1913. In these sets the lower values were cancelled-to-order, but stamps with a face value of over 5s. or later 50c. were overprinted "SPECIMEN" in different types. These overprints are listed as they could be purchased from the Australian Post Office.

It is, however, believed that examples of No. 112 overprinted "SPECIMEN" were distributed by the U.P.U. in 1929. Supplies of the 1902 and 1902–04 postage due stamps overprinted "SPECIMEN" were supplied to the U.P.U. by some of the states.

Die I

Die II

Dies of Type 1 (mono-coloured values only):—

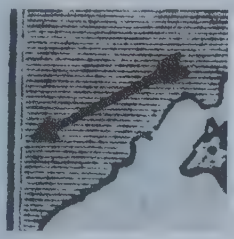
Die I. Break in inner frame line at lower left level with top of words of value.

Die II. Die repaired showing no break.

Die I was only used for the ½d., 1d., 2d. and 3d. Several plates were produced for each except the 3d. When the second plate of the 3d. was being prepared the damage became aggravated after making 105 out of the 120 units when the die was returned for repair. This gave rise to the *se-tenant* pairs showing the two states of the die.

Die II was used until 1945 and deteriorated progressively with damage to the frame lines and rounding of the corners.

Specialists recognise seven states of this die, but we only list the two most major of the later versions.



Die IIA. This state is as Die II, but, in addition, shows a break in the inner left-hand frame line, 9 mm from the top of the design (occurs on 1d., 2d. and 6d.).

Die IIB. As Die IIA, but now also showing break in outer frame line above "ST", and (not illustrated) an incomplete corner to the inner frame line at top right (occurs on 3d., 6d., 9d., 1s. and £1 (No. 75)).

No. 9a shows a badly distorted second "E" in "PENCE", which is unmistakable. It occurs on the upper plate right pane R. 10/6 and was replaced by a substitute cliché in Die IIA (No. 9b) in the November 1913 printing.

(Des B. Young. Eng S. Reading. Typo J. B. Cooke)

The watermark on Nos. 1c, 2a and 2da shows the Crown pointing to the left and on Nos. 1cw, 2aw and 2daw pointing to the right, *as seen from the back of the stamp*. One example of 1c and two examples of 1cw are known, all used.

The 3d. was printed from two plates, one of which contained 105 stamps as Die I and 15 as Die II. The other plate contained Die I stamps only.

No. 5a is from the top row of a sheet, with perforations at foot only. No. 5aa is from the bottom two rows of a different sheet.

See also Nos. 24/30 (W **5**), 35/45*b* (W **6**), 73/5 (W **6**, new colours), 107/14 (W **7**), 132/8 (W **15**), 212 (2s. re-engraved).

19	**4**	6d. claret (26.8.14)	75·00	55·00

All printings from Plate 1 of the 1d. were in the shade of No. 17c. This plate shows many retouches.

5

5a

Thin "1" in fraction at right (Plate 5 right pane R. 8/1)

Cracked electro (Plate 5 left pane R. 8/4)

1d. Die II

Dot before "1" (Plate 3 right pane R. 4/3)

"Secret mark" (Plate 4 left pane R. 1/1)

Flaw under neck (Plate 4 left pane R. 7/1)

"RA" joined (Plate 4 left pane R. 10/6)

4d. Line through "FOUR PENCE" (Pl. 2 right pane R. 2/6)

1d. Die II. The flaw distinguishing the so-called Die II, a white upward spur to the right of the base of the "1" in the left value tablet, is now known to be due to a defective roller-die. It occurred on all stamps in the second and third vertical rows of upper left plate, right pane. Each of the twenty defective impressions differs slightly; a typical example is illustrated above.

(Dies eng P.B. Typo J. B. Cooke until May 1918, then T. S. Harrison)

The variety No. 20d was caused by the engraving of a new fraction in a defective electro in 1918.

No. 21ca was caused by rusting on two positions of the steel Plate 2 and shows as white patches on the back of the King's neck and on, and beside, the top of the right frame (right pane R. 6/4) and on the left frame, wattles, head and ears of kangaroo (right pane R. 6/5). These were noticed in December 1916 when the damaged impressions were removed and replaced by a pair of copper electros (Die II for R. 6/4 and Die I for R. 6/5), showing rounded corners and some frame damage, the former also showing a white spot under tail of emu. In time the tops of the crown quickly wore away.

One example of No. 21cz has been recorded. It shows wmk crown to right *(as seen from the back of the stamp)*.

Most of Nos. 20/3 were perforated 14 by a comb machine (exact gauge 14.25×14), but printings of the ½d. in December 1915, of the 1d. in July and August 1914 and of the 5d. until June 1917 were perforated by a line machine measuring 14.2.

See also Nos. 47/k (W **5**, rough paper), 48/52 (W **6a**), 53/*ba* (1d. Die III), 56/66*b* and 76/81 (W **5**, new colours), 82 (W **6a**), 83/4 (no wmk), 85/104 (W **7**), 124/31 (W **15**).

*The Die IIA of No. 35a is a substituted cliché introduced to repair a crack which occurred on R. 10/1 of the upper plate left pane. Its Die IIA characteristics are more pronounced than on the sheet stamps from this die, with the break at left extending to the outer, in addition to the inner, frame line.

One plate of the 3d. contained mixed Die I and Die II stamps as described.

No. 39c comes from six substituted clichés taken from plate 2 (Die II) and inserted in plate 4 (Die IIB) at positions left pane R. 1/3-4, 2/3-4 and 8/6 and right pane R. 2/1 This substitution took place towards the end of the printings on W **6**. The variety can also be found on stamps with W **7** and W **15**, see Nos. 108a and 133a.

All values were printed by both Cooke and Harrison, and the 9d., 1s. and 5s. were also printed by Mullett and Ash.

The watermark on No. 40ba shows the Crown printing to the right, that on Nos. 42ba and 43ab shows the Crown pointing to the left *as seen from the back of the stamp.*

1916 (Nov)–**18**. Rough, unsurfaced paper, locally gummed. W **5**. P 14.

47	**5a**	1d. scarlet (Die I)	27·00	3·00
		a. Deep red (1917)	27·00	2·50
		b. Rose-red (1918)	35·00	2·75
		ba. Substituted cliché (Pl 2 rt pane R. 6/5)	£1800	75·00

		hw. Wmk inverted	60·00	12·00
		i. Die II *Rose-red* (1918)	£500	23·00
		ia. Substituted cliché (Pl 2 rt pane R. 6/4)	£1800	75·00
		iw. Wmk inverted	£1200	£150
		j. Die II *Rosine* (1918)	£1400	£180
		ja. Substituted cliché (Pl 2 rt pane R. 6/4)	£3500	£425
		k. No wmk	£6500	£4750

All examples of the 5d. on this paper were perforated "OS" and will be found listed as No. O60.

No. 47k is the result of misplacement of the sheet during printing. To qualify, there should be no trace of the Crown over A or a line watermark.

(Typo J. B. Cooke to May 1918 thereafter T. S. Harrison)

		a. Chocolate (1920)	12·00	2·25
		w. Wmk inverted	£120	70·00

No. 48 was printed by Cooke and Harrison, Nos. 49/*b* by Cooke only and Nos. 50/2*a* by Harrison only. Nos. 49/*b* have rather yellowish gum, that of No. 50 being pure white.

The watermark on No. 48b shows the Crown pointing to the left and on No. 48bw pointing to the right, *as seen from the back of the stamp.* One example of No. 48b and two of No. 48bw are known.

1d. Die III

1d. Die III. In 1917 a printing (in sheets of 120) was made on paper originally prepared for printing War Savings Stamps, with watermark T **5**. A special plate was made for this printing, differing in detail from those previously used. The shading round the head is even; the solid background of the words "ONE PENNY" is bounded at each end by a white vertical line; and there is a horizontal white line cutting the vertical shading lines at left on the King's neck.

(Typo J. B. Cooke)

1918 (15 Jul). Printed from a new Die III plate on white unsurfaced paper, locally gummed. W **5**. P 14.

56/66 *Set of 11*			£225	55·00

In addition to a number of mint pairs of No. 57a from two sheets purchased at Gumeracha, South Australia, with the bottom row imperforate on three sides, a single used example of No. 57 imperforate on three sides is known.

No. 61a was printed on a batch of coarse unsurfaced paper during 1923. Examples may be indentified by a clear vertical mesh in the paper, with mint stamps having a yellowish gum.

The 4d. ultramarine was originally printed from the Cooke plates but the plates were worn in mid-1923 and Harrison prepared a new pair of plates. Stamps from these plates can only be distinguished by the minor flaws which are peculiar to them.

The variety of Nos. 64 and 65 with "FOUR PENCE" thinner, was caused by the correction of the line through "FOUR PENCE" flaw early in the printing of No. 64.

(Typo T. S. Harrison (to February 1926), A. J. Mullett (to June 1927), thereafter J. Ash)

1923 (6 Dec)–**24**. W **6**. P 12.

76/84 *Set of 9*			£140	45·00

Nos. 78/*a* and 82/4 were printed by Harrison only but the remainder were printed by both Harrison and Mullett.

In the semi-transparent paper of Nos. 51a and 77a the watermark is almost indistinguishable.

Nos. 77b, 77c and 77d are typical examples of retouching of which there are many others in these issues. In No. 77c the letters "RAL" differ markedly from the normal. There is a white stroke cutting the oval frame-line above the "L", and the right-hand outer line of the Crown does not cut the white frame-line above the "A".

It is believed that No. 79a occurs on the bottom row of at least four sheets purchased from post offices in Victoria during 1926.

7

I

II

New Dies

1d. For differences see note above No. 20.

1½d. From new steel plates made from a new die. Nos. 87*a* and 96*a* are the Ash printings, the ink of which is shiny.

2d. Die I. Height of frame 25.6 mm. Left-hand frame-line thick and uneven behind Kangaroo. Pearls in Crown vary in size.

Die II. Height of frame 25.6 mm. Left-hand frame-line thin and even. Pearls in Crown are all the same size.

Die III. Height 25.1 mm; lettering and figures of value bolder than Die I.

3d. Die II has bolder letters and figures than Die I, as illustrated above.

5d. Die II has a bolder figure "5" with flat top compared with Die I of the earlier issues.

(Typo A. J. Mullett or J. Ash (from June 1927))

Dies of 3d.:

Die I — Die Ia — Die II

Die I. The letters "TA" of "POSTAGE" at right are joined by a white flaw; the outline of the chin consists of separate strokes.

No. 168a is a preliminary printing made with unsuitable ink and may be detected by the absence of finer details; the King's face appears whitish and the wattles are blank. The greater part of this printing was distributed to the Press with advance notices of the issue.

Die Ia. As Die I, but "T" and "A" have been clearly separated by individual retouches made on the plates.

Die II A completely new die. "T" and "A" are separate and a continuous line has been added to the chin. The outline of the cheek extends to about 1 mm above the lobe of the King's right ear.

Die III. Differs from Dies I and II in the King's left eyebrow which is shaded downwards from left to right instead of from right to left. This die also shows more of the epaulette at the right of the stamp, similar to the 1s.4d. value.

½d. Line to Kangaroo's ear (Right pane R. 6/8)

2d. Medal flaw (Right pane R. 2/5)

6d. "Top hat" flaw (Lower plate, right pane R. 3/3)

1s. Roller flaw over "o" of "one" (Upper plate, right pane R. 1-6/6)

(Des R. A. Harrison (T **28/30**), F. D. Manley (T **27**, **31/6**), H. Barr (T **38/9**), H. Barr and F. D. Manley (T **40**). Eng F. D. Manley and T. C. Duffell (T **34**), T. C. Duffell (revised lettering for T **28a**, **30a**), F. D. Manley and E. Broad (T **38/40**), F. D. Manley (others). All recess with John Ash, W. C. G. McCracken or "By Authority ..." imprints)

1937–49. Chalk-surfaced paper (3d. (No. 168/c), 5s., 10s., £1). W **15** (sideways on 5d., 9d., 5s. and 10s.).

		a. Roller flaw	50·00	15·00
		w. Wmk inverted	£5000	£4000
179/92 *Set of* 14			75·00	27·00

The watermark on No. 191 shows Crown to the left of C of A, on Nos. 171, 173 and 189 it is to the right, *as seen from the back of the stamp*.

For unwmkd issue, see Nos. 228/30*d*.

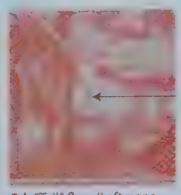
Thin paper. Nos. 176a, 177a, 178a. In these varieties the watermark is more clearly visible on the back and the design is much less sharp. On early printings of No. 176a the paper appears tinted.

SPECIAL COIL PERFORATION. This special perforation of large and small holes on the narrow sides of the stamps was introduced after 1939 for stamps issued in coils and was intended to facilitate separation. Where they exist they are listed as "Coil pairs".

The following with "special coil" perforation were placed on sale in *sheets*: Nos. 179, 205, 222a (1952), 228, 230, 237, 262 (1953), 309, 311, and 314. These are listed as "Coil blocks of four".

Coils with "normal" perforations also exist for Nos. 180 and 184.

41 "Governor Phillip at Sydney Cove" (J. Alcott)



2d. "Tail" flaw (Left pane R. 7/1. Later retouched)

(Des and eng E. Broad and F. D. Manley. Recess J. Ash)

		a. Imperf (pair)*	£6500	
		w. Wmk inverted (*from booklets*)	7·00	2·25
207	**49**	3½d. bright blue (3.42)	3·50	60
		a. Deep blue	2·25	60
208	**50**	5½d. slate-blue (12.2.42)	1·25	20
203/8 *Set of 6*			10·00	2·50

*No. 206a comes in horizontal pair with the right-hand stamp completely imperforate and the left-hand stamp imperforate at right only.

Coils with normal perforations exist for 1d.

For stamps as Nos. 204/5 but without watermark see Nos. 229/30.

The following items are understood to have been the subject of unauthorised leakages from the Commonwealth Note and Stamp Printing Branch and are therefore not listed by us.

It is certain that none of this material was distributed to post offices for issue to the public.

Imperforate all round: 1d. Princess Elizabeth; 1½d. Queen; 2½d. King; 4d. Koala; 6d. Kookaburra; 9d. Platypus; 1s. Lyrebird (small) (also imperf three sides); 1s.6d. Air Mail (Type **22**); 2½d. Mitchell; 2½d. Newcastle (also imperf three sides or imperf vertically).

Also 2½d. Peace, unwatermarked; 2½d. King, *tête-bêche*; 3½d. Newcastle, in dull ultramarine; 2½d. King on "toned" paper.

52 Duke and Duchess of Gloucester

(Des F. D. Manley. Eng F. D. Manley and T. C. Duffell. Recess)

308/14 *Set of 6*			4·50	65

No. 313. Produced in printer's sheets, of 640 split into sheets of 160 for issue. Type I occurs on the two upper sheets from the printers' sheet and on ten positions from the left pane of the lower right sheet. Type II occurs on all stamps from the lower sheets except for ten positions from the left pane of lower right sheet.

No. 314. Both types occur in alternate horizontal rows in the sheet (Type A in Row 1, Type B in Row 2, and so on), and their value is identical. Booklet pane No. 314d from SB35/6a contains two Type A and four Type B.

Nos. 309a/b, 311a/b and 314b/c have horizontal coil perforations as described after No. 191.

Nos. 313ab from booklets SB34/a and 314d from booklets SB35/6a have the outer edges of the panes imperforate, producing stamps with one or two adjacent sides imperforate.

A single example (imperforate at base) of No.314da is known, apparently from a miscut booklet pane.

Printings of the 2d. (from March 1965) and of the 3d. (from April 1965), both including coils, were on Helecon paper.

No. 327 is on toned paper. No. 327a was a late printing on the white paper referred to in the note below No. 360.

An experimental printing of the 11d. was made on Helecon paper in December 1963. See note below No. 362.

All printings of the 8d., 11d., 1s.2d. and 2s.3d. (No. 324a) were on Helecon paper from April 1965.

353 **165** 5d. red 10 10

(Des and eng P. E. Morriss from photograph by Anthony Buckley. Recess)

1963 (9 Oct)–**65**. P 15×14.

354 **166** 5d. deep green ..... 1·00 10
a. Booklet pane of 6 ..... 22·00
b. Imperf between (horiz pair) (31.7.64) ..... 1·50 2·50
354*c* 5d. red (30.6.65) 55 10
ca. Coil pair ..... 19·00 38·00
cb. Booklet pane of 6 ..... 22·00

The 5d. deep green exists from both sheets and booklets on Helecon paper produced in error.

The 5d. red was issued with or without Helecon added to the ink. All coil and booklet printings included Helecon in the ink, except for a small printing produced in error. Examples of the sheet and booklet printings with Helecon ink have been found on Helecon *paper*.

Nos. 354a and 354cb have the outer edges of the panes imperforate producing single stamps with one or two adjacent sides imperforate. They come from booklets SB37/8a.

No. 354b comes from sheets of uncut booklet panes containing 288 stamps (16×18) with wide margins intersecting the sheet horizontally below each third row, alternate rows of stamps imperforate between vertically and the outer left, right and bottom margins imperforate. This means that in each sheet there are 126 pairs of stamps imperf between vertically, plus a number with wide imperforate margins attached, as shown in the illustration.

A 5d. in a similar design, printed in blue and brown with vertical edges imperforate, was prepared, but not issued.

167 Tasman and *Heemskerk*

168 Dampier and *Roebuck*

169 Captain Cook (after painting by Nathaniel Dance)

1963 (3 Dec). Opening of COMPAC (Trans-Pacific Telephone Cable). Chalk-surfaced paper. P 13½.

362 **174** 2s.3d. red, blue, black and pale blue ..... 1·50 2·75

HELECON (PHOSPHOR) STAMPS. "Helecon", a chemical substance of the zinc sulphide group, has been incorporated in stamps in two different ways, either in the ink with which the stamps are printed, or included in the surface coating of the stamp paper.

Owing to the difficulty of identification without the use of a U.V. lamp we do not list the Helecon stamps separately but when in stock can supply them after testing under the lamp.

The first stamp to be issued on Helecon was the 11d. Bandicoot (No. 319) from an experimental printing of four million released to the public in December 1963. The next printing, on ordinary paper, was released in September 1964. The experimental printing was coarse, showing a lot of white dots and the colour is slate-blue, differing from both the ordinary and the later Helecon paper.

Further Helecon printings followed from March 1965. Almost all issues from No. 378 onwards were on Helecon paper or paper coated with Derby Luminescence.

175 Yellow-tailed Thornbill

176 Black-backed Magpie

177 Galah

178 Golden Whistler

179 Blue Wren

180 Scarlet Robin

181 Straw-necked Ibis

(Des Betty Temple-Watts. Photo)

1964 (11 Mar)–**65**. Birds. T **175/81** and similar designs. Chalk-surfaced paper. P 13½.

363	**175**	6d. brown, yellow, black and bluish green (19.8.64)	1·50	50
		a. Brown, yellow, black and emer-grn	3·00	2·50

		a. Ordinary paper. *Deep blue, light blue, orange-brown, blue-grey and black* (7.65)	7·00	8·00
368	**180**	2s.6d. black, red, grey and green (21.4.65)	2·50	4·50
		a. Red omitted (white breast)	£17000	
369	**181**	3s. black, red, buff and yellow-green (21.4.65)	2·50	2·25
363/69 *Set of 7*			10·00	14·00

No. 367a was from a printing, made in 1962, on unsurfaced Wiggins Teape paper, the rest of the set being on chalk-surfaced Harrison paper. Apart from the differences in shade, the inscriptions, particularly "BLUE WREN", stand out very much more clearly on No. 367a. Although two colours are apparent in both stamps, the grey and black were printed from one cylinder.

The 6d. (No. 363) and 2s.5d. were only issued on ordinary paper. The 9d. and 1s.6d. exist on ordinary or Helecon paper. The 6d. (No. 363a), 1s., 2s.6d. and 3s. were issued on Helecon paper only.

182 Bleriot XI Aircraft (type flown by M. Guillaux, 1914)

5d. Re-entry to second "A" of "AUSTRALIA" (Upper right plate, R. 4/4 subsequently retouched)

(Des K. McKay. Adapted and eng P. E. Morriss. Recess)

1964 (1 July). 50th Anniv of First Australian Airmail Flight. P 14½×14.

370	**182**	5d. olive-green	30	10
		a. Re-entry	£275	£180
371		2s.3d. scarlet	1·75	2·75

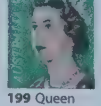
As T **168**—$2 Bass and whaleboat; $4 Admiral King and *Mermaid* (survey cutter).

*This shows two stamps imperforate all round and one imperforate at left only.

†The exact gauge of No. 401c is 14.8×14.1. No. 401 is 14.25×13.95.

Nos. 385a (from booklets SB39/a) and 386ca (from booklets SB42/3a) have the outer edges of the pane imperforate producing single stamps with one or two adjacent sides imperforate.

No. 385 was normally printed in Helecon ink. Early in 1967 experimental printings on different kinds of paper coated with Helecon or Derby Luminescents phosphor were put on sale. These cannot be distinguished by the naked eye.



199 Queen Elizabeth II

200 "Saving Life"

1966 (14 Feb)–**67**. Coil stamps. Photo. P 15×imperf.

404	**199**	3c. black, light brown and green	45	1·25
405		4c. black, light brown and light vermilion	35	1·25
405*a*		5c. black, light brown and new blue (29.9.67)	40	10
404/5a *Set of 3*			1·10	2·25

(Des L. Mason. Photo)

1966 (6 July). 75th Anniv of Royal Life Saving Society. P 13½.

406	**200**	4c. black, bright blue and blue	15	10

201 "Adoration of the Shepherds"

(Des L. Stirling, after medieval engraving. Photo)

1966 (19 Oct). Christmas. P 13½.

407	**201**	4c. black and yellow-olive	10	10
		a. Value omitted	£3750	

No. 407a was caused by a partial omission of the yellow-olive so that there was no colour surrounding the white face value.

202 *Eendracht*

203 Open Bible

(Des F. Eidlitz. Photo)

1966 (24 Oct). 350th Anniv of Dirk Hartog's Landing in Australia. P 13½.

459/64 *Set of 6*			2·25	2·75
MS465 157×129 mm. Nos. 459/64. Imperf			5·50	6·50

The 5c. stamps were issued horizontally *se-tenant* within the sheet, to form a composite design in the order listed.

Several used single 5c. stamps are also known with the black omitted.

50,000 miniature sheets were made available by the Post Office to the organisers of the Australian National Philatelic Exhibition which overprinted them in the white margin at each side of the 30c. stamp with "Souvenir Sheet AUSTRALIAN NATIONAL PHILATELIC EXHIBITION" at left and "ANPEX 1970 SYDNEY 27 APRIL–1 MAY" at right in light red-brown and they were also serially numbered. These were put on sale at the exhibition on the basis of one sheet to each visitor paying 30c. for admission. Although still valid for postage, since the stamps themselves had not been defaced, these sheets were not sold at post offices.

Subsequently further supplies were purchased and similarly overprinted and numbered by a private firm without the authority of the Post Office and ANPEX took successful legal action to stop their further sale to the public. This firm also had the unoverprinted sheets rouletted in colour between the stamps whilst further supplies of the normal sheets were overprinted with reproductions of old coins and others with an inscription commemorating the opening of Melbourne Airport on 1st July 1970, but all these are private productions. Further private productions have been reported.

259 Sturt's Desert Rose

AUSTRALIA I. AUSTRALIA II.

Two types of 2c.

I. "AUSTRALIA" thin: "2c" thin; flower name lightly printed.
II. Redrawn. "AUSTRALIA" thicker; "2c" much more heavily printed; flower name thicker and bolder.

*Nos. D64/b and D65a are also known perf 12½ (line).

Only one unused example, without gum, and another pen-cancelled are known of No. D74*a*.

The 1d. of this printing (No. D74) is distinguishable from No. D78 by the colours, the green being very yellow and the rose having less of a carmine tone. The paper is thicker and slightly toned, that of No D78 being pure white; the gum is thick and yellowish, No. D78 having thin white gum.

All later issues of the 1d. and 2d. are Die II.

(Typo J.B. Cooke (later ptgs by T.S. Harrison))

A new die was introduced for No. D131a. This differs from the original in having a distinct gap between the two arms of the "5". On No. D131 these two features are joined.

Two Dies of ½d.:
Die I. Six dots in base of "2"
Die II. Seven dots in base of "2"

I. II.

Two Dies of 1d. to 10d.:
Die I. Numeral, "D" and stop, generally unoutlined.
Die II. Clear white line separates numeral, etc. from background.

1958–60. No wmk. P 14½×14.

Nos. D140*a* and D141. Value tablets are re-engraved and have thicker and sharper printed lines than before.

The use of Postage Due stamps ceased on 13 January 1963.

OFFICIAL STAMPS

From 1902 the departments of the Commonwealth government were issued with stamps of the various Australian States perforated "OS" to denote official use. These were replaced in 1913 by Commonwealth of Australia issues with similar perforated initials as listed below.

During the same period the administrations of the Australian States used their own stamps and those of the Commonwealth perforated with other initials for the same purpose. These States issues are outside the scope of this catalogue.

Most shades listed under the postage issues also exist perforated "OS". Only those which are worth more than the basic colours are included below.

(O **1**) (O **2**) (11 holes in "S". Examples with 12 holes in "S" are N.S.W. state issues) (O **3**)

1913 (Jan–Apr). Nos. 1/16 punctured as Type O **1**. W **2**. P 12.

No. O128a and probably the other inverted overprints were caused by the insertion of a stamp upside down into sheets repaired before surcharging.

Issue of overprinted official stamps ceased in February 1933 and remaining supplies were withdrawn from sale on 1 October 1935. Thereafter mail from the federal administration was carried free.

BRITISH COMMONWEALTH OCCUPATION FORCE (JAPAN)

Nos. J1/7 were used by the Australian forces occupying Japan after the Second World War. Initially their military post offices supplied unoverprinted Australian stamps, but it was decided to introduce the overprinted issue to prevent currency speculation.

The ½d., 1d. and 3d. values were first issued on 12 October 1946, and withdrawn two days later, but were re-issued together with the other values on 8 May 1947.

The following values with T **2** in the colours given were from proof sheets which, however, were used for postage: ½d. (red) 1d. (red or black) and 3d. (gold, red or black). (*Prices for black opts* £100, *each, and for red or gold from* £325 each, *all un*).

The use of B.C.O.F. stamps ceased on 12 February 1949.

AUSTRALIAN ANTARCTIC TERRITORY

For use at the Antarctic bases of Casey (opened early 1969: used Wilkes postmark until early 1970), Davis (closed from 1965 until early 1969), Heard Island (seasonal occupation only), Macquarie Island, Mawson and Wilkes (closed January 1969). Stamps of Australia were used from the bases before 27 March 1957 and remained valid for use there after the introduction of Australian Antarctic Territory issues.

The following are also valid for use in Australia, where they are put on sale for a limited period when first issued.

DATES OF ISSUE. The dates given refer to release dates in Australia. Local release dates are usually later and where known they are given in footnotes.

Nos. 8/10 and 12/18 placed on sale locally at Macquarie Island on 11.12.66, Wilkes 9.2.67 and Mawson 16.2.67.

No. 11 issued Macquarie Island 4.12.68, Mawson 13.1.69, Wilkes/Casey 9.2.69 and Davis 20.2.69.

CHRISTMAS ISLAND

Formerly a part of the Straits Settlements and then of the Colony of Singapore, Christmas Island was occupied by the Japanese from 31 March, 1942, until September, 1945. It reverted to Singapore after liberation, but subsequently became an Australian territory on 15 October 1958.

Stamps of the STRAITS SETTLEMENTS were used on Christmas Island from 1901 until 1942. Following liberation issues of MALAYA (BRITISH MILITARY ADMINISTRATION) and then SINGAPORE were used from 1946 to 1958.

COCOS (KEELING) ISLANDS

The Cocos (Keeling) Islands, which had been settled by the Clunies Ross family in the 1820s, were annexed by Great Britain in 1857. In 1878 the group was attached to Ceylon, but was transferred to the Straits Settlements on 7 February 1886. During the Second World War the islands were under British military control exercised from Ceylon. At the end of hostilities administration from Singapore was continued until the islands were transferred to Australia on 23 November 1955.

The stamps of the STRAITS SETTLEMENTS were used by a postal agency operating on Cocos (Keeling) Islands from 1 April 1933 until 1 March 1937. The postal agency reopened on 2 September 1952 and used the stamps of SINGAPORE until the islands were transferred to Australia in 1955. From 1955 until 1963 stamps of AUSTRALIA were in use.

Nos. 1/31 were also valid for use in Australia.

PRINTERS. All the following stamps to No. 31 were printed by the Note Printing Branch, Reserve Bank of Australia, Melbourne.

NEW GUINEA

Stamps of Germany and later of GERMAN NEW GUINEA were used in New Guinea from 1888 until 1914.

During the interim period between the "G.R.I." surcharges and the "N.W. PACIFIC ISLANDS" overprints, stamps of AUSTRALIA perforated "OS" were utilised.

AUSTRALIAN OCCUPATION

Stamps of German New Guinea surcharged

G.R.I. **G.R.I.**

2d. (1) **1s.** (2) **1** (3)

SETTINGS. The "G.R.I." issues of New Guinea were surcharged on a small hand press which could only accommodate one horizontal row of stamps at a time. In addition to complete sheets the surcharges were also applied to multiples and individual stamps which were first lightly affixed to plain paper backing sheets. Such backing sheets could contain a mixture of denominations, some of which required different surcharges.

Specialists recognise twelve settings of the low value surcharges (1d. to 8d.):

Setting 1	(Nos. 1/4, 7/11) shows the bottom of the "R" 6 mm from the top of the "d"
Setting 2	(Nos. 16/19, 22/6) shows the bottom of the "R" 5 mm from the top of the "d"
Setting 3	was used for the Official stamps (Nos. O1/2)
Setting 4, and Setting 5	which included the 2½d. value for the first time, showed individual stamps with either 6 mm or 5 mm spacing.

These five settings were for rows of ten stamps, but the remaining seven, used on odd stamps handed in for surcharging, were applied as strips of five only. One has, so far, not been reconstructed, but of the remainder three show the 6 mm spacing, two the 5 mm and one both.

On the shilling values the surcharges were applied as horizontal rows of four and the various settings divide into two groups, one with 3½ to 4½ mm between the bottom of the "R" and the top of numeral, and the second with 5½ mm between the "R" and numeral. The first group includes the very rare initial setting on which the space is 4 to 4½ mm.

	a. No stop after "I"	£8500	£8000

Examples of Nos. 33db, 36b, 38e, 41c and 43a also show the stop after "R" either very faint or missing completely.

Stamps of Marshall Islands surcharged

SETTINGS. The initial supply of Marshall Islands stamps, obtained from Nauru, was surcharged with Setting 2 (5 mm between "R" and "d") on the penny values and with the 3½ to 4 setting on the shilling stamps.

Small quantities subsequently handed in were surcharged, often on the same backing sheet as German New Guinea values, with Settings 6, 7 or 12 (all 6 mm between "R" and "d") for the penny values and with a 5½ mm setting for the shilling stamps.

1914 (16 Dec). Stamps of 1901 surch.

97	2s. brown (Die II) (8.16)	35·00	50·00
	w. Wmk inverted	30·00	90·00
99	£1 chocolate and dull blue (Die II) (8.16)	£350	£450

Dates for Nos. 67 and 74 are issue dates at Rabaul. The stamps were in use from 2 January 1915 on Nauru. All other dates are those of despatch. Nos. 65/6, 68/73, 76/81 were despatched on 15 March 1915.

For Die IIA of 2d. see note below Australia No. 45.

SETTINGS. Type **6** exists in three slightly different versions, illustrated above as (*a*), (*b*), and (*c*). These differ in the letters "S" of "ISLANDS" as follows:

(*a*) Both "SS" normal.

(*b*) First "S" with small head and large tail and second "S" normal.

(*c*) Both "SS" with small head and large tail.

Type **11**, which also shows the examples of "S" as the normal version, can be identified from Type **6** (*a*) by the relative position of the second and third lines of the overprint. On Type **6** (*a*) the "P" of "PACIFIC" is exactly over the first "S" of "ISLANDS". On Type **11** the "P" appears over the space between "I" and "S".

It has been established, by the study of minor variations, that there are actually six settings of the "N.W. PACIFIC ISLANDS" overprint, including that represented by T **11**, but the following are the different arrangements of Type **6** (*a*), (*b*), and (*c*) which occur.

A. Horizontal rows 1 and 2 all Type (*a*). Row 3 all Type (*b*). Rows 4 and 5 all Type (*c*).

B. (½d. green only). As A, except that the types in the bottom row run (*c*) (*c*) (*c*) (*c*) (*b*) (*c*).

C. As A, but bottom row now shows types (*a*) (*c*) (*c*) (*c*) (*b*) (*c*).

Horizontal strips and pairs showing varieties (*a*) and (*c*), or (*b*) and (*c*) *se-tenant* are scarce.

The earliest printing of the 1d. and 2½d. values was made on sheets with margin attached on two sides, the later printings being on sheets from which the margins had been removed. In this printing the vertical distances between the overprints are less than in later printings, so that in the lower horizontal rows of the sheet the overprint is near the top of the stamp.

The settings used on King George stamps and on the Kangaroo type are similar, but the latter stamps being smaller the overprints are closer together in the vertical rows.

PURPLE OVERPRINTS. We no longer differentiate between purple and black overprints in the above series. In our opinion the two colours are nowadays insufficiently distinct to warrant separation.

PRICES. The prices quoted for Nos. 65 to 101 apply to stamps with opts Types **6** (*a*) or **6** (*c*). Stamps with opt Type **6** (*b*) are worth a 25 per cent premium. Vertical strips of three, showing (*a*), (*b*) and (*c*), are worth from four times the prices quoted for singles as Types **6** (*a*) or **6** (*c*).

One Penny	N. W. PACIFIC ISLANDS.
(10)	(11)

1918 (23 May). Nos. 72 and 81 surch locally with T **10**.

O21	4d. ultramarine (1.23)	£350	£150

Dates quoted for Nos. O3/21 are those of despatch from Australia. The earliest postmark date recorded is 2 April 1919 on No. O3. Their continued use on mail from government departments after the establishment of the civil administration is confirmed by a notice in the official *New Guinea Gazette* of 1 August 1921.

Australian postal archives indicate that nine sheets of the £1 Type **1** perforated "O S" were sent to New Guinea in September 1921. There is a pane of 30 of this stamp in the Royal Collection, but as no other examples are known it may not have been issued for postal purposes.

1925 (6 Apr)–**31**. Optd with Type O **2**. P 11.

O42/54 *Set of* 13			£275	£475

Civil Administration in New Guinea was suspended in 1942, following the Japanese invasion.

Various New Guinea stamps exist overprinted with an anchor and three Japanese characters in a style similar to the Japanese Naval Control Area overprints found on the stamps of Netherlands Indies. These overprints on New Guinea are bogus. Two different versions are known, one produced in Japan during 1947 and the other in Australia during the late 1980s.

On resumption, after the Japanese defeat in 1945, Australian stamps were used until the appearance of the issue for the combined territories of Papua & New Guinea.

NORFOLK ISLAND

Norfolk Island, first settled in 1788 from New South Wales, was transferred to Tasmania on 29 September 1844. It became a separate settlement on 1 November 1856 under the control of the Governor of New South Wales. The island was declared an Australian Territory on 1 July 1914. Unlike the other External Territories it retains an independent postal administration.

A Post Office was opened on Norfolk Island in 1832. The stamps of TASMANIA were used on Norfolk Island from July 1854 until May 1855, such use being identified by the "72" numeral cancellation. Stamps of NEW SOUTH WALES were first used on the island in 1877, but were not regularly available until 1898. The first "NORFOLK ISLAND" cancellation was supplied in 1892, but not used until 1898. Stamps of AUSTRALIA were in use from 1913 to 1947.

PAPUA (BRITISH NEW GUINEA)

Stamps of QUEENSLAND were used in British New Guinea (Papua) from at least 1885 onwards. Post Offices were opened at Daru (1894), Kulumadau (Woodlarks) (1899), Nivani (1899), Port Moresby (1885), Samarai (1888), Sudest (1899) and Tamata (1899). Stamps were usually cancelled "N.G." (at Port Moresby from 1885) or "BNG" (without stops at Samarai or with stops at the other offices) from 1888. Queensland stamps were replaced in Papua by the issue of 1901.

9/16a *Set of 8 (cheapest)*			£750	£1400

The paper used for Nos. 1/8 is white, of consistent thickness and rather opaque. The thin paper used for the horizontal watermark printings is of variable thickness, readily distinguishable from the thick paper by its greater transparency and by the gum which is thin and smooth.

Nos. 9/16 were initially printed on the same thick paper as the stamps with horizontal watermark and were line perforated. Values from ½d. to 2½d. were subsequently printed on medium paper on which the watermark was more visible. These were comb perforated. The thin paper with vertical watermark, produced in 1905, is much more transparent and has smooth gum. Printings were made on this paper for all values except the 2½d., but only the ½d. and 2d. were issued in Papua although used examples of the 4d., 1s. and 2s.6d. are also known. The entire printing of the 1d. on thin paper with vertical watermark was used for subsequent overprints.

The sheets of the ½d., 2d. and 2½d. show a variety known as "white leaves" on R. 4/5, while the 2d. and 2½d. (both R. 6/2) and the ½d. and 1s. (both R. 6/3) show what is known as the "unshaded leaves" variety.

38/45a *Set of 8*			£225	£250

In the setting of this overprint Nos. 10, 16, and 21 have the "p" of "Papua" with a defective foot or inverted "d" for "p", and in No. 17 the "pua" of "Papua" is a shade lower than the first "a".

No. 37a comes from a single sheet on which the overprints were sideways. Examples exist showing one, two or four complete or partial overprints.

PRINTERS. All the following issues were printed at Melbourne by the Stamp Ptg Branch (to 1928) or Note Ptg Branch.

WATERMARK VARIETIES. The lithographed issues Nos. 47/83 were printed using a "print-and-turn" technique. Thus, after one half of the sheet had been printed it was turned 180 degrees and the second half printed. As a result, upright and inverted (or sideways and sideways-inverted) watermarks were produced in equal quantities. Nos. 51/3, 57, 62 and 69 are known with watermark reversed and others may well exist.

5 Large "PAPUA"

B

C

Three types of the 2s.6d.:—

A. Thin top to "2" and small ball. Thin "6" and small ball. Thick uneven stroke.

B. Thin top to "2" and large, round ball. Thin "6" and large ball. Very thick uneven stroke. Every stamp in Type B varies slightly.

C. Thick uniform figures with large oval balls Thin even stroke.

Type A is not illustrated as the stamp is distinguishable by perf and watermark.

The litho stones were prepared from the engraved plates of the 1901 issue, value for value except the 2s.6d. for which the original plate was mislaid. No. 48 containing Type A was prepared from the original ½d. plate with the value inserted on the stone and later a fresh stone was prepared from the 1d. plate and this contained Type B. Finally, the original plate of the 2s.6d. was found and a third stone was prepared from this, and issued in 1911. These stamps show Type C.

6 Small "PAPUA"

Civil Administration in Papua was suspended in 1942. On resumption, after the Japanese defeat in 1945, Australian stamps were used until the appearance of the issue of the combined territories of Papua & New Guinea.

POSTAL FISCAL STAMP

Stamp Duty.

F 1

1912 (May) No. 85 Optd with T F **1** by Govt Printer, Port Moresby.

F1	1d. rose-pink	48·00	65·00
	a. Pair, one without opt	£3750	
	b. Opt double	£1400	
	c. "Samp" for "Stamp" (R. 1/1)	£1000	

The use of No. F1 was authorised at Samarai in May 1912 and in early 1913 during shortages of 1d. stamps. Other values, including the 1d. with a curved sans-serif overprint are known used at other offices and at other times, but such use was not authorised.

PAPUA NEW GUINEA

AUSTRALIAN TRUST TERRITORY

Stamps of Australia were used in the combined territory following the defeat of the Japanese in 1945. They remained valid for postal purposes from Papua and New Guinea until 1 March 1953.

The name of the combined territory was changed from "Papua and New Guinea" to "Papua New Guinea" at the beginning of 1972.

SPECIMEN OVERPRINTS. These come from specimen sets in which the lower values were cancelled-to-order, but stamps above the value of 10s. were overprinted "SPECIMEN". These overprints are listed as they could be purchased from the Post Office.

81		2s. blue, blue-green and light yellow-olive	10	10
79/81 *Set of 3*			25	25

Design:—2s. U.N. Emblem and globes.

(New Currency. 100 cents = 1 Australian dollar)

69 *Papilio ulysses*

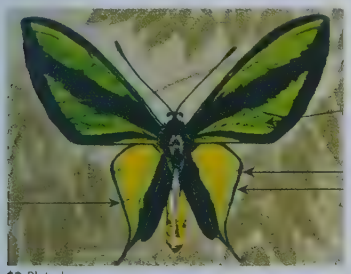
71 *Ornithoptera priamus*

$1 Plate I

Black line through left blue patch on wing consists of two dots only. There are two blue lines extending from upper right edge of right wing towards two small patches of blue.

$1 Plate II

The black line through left blue patch on wing is continuous. Blue lines at upper right edge of wing are omitted. There is an extra short faint blue line extending from edge of lower right wing which is absent in Plate I.



$2 Plate I

In the lower left of the butterfly there are two short black lines from the edge to the yellow part.

In the lower part of the upper right wing there is a series of indeterminate short lines and dots.

$2 Plate II

The two black lines at lower left are lacking.
There are clear fine lines of shading in place of the thicker lines.

There are numerous other minor differences between the two plates of each value and also slight variations in the shades.

(Photo Courvoisier)

1966 (14 Feb)–**67**. Decimal Currency. Butterflies. Vert designs as T **69** (1 to 5c.), or horiz as T **71** (others). Multicoloured. P 11½.

The use of Postal Charge stamps was discontinued on 12 February 1966, but they remained on sale at the Philatelic Bureau until 31 August 1966.

Bahamas

The British Post Office at Nassau was established during the early days of the West Indies packet system, and was certainly operating by 1733. The first known local postmark dates from 1802.

The crowned-circle handstamp No. CC1 was issued in 1846 and was generally replaced, for the public mails, by various stamps of Great Britain in 1858.

Local mail deliveries were rudimentary until 1859 when Nos. 1/2 were issued by the colonial authorities for interisland mails. Examples used for this purpose are usually cancelled in manuscript or with a "27" postmark. The "local" 1d. stamp became valid for overseas mails in May, 1860, when the colonial authorities took over this service from the British G.P.O.

For illustrations of the handstamp and postmark types see BRITISH POST OFFICES ABROAD notes, following GREAT BRITAIN.

NASSAU

CROWNED-CIRCLE HANDSTAMPS

CC1 CC **2** BAHAMAS (Nassau) (18.5.1846) (R). *Price on cover* £2250

No. CC1 was later struck in black and used as an Official Paid mark in 1865 and between 1897 and 1937. Handstamps as Types CC **1** and CC **3** (only three known) struck in black were used for the same purpose from 1933 until 1953; but it is believed that these were never employed during the pre-stamp period. *Price on cover from* £50.

Stamps of GREAT BRITAIN cancelled "A 05" as Type **2**.

1858–60.

CROWN COLONY

1

2

3

(Eng and recess P.B.)

1859 (10 June)–**60.** No wmk. Imperf.

(a) Thick, opaque paper

1	**1**	1d. reddish lake (*shades*)	£5000	£2250

(b) Thin paper

2	**1**	1d. dull lake (4.60)	65·00	£1500

No. 1, the printing on thick opaque paper, is very rare in unused condition. Unused remainders, on medium to thick, but slightly transparent, paper are worth about £250.

Collectors are warned against false postmarks upon the remainder stamps of 1d., imperf, on thin paper.

1860 (Oct). No wmk. Clean-cut perf 14 to 16.

3	**1**	1d. lake (H/S "CANCELLED" in oval £8500)	£5500	£750

For notes on "CANCELLED" examples see Catalogue Introduction. Examples with this handstamp on No. 3 are imperforate horizontally.

1861 (June)–**62.** No wmk.

(a) Rough perf 14 to 16

4	**1**	1d. lake	£650	£325
5	**2**	4d. dull rose (Dec, 1861)	£1400	£400
		a. Imperf between (pair)	£38000	
6		6d. grey-lilac (Dec, 1861)	£4250	£600
		a. Pale dull lilac	£3250	£500

(b) P 11 to 12½ (1862)

7	**1**	1d. lake	£2250	

No. 7 was a perforation trial on a new machine at Perkins, Bacon. It was not sent out to the Colony and is also known part perforated.

(Recess D.L.R.)

1862. No wmk.*

(a) P 11½, 12

8	**1**	1d. carmine-lake	£1000	£190
9		1d. lake	£1600	£275
10	**2**	4d. dull rose	£3750	£425
11		6d. lavender-grey	£11000	£500

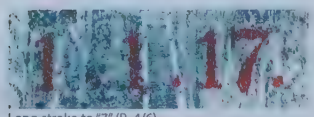
1.1.17. (9)

WAR TAX (10)



Long stroke to "7" (R. 4/6)

1917 (18 May). No. 75b optd with T **9** in red by D.L.R.

90	**6**	1d. grey-black and deep carmine-red	40	2·25
		a. Long stroke to "7"	40·00	75·00
		s. Optd "SPECIMEN"	65·00	

It was originally intended to issue No. 90 on 1 January 1917, but the stamps were not received in the Bahamas until May. Half the proceeds from their sale were donated to the British Red Cross Society.

1918 (21 Feb–10 July). Nos. 75/6, 81/2 and 87 optd at Nassau with T **10**.

91	**8**	½d. green	14·00	50·00
92		1d. carmine (aniline)	1·00	70
		w. Wmk inverted	£300	
		x. Wmk reversed	£400	
93	**6**	1d. black and red (10 July)	4·25	9·50
		a. Opt double, one inverted	£850	
		b. Opt double	£1700	£1800
		c. Opt inverted	£1500	£1600
		x. Wmk reversed	£350	
94		3d. purple/*yellow (thin paper)*	2·75	2·50
		a. Opt double	£1600	£1700
		b. Opt inverted	£1100	£1200
		c. "W" of "WAR" inserted by hand.	£5000	
95	**8**	1s. grey-black and carmine	£110	£160
91/5 *Set of 5*			£120	£200

No. 93 was only on sale for ten days.

No. 94c occurred on R. 1/1 of one sheet, the original "W" having been omitted as a result of a paper fold.

Examples of Nos. 91/2 with overprint inverted, and of Nos. 91/2 and 95 with overprint double, are now considered to be forgeries.

WAR TAX (11)

WAR TAX (12)

WAR CHARITY 3.6.18. (13)

1918 (20 July). Optd by D.L.R. in London with T **11** or **12** (3d).

96	**8**	½d. green	1·75	1·75
		w. Wmk inverted		
		x. Wmk reversed		
97		1d. carmine	4·25	35
		a. Wmk sideways	£200	
		w. Wmk inverted		
		y. Wmk inverted and reversed	£325	
98	**6**	3d. purple/*yellow*	1·00	1·50
		w. Wmk inverted	£170	
		x. Wmk reversed	£200	
99	**8**	1s. grey-black and carmine (R.)	13·00	7·00
96/9 *Set of 4*			18·00	9·75
96s/9s Optd "SPECIMEN" *Set of 4*			£170	

1919 (21 Mar). No. 77 optd with T **12** by D.L.R.

100	**6**	3d. black and brown	1·75	6·00
		a. "C" and "A" missing from wmk	£1800	
		s. Optd "SPECIMEN"	50·00	
		w. Wmk inverted	70·00	

No. 100a shows the "C" omitted from one impression and the "A" missing from the next one to the right (as seen from the front of the stamp). The "C" is badly distorted in the second watermark.

1919 (1 Jan). No. 75b optd with T **13** by D.L.R.

101	**6**	1d. grey-black and deep carmine-red (R.)	30	2·50
		a. Opt double	£2000	
		s. Optd "SPECIMEN"	55·00	
		w. Wmk inverted	80·00	
		x. Wmk reversed	85·00	95·00
		y. Wmk inverted and reversed	£160	

The date is that originally fixed for the issue of the stamp. The year 1918 was also the bicentenary of the appointment of the first Royal Governor.

Nos. 149/50a exist in coils, constructed from normal sheets.

No. 149eb occurs on a row in the watermark in which the crowns and letters "CA" alternate.

The thick chalk-surfaced paper, used for the initial printing of the 1s., 5s. and £1, was usually toned and had streaky gum. The April 1942 printing for the 1s. and 5s., which was mostly used for the "LANDFALL" overprints, was on thin striated paper. Printings of the three values between September 1942 and November 1946 were on a thick, smooth, opaque ordinary paper.

These stamps replaced the definitive series for a period of six months. Initially stocks of existing printings were used, but when further supplies were required for overprinting a number of new printings were produced, some of which, including the new colour of the 3d., did not appear without overprint until much later.

No. 167 perforated "SPECIMEN" is known with the overprint double. (*Price*, £900).

284	50c. on 2s.6d. yellow-olive, blue and carmine	1·00	1·40
285	$1 on 5s. orange-brown, ultramarine and green	1·75	1·50
286	$2 on 10s. rose, blue and chocolate	7·50	4·50
287	$3 on £1 chestnut, blue and rose-red	7·50	4·50
273/287 *Set of* 15		22·00	16·00

The above were made on new printings, some of which vary slightly in shade, and in No. 273 the shield appears as vermilion and green instead of carmine and blue-green due to a different combination of the printing colours.

No. 277a. One sheet exists and the stamp can be distinguished from No. 252 when in a vertical strip of ten as these were printed in sheets of 100 whereas No. 252 was printed in sheets of 60 (six rows of ten across).

1966 (1 July). World Cup Football Championship. As Nos. 176/7 of Antigua.

288	8c. violet, yellow-green, lake and yellow-brown	35	15
289	15c. chocolate, blue-green, lake and yellow-brown	40	25

295a/309a *Set of* 15 (whiter paper)			£500	£375

*This is the earliest known date recorded in the Bahamas.

The 3c. has the value at right instead of at left as on No. 250.

The 1970–71 printings on whiter paper were released as needed, the 12c., $1, $2 and $3 only a week or two before the issue was withdrawn. Due to the marked difference in paper and the use of some new plates there are marked differences in shade in nearly all values.

SPECIAL DELIVERY STAMPS

SPECIAL DELIVERY

(S 1)

1916 (1 May). No. 59 optd with Type S **1** by The Nassau Guardian.

S1	**6** 5d. black and orange	7·50	45·00
	a. Opt double	£800	£1200
	b. Opt double, one inverted	£950	£1300
	c. Opt inverted	£1300	£1400
	d. Pair, one without opt	£27000	£35000
	x. Wmk reversed	£800	

No. S1 was issued as a result of a reciprocal arrangement between the Bahamas and Canadian Post Offices, whereby the application of a special delivery stamp from the country of destination would ensure special treatment on arrival. Canadian special delivery stamps were supplied to the Bahamas Post Office, but, there being no equivalent in Bahamas, the current 5d. definitive was overprinted "SPECIAL DELIVERY" and sent to Canada.

There were three printings from similar settings of 30 (6×5), and each sheet had to pass through the press twice. The first printing of 600 was on sale from March 1916 at four post offices in Canada; Ottawa, Toronto, Westmount (Montreal) and Winnipeg; and was used in combination with Canadian stamps and cancelled in Canada. Towards the end of 1916, however, the Canadian authorities decided to leave the Bahamas stamps to be cancelled on arrival in Nassau.

The second printing of 6000 was released in February 1917 and the third, estimated to be 1200 to 1800, in March the same year. They were both on sale only in the Bahamas. In August 1917 the Canadian Post Office became aware of the later printings and ordered all remaining stocks at the four offices in Canada to be sold off, bringing the facility to an end.

It is not possible to identify the three printings with certainty without plating both the basic stamp and the overprint. The first printing was applied to stamps from vignette plate 1 only, while the second and third were applied to stamps from both plate 1 and plate 2. In general, the word "SPECIAL" is further to the right in relation to "DELIVERY" in the second printing than the first or third, but this alone should not be considered conclusive.

Our prices for No. S1 are for the second printing and any stamps which can be positively identified as being from the first or third would be worth about ten times (first) or four times (third) as much, either unused or used. Examples on cover, posted at one of the four eligible Canadian offices and with the special delivery stamp cancelled in Canada, are very scarce.

All the errors appear to be from the second printing.

SPECIAL DELIVERY (S 2) **SPECIAL DELIVERY** (S 3)

1917 (2 July). As No. 59, but Wmk Mult Crown CA. Optd with Type S **2** by D.L.R.

	s. Optd "SPECIMEN"	70·00	

Nos. S2/3 were only on sale in the Bahamas.

Bahrain

An Independent shaikhdom, with an Indian postal administration from 1884. A British postal administration operated from 1 April 1948 to 31 December 1965.

The first, and for 62 years the only, post office in Bahrain opened at the capital, Manama, on 1 August 1884 as a sub-office of the Indian Post Office at Bushire (Iran), both being part of the Bombay Postal Circle.

Unoverprinted postage stamps of India were supplied to the new office, continuing on sale there until 1933.

Unoverprinted India Victory stamps, Nos. 278/81, were placed on sale in Bahrain on 2 January 1946 (½a. and 3½a.) and 8 February (9p. and 12a.).

Although the stamps of Pakistan were never placed on sale in Bahrain examples of the 1947 "PAKISTAN" overprints on India can be found cancelled in Bahrain from air mail originating at Dubai or Sharjah.

Stamps of Great Britain surcharged

For similar surcharges without the name of the country, see BRITISH POSTAL AGENCIES IN EASTERN ARABIA.

93	**164**	1r. on 1s.6d. deep grey-blue	7·50	50
90/3 *Set of* 4			15·00	14·00

BAHRAIN 2 RUPEES I

BAHRAIN 2 RUPEES II

BAHRAIN 2 RUPEES (**9**) III

BAHRAIN 5 RUPEES I

BAHRAIN 5 RUPEES (**10**) II

BAHRAIN 10 RUPEES I

BAHRAIN 10 RUPEES (**11**) II

TYPE I (T **9/11**). Type-set surch by Waterlow. Bold thick letters with sharp corners and straight edges.

TYPE II (T **9/11**). Plate-printed surch by Harrison. Thinner letters, rounded corners and rough edges. Bars wider apart.

TYPE III (T **9**). Plate-printed surch by Harrison. Similar to Type II as regards the position of the bars on all 40 stamps of the sheet, but the letters are thinner and with more rounded corners than in II, while the ink of the surcharge is less black.

The general characteristics of Type II of the 2r. are less pronounced than in the other values, but a distinguishing test is in the relative position of the bars and the "U" of "RUPEES". In Type B (except for the 1st stamp, 5th row) the bars start immediately beneath the left-hand edge of the "U". In Type I they start more to the right.

In the 10r. the "1" and the "0" are spaced 0.9 mm in Type I and only 0.6 mm in Type II.

1955 (23 Sept)–**60**. T **166/8** (Waterlow ptgs) surch as T **9/11**.

94		2r. on 2s.6d. black-brown (Type I)	5·50	2·25

STAMP BOOKLET

1934. Red and black on tan cover. Mysore Sandal Soap advertisement on front.

SB1	1r. booklet containing sixteen 1a. (Nos. 16 and/or 16w) in blocks of 4	£2500

The Bahrain Post Department took over the postal services on 1 January 1966. Later stamp issues wil be found in Part 19 (*Middle East*) of the Stanley Gibbons catalogue.

Barbados

Regular mails between Barbados and Great Britain were established at an early date in the island's development and it is believed that the British Mail Packet Agency at Bridgetown was opened in 1688 as part of the considerable expansion of the Packet Service in that year.

From 1 August 1851 the colonial authorities were responsible for the internal post system, but the British G.P.O. did not relinquish control of the overseas post until 1858.

For illustrations of the handstamp types see BRITISH POST OFFICES ABROAD notes, following GREAT BRITAIN.

CROWNED-CIRCLE HANDSTAMPS

CC1 CC **1** *BARBADOES (3.10.1849) (R.)*..... *Price on cover* £475

Combination covers exist with the local postage paid by a Barbados 1d. stamp and the overseas fee by an example of No. CC1.

During shortages of ½d. stamps in 1893 (17 February to 15 March) and of the ¼d. in 1896 (23 January to 4 May) No. CC1 was utilised, struck in black, on local mail. *Price on cover from* £100.

PERKINS BACON "CANCELLED". For notes on these handstamps, showing "CANCELLED" between horizontal bars forming an oval, see Catalogue Introduction.

CROWN COLONY

1 Britannia

2 Britannia

(Recess Perkins, Bacon & Co)

1852 (15 Apr)–**55**. Paper blued. No wmk. Imperf.

1	**1**	(½d.) yellow-green (1855)	—	£700
2		(½d.) deep green	£150	£325
3		(1d.) blue	60·00	£190
4		(1d.) deep blue	42·00	70·00
4*a*		(2d.) greyish slate	£300	£1300
		b. Bisected (1d.) (on cover) (1854)	†	£8500
5		(4d.) brownish red (1855)	£120	£275

The bisect, No. 4b was authorised for use between 4 August and 21 September 1854 during a shortage of 1d. stamps.

Prepared for use but not issued.

5*a*	**1**	(No value), slate-blue (*shades*)	28·00	
5*b*		(No value), deep slate	£250	

Nos. 5*a*/*b* were never sent to Barbados and come from the Perkins Bacon remainders sold in the 1880's.

Apart from the shade, which is distinctly paler, No. 4*a* can be distinguished from No. 5*b* by the smooth even gum, the gum of No. 5*b* being yellow and patchy, giving a mottled appearance to the back of the stamp. No. 5*a* also has the latter gum.

1855–58. White paper. No wmk. Imperf.

7	**1**	(½d.) yellow-green (1857)	£550	£110
8		(½d.) green (*shades*) (1858)	£190	£200
9		(1d.) pale blue	£170	70·00
10		(1d.) deep blue (H/S "CANCELLED" in oval £12000)	90·00	60·00

No. 8 exists in a yellowish green shade which should not be confused with No. 7.

1858 (10 Nov). No wmk. Imperf.

11	**2**	6d. pale rose-red	£750	£120
11*a*		6d. deep rose-red	£750	£180
12		1s. brown-black	£250	£110
12*a*		1s. black	£225	75·00

BISECTS. The various 1d. bisects recorded between Nos. 14a and 73a were principally used for the ½d. inland rate, covering newspapers from 1854 onwards. Prices for Nos. 24a, 52a, 66a and 73a are for examples on dated piece, undated pieces being worth considerably less. Nos. 14a, 15a and 19a are only known on undated piece and the prices for these bisects are for items in this condition.

1860. No wmk.

(a) Pin-perf 14

13	**1**	(½d.) yellow-green	£2750	£425

		a. Imperf (pair)	£750	
33		6d. orange (1870)	£200	50·00
34		1s. brown-black (1863)	75·00	11·00
		a. Error. Blue	£18000	
35		1s. black (1866)	65·00	11·00
		a. Imperf between (horiz pair)	£9000	

(b) Prepared for use, but not issued. P 11 to 12½

36	1	(½d.) grass-green	£15000	
37		(1d.) blue	£2000	

The (1d.) deep blue No. 24, also exists imperforate, from a new plate, but examples cannot readily be distinguished from No. 10.

The bisect, No. 24a, was first authorised for use in April 1863 and further examples have been reported up to January 1869 during shortages of ½d. stamps.

No. 34a was an error on the part of the printer who supplied the first requisition of the 1s. value in the colour of the 1d. The 1s. blue stamps were never placed on sale, but the Barbados Colonial Secretary circulated some samples which were defaced by a manuscript corner-to-corner cross. A number of these samples subsequently had the cross removed.

Nos. 36/7 were never sent to Barbados and come from the Perkins Bacon remainders. It is believed that the imperforate pairs came from the same source.

1870. Wmk Large Star, Type w **1**. Rough perf 14 to 16.

43	1	(½d.) green	£170	10·00
43*b*		(½d.) yellow-green	£225	50·00
44		(1d.) blue	£2500	70·00
		a. Blue paper	£4000	£140
		b. Wmk sideways	†	£1400
45		(4d.) dull vermilion	£1600	£120
46	2	6d. orange-vermilion	£1000	90·00
47		1s. black	£450	19·00

No. 43 exists imperforate (*Price* £1300, unused pair).

1871. Wmk Small Star, Type w **2**. Rough perf 14 to 16.

48	1	(1d.) blue	£180	4·25

(c) P 14×12½

84	2	4d. red	£6000	

*The normal sideways watermark shows Crown to left of CC, *as seen from the back of the stamp.*

Only two examples, both used, of No. 70a have been reported.

Nos. 72sa/3sa were from postal stationery and are without gum.

Very few examples of No. 84 have been found unused and only one used example is known.

(3a)

(3b)

(3c)

1878 (28 Mar). No. 64 surch by West Indian Press with T **3a/c** sideways twice on each stamp and then divided vertically by 11½ to 13 perforations. The lower label, showing the original face value, was removed before use.

*(a) With T **3a**. Large numeral "1", 7 mm high with curved serif, and large letter "D", 2¼ mm high*

86	3	1d. on half 5s. dull rose	£5000	£650
		a. No stop after "D"	£16000	£2000
		b. Unsevered pair (both No. 86)	£26000	£2500
		c. Ditto, Nos. 86 and 87	—	£5000
		ca. Pair without dividing perf	†	£40000
		d. Ditto, Nos. 86 and 88	£42000	£8500

*(b) With T **3b**. As last, but numeral with straight serif*

87	3	1d. on half 5s. dull rose	£7500	£950
		a. Unsevered pair	†	£4250

*(c) With T **3c**. Smaller numeral "1", 6 mm high and smaller "D", 2½ mm high*

88	3	1d. on half 5s. dull rose	£9000	£1000
		a. Unsevered pair	£38000	£5000

All types of the surcharge are found reading upwards as well as downwards, and there are minor varieties of the type.

Barbuda (*see after* Antigua)

Basutoland

Stamps of CAPE OF GOOD HOPE were used in Basutoland from about 1876, initially cancelled by upright oval with framed number type postmarks of that colony. Cancellation numbers known to have been used in Basutoland are 133 (Quthing), 156 (Mafeteng), 210 (Mohaleshoek), 277 (Morija), 281 (Maseru), 317 (Thlotse Heights) and 688 (Teyateyaneng).

From 1910 until 1933 the stamps of SOUTH AFRICA were in use. Stamps of the Union provinces are also known used in Basutoland during the early years of this period and can also be found cancelled-to-order during 1932–33.

The following post offices and postal agencies existed in Basutoland before December 1933. Stamps of Cape of Good Hope or South Africa with recognisable postmarks from them are worth a premium. For a few of the smaller offices or agencies there are, as yet, no actual examples recorded. Dates given are those generally accepted as the year in which the office was first opened.

Bokong (1931)	Motsekuoa (1915)
Butha Buthe (1907)	Mount Morosi (1918)
Jonathan's (1927)	Mphotos (1914)
Khabos (1927)	Peka (1908)
Khetisas (1930)	Phamong (1932)
Khukhune (1933)	Pitseng (1921)
Kolonyama (1914)	Qachasnek (1895)
Kueneng (1914)	Qalo (1923?)
Leribe (1890)	Quthing (1882)
Mafeteng (1874)	Rankakalas (1933)
Majara (1912)	Roma Mission (1913)
Makhoa (1932)	Sebapala (1930)
Makoalis (1927)	Seforong (1924)
Mamathes (1919)	Sehlabathebe (1921)
Mapoteng (1925)	Sekake (1931)
Marakabeis (1932)	Teyateyaneng (1886)
Maseru (1872)	Thaba Bosigo (1913)
Maseru Rail (1915?)	Thabana Morena (1922)
Mashai (1929)	Thabaneng (1914)
Matsaile (1930)	Thaba Tseka (1929)
Mekading (1914)	Thlotse Heights (1872)
Mofokas (1915)	Tsepo (1923)
Mohaleshoek (1873)	Tsoelike (1927)
Mokhotlong (1921)	Tsoloane (1918)
Morija (1884)	

For further details of the postal history of Basutoland see *The Cancellations and Postal Markings of Basutoland/Lesotho* by A. H. Scott, published by Collectors Mail Auctions (Pty) Ltd, Cape Town, from which the above has been, with permission, extracted.

Selling Your Stamps?

Summary Tip #19:
5 Different Ways to Sell your Stamps: Choose with Care

by Andrew McGavin

Dear Colleague,

Following the first article (page 42) in the 'Selling your Stamps?' series we present the advantages and disadvantages inherent in each of the 5 different ways to sell your stamps.

1. Direct Sale: To a Dealer – or Stamp Auction buying on their own account.

The merits of 'direct sale' are often under-estimated by collectors. Direct sale, intelligently handled, may yield considerable benefits. For example we recently purchased a modest collection at a major London auction which was estimated at £4,000 to £5,000. Remember in our last article #18 when we talked about 'know the strength of your collection' ... this collection was the kind that no public auction house could afford to 'break' on behalf of the owner – so it was offered intact as one lot. Inevitably no collector would purchase such a diverse collection – so the 'trade' was bidding against each other in order to purchase. Finally we purchased the collection for £8,158 including 20% buyer's premium. The collection actually sold for £6,800. The auction's commission charged to the buyer was £1,358.

But that's not the end of the story. Did the seller receive £6,800? ... NO. The seller received £6,800 less the seller's commission which unless specially negotiated was a further 17.62% inclusive of VAT. That's a further £1,198 to be deducted from the £6,800 sale price. The owner will have received £5,602 upon a collection sold to us for which we paid £8,158 !

I can hear you saying that Auctions exist so that buyers compete to pay more for your stamps – it's true – but some collections simply are not suited to being sold via public auction. All you are doing is paying an auction to ensure that dealers compete to purchase your collection ...

45% MORE was paid for the public auction to sell the collection to a stamp dealer. £2,556 more was paid that the collector did not receive.

BUT – there are imaginative ways that you can obtain more from dealers without going to auction – and have the benefit of certainty too, whilst not waiting up to 6 months for your money ... for example – ... a valuable collection was offered to us earlier this year. We're allowed to write what happened without revealing any confidences. Unfortunately the Father had died leaving one of his two Daughters £25,000 and the other Daughter his Stamp Collection – a very difficult situation as you might imagine. Believing the collection may be valuable, unusually, 3 different dealers visited to value it. All 3 dealers incurred costs – in our case 6 travelling hours and 260 miles – so none was happy to leave an offer on the 'table' for the next dealer to pay £50 more and purchase the collection – what was the client to do allowing fair play to all? We suggested an 'auction' monitored by the owner of the collection – not hard to conduct in the age of landline and mobile phones... and opened the bidding with a £20,000 bid.

The 3rd Dealer dropped out – the 2nd dealer had just finished viewing the collection so was actually on the client's premises. He bid £21,000, we bid £22,000 ... and so it went on until bidding 'narrowed' to £500 increments and finally we purchased the collection for £27,500 and travelled 260 miles again to collect it and pay for it. The client thanked the 2nd dealer for his time and participation with a small ex-gratia payment. Fortunately a happy ending for the client – amazingly, more than her Sister ... it could so easily have been a different outcome.

But what if that collection had been auctioned as one lot or 7 volumes + residue? For the client to have been better off – the trade would have had to pay more than £40,000 ... an unlikely scenario. The moral – know the strength of your collection and 'pick' the right people to participate in its purchase.

In our next article we'll discuss alternatives

Happy collecting from us all,

PS. If you find this 'tip' interesting please forward it to a philatelic friend.

Batum

Batum, the outlet port on the Black Sea for the Russian Transcaucasian oilfields, was occupied by the Turks on 15 April 1918.

Under the terms of the armistice signed at Mudros on 30 October 1918 the Turks were to withdraw and be replaced by an Allied occupation of Batum, the Baku oilfields and the connecting Transcaucasia Railway. British forces arrived off Batum in early December and the oblast, or district, was declared a British military governorship on 25 December 1918. The Turkish withdrawal was complete five days later.

The provision of a civilian postal service was initially the responsibility of the Batum Town Council. Some form of mail service was in operation by February 1919 with the postage prepaid in cash. Letters are known showing a framed oblong handstamp, in Russian, to this effect. The Town Council was responsible for the production of the first issue, Nos. 1/6, but shortly after these stamps were placed on sale a strike by Council employees against the British military governor led to the postal service being placed under British Army control.

SURCHARGES. Types **2** and **4/8** were all applied by handstamp. Most values from No. 19 to 40 are known showing the surcharge inverted, surcharge double or in pairs with surcharge *tête-bêche*. Inverted surcharges are worth from 2xnormal, *tête-bêche* pairs from four times the price of a single stamp.

FORGERIES. Collectors are warned that all the stamps, overprints and surcharges of Batum have been extensively forged. Even the Type **1** stamps should be purchased with caution, and rarities should not be acquired without a reliable guarantee.

		a. "BPITISH"	£190	
53		50r. deep blue	2·75	25·00
		a. "BPITISH"	£425	
45/53 *Set of 9*			19·00	£160

Nos. 45/53 were printed in sheets of 308 (22×14). The "BPITISH" error occurs on R. 1/19 of the overprint.

POSTCARD STAMPS

When Nos. 7/10 were issued on 13 April 1919 a similar 35k. surcharge was applied to stocks of various Russian postcards held by the post office. The majority of these had stamp impressions printed directly on to the card, but there were also a few cards, originally intended for overseas mail, on which Russia 4k. stamps had been affixed.

PRICES. Those in the left-hand column are for unused examples on complete postcard; those on the right for used examples off card. Examples used on postcard are worth more.

1919 (13 Apr). Russian stamps handstamped as T **2**.

P1	35k. on 4k. red (Arms type)	£9000	£9000
P2	35k. on 4k. carmine-red (Romanov issue)	£17000	£17000

Batum was handed over to the National Republic of Georgia on 7 July 1920.

Bechuanaland

Before the 1880s the only Europeans in the area which became Bechuanaland were scattered hunters and traders, together with the missionaries who were established at Kuruman as early as 1816.

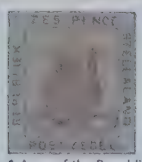
Tribal conflicts in the early years of the decade led to the intervention of Boers from the Transvaal who established the independent republics of Goshen and Stellaland.

STELLALAND

The Boer republic of Stellaland was proclaimed towards the end of 1882. A postal service was organised from the capital, Vryburg, and stamps were ordered from a firm in Cape Town. These were only valid within the republic. Until June 1885 mail to other parts of South Africa was sent through Christiana, in the Transvaal, and was franked with both Stellaland and Transvaal stamps.

No date stamps or obliterators were used by the Stellaland Post Office. Stamps were initially pen-cancelled with the date only and from August 1884 to May 1885 by the date and the postmaster's initials. After May 1885 they were generally cancelled by a pen stroke or cross or left uncancelled. Postmarks found on Stellaland stamps were applied in transit; those known being '3' (Rustenburg), '6' (Christiana) and '8' (Zeerust) of Transvaal, '27' (Hoopstad, Orange Free State) or '232' (Barkly West, Cape Colony).

PRICES FOR STAMPS ON COVER
The issues of Stellaland are very rare on cover.



1 Arms of the Republic

		b. Imperf between (vert pair)	£1800	
5		1s. green	85·00	£800

In 1884 the British Government, following appeals from local chiefs for protection, decided to annex both Goshen and Stellaland. A force under Sir Charles Warren from the Cape reached Vryburg on 7 February 1885 and continued to Mafeking, the principal town of Goshen.

On 30 September 1885 Stellaland and other territory to the south of the Molopo River was constituted the Crown Colony of British Bechuanaland. A protectorate was also proclaimed over a vast tract of land to the north of the Molopo.

Stellaland stamps continued to be used until 2 December 1885 with external mail, franked with Stellaland and Cape of Good Hope stamps, postmarked at Barkly West and Kimberley in Griqualand West.

1885 (Oct). Handstamped "Three" sideways in violet-lake.

6	**1**	2d. on 4d. olive-grey	£3500

On 2 December 1885 Cape of Good Hope stamps overprinted "British Bechuanaland" were placed on sale at the Vryburg post office.

BECHUANALAND
(2)

1885 (2 Dec)–**87**. Stamps of Cape of Good Hope ("Hope" seated) optd with T **1**, by W. A. Richards & Sons, Cape Town.

(a) Wmk Crown CC (No. 3) or Crown CA (others)

1	½d. grey-black (No. 40a) (R.)	35·00	40·00
	a. Opt in lake	£5000	£5500
	b. Opt double (Lake+Black)	£750	

2		3d. pale claret (No. 43)	60·00	70·00
		a. No dot to 1st "i" of "British"	£800	
3		4d. dull blue (No. 30) (2.6.87)	95·00	85·00
		(b) Wmk Anchor (Cape of Good Hope. Type **13***)*		
4		½d. grey-black (No. 48*a*) (24.12.86)	14·00	27·00
		a. Error. "ritish"	£2750	
		b. Opt double	£3500	
		w. Wmk inverted		
5		1d. rose-red (No. 49)	27·00	9·00
		a. Error. "ritish"	£4250	£2250
		b. No dot to 1st "I" of "British"	£475	£300
		c. Opt double	†	£2250
6		2d. pale bistre (No. 50)	55·00	8·00
		a. Error. "ritish"	£8000	£4000
		b. No dot to 1st "i" of "British"	£850	£275
		c. Opt double	†	£2250
		w. Wmk inverted	†	£800
7		6d. reddish purple (No. 52)	£200	38·00
		a. No dot to 1st "i" of "British"	£2250	£750
8		1s. green (No. 53) (26.11.86)	£375	£190
		a. Error. "ritish"	£24000	£15000

Nos. 1/8 were overprinted from settings of 120. The missing "B" errors are believed to have occurred on one position for one of these settings only. The 'No dot to 1st "i"' variety occurs on R. 10/3 of the left pane.

Overprints with stop after "Bechuanaland" are forged, as are overprints on the 1s. Wmk Crown CC and the 5s. Cape of Good Hope stamps.

1888 (19 Jan). No. 197 of Great Britain optd with T **2**, by D.L.R.

9		½d. vermilion	2·00	1·50
		a. Opt double	£2500	
		s. Handstamped "SPECIMEN"	85·00	

3 4 5

(Typo D.L.R.)

1888 (19 Jan).

		(a) Wmk Orb (Great Britain Type **48***). P 14*		
10	**3**	1d. lilac and black	25·00	4·00
11		2d. lilac and black	£120	2·25
		a. Pale dull lilac and black	£120	25·00

17		2s.6d. green and black	80·00	80·00
18		5s. green and black	£130	£170
19		10s. green and black	£275	£400
		(c) Two Orbs (sideways). P 14×13½		
20	**5**	£1 lilac and black (f.c. 50·00)	£900	£800
21		£5 lilac and black (f.c. £200)	£4000	£1700
10s/21s H/S "SPECIMEN" *Set of* 12			£1000	

Nos. 10/21 were produced by overprinting a series of "Unappropriated Die" designs originally produced by the Board of Inland Revenue for use as Great Britain fiscal stamps.

Several values are known on blued paper. No. 11*a* is the first printing of the 2d. (on safety paper?) and has a faded appearance.

When purchasing Nos. 20/21 in used condition beware of copies with fiscal cancellations cleaned off and bearing forged postmarks.

For No. 15 surcharged "£5" see No. F2.

1d. (6) **1s.** (7) **2d.** Curved foot to "2"

1888 (Sept–20 Nov). Nos. 10/11 and 13/15 surch as T **6** or **7**, by P. Townshend & Co., Vryburg.

22	**3**	1d. on 1d. lilac and black	8·00	8·00
23		2d. on 2d. lilac and black (R.)	65·00	4·00
		a. Pale dull lilac and black (No. 11*a*)	£150	65·00
		b. Curved foot to "2"	£350	£150
		c. Surch in green	†	£4000
25		4d. on 4d. lilac and black (R.) (20.11)	£425	£600
26		6d. on 6d. lilac and black	£150	12·00
		a. Surch in blue	†	£13000
28	**4**	1s. on 1s. green and black	£250	90·00

Nos. 23c and 26a are from two sheets of surcharge trials subsequently put into stock and used at Vryburg (2d.) or Mafeking (6d.) during 1888–89.

It should be noted that, in addition to its curved foot, the "2" on No. 23b is distinctly shorter than the "d".

A single example of No. 23c with the curved foot to "2" variety has been recorded (*Price,* £18,000, *used*).

One Half-Penny

(8)

1888 (8 Dec). No. 12a surch with T **8**, by P. Townshend & Co, Vryburg.

29	**3**	½d. on 3d. pale reddish lilac and black	£275	£325
		a. Broken "f" in "Half"	£17000	

No. 29 was produced from a setting of 60 (12×5).

No. 29a shows the letter "f" almost completely missing and occurs on R. 5/11 of the setting. Five examples are known, one being in the Royal Collection.

Errors of spelling on this surcharge are bogus. The normal surcharge has also been extensively forged.

British Bechuanaland. (9) **British Bechuanaland.** (10) **BRITISH BECHUANALAND** (11)

1888 (27 Dec). No. 48a of Cape of Good Hope (wmk Anchor) optd with T **9**, by P. Townshend & Co, Vryburg.

30		½d. grey-black (G.)	3·25	35·00
		a. Opt "Bechuanaland British"	£3000	
		ab. "British" omitted	£7000	
		b. Opt double, one inverted, inverted opt "Bechuanaland British"	£3000	
		ba. Opt double, one inverted, inverted "British" omitted	£7500	
		c. Opt double, one vertical	£850	
		ca. *Se-tenant* with stamp without opt	£10000	

No. 30 was produced using a setting of 30 (6×5).

The overprint was misplaced upwards on at least one pane, giving the overprint "Bechuanaland British" (No. 30a) on rows 1 to 4 and "British" omitted on row 5 (No. 30ab). "British" was also omitted on R. 5/1 of the setting on some sheets only.

On one pane on which the overprint was applied double, one inverted, the inverted overprint was misplaced downwards, giving No. 30b on rows 7 to 10 and "British" omitted (No. 30ba) on row 6.

n Normal "n" **n** Inverted "u"

1891 (Nov). Nos. 49a/50 of Cape of Good Hope (wmk Anchor), optd with T **10**, reading upwards.

31		1d. carmine-red	13·00	18·00
		a. Horiz pair, one without opt	£26000	
		b. Optd "Bechuanaland. British"		
		c. "Bechuanaland" omitted	£3500	
		d. Inverted "u" for 2nd "n"	£225	£275
32		2d. bistre (*shades*)	7·00	2·25
		a. No stop after "Bechuanaland"	£350	£350
		b. Inverted "u" for 2nd "n"	£300	£300
31s/2s H/S "SPECIMEN" *Set of* 2			£130	

The overprint on Nos. 31 and 32 was of 120 impressions in two panes of 60 (6×10). That on No. 32 was applied both by a stereo plate and by a forme made up from loose type. No. 31 was overprinted only with the latter. No. 32a is from the stereo overprinting (left pane, R. 3/3), 31d and 32b are from the typeset overprinting (left pane, R. 10/4).

A single example of No. 31 with "British" omitted is known; it is in the Royal Philatelic Collection.

See also Nos. 38 and 39.

1891 (1 Dec)–**1904**. Nos. 172, 200, 205, 208 and 211 of Great Britain optd with T **11**, by D.L.R.

33		1d. lilac	7·00	1·50
34		2d. grey-green and carmine	23·00	4·00
35		4d. green and purple-brown	4·25	60
		a. Bisected (2d.) (on cover) (11.99)	†	£2500
36		6d. purple/*rose-red*	9·00	2·25
37		1s. dull green (7.94)	13·00	18·00
		a. Bisected (6d.) (on cover) (12.04)	†	—
33/7 *Set of* 5			50·00	24·00
33s/6s H/S "SPECIMEN" *Set of* 4			£170	

No. 35a was used at Palapye Station and No. 37a at Kanye, both in the Protectorate.

1893 (Dec)–**95**. As Nos. 31/2, but T **10** reads downwards.

38		1d. carmine-red	4·00	2·25
		b. "British" omitted	£4250	£4250
		c. Optd "Bechuanaland. British"	£1500	£1600
		d. Inverted "u" for 2nd "n"	£160	£160
		e. No dots to "i" of "British"	£160	£160
		f. "s" omitted	£700	£700
		g. Opt reading up, no dots to "i" of "British"	£4500	
39		2d. bistre (12.3.95)	13·00	3·25
		a. Opt double	£1400	£700
		b. "British" omitted	£850	£500
		c. "Bechuanaland" omitted	—	£700
		d. Optd "Bechuanaland. British"	£500	£300
		e. Inverted "u" for 2nd "n"	£275	£170
		f. No dots to "i" of "British"	£275	£170
		g. Opt reading up, no dots to "i" of "British"	£4750	

The same typeset overprint was used for Nos. 38 and 39 as had been employed for Nos. 31 and 32 but applied the other way up; the inverted "u" thus falling on the right pane, R. 1/3. The no dots to "i" variety only occurs on this printing (right pane, R. 1/4). Some sheets of both values were overprinted the wrong way up, resulting in Nos. 38g. and 39g.

No. 38f. developed gradually on right pane R. 10/8. The variety is not known on Nos. 31, 32 or 39.

On 16 November 1895 British Bechuanaland was annexed to the Cape of Good Hope and ceased to have its own stamps, but they remained in use in the Protectorate until superseded in 1897. The Postmaster-General of Cape Colony had assumed control of the Bechuanaland postal service on 1 April 1893 and the Cape, and subsequently the South African, postal authorities continued to be responsible for the postal affairs of the Bechuanaland Protectorate until 1963.

This large area north of the Molopo River was proclaimed a British Protectorate on 30 September 1885 at the request of the native chiefs.

A postal service using runners was inaugurated on 9 August 1888 and Nos. 40 to 55 were issued as a temporary measure with the object of assessing the cost of this service.

Protectorate (12) 15½ mm **Protectorate 1d** (13)

13a Small figure "1" (R. 7/2) **13b** Small figure "1" (R. 10/2)

2 Normal "2" **2** Curved foot to "2" (42b)

1888 (Aug). No. 9 optd with T **12** and Nos. 10/19 surch or optd only as T **13** by P. Townshend & Co. Vryburg.

40	–	½d. vermilion	13·00	55·00
		a. "Protectorate" double	£350

		b. Curved foot to "2"	£950	£550
43		3d. on 3d. pale reddish lilac and black	£200	£275
44		4d. on 4d. lilac and black	£475	£500
		a. Small figure "4"	£6000	£6000
45		6d. on 6d. lilac and black	£120	55·00
46	**4**	1s. green and black	£140	60·00
		a. First "o" omitted	£6500	£3750
		s. Handstamped "SPECIMEN"	£130	
47		2s. green and black	£750	£1100
		a. First "o" omitted	£18000	
48		2s.6d. green and black	£600	£950
		a. First "o" omitted	£20000	
49		5s. green and black	£1300	£2250
		a. First "o" omitted	£25000	
50		10s. green and black	£5000	£7500

Nos. 40/5 were produced from a basic setting of 120 (12×10) on which a faulty first "o" in "Protectorate" occurred on R. 5/12. For Nos. 46/50 the setting was reduced to 84 (12×7) and on many sheets the first "o" on R. 5/12 failed to print.

There were two distinct printings made of No. 40, the first in 1888 and the second in 1889. The overprint setting used for the first printing was broken up and had to be remade for the second. The first printing used a matt ink which produces a cleaner impression than the second, which is printed with a black glossy ink giving a distinctly muddy appearance.

There are a number of smaller than normal "1"s in the setting, usually identifiable by the upper serif of the "1" which is pointed and slopes sharply downwards at the left. R. 7/2 and 10/2 are quite distinct and are as shown.

The normal space between "1" and "d" measures 1 mm. On No. 41b it is 1.7 mm.

It should be noted that, like No. 23b, the "2" on No. 42b is distinctly shorter than the "d" and has a distinctive curl to the upper part of the "2", not present on No. 23.

A single example of No. 50 with the first "o" omitted is known; it is in the Royal Philatelic Collection.

Nos. 40/50 were first placed on sale in Vryburg on 23 June 1888. The August issue date refers to the start of the Runner Post.

See also Nos. 54/5.

1888 (10 Dec). No. 25 optd with T **12** by P. Townshend & Co., Vryburg.

51	**3**	4d. on 4d. lilac and black	£150	60·00
		a. Opt (T **12**) double	†	£2750

Bechuanaland Protectorate (14) **Fourpence** (15)

1888 (27 Dec). No. 48a of Cape of Good Hope (wmk Anchor), optd with T **14** by P. Townshend & Co., Vryburg.

52		½d. grey-black (G.)	6·50	55·00
		a. Opt double	£500	£750
		ab. Ditto, one reading "Protectorate Bechuanaland"	£1200	
		ac. Ditto, one reading "Bechuanaland" only	£2500	
		b. "Bechuanaland" omitted	£1800	
		c. Optd "Protectorate Bechuanaland"	£1000	£1000

1889 (Mar). No. 9 surch with T **15** by P. Townshend & Co., Vryburg.

53	4d. on ½d. vermilion	45·00	6·00
	a. "rpence" omitted (R. 9/2)	†	£6000
	b. "ourpence" omitted (R. 9/2)	£10000	
	c. Surch (T **15**) inverted	†	£4000
	cb. Ditto. "ourpence" omitted	†	£17000
	s. Handstamped "SPECIMEN"	£150	

The lines of the surcharge are normally 6 mm apart, but 5 mm and 4.5 mm spacings are known.

Examples of No. 53c are postmarked "679" (Tati).

The surcharge is known printed in green, due to faulty cleaning of the inking roller. All examples known were cancelled at Shoshong. (*Price* £1500 *used*).

Protectorate (16) 15 mm

Protectorate (17) 19 mm

1890. No. 9 optd.

54	**16**	½d. vermilion	£225	£250
		a. Type **16** inverted	85·00	£120
		b. Type **16** double	£130	£180
		c. Type **16** double and inverted	£750	£850
		d. Optd "Portectorate" inverted	£20000	
		w. Wmk inverted		
55	**17**	½d. vermilion	£275	£450
		a. Type **17** double	£1600	£1700
		b. Optd "Protectorrte"		
		c. Optd "Protectorrte" double	£20000	

These were trial printings made in June 1888 (No. 55) and subsequently (No. 54) which were later issued.

The 15 mm measurement of the overprint on No. 54 should not be relied on as a sole diagnostic, since the overprint on a few positions within the setting of No. 40 similarly measure 15 mm. No. 54 is a cleaner, more even overprint and the out of line letters so frquently encountered on No. 40, especially the raised 'P' of 'Protectorate' and its consequent greater separation from the first 'r' are not found on this stamp.

In June 1890 the Bechuanaland Protectorate and the Colony of British Bechuanaland came under one postal administration and the stamps of British Bechuanaland were used in the Protectorate until 1897.

BRITISH BECHUANALAND (18)

BECHUANALAND PROTECTORATE (19)

1897. No. 61 of Cape of Good Hope (wmk Anchor), optd as T **18**.

	(a) Lines 13 mm apart, bottom line 16 mm long, by Taylor & Marshall, Cape Town		
56	½d. yellow-green (July?)	2·50	20·00
	(b) Lines 13½ mm apart bottom line 15 mm long, by P. Townshend & Co, Vryburg		
57	½d. yellow-green (April)	42·00	£110
	(c) Lines 10½ mm apart, bottom line 15 mm long, by W. A. Richards & Sons, Cape Govt Printers		
58	½d. yellow-green (July?)	19·00	75·00

Although issued only in the Protectorate, the above were presumably overprinted "BRITISH BECHUANALAND" because stamps bearing this inscription were in use there at the time.

1897 (Oct)–**1902**. Nos. 172, 197, 200, 202, 205 and 208 of Great Britain (Queen Victoria) optd with T **19** by D.L.R.

Stanley Gibbons

399 Strand

BY APPOINTMENT TO
HER MAJESTY THE QUEEN
PHILATELISTS
STANLEY GIBBONS LTD
LONDON

Unsure how to progress your collection?

Visit 399 Strand to get advice from our experienced and knowledgeable staff. They will help you choose the stamps and philatelic accessories that will enhance and develop your collection. They will also offer guidance on techniques for the care and storage of your stamps and covers.

We have a superb range of albums and philatelic accessories.

We strive to cater for every need a collector might have, and if we don't have the exact item you need, we will recommend an equivalent or an alternative.

Come in, browse our range and choose what's best for you.

Before you commit to a particular album, take the time to talk to our staff who will help you weigh up the pros and cons before you make your decision. We are always happy to demonstrate anything we sell from tweezers to Frank Godden luxury albums.

OUR PROMISE TO YOU!

If anything is out of stock when you visit, we will ship it to you carriage free*.
**Free delivery service available to UK addresses only.*

161		3½c. on 4d. red-orange (Type I)	50	3·75
		a. Wide surch (I)	18·00	42·00
		b. Type II	3·00	14·00
		ba. Bold "c" (Type II)	£120	£180
		c. Wide surch (II)	65·00	£100
		d. Type III (6 June)	20	60
		da. Bold "c" (Type III)	10·00	19·00
162		5c. on 6d. purple (Type I)	2·25	3·25
		a. Type II (12 May)	20	10
163		10c. on 1s. black and brown-olive	20	10
		a. Horiz pair, righthand stamp without surch	£13000	
164		12½c. on 1s.3d. black and lilac	65	20
165		25c. on 2s.6d. black and rose-red	1·50	1·00
166		50c. on 5s. black and violet-blue	2·00	3·00
167		1r. on 10s. black and red-brown (Type I)	£350	£170
		a. Type II (surch at bottom left) (17 Mar)	27·00	38·00
		b. Type II (surch at foot, either to right or central) (Apr)	26·00	20·00
157/67b *Set of 11 (cheapest)*			38·00	35·00

Nos. 161/c occur from the same printing, each sheet containing 33 examples of Type I, five of Type I with wide spacing, 19 of Type II and three of Type II with wide spacing. The wide surcharge measures 9½ mm overall (with "C" spaced 1½ mm from "½") and comes on eight of the ten stamps in the last vertical row. The surcharge on the remainder of the sheet varies between 8½ and 9½ mm.

No. 163a was caused by a shift of the surcharge so that the last vertical row on the sheet is without "10 c".

A later printing of the 12½c. on 1s.3d. was from a fresh setting of type, but is insufficiently different for separate listing. Later printings of the 10c. and 25c. were identical to the originals.

Examples of No.167 with the surcharge central at foot are believed to be from a trial sheet.

POSTAL FISCAL STAMPS

The following stamps issued for fiscal purposes were each allowed to be used for postal purposes for a short time. No. F2 was used by the public because the word "POSTAGE" had not been obliterated and No. F3 because the overprint did not include the words "Revenue only" as did the contemporary fiscal overprints for Basutoland and Swaziland.

Bechuanaland Protectorate (F 1) £5 (F 2) Bechuanaland Protectorate. (F 3)

1910 (July). No. 266a of Transvaal optd with Type F **1** by Transvaal Govt Ptg Wks, Pretoria.

F1		6d. black and brown-orange (Bl-Blk)	£190	£375

No. F1 was supplied to Assistant Commissioners in January 1907 for revenue purposes. The "POSTAGE" inscription was not obliterated, however, and the stamp is known postally used for a period of a year from July 1910.

1918. No. 15 surch with Type F **2** at top.

F2	**4**	£5 on 1s. green and black (F.C. £950)	£60000	

1921. No. 4b of South Africa optd with Type F **3**, in varying positions.

F3		1d. scarlet	48·00	£150
		a. Opt double, one albino	£180	

Bechuanaland became the independent republic of Botswana, within the Commonwealth, on 30 September 1966.

MILITARY TELEGRAPH STAMPS

Military Telegraph Stamps were provided for the pre-payment of non-official messages sent via the army telegraph system. They were used by army personnel for private communications, newspaper reporters and the local population when the army was in control of the telegraph system. They were supplied to the Bechuanaland Expedition in late November 1884.

Bermuda

The first internal postal system for Bermuda was organised by Joseph Stockdale, the proprietor of the *Bermuda Gazette*, in January 1784. This service competed with that of the colonial post office, set up in May 1812, until 1818.

Control of the overseas postal services passed to the British G.P.O. in 1818. The internal delivery system was discontinued between 1821 and 1830. The overseas posts became a colonial responsibility in September 1859.

For illustrations of the handstamp types see BRITISH POST OFFICES ABROAD notes, following GREAT BRITAIN.

O 1

O 2

1848–61. Postmasters' Stamps. Adhesives prepared and issued by the postmasters at Hamilton and St. Georges. Dated as given in brackets.

(a) By W. B. Perot at Hamilton

O1	O **1**	1d. black/*bluish grey* (1848)	—	£180000
O2		1d. black/*bluish grey* (1849)	—	£200000
O3		1d. red/*thick white* (1853)	—	£180000
O4		1d. red/*bluish wove* (1854)	—	£400000
O5		1d. red/*bluish wove* (1856)	—	£250000
O6	O **2**	(1d.) carmine-red/*bluish laid* (1861)	£140000	£100000

(b) By J. H. Thies at St. Georges. As Type O 2 but inscr "ST. GEORGES"

O7	–	(1d.) carmine-red/*buff* (1860)	†	£85000

Stamps of Type O **1** bear manuscript value and signature, the dates being those shown on the eleven known examples. The stamps are distributed between the dates as follows: 1848 three examples, 1849 two examples, 1853 three examples, 1854 two examples, 1856 one example.

It is believed that the franking value of Nos. O6/7 was 1d., although this is not shown on the actual stamps. Four examples are known of this type used from Hamilton, from March 1861 (and one unused), and five used from St. Georges between July 1860 and January 1863, both issues being cancelled by pen.

Prices shown reflect our estimation of value based on known copies. For instance of the two copies known of No. O4, one is in the Royal collection and the other is on entire.

It is possible that a fourth postmaster's provisional was used by Robert Ward at Hamilton in late 1862 when two examples of Type O **2** on laid paper are known cancelled by blue crayon.

5

(Typo D.L.R.)

1865–1903. Wmk Crown CC.

(a) P 14

1	**1**	1d. rose-red (25.9.65)	£100	1·25
		a. Imperf	£75000	£27000
		w. Wmk inverted	£550	£200
2		1d. pale rose	£140	7·50
		w. Wmk inverted	£600	£275
3	**2**	2d. dull blue (14.3.66)	£475	38·00
		w. Wmk inverted	£1700	£700
4		2d. bright blue (1877)	£475	21·00
		w. Wmk inverted	£1700	£700
5	**3**	3d. yellow-buff (10.3.73)	£475	65·00
		aw. Wmk inverted	£1400	£325
		ax. Wmk reversed	£2500	£1200
5*b*		3d. orange (1875)	£2000	£160
6	**4**	6d. dull purple (25.9.65)	£1000	75·00
		w. Wmk inverted	—	£1600
7		6d. dull mauve (2.7.74)	23·00	12·00
		w. Wmk inverted	£180	£275
8	**5**	1s. green (25.9.65)	£350	70·00
		w. Wmk inverted	£900	£350

(b) P 14×12½

10	**3**	3d. yellow-buff (12.81)	£180	60·00
10*a*	**4**	6d. bright mauve (1903)	17·00	22·00
		w. Wmk inverted	£1400	£1500
11	**5**	1s. green (11.93)	17·00	£120
		a. Imperf between (vert strip of 3)	£12000	
		w. Wmk inverted	£1300	

No. 11a occurs from Rows 8, 9, and 10 of four panes, possibly from a single sheet. Some of the stamps have become partially separated. One *used* vertical pair is known (*Price* £18000).

Although they arrived in Bermuda in March 1880, stamps perforated 14×12½ were not issued until the dates given above.

THREE PENCE (6) THREE PENCE (6a)

THREE PENCE (7) One Penny. (8)

1874 (12 Mar–19 May). Nos. 1 and 8 surch diagonally.

(a) With T 6 ("P" and "R" different type)

12	**1**	3d. on 1d. rose-red	£18000	
13	**5**	3d. on 1s. green	£2500	£850

(b) With T 6a ("P" same type as "R")

13*b*	**5**	3d. on 1s. green	£2000	£800

(c) With T 7 (19 May)

14	**5**	3d. on 1s. green	£1500	£650

The 3d. on 1d. was a trial surcharge which was not regularly issued, though a few examples were postally used before 1879. Nos. 13, 13*b* and 14, being handstamped, are found with double or partial double surcharges.

(Surch by Queens Printer, Donald McPhee Lee)

1875 (March–May). Surch with T **8**.

15	**2**	1d. on 2d. (No. 3) (23 Apr)	£700	£375
		a. No stop after "Penny"	£25000	£13000
16	**3**	1d. on 3d. (No. 5) (8 May)	£450	£350
17	**5**	1d. on 1s. (No. 8) (11 Mar)	£500	£250
		a. Surch inverted	—	£50000
		b. No stop after "Penny"	£40000	£18000

It is emphasised that the prices quoted for Nos. 12/17 are for fine examples. The many stamps from these provisional issues which are in inferior condition are worth much less.

1893 PROVISIONAL POSTCARD. Following the reduction of the overseas postcard rate to 1d. in 1893 existing stocks of postal stationery postcards, including some from the September 1880 issue franked with Nos. 19 and 22, were surcharged "One Penny". This surcharge was applied by the *Royal Gazette* press. It is generally believed that an individual in the Post Office acquired all the examples showing Nos. 19 and 22, but provisional postcards are known used to Europe or locally (*Price from* £600 *unused*, £1600 *used*).

ONE FARTHING

(12)

13 Dry Dock

14

1901. As Nos. 29/a but colour changed, surch with T **12** by D.L.R.

30	**5**	¼d. on 1s. dull grey (11.1.01)	5·00	1·00
		as. Optd "SPECIMEN"	80·00	
30*b*		¼d. on 1s. bluish grey (18.3.01)	5·50	1·50
		ba. "F" in "FARTHING" inserted by handstamp	£8000	£10000

Ten examples of No. 30ba are known, eight unused (one being in the Royal Philatelic Collection) and two used (one on postcard). It would appear that the "F" in position one of an unspecified horizontal row was damaged and an additional impression of the letter was then inserted by a separate handstamp.

Nos. 44 to 51*a* are comb-perforated 13.8x14 or 14. No. 45 exists also line-perforated 14 probably from the printing dispatched to Bermuda on 13 March 1911.

See also Nos. 77/87*a*.

15

HIGH VALUE KEY TYPES. The reign of King Edward VII saw the appearance of the first in a new series of "key type" designs, initially for Nyasaland, to be used for high value denominations where a smaller design was felt to be inappropriate. The system was extended during the reign of King George V, using the portrait as Bermuda Type **15**, to cover Bermuda, Ceylon, Leeward Islands, Malaya — Straits Settlements, Malta and Nyasaland. A number of these territories continued to use the key type concept for high value King George VI stamps and one, Leeward Islands, for stamps of Queen Elizabeth II.

In each instance the King George V issues were printed in sheets of 60 (12×5) on various coloured papers. The system utilised a common "head" plate used with individual "duty" plates which printed the territory name and face value.

Many of the major plate flaws on the King George V head plate occur in different states, having been repaired and then damaged once again, perhaps on several occasions. Later printings of R. 1/12 show additional damage to the crown and upper scrolls. The prices quoted in the listings are for examples approximately as illustrated.

Break in scroll (R. 1/12)

Broken crown and scroll (R. 2/12)

Nick in top right scroll (R. 3/12) (Some printings from 1920 onwards show attempts at repair)

Break through scroll (R. 1/9. Ptgs from June 1929. Some show attempts at repair)

Break in lines below left scroll (R. 4/9. Ptgs from May 1920)

Damaged leaf at bottom right (R. 5/6. Ptgs from April 1918)

Gash in fruit and leaf (R. 5/12. Ptgs from November 1928)

88/93 *Set of* 4			£450	£700
88s/93s Optd or Perf (12s.6d) "SPECIMEN" *Set of* 4			£600	

The true No. 89*h* is the only stamp on grey-blue paper, other deeper orange-vermilion shades exist on different papers. No. 89k was despatched to Bermuda in July/August 1932, but is not known used before 1937.

Beware of fiscally used 2s.6d. 10s. and 12s.6d. stamps cleaned and bearing faked postmarks. Large quantities were used for a "head tax" levied on travellers leaving the country.

For 12s.6d. design inscribed "Revenue" at both sides see No. F1 under POSTAL FISCAL.

1935 (6 May). Silver Jubilee. As Nos. 91/4 of Antigua, but ptd by Waterlow. P 11×12.

Perforations. Two different perforating machines were used on the various printings of these stamps: (*a*) the original 11.9 line perforation; (*b*) 11.9×11.75 comb perforation, introduced in July 1950. These perforations occur as indicated above.

Murray Payne Ltd

British Commonwealth & King George VI Specialists

We hold an extensive stock of King George VI keyplates, both basic stamps and varieties.

We guarantee our identifications, and the Specimens in our stock.

Following extensive damage to their printing works on 29 December 1940 much of De La Rue's work was transferred to other firms operating under their supervision. It is understood that Williams Lea & Co produced those new printings ordered for the Bermuda high value stamps during 1941. The first batch of these printings showed the emergency use, by Williams Lea, of a 14¼ line perforating machine (exact gauge 14.15) instead of the comb perforation (exact gauge 13.9×13.8).

Dates marked * are those of earliest known use.

In No. 116c the coloured surfacing of the paper is mottled with white specks sometimes accompanied by very close horizontal lines. In Nos. 116d, 117b and 118c/d the surfacing is the same colour as the back, sometimes applied in widely spaced horizontal lines giving the appearance of laid paper.

†No. 120d is the so-called "lemon" shade.

British Guiana

The postal service from what was to become British Guiana dates from 1796, being placed on a more regular basis after the final British occupation.

An inland postal system was organised in 1850, using the adhesive stamps of British Guiana, but, until 1 May 1860, overseas mails continued to be the province of the British G.P.O. The stamps of Great Britain were supplied for use on such letters from 11 May 1858 and examples of their use in combination with British Guiana issues have been recorded.

For illustration of the handstamp and postmark type see BRITISH POST OFFICES ABROAD notes, following GREAT BRITAIN.

CROWNED-CIRCLE HANDSTAMPS

The provision of a handstamp, probably as Type CC **1**, inscribed "DEMERARA", is recorded in the G.P.O. proof book under 1 March 1856. No examples have been reported. A further handstamp, as Type CC **6**, recorded in the proof book on 17 February 1866, is known used as a cancellation in at least three instances, including one on cover dated 8 November 1868.

GEORGETOWN (DEMERARA)

CROWN COLONY

(Currency. 100 cents = 1 dollar)

1

2

(Set up and printed at the office of the *Royal Gazette*, Georgetown, British Guiana)

1850 (1 July)–**51**. Type-set. Black impression.

(a) Medium wove paper. Prices are for—I. Cut square. II. Cut round

			I Used	*II Used*
1	**1**	2c. *rose* (1.3.51)	—	£325000
2		4c. *orange*	£100000	£16000
3		4c. *lemon-yellow* (1851)	£130000	£24000
4		8c. *green*	£70000	£16000
5		12c. *blue*	£35000	£11000
6		12c. *indigo*	£45000	£13000
7		12c. *pale blue* (1851)	£40000	£13000
		a. "2" of "12" with straight foot	£110000	£25000
		b. "1" of "12" omitted		† £250000
		(b) Pelure paper (1851)		
8	**1**	4c. *pale yellow*	£130000	£24000

These stamps were usually initialled by the postmaster, or the Post Office clerks, before they were issued. The initials are—E. T. E. D(alton), E. D. W(ight), J. B. S(mith), H. A. K(illikelly), and W. H. L(ortimer). There are several types of each value and it has been suggested that the setting contained one horizontal row of four slightly different impressions.

Ten examples of No. 1 have been recorded, including three pairs on separate covers.

(Litho Waterlow)

1852 (1 Jan). Surface-coloured paper. Imperf.

9	**2**	1c. black/*magenta*	£15000	£5500
10		4c. black/*deep blue*	£25000	£12000

There are two types of each value.

Reprints on thicker paper, and perf 12½, were made in 1865 (*Price £24 either value*).

Such reprints with the perforations removed are sometimes offered as genuine originals.

CONDITION. Prices for Nos. 9 to 27 are for fine copies. Poor to medium specimens can be supplied when in stock at much lower rates.

3

4

5

(Dies eng and stamps litho Waterlow)

1853–59. Imperf.

(a) Original printing

11	**3**	1c. vermilion	£7500	£1700

This 1c. in *reddish brown* is probably a proof (*Price* £1500).

A

B

C

D

A. "O" large and 1 mm from left corner.
B. "O" small and ¾ mm from left corner.
C. "O" small and ¾ mm from left corner. "NT" widely spaced.
D. "ONE" close together, "O" 1¼ mm from left corner.

(b) Fresh lithographic transfers from the 4c. with varying labels of value. White line above value (1857–59).

12	**3**	1c. dull red (A)	£7500	£2000
13		1c. brownish red (A)	£15000	£2500
14		1c. dull red (B)	£8500	£2250
15		1c. brownish red (B)	£16000	£2750
16		1c. dull red (C)	£10000	£2500
16*a*		1c. brownish red (C)	—	£3500
17		1c. dull red (D)	†	£25000

The four types (A to D) occurred within the same sheet and exist *se-tenant* (*Prices, for se-tenant pair from* £25,000 *unused*, £7000 *used*).

1853–55. Imperf.

18	**4**	4c. deep blue	£5500	£1100
		a. Retouched	£8000	£1600
19		4c. blue (1854)	£3000	£800
		a. Retouched	£4500	£1000
20		4c. pale blue (1855)	£2250	£700
		a. Retouched	£3250	£1000

The 4c. value was produced from transfers from the original 1c., with the bottom inscription removed, teamed with a new face value. The join often shows as a white line or traces of it above the label of value and lower corner figures. In some stamps on the sheet this line is missing, owing to having been retouched, and in these cases a line of colour usually appears in its place.

The 1c. and 4c. stamps were printed in 1865 from fresh transfers of five varieties. These are on thin paper and perf 12½ (*Price* £21 *each unused*).

1860 (May). Figures in corners framed. Imperf

21	**5**	4c. blue	£7000	£800

6

(Type-set and printed at the *Official Gazette* by Baum and Dallas, Georgetown).

1856.

(a) Surface-coloured paper

23	**6**	1c. black/*magenta*	*	—
24		4c. black/*magenta* (Jan)	£100000	£25000
25		4c. black/*rose-carmine* (Aug)	†	£40000
26		4c. black/*blue* (Sept)	†	£150000

(b) Paper coloured through

27	**6**	4c. black/*deep blue* (Aug)	†	£225000

Since only one example of No. 23 is known, no market price can be given. This celebrated stamp frequently termed "the world's rarest", was last sold in New York in June 2014 for nearly £6 million. It is initialled by E. D. Wight and postmarked at Demerara on 4 April 1856.

These stamps, like those of the first issue, were initialled before being issued; the initials are—E.T.E.D(alton), E.D.W.(ight), C.A.W(atson), and W.H.L(ortimer). C.A.W. only appears on stamps postmarked between 14 March and 4 April and also 16–20 May. E.T.E.D. is only known on stamps between 1–5 July and on 1 August. All examples on the rose-carmine or blue papers show E.D.W.

Stamps as Type **6** were printed in sheets of four (2×2) each stamp differing slightly in the position of the inscriptions. There is evidence that the setting was re-arranged at some point before August, *possibly* to accommodate the production of the 1c.

PAPERMAKERS' WATERMARKS. Seven different papermakers' watermarks were used in the period 1860 to 1875 and stamps bearing portions of these are worth a premium.

7

		d. Italic "S" in "BRITISH" (R. 3/3)	—	£1600

Stamps were initialled across the centre before use by the Acting Receiver-General, Robert Mather. Black was used on the 1c., red for the 2c. and an ink which appears white for the 4c.

The three values of this provisional were each printed in sheets of 24 (6×4). The 1c. and 2c. were produced from the same setting of the border ornaments which contained 12 examples as Type **10** (Rows 1 and 2), eight as Type **11** (R. 3/1 to R. 4/2) and four as Type **12** (R. 4/3–6).

The setting of the 4c. contained ten examples as Type **13** (R. 1/1 to R. 2/4), eight as Type **14** (R. 2/5–6 and Row 4) and six as Type **15** (Row 3).

		a. Without "SPECIMEN"	£1400	£550
		b. "1" with foot	£275	£110
		c. Imperf between (horiz pair)	†	£10000
165		2c. *yellow*	95·00	50·00
		a. Bisected diagonally (1c.) (on cover)	†	—
		b. Without "SPECIMEN"	£1200	£650
		c. Small "2"	£180	£100

These stamps were perforated "SPECIMEN" as a precaution against fraud. The letters may be upright, inverted, reversed or inverted and reversed and stamps are known with "SPECIMEN" double or treble.

The 2c. is known printed double, one albino.

The 1c. and 2c. stamps were printed in separate sheets, but utilising the same clichés, these being altered according to the face value required. Two settings were used, common to both values:—

1st setting. Four rows of three, T **26** being Nos. 5, 6, 7, 8, 11 and 12, and T **27** the remainder.

From this setting there were two printings of the 2c., but only one of the 1c.

2nd setting. Six rows of two, T **26** being Nos. 3, 7, 8, 9, 11 and 12, and T **27** the remainder.

There were two printings of each value from this setting.

Se-tenant pairs are worth about 20% more.

The "1" with foot occurs on T **27** on No. 9 in the first setting and on T **26** on No. 7 in the first printing only of the second setting.

The small "2" appears on T **26** in the first setting on Nos. 6, 7, 8 and 12 in the first printing and on Nos. 7, 8 and 12 only in the second printing: in the second setting it comes on Nos. 3, 9 and 12 in the first printing and on Nos. 9, 11 and 12 in the second printing. On T **27** the variety occurs in the first setting on No. 9 of the second printing only and in the second setting on No. 10 in both printings.

		f. Shaved "E" (R. 6/2)	55·00	
222/4 *Set of* 3			11·00	6·25

No. 222c was caused by damage to the first "E" of "CENTS" which developed during surcharging. The listing is for an example with only the upright stroke of the letter visible.

There were two settings of No. 223 with the no stop and shaved "E" varieties occurring on R. 5/5 and R. 4/2 of the first and on R. 2/9 and R. 3/8 of the second.

No. 224b occurred on the first five vertical columns of one sheet, the surcharges on the right hand vertical column being normal.

Only two examples of No. 224ba are known.

There is only one known example of No. 224da.

In No. 253a the flag at the main truck is close to the mast, whereas in the original type it appears to be flying loose from halyards. There are two background lines above the value "2 CENTS" instead of three and the "S" is further away from the end of the tablet.

On the Waterlow printings there is *always* a single wide-tooth perforation on each side at the top of the stamps. For the De La Rue stamps these teeth can occur *either* at the top or the bottom. Those listed De La Rue printings, which do not differ in shade, are for examples with the wide-tooth perforation at the bottom.

*All the Waterlow printings and early De La Rue printings of the horizontal designs are perforated 12.3×12.8, but De La Rue printings from 22 May 1962 (including those on the Block CA watermark) are perf 12.3×12.6.

The 1c. and 2c., printed by Waterlow, exist in coils constructed from normal sheets.

OFFICIAL STAMPS

OFFICIAL (O 1) OFFICIAL (O 1a) OFFICIAL (O 2)

1875. Optd with Type O **1** (1c.) or O **1a** (others) by litho. P 10.

O1	**8**	1c. black (R.)	75·00	26·00
		a. Imperf between (horiz pair)	†	£30000
O2		2c. orange	£450	14·00
O3		8c. rose	£350	£150
O4	**7**	12c. brownish purple	£3500	£500
O5	**9**	24c. green	£2750	£275

Two types of the word "OFFICIAL" are found on each value. On the 1c. the word is either 16 or 17 mm long. On the other values the chief difference is in the shape and position of the letter "o" in "OFFICIAL". In one case the "o" is upright, in the other it slants to the left.

1877. Optd with Type O **2** by typo. Wmk Crown CC. P 14.

O6	**16**	1c. slate	£375	65·00
		a. Imperf between (vert pair)	†	£30000
O7		2c. orange	£170	15·00
O8		4c. blue	£140	27·00
O9		6c. brown	£5500	£600
O10		8c. rose	£2000	£450
		Prepared for use, but not issued.		
O11	**16**	12c. pale violet	£1800	
O12		24c. green	£2250	

The "OFFICIAL" overprints have been extensively forged.

The use of Official stamps was discontinued in June 1878.

British Guiana became independent as Guyana on 25 May 1966.

British Honduras

It is recorded that the first local post office was established by the inhabitants in 1809, but Belize did not become a regular packet port of call until December 1829. The post office came under the control of the British G.P.O. in April 1844 and the stamps of Great Britain were supplied for use on overseas mail from May 1858.

The colonial authorities took over the postal service on 1 April 1860, the Great Britain stamps being withdrawn at the end of the month. There was no inland postal service until 1862.

For illustrations of the handstamp and postmark types see BRITISH POST OFFICES ABROAD notes, following GREAT BRITAIN.

CROWN COLONY

1

(Typo D.L.R.)

1865 (1 Dec). No wmk. P 14.

1	**1**	1d. pale blue	70·00	65·00
		a. Imperf between (pair)		
2		1d. blue	£100	75·00
3		6d. rose	£425	£170
4		1s. green	£400	£130
		a. In horiz pair with 6d.	£50000	
		b. In vert pair with 1d.	£65000	

In the first printing all three values were printed in the same sheet separated by horizontal and vertical gutter margins. The sheet comprised two panes of 60 of the 1d. at the top with a pane of 60 of the 1s. at bottom left and another of 6d. at bottom right. Copies of 1d. *se-tenant* with the 6d. are not known. There were two later printings of the 1d. but they were in sheets without the 6d. and 1s.

1872–79. Wmk Crown CC.

(New Currency. 100 cents = 1 British Honduras dollar)

2 CENTS (2) TWO (3) 2 CENTS (4)

1888 (1 Jan). Stamps of 1872–79 (wmk Crown CC), surch locally as T **2**.

(a) P 12½

23	**1**	2c. on 6d. rose	£350	£275
24		3c. on 3d. chocolate	£18000	£6000

(b) P 14

25	**1**	2c. on 6d. rose	£190	£170
		a. Surch double	£2500	
		b. Bisected (1c.) (on cover)	†	£300
		c. Slanting "2" with curved foot	£3250	
		w. Wmk inverted	—	£650
26		3c. on 3d. chestnut	£110	£110

There are very dangerous forgeries of these surcharges, particularly of No. 24.

No. 25c may be a trial.

1888. Stamps of 1882–87 (wmk Crown CA), surch locally as T **2**, P 14.

27	**1**	2c. on 1d. rose	13·00	45·00
		a. Surch inverted	£7500	£5500
		b. Surch double	£900	£900
		c. Bisected (1c.) (on cover)	†	£200
28		10c. on 4d. mauve	70·00	19·00
29		20c. on 6d. yellow	30·00	50·00
30		50c. on 1s. grey	£475	£700
		a. Error. "5" for "50"	£17000	

Various settings were used for the surcharges on Nos. 23/30, the most common of which was of 36 (6x6) impressions. For No. 29 this setting was so applied that an albino surcharge occurs in the margin above each stamp in the first horizontal row.

The same setting was subsequently amended, by altering the "2" to "1", to surcharge the 4d. value. As this was in sheets of 30 it was only necessary to alter the values on the bottom five rows of the setting. Albino surcharges once again occur in the top margin of the sheet, but, as the type in the first horizontal row remained unaltered, these read "20 CENTS" rather than the "10 CENTS" on the actual stamps.

1888 (Mar). No. 30 further surch locally with T **3**.

35	**1**	"TWO" on 50c. on 1s. grey (R.)	60·00	£100
		a. Bisected (1c.) (on cover)	†	£300

63	**11**	$1 green and carmine (12.99)	95·00	£160
64		$2 green and ultramarine (12.99)	£150	£225
65		$5 green and black (12.99)	£325	£475
51/65 *Set of* 15			£700	£1000
51s/65s Optd "SPECIMEN" *Set of* 15			£400	

Most values are known with a forged Belize postmark dated "OC 23 09".

1899 (1 July). Optd "REVENUE" 12 mm long.

66	**8**	5c. ultramarine	28·00	3·00
		a. "BEVENUE"	£180	£180
		b. Malformed "S" at right	£700	£350
		d. Opt 11 mm long	32·00	12·00
67	**9**	10c. mauve and green	19·00	21·00
		a. "BEVENUE"	£350	£425
		b. "REVENU"	£700	
		c. Opt 11 mm long	22·00	50·00
		cb. "REVENU"	£800	£900
68		25c. red-brown and green	4·25	40·00
		a. "BEVENUE"	£200	£425
		b. "REVE UE"	£2500	
		c. Repaired "S" at right	£750	
		d. Opt 11 mm long	5·50	65·00
69	**1**	50c. on 1s. grey	£275	£425
		a. "BEVENUE"	£5500	£6500
		c. Opt 11 mm long	£425	£650

Two minor varieties, a small "U" and a tall, narrow "U" are found in the word "REVENUE".

The overprint setting of 60 (6×10) contained 43 examples of the 12 mm size and 17 of the 11 mm. The smaller size overprints occur on R. 8/1, R. 8/3 to 6 and on all positions in Rows 9 and 10.

The "BEVENUE" error appears on R. 6/4 and, it is believed, "REVE UE" comes from R. 6/6. Both occur on parts of the printing only. The missing "E" developed during the overprinting and damage to this letter can be observed on at least eight positions in the setting.

1/15 *Set of* 15		40·00	30·00

*The normal sideways watermark shows Crown to left of CA, *as seen from the back of the stamp.*

These were issued by the Crown Agents on 15 January but owing to shipping delays they were not put on sale locally until 17 January.

The positions of the "no stop" varieties are as follows:

After "I": R. 2/4 on horiz stamps except 45c. where it occurs on R. 3/3, and R. 8/5 on vert stamps except 10r. where it occurs on R. 4/3.

After "O": R. 3/2 and 5/1 on vert stamps, R. 2/1 and 4/4 on horiz stamps (only occurs on R. 2/1 for 45c.), and R. 2/7 and 5/9 on 10r. value.

After "B": R. 10/4 (45c.) or R. 1/8 (10r.).

As sheets of all values from 5c. to 50c. are known with all stops in place the no stop varieties either developed during printing or their omission was discovered and replacements inserted.

2 Lascar

British Levant

The term "British Levant" is used by stamp collectors to describe the issues made by various British Post Offices within the former Turkish Empire.

Arrangements for the first such service were included amongst the terms of a commercial treaty between the two countries in 1832, but the system did not start operations until September 1857 when a post office for civilian use was opened in Constantinople, replacing the Army Post Office which had existed there since June 1854.

Eventually the number of British Post Offices grew to five:

Beyrout (Beirut, Lebanon). Opened March 1873, closed 30 September 1914.

Constantinople (Istanbul). Opened 1 July 1857, closed 30 September 1914, re-opened 4 February 1919, finally closed 27 September 1923.

Salonica (Thessalonika, Greece). Opened 1 May 1900, closed October 1914. The city was captured by Greek troops on 7 November 1912 and incorporated into Greece by the Treaty of London (July 1913).

Smyrna (Izmir). Opened December 1872, closed 30 September 1914, re-opened 1 March 1919, finally closed September 1922. Between 15 May 1919 and 8 September 1922 the city was under Greek occupation.

Stamboul (a sub-office of Constantinople). Opened April 1885, closed 25 August 1896, re-opened 10 February 1908, finally closed 30 September 1914.

Stamps from the two British Post Offices in Egypt still technically part of the Turkish Empire, are listed under EGYPT.

A. BRITISH POST OFFICES IN TURKISH EMPIRE, 1857–1914

Z 6

Z 7

Z 8

From 1 August 1885 letter and registered charges were prepaid with surcharged stamps (No. 1 onwards). Until 14 August 1905 postcards and parcels continued to be franked with unoverprinted Great Britain stamps. Only a limited range of values were stocked for this purpose and these are listed. Other values exist with Levant postmarks, but these stamps did not originate from the local post offices.

After 15 August 1905 the post offices were supplied with Great Britain stamps overprinted "LEVANT". Subsequent examples of unoverprinted stamps with Levant postmarks are omitted from the listing. Such stamps used during 1919–22 at Constantinople and Smyrna are listed as Z176/201 and Z282/95.

BEYROUT (BEIRUT)

Between 1873 and 1876 much of the mail from the British Post Office in Beyrout sent to European addresses was forwarded through the French or Italian Post Offices at Alexandria. Such covers show Great Britain stamps used in combination with those of French or Italian P.O's in the Turkish Empire.

Stamps of GREAT BRITAIN cancelled "G 06" Type Z **4** or with circular postmark inscr "BEYROUT" as Types Z **6** or Z **8**.

STAMBOUL (CONSTANTINOPLE)

Stamps of GREAT BRITAIN cancelled "S" as Type Z **3**, or circular postmarks inscribed either "BRITISH POST OFFICE CONSTANTINOPLE S" or "BRITISH POST OFFICE STAMBOUL" as Type Z **6**.

1884.

Z296	½d. slate-blue	30·00	
Z297	1d. lilac	13·00	
Z298	2d. lilac		
Z299	2½d. lilac	16·00	
Z300	5d. dull green	£160	

1887–92.

Z306	½d. vermilion	16·00	
Z314	6d. purple/*rose-red*	38·00	
Z317	1s. dull green		

The "S" cancellation was in use from 1885 to 1891 and the "Stamboul" mark from 1892 to 1896, when the office was closed, and from its reopening in 1908 to 1914. The "CONSTANTINOPLE S" handstamp was normally used as a back stamp, but can be found cancelling stamps in the period 1885 to 1892.

Nos. 4/6*a*	*from* × 5
Nos. 7/40	*from* × 3
Nos. L1/10	*from* × 6
Nos. L11/17	*from* × 3

I. TURKISH CURRENCY

(40 paras = 1 piastre)

Following the depreciation of the Turkish piastre against sterling in 1884 it was decided to issue stamps surcharged in Turkish currency to avoid speculation. During the early period unsurcharged stamps of Great Britain remained on sale from the British Post Offices at the current rate of exchange until replaced by "LEVANT" overprints.

80 PARAS (1) **4 PIASTRES** (2) **12 PIASTRES** (3)

PRINTERS. Nos. 1/24 were surcharged or overprinted by De La Rue, *unless otherwise stated*.

Stamps of Great Britain (Queen Victoria) surch as T 1 to 3

1885 (1 Aug)–**88**.

1	**64**	40pa. on 2½d. lilac	£140	1·25
2	**62**	80pa. on 5d. green	£225	9·50
3	**58**	12pi. on 2s.6d. lilac/*bluish*	£550	£300
		a. On white paper (4.88)	65·00	26·00

Nos. 3, 11 and 33 were surcharged from a horizontal setting of eight clichés of which three showed a small final 'S'.

Large wide "4" (R. 1/2, R. 1/4)

1887 (June)–**96**.

4	**74**	40pa. on 2½d. purple/*blue*	20·00	10
		a. Surch double	£1900	£2500
5	**78**	80pa. on 5d. purple and blue (7.90)	18·00	30
		a. Small "0" in "80"	£375	95·00
		w. Wmk inverted	—	£650
6	**81**	4pi. on 10d. dull purple and carmine (10.10.96)	45·00	8·00
		a. Dull purple and deep bright carmine	45·00	11·00
		b. Large, wide "4" (R. 1/2, 1/4)	£225	70·00

No. 5a first appeared on the June 1895 printing when the size of the surcharge plate was increased from 60 to 120. On the Victorian stamp the variety comes on R. 4/1 and 4/7. The same setting was used for the first printing of the Edward VII surcharge, but here the sheet size was further increased to 240 so that No. 9a occurs on R. 4/1, 4/7, 14/1 and 14/7.

1893 (25 Feb). Roughly handstamped at Constantinople, as T **1**.

7	**71**	40pa. on ½d. vermilion	£425	£100

This provisional was in use for five days only at the Constantinople and Stamboul offices. As fraudulent copies were made with the original handstamp, and can be found "used" on piece cancelled by fraudulent use of the usual canceller, this stamp should only be purchased from undoubted sources.

The handstamp became damaged during use so that by 1 March the top of the "S" was broken. Used examples dated 25 or 26 February showing the broken "S" *must* be fraudulent. It is also known with genuine handstamp inverted (*Price £850 unused, £325 used*).

1902–05. Stamps of King Edward VII surch as T **1** to **3**.

8	**86**	40pa. on 2½d. ultramarine (3.02)	24·00	10
		a. Pale ultramarine	26·00	10
		ab. Surch double	†	£2500
9	**89**	80pa. on 5d. dull purple and ultramarine (5.6.02)	16·00	2·00
		a. Small "0" in "80"	£325	£200
10	**92**	4pi. on 10d. dull purple and carmine (6.9.02)	24·00	4·00
		a. No cross on crown	£180	90·00
		b. Chalk-surfaced paper	6·00	10·00
		ba. Chalk-surfaced paper. No cross on crown	£100	£120
11	**94**	12pi. on 2s.6d. lilac (29.8.03)	42·00	38·00
		a. Chalk-surfaced paper. *Pale dull purple*	75·00	80·00
		b. Chalk-surfaced paper. *Dull purple*	42·00	38·00
12	**95**	24pi. on 5s. bright carmine (15.8.05)	32·00	42·00
8/12 *Set of 5*			£110	75·00
9s/11s Optd "SPECIMEN" *Set of 3*			£160	

No. 9a only occurs on the first printing of 80pa. on 5d.

1 PIASTRE (4)

1905–08. Surch in "PIASTRES" instead of "PARAS" as T **4** and **2**.

13	**86**	1pi. on 2½d. ultramarine (17.4.06)	32·00	10
		a. Surch double	†	£2000
		w. Wmk inverted	£750	£750
14	**89**	2pi. on 5d. dull purple and ultramarine (11.11.05)	50·00	2·50
		a. Chalk-surfaced paper (1.08)	30·00	4·75
		ab. Slate-purple and ultramarine	50·00	9·50

1 Piastre (5) **1 PIASTRE 10 PARAS** (6)

1906 (2 July). Issued at Beyrout. No. L4 surch with T **5** by American Press, Beyrout.

15	**85**	1pi. on 2d. grey-green and carmine	£1500	£700

1909 (16 Nov–Dec). Stamps of King Edward VII surch as T **1** (30pa.) **6**, and **2** (5 pi). Ordinary paper (No. 19) or chalk-surfaced paper (others).

16	**84**	30pa. on 1½d. pale dull purple and green	20·00	1·25
		a. Surch double, one albino		
17	**87**	1pi.10pa. on 3d. dull purple/*orange-yellow*	12·00	50·00
18	**88**	1pi.30pa. on 4d. green and chocolate-brown	5·00	20·00
19		1pi.30pa. on 4d. brown-orange (16.12.09)	22·00	70·00
20	**83**	2pi.20pa. on 6d. dull purple	26·00	70·00
21	**93**	5pi. on 1s. dull green and carmine	4·25	17·00
		s. Optd "SPECIMEN"	80·00	
16/21 *Set of 6*			75·00	£200

Examples of Nos. 17/21 are known showing forged Constantinople postmarks dated "MR 1 10", "AP 1 10" and "AP 18 10", or a forged Smyrna registered oval dated "24 OC 10".

1¾ PIASTRE (7) **4** Normal "4" **4** Pointed "4"

1910 (24 Jan). Stamps of King Edward VII surch as T **7**. Chalk-surfaced paper (Nos. 22 and 24).

22	**87**	1¼pi. on 3d. dull purple/*orange-yellow*	1·00	1·00
23	**88**	1¾pi. on 4d. pale orange	50	60
		a. Orange-red	7·00	7·50
		b. Thin, pointed "4" in fraction	5·50	26·00
24	**83**	2½pi. on 6d. dull purple	3·75	65
22/4 *Set of 3*			4·75	2·00

No. 23b occurs in the first and seventh vertical rows of the sheet. The variety also occurs on No. 38, but not on No. 38b.

1 PIASTRE (8) **1 PIASTRE** (9)

TYPE DIFFERENCES. In T **4** the letters are tall and narrow and the space enclosed by the upper part of the "A" is small.

In T **8** the opening of the "A" is similar but the letters are shorter and broader, the "P" and the "E" being particularly noticeable.

In T **9** the letters are short and broad, but the "A" is thin and open.

1911–13. Stamps of King Edward VII, Harrison or Somerset House ptgs, surch at Somerset House.

(a) Surch with T 4 (20 July)

25	**86**	1pi. on 2½d. bright blue (perf 14)	24·00	10·00

35/40 *Set of 6*			75·00	£120

II. BRITISH CURRENCY

Stamps overprinted "LEVANT" were for use on parcels, with the ½d. and 1d. principally used for printed paper and post cards. They replaced unoverprinted Great Britain stamps, Nos. Z58/64, Z160/74, Z208/9*c* and Z267/81, which had previously been used for these purposes.

From October 1907 the three lowest values were also used for certain other amended postal rates until Nos. 16/21 were introduced.

LEVANT (L 1)

1905 (15 Aug)–**12**. Stamps of King Edward VII optd with Type L **1**.

		a. Vermilion	19·00	20·00
		b. Distorted "N"	18·00	

Similar overprints were issued when the British Post Offices reopened in 1919, and are listed below.

B. BRITISH POST OFFICES IN CONSTANTINOPLE AND SMYRNA, 1919–1923

CONSTANTINOPLE

Following the occupation of Constantinople by Allied forces a British Military Post Office was opened for civilian use on 4 February 1919. During the period of its existence stamps of Great Britain with face values to 10s. were available and such use can be identified by the following cancellations:

"FIELD POST OFFICE H12" (4 February 1919 to 18 March 1919)
"ARMY POST OFFICE Y" (20 March 1919 to June 1920)
"ARMY POST OFFICE S.X.3" (March 1919 to April 1920)
"British A.P.O. CONSTANTINOPLE" (July 1919 to July 1920).

Of these four marks the first two types were also used for military mail.

The office reverted to civilian control on 29 July 1920, Nos. 41/50 and L18/24 being intended for its use.

		s. Optd "SPECIMEN"	£140	
L18/24 *Set of* 7			£100	£200

On No. L24 the letters of the overprint are shorter, being only 3 mm high.

Nos. 41/50 and L18/24 were used at the Constantinople office only.

SMYRNA

When the office re-opened on 1 March 1919 existing stocks of surcharged or overprinted issues were utilised until they were exhausted in mid-1920. During this period examples of Nos. 24, 29*a*, 30*a*, 33*a*/7, 39/40, L4ab, L14/17 are known with commercial postmarks. These stamps were supplemented and finally replaced in mid-1920 by ordinary stamps of Great Britain.

1919–22. Stamps of GREAT BRITAIN cancelled with circular postmark as Type **18** or with "REGISTERED" oval.

Z282	½d. green	3·00
Z283	1d. scarlet	3·00
Z284	1½d. brown	4·00
Z285	2d. orange (Die I)	3·50
Z286	2d. orange (Die II)	35·00
Z287	2½d. blue (*shades*)	5·50
Z288	2½d. dull Prussian blue	£500
Z289	4d. grey-green	13·00
Z290	6d. purple	9·00
Z290a	8d. black/*yellow-buff*	
Z291	10d. turquoise-blue	42·00
Z292	1s. bistre	10·00
Z293	2s.6d. brown	£110
Z294	5s. rose-carmine	£180
Z295	10s. dull grey-blue	£325

Turkish forces entered Smyrna on 9 September 1922 and the British postal service was suspended shortly afterwards.

C. BRITISH FIELD OFFICE IN SALONICA

These overprints were originally prepared for use by a civilian post office to be set up on Mt. Athos, Northern Greece. When the project was abandoned they were placed on sale at the Army Field Office in Salonica.

PRICES FOR STAMPS ON COVER

British Occupation of Italian Colonies

PRICES FOR STAMPS ON COVER TO 1945	
Nos. M1/21	*from* × 4
Nos. MD1/5	*from* × 10
Nos. S1/9	*from* × 4

The above prices refer to covers from the territories concerned, not examples used in Great Britain.

MIDDLE EAST FORCES

For use in territory occupied by British Forces in Eritrea (1942), Italian Somaliland (from 13 April 1942), Cyrenaica (1943), Tripolitania (1943), and some of the Dodecanese Islands (1945).

PRICES. Our prices for used stamps with "M.E.F." overprints are for examples with identifiable postmarks of the territories in which they were issued. These stamps were also used in the United Kingdom with official sanction, from the summer of 1950 onwards, and with U.K. postmarks are worth considerably less.

PRINTERS. Considerable research has been undertaken to discover the origins of Nos. M1/10. It is now suggested that Nos. M1/5, previously assigned to Harrison and Sons, were produced by the Army Printing Services, Cairo, and that the smaller printing, Nos. M6/10, previously identified as the work of the Army Printing Services, Cairo, was from GHQ, Middle East Land Forces, Nairobi."

M.E.F. (M **1**) Opt. 14 mm long. Regular lettering and upright oblong stops.

M.E.F. (M **2**) Opt. 13½ mm long. Regular lettering and square stops.

M.E.F. (M **2a**) Opt. 13½ mm long. Rough lettering and round stops.

M.E.F. Sliced "M" (R. 6/10)

Tripolitania became part of the independent kingdom of Libya on 24 December 1951.

British P.Os in Crete

BRITISH ADMINISTRATION OF CANDIA PROVINCE (HERAKLEION)

Crete, formerly part of the Turkish Empire, was made autonomous, under Turkish suzerainty, in November 1898 with British, French, Italian and Russian troops stationed in separate zones to keep the peace.

Overseas mail franked with Nos. B1/5 was forwarded through the Austrian post office at Canea, being additionally franked with stamps of the Austro-Hungarian Post Offices in the Turkish Empire.

(Currency. 40 paras = 1 piastre)

PRICES FOR STAMPS ON COVER

No. B1	*from* × 8
Nos. B2/5	—

B **1**

B **2**

1898 (25 Nov). Handstruck locally. Imperf.

B1	B **1** 20pa. bright violet	£450	£225

1898 (3 Dec). Litho by M. Grundmann, Athens. P 11½.

B2	B **2** 10pa. blue	11·00	25·00
	a. Imperf (pair)	£250	
B3	20pa. green	20·00	23·00
	a. Imperf (pair)	£250	

1899. P 11½.

B4	B **2** 10pa. brown	11·00	35·00
	a. Imperf (pair)	£250	
B5	20pa. rose	20·00	19·00
	a. Imperf (pair)	£250	

Forgeries exist of Nos. B1/5. Note that genuine examples of type B **2** show a full circle in the ornament above the figures of value. Forgeries with a broken circle in this position are frequently met with.

The British postal service closed at the end of 1899.

British P.O. in Siam

(Bangkok)

An overseas postal service for foreign residents was operated by the British Consulate at Bangkok from 1858. Mail was despatched by steamer to Singapore and from 1876 onwards was increasingly franked with Straits Settlements stamps. These were initially cancelled on arrival at Singapore, but later an oval postmark inscribed "BRITISH CONSULATE BANGKOK" was used. In 1883 a circular "BANGKOK" datestamp was introduced for use with Nos. 1/23. Both cancellations can also be found used on Hong Kong stamps between 1881 and 1885.

(Currency. 100 cents = 1 Straits dollar)

Stamps of Straits Settlements (see Malaysia) cancelled with oval postmark inscribed "BRITISH CONSULATE BANGKOK" around Royal Arms.

1882. Wmk Crown CC (Nos. 11/15, 33, 35).

Z1	2c. brown	£450
Z2	4c. rose	£500
Z3	6c. dull lilac	£500
Z4	8c. orange-yellow	£450
Z5	10c. on 30c. claret (thin "0") (No. 33)	£1300
Z6	10c. on 30c. claret (thick "10") (No. 34)	£1300
Z7	10c. on 30c. claret (thin "1", thick "0") (No. 35)	£1600
Z8	12c. blue	£700

Subsequent Straits Settlements values to 8c. watermarked Crown CA are known used at Bangkok in 1883 and 1884. During this period the stamps overprinted "B" were on sale at the British Post Office.

PRICES FOR STAMPS ON COVER

The issues of the British Post Offices in Siam are worth *from* × 100 the prices quoted for used stamps when on cover.

B B
(1) (2)

Opt Type **2** differs from Type **1** in having the two loops of the "B" almost equal in size with wider internal dimensions. The Type **2** overprints are generally placed higher than Type **1**. It is believed that the two types were both supplied to Bangkok in May 1882.

The prices quoted for the overprint double errors, Nos. 3a, 15b, 17a and 20c, are for stamps showing two clear impressions of the overprint. Examples showing partial doubling, on these and other values, are worth a small premium over the price quoted for normal stamps.

No. 17b shows the edge of the central oval broken above the "O" of "POSTAGE". It occurs on R. 10/5 of the lower right pane.

The use of these stamps ceased on 30 June 1885. Siam joined the Universal Postal Union on 1 July 1885.

British Postal Agencies in Eastern Arabia

Certain Arab States in Eastern Arabia, whilst remaining independent, had British postal administrations replacing Bahrain, and subsequently Indian, post offices at Dubai and Muscat.

Bahrain and Kuwait (from 1948) and Qatar (from 1957) used British stamps overprinted and surcharged in local currency. Abu Dhabi (from 1964) and Trucial States (from 1961 and used only in Dubai) had definitive issues made under the auspices of the British Agencies.

In addition, British stamps were surcharged with value only for use in Muscat and certain other states. They were formerly listed under Muscat as they were first put on sale there, but in view of their more extended use, the list has been transferred here, retaining the same numbering.

The stamps were used in Muscat from 1 April 1948 to 29 April 1966; in Dubai from 1 April 1948 to 6 January 1961; in Qatar: Doha from August 1950, Umm Said from February 1956, to 31 March 1957; and in Abu Dhabi from 30 March 1963 (Das Island from December 1960) to 29 March 1964.

Nos. 21/2 were placed on sale in Kuwait Post Offices in April and May 1951 and from February to November 1953 due to shortages of stamps with "KUWAIT" overprint. Isolated examples of other values can be found commercially used from Bahrain or Kuwait.

(Currency. 12 pies = 1 anna; 16 annas = 1 rupee)

Stamps of Great Britain surcharged

Two types of 1½a. surcharge:
I. "1" 3¼ mm high and aligns with top of "2" in "½" (Rows 1 to 10).
II. "1" 3½ mm high with foot of figure below top of "2" (Rows 11 to 20).

1948 (1 Apr). Surch with T **3** (½a. to 1r.) or **4** (2r.).

16	**128**	½a. on ½d. pale green	3·00	9·50
17		1a. on 1d. pale scarlet	3·00	30
18		1½a. pale red-brown (I)	20·00	10·00
		a. 1½a. on 1½d. Type II	20·00	10·00
		b. Vert pair. Nos. 18/a	£500	
19		2a. on 2d. pale orange	2·25	3·25
20		2½a. on 2½d. light ultramarine	3·50	9·50

52/5 *Set of 4*		11·00	6·75

Types of surcharges

2 rupees.

Type I. On *Waterlow ptg*. Top of "R" level with top of "2" and other letters of "RUPEES". Bars 7 mm long.

Type II. On *Waterlow ptg* by Harrison: "R" dropped out of alignment with 2" and other letters of RUPEES". Bars 6½ mm long.

Type III. On *De La Rue ptg* by Harrison. Top of "R" below level of top of "2". Bars 7–7¼ mm long and with left sides aligned with "S".

5 rupees.

Type I. On *Waterlow ptg* by Harrison. Ends of letters square and sharp. There were two printings made in March and May 1957.

Type II. On *De La Rue ptg* by Harrison. Type is thicker and ends of letters are relatively rounded.

For differences between Waterlow and De La Rue printings of the basic stamps see notes in Great Britain after No. 539.

1955–60. T **166/7** (Waterlow ptgs) (W **165**, St. Edward's Crown) surch with T **7/8**.

56	2r. on 2s.6d. black-brown (Type I) (23.9.55)	10·00	70
	a. Type II (2.57)	10·00	4·75
	b. Type III (No. 536a D.L.R.) (6.60)	28·00	80·00
57	5r. on 5s. rose-red (Type I) (1.3.57)	10·00	2·25
	a. Wide surcharge	£550	£425
	b. Type II (No. 537a D.L.R.) (27.1.60)	20·00	65·00

Designs:—No. 56, Carrickfergus Castle; No. 57, Caernarvon Castle.

No. 57a ("5" and "R" spaced 2¼ mm instead of 1¼ mm) occurred on R. 8/4 of the first surcharging of No. 57 only.

1956–57. Stamps of Queen Elizabeth II, W **165**, St. Edward's Crown, surch as T **3** (in one line on 2½a and 6a.).

58	1a. on 1d. ultramarine (20.3.57)	35	1·00
58*a*	1½a. on 1½d. green (1956)	£8000	£1200
59	2a. on 2d. red-brown (8.6.56)	70	2·50
60	2½a. on 2½d. carmine-red (8.6.56)	80	7·50

62	4a. on 4d. ultramarine (9.12.56)	7·00	23·00
63	6a. on 6d. red-purple (10.2.57)	1·25	7·00
64	1r. on 1s.6d. grey-blue (2.8.56)	16·00	15
58/64 (*ex* 58*a*) *Set of 7*		24·00	48·00

No. 58*a* came from a few sheets of the St. Edward's Crown watermark included, in error, with a printing of No. 44. Most examples were used in Dubai, but two are known from Muscat, a pair and a single on separate covers from Bahrain and a single postmarked F.P.O. 936 (Sharjah). A single mint example also exists.

1957 (1 Apr)–**59**. Value in naye paise. Stamps of Queen Elizabeth II, W **165**, St. Edward's Crown, surch as T **9** (1, 15, 25, 40, 50n.p.), **11** (75n.p.) or **10** (others).

93	5r. on 5s. rose-red (No. 596) (8.4.61)	32·00	70·00
79/93 *Set of 15*		85·00	£140

Designs:—Nos. 79/91, Queen Elizabeth II; No. 92, Carrickfergus Castle; No. 93, Caernarvon Castle.

The "5" on No. 93 differs from that on Nos. 57/b, being the same height as "RUPEES".

British Solomon Islands

The first British Resident Commissioner, Charles Woodford, was appointed in 1896 and an administrative centre established at Tulagi.

Mail was initially sent unstamped by sealed bag to Sydney where New South Wales stamps were applied and cancelled. Later the Resident Commissioner kept a stock of New South Wales stamps which were still not cancelled until arrival at Sydney. From April 1906 Mr. Woodford used a vertical oblong "BRITISH SOLOMON ISLANDS PAID" handstamp in place of New South Wales stamps which were then added to many of the covers by the postal authorities in Sydney.

		a. Imperf between (vert pair)	£7000	
7		1s. bright purple	80·00	85·00
1/7 *Set of* 7			£275	£300

Nos. 1/7 did not become valid for international postage until early September 1907. Overseas covers before that date show additional New South Wales values.

Three types exist of the ½d. and 2½d., and six each of the other values, differing in minor details.

Forgeries of Nos. 1/7 show different perforations and have the boat paddle touching the shore. Genuine stamps show a gap between the paddle and the shore.

(Recess D.L.R.)

1908 (1 Nov)–**11**. Wmk Mult Crown CA (sideways). P 14.

The positions of the bars in the surcharge vary considerably from stamp to stamp within the sheets.

The stamps with sideways watermark are all from new printings and in some instances there are marked shade variations from Nos. 112/26 which were used for making Nos. 135A/152A.

No. 142Ab comes from the bottom left-hand corner of the sheet and was covered by a paper fold. The bottom stamp in the pair is completely without surcharge and the upper has the surcharge value and one bar missing.

British Virgin Islands

CROWN COLONY

Apart from the 1951 Legislative Council issue, the word "BRITISH" did not appear regularly on the stamps until 1968 when it was introduced to avoid confusion with the nearby Virgin Islands of the United States (the former Danish West Indies).

Most mail from the early years of the islands' history was sent via the Danish island of St. Thomas.

It is not known exactly when the first post office, or agency, was established on Tortola, but an entry in a G.P.O. account book suggest that it was operating by 1787 and the earliest letter postmarked "TORTOLA" dates from June of that year. The stamps of Great Britain were used from 1858 to May 1860, when the colonial authorities assumed responsibility for the overseas mails from the British G.P.O.

For illustrations of the handstamp and postmark types see BRITISH POST OFFICES ABROAD notes, following GREAT BRITAIN.

TORTOLA

CROWNED-CIRCLE HANDSTAMPS

CC1	CC **1** TORTOLA (R.) (15.12.1842) *Price on cover*	£6500

Normal

Variety

1s. Long-tailed "S" in "ISLANDS" (R. 3/1)

(Litho and typo (figure of the Virgin) (1s.) or litho (others) Nissen and Parker from original dies by Waterlow)

1867–70. No wmk. P 15. 1s. with double-lined frame.

(a) White wove paper

8	**1**	1d. yellow-green (1868)	80·00	80·00
9		1d. blue green (1870)	65·00	70·00
10	**2**	6d. pale rose	£600	£600
11	**4**	1s. black and rose-carmine	£275	£375
		a. Long-tailed "S"	£900	£1100

(b) Greyish (No. 14) or toned paper (others)

12	**1**	1d. yellow green (1868)	85·00	80·00
13	**2**	6d. dull rose (1868)	£300	£350
14	**4**	1s. black and rose-carmine (*greyish paper*)	£275	£375
		a. Long-tailed "S"	£900	£1100
14*b*		1s. black and rose-carmine (*toned paper*)	£325	£375
		ba. Long-tailed "S"	£900	£1100

(c) Pale rose paper

15	**3**	4d. lake-red	55·00	75·00

(d) Buff paper

16	**3**	4d. lake-red	45·00	60·00
17		4d. lake-brown	45·00	60·00

The thin lines of the frame on the 1s. are close together and sometimes merge into one.

The 1d. from the 1868 printing was in sheets of 20 (5×4) with narrow margins between the stamps. Later printings were in sheets of 12 (3×4) with wider margins. The 4d. was in sheets of 25; and the remaining two values in sheets of 20 (5×4).

The greyish paper used for Nos. 14 and 20 often shows traces of blue.

1867. Nos. 11 and 14*b* with crimson frames superimposed extending into margins. P 15.

18	**4**	1s. black and rose-carmine (*white paper*)	90·00	£100

		da. Long-tailed "S"	£600	£750

The special issues for Virgin Islands were superseded on 31 October 1890, by the general issue for Leeward Islands. In 1899, however, a new special issue, Nos. 43/50, appeared; it did not supersede the general issue for Leeward Islands, but was used concurrently, as were all subsequent issues, until 1 July 1956 when the general Leeward Islands stamps were withdrawn.

Brunei

Sultan Hashim Jalil-ul-alam Akamudin, 1885–1906

(Currency. 100 cents = 1 Straits, later Malayan and Brunei, dollar)

For many years the status of the 1895 issue remained uncertain to such an extent that the 1906 provisionals on Labuan were taken to be the first issue of Brunei.

The 1895 "Star and Crescent" design stamps were, from their first appearance, considered bogus or, at best, as an issue made purely for philatelic purposes. Research into the background of the events surrounding the set led to the publication, in 1933, of the original agreement between Sultan Hashim and J. C. Robertson, dated 20 August 1894, which made clear that the stamps fulfilled a genuine postal purpose. Although Robertson and his partners intended to exploit the philatelic sales for their own benefit, the agreement testifies, as does other evidence, to the use of the stamps by the Sultan for his postal service. As Brunei did not, at that time, belong to any local or international postal union, the stamps were only valid within the state or on mail to Labuan or Sarawak. Items for further afield required franking with Labuan stamps in addition. Although most covers surviving are addressed to Robertson's associates, enough commercial covers and cards exist to show that there was, indeed, a postal service.

PRICES FOR STAMPS ON COVER TO 1945

Nos. 1/10 are rare used on cover.	
Nos. 11/22	*from* × 30
Nos. 23/33	*from* × 25
Nos. 34/50	*from* × 10
Nos. 51/9	*from* × 12
Nos. 60/78	*from* × 8

The Sarawak Government maintained a post office at the coal mining centre of Brooketon, and the stamps of SARAWAK were used there from 1893 until the office was handed over to Brunei in February 1907.

Only one sheet of the 1c. received the black overprint.

The surcharges were applied in settings of 50. Nos. 13a/b occur from one sheet on which the surcharge from the second impression of the setting was misplaced to give two surcharges on row five and none on row ten.

Examples of all values are known showing a forged Brunei postmark dated "13 JUL".

Sultan Mohamed Jemal-ul-Alam, 1906–1924

PRINTERS. All Brunei stamps from Nos. 23 to 113 were recess-printed by De La Rue.

*For 5 c, orange, see No. 82. No. 66 is a "Wet" printing and No. 82 a "Dry".

**For 6c. black, see No. 83. Apart from the difference in shade there is a variation in size, No. 69 being 37¾ mm long and No. 83 39 mm.

The 2c. orange and 3c. blue-green in Type **5**, and the 6c. greenish grey (Perf 14×11½), 8c. red and 15c. ultramarine in Type **7** were not issued without the Japanese Occupation overprint, although unoverprinted examples exist. It is believed that these 1941 printings were produced and possibly perforated, by other firms in Great Britain following bomb damage to the De La Rue works at the end of 1940 (*Prices* 2c., 8c., *each* £75, 15c. £100, 6c. £130, 3c. £225 *unused*).

During the life of this issue De La Rue changed the method of production from a "Wet" to a "Dry" process. Initially the stamps were printed on ungummed paper which was dampened before being put on the press. Once the paper had dried, and contracted in the process, the gum was then applied. "Dry" printings, introduced around 1934, were on pre-gummed paper. The contraction of the "Wet" printings was considerable and usually involves a difference of between 0.5 mm and 1 mm when compared with the larger "Dry" printings. The following stamps occur from both "Wet" and "Dry" versions: 1c., 2c. green, 4c. orange, 5c. chocolate, 6c. scarlet, 8c. grey-black, 10c. and 25c.

Stamps of this issue can be found either line or comb perforated.

The 10c. perforated "SPECIMEN" is listed separately due to its later distribution by the UPU.

Brunei was occupied by the Japanese Army in January 1942 and remained under Japanese administration until liberated by the 9th Australian Division in June 1945.

After the cessation of hostilities with the Japanese, postal services were re-introduced by the British Military Administration. From 6 November, military post offices using Australian stamps were opened for civilian use, until offices under B.M.A. control were opened at Brunei Town and Kuala Belait on 17 December 1945 where B.M.A. overprints on the stamps of NORTH BORNEO and SARAWAK were used until the reappearance of Brunei issues on 2 January 1947.

*See also Nos. 66 and 69.

The 1, 2, 3, 5, 6, 10 and 25c. values utilised the plates of the pre-war issue and were line perforated until the introduction of the 14½×13½ comb machine for some values in 1950–51. The 8, 15, 50c., $1, $5 and $10 were from new plates with the sheets comb perforated. The 30c. was initially a pre-war plate, but it is believed that a new plate was introduced in 1951.

175/7 *Set of* 3			1·00	1·90

JAPANESE OCCUPATION OF BRUNEI

Japanese forces landed in Northern Borneo on 15 December 1941 and the whole of Brunei had been occupied by 6 January 1942.

Brunei, North Borneo, Sarawak and, after a short period, Labuan, were administered as a single territory by the Japanese. Until September-October 1942, previous stamp issues, without overprint, continued to be used in conjunction with existing postmarks. From the Autumn of 1942 onwards unoverprinted stamps of Japan were made available and examples can be found used from the area for much of the remainder of the War. Japanese Occupation issues for Brunei, North Borneo and Sarawak were equally valid throughout the combined territory but not, in practice, equally available.

PRICES FOR STAMPS ON COVER	
Nos. J1/16	*from* × 8
Nos. J17/20	—

(1) ("Imperial Japanese Government")

(2) ("Imperial Japanese Postal Service $3")

1942 (Oct)–**44**. Stamps of Brunei handstamped with T **1** in violet to blue. Wmk Mult Script CA (except Nos. J18/19, Mult Crown CA). P 14.

J1	**5**	1c. black	10·00	23·00
		a. Red opt	£200	£225

		a. Red opt	—	£1600
J18		$5 carmine/*green* (1944)	£1000	£3500
J19		$25 black/*red* (1944)	£1000	£3500

The overprint varies in shade from violet to blue, and being handstamped, exists inverted, double, double one inverted and treble.

Nos. J3, J4, J7, J10 and J13 were not issued without the overprint (See footnote below Brunei No. 78).

1944 (11 May). No. J1 surch with T **2** in orange-red.

J20	**5**	$3 on 1c. black	£9000	£10000
		a. Surch on No. 60 of Brunei	£11000	

Three separate handstamps were used to apply Type **2**, one for the top line, one for the bottom and the third for the two central characters.

Burma

(Currency. 12 pies = 1 anna; 16 annas = 1 rupee)

Stamps of India were used in Burma from 1854 and, after 1856, individual examples can be identified by the use of the concentric octagonal postmarks of the Bengal Postal Circle of which the following were supplied to Burmese post offices:

Type A No. B156 (Rangoon)

Type B No. B5 (Akyab)

B5	Akyab	B146	Pegu
B12*	Bassein	B150	Prome
B22	Nga Thine Khyoung	B156*	Rangoon
B56	Amherst	B159	Sandoway
B108	Kyouk Phyoo	B165	Sarawah (*to* 1860)
B111	Meeaday	B165	Henzada (*from* 1861)
B112	Mengyee	B171	Shoay Gyeen
B127	Moulmein	B173	Sittang
B128	Mergui	B179	Thayetmyo
B129	Tavoy	B181	Toungoo
B133	Myanoung	B227	Port Blair
B136	Namayan		

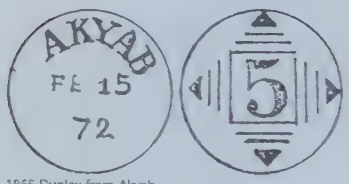
*Exists in black or blue. Remainder in black only.

Akyab, Moulmein and Rangoon used postmarks as both Type A and Type B. Port Blair as Type B only and the remainder as Type A only.

From 1860 various types of duplex cancellations were introduced and Burmese examples can be identified when sufficient of the left-hand portion is visible on the stamp. Such marks were issued for the following offices:

Akyab	Rangoon
Bassein	Rangoon C.R.H. (Cantonment Receiving House)
Mandalay	
Moulmein	Thayetmyo
Port Blair	Toungoo
Prome	

1862 Duplex from Toungoo

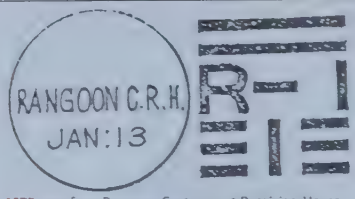


1865 Duplex from Akyab

During 1875, a further series of duplex marks was introduced in which the right-hand portion of the cancellation included the office code number, prefixed by the letter "R" for Rangoon:

R–1	Rangoon	R–9	Myanoung
R–1/1	Rangoon Cantonment	R–10	Port Blair
R–2	Akyab	1/R–10	Nancowry
R–3	Bassein	R–11	Prome
R–4	Henzada	R–12	Sandoway
R–5	Kyouk Phyoo	R–13	Shwegyeen
R–6	Mandalay	R–14	Tavoy
R–7	Mergui	R–15	Thayetmyo
R–8	Moulmein	R–16	Toungoo
R–9	Amherst		

1875 type from Rangoon



1875 type from Rangoon Cantonment Receiving House

From 1886 the whole of Burma was united under the Crown and the post offices were supplied with circular date stamps giving the name of the town.

Most Indian stamps, both postage and official, issued during the period were supplied to post offices in Burma. None of the imperforates printed by De La Rue have been seen however, and from the later issues the following have not been recorded with Burma postmarks:

Nos. 39a, 66a/b, 85a, 92a, 110a/b, 148a, 155a, 165, 192a/c, 195a/b, O15, O38, O40b, O50a/b, O74a, O101a, O102, O103/a, O104/5 and O142.

The value of most India stamps used in Burma coincides proportionately with the used prices quoted for India, but some, especially the provisional surcharges, are extremely rare with Burmese postmarks. Stamps of the face value of 2r. and above from the reigns of Victoria and Edward VII are more common with telegraph cancellations than with those of the postal service.

PRICES FOR STAMPS ON COVER TO 1945

		a. Birds over trees	85·00	75·00
		b. Broken bar	85·00	75·00

For stamps issued in 1942–45 see under Japanese Occupation.

CHIN HILLS DISTRICT. This area, in the far north-west of the country, remained in British hands when the Japanese overran Burma in May 1942.

During the period July to December 1942 the local officials were authorised to produce provisional stamps and the letters "OHMS" are known overprinted by typewriter on Nos. 3, 20, 22/4, 28/9 and 31 of Burma or handstamped, in violet, on Nos. 25, 27 and 29. The two types can also occur together or in combination with a handstamped "SERVICE".

From early in 1943 ordinary postage stamps of India were used from the Chin Hills post offices of Falam, Haka, Fort White and Tiddim, this expedient continuing until the fall of Falam to the Japanese on 7 November 1943.

The provisional stamps should only be collected on Official cover (*Price, from* £2250) where dates and the sender's handwriting can be authenticated.

BRITISH MILITARY ADMINISTRATION

Preparations for the liberation of Burma commenced in February 1943 when the Civil Affairs Service (Burma) (CAS(B)) was set up at Delhi as part of the proposed military administration structure. One of the specific tasks assigned to CAS(B) was the operation of a postal service for the civilian population.

Operations against the Japanese intensified during the second half of 1944. The port of Akyab in the Arakan was reoccupied in January 1945. The 14th Army took Mandalay on 29 March and Rangoon was liberated from the sea on 3 May.

Postal services for the civilian population started in Akyab on 13 April 1945, while post offices in the Magwe Division around Meiktila were operating from 4 March. Mandalay post offices opened on 8 June and those in Rangoon on 16 June, but the full network was only completed in December 1945, just before the military administration was wound up.

MILY ADMN (12) MILY ADMN (13)

1945 (from 11 Apr). Nos. 18*b* to 33 optd with T **12** (small stamps) or **13** (others) by Security Printing Press, Nasik.

35	2	1p. red-orange	10	10
		a. Opt omitted (in pair with normal)	£1600	
36		3p. bright violet	20	2·00
37		6p. bright blue	20	30
		a. Medallion flaw	32·00	38·00
38		9p. yellow-green	30	2·00
39	3	1a. purple-brown (16.6)	20	10
40		1½a. turquoise-green (16.6)	20	15
41		2a. carmine	20	15
42	4	2a.6p. claret	2·25	3·75
		a. Birds over trees	60·00	80·00
43	5	3a. dull violet	1·50	30
44	6	3a.6p. light blue and blue	20	1·00

50		10r. brown and myrtle	50	1·50
35/50 *Set of* 16			7·00	16·00

Only the typographed version of the 1a., No. 22, received this overprint.

The missing overprints on the 1p. occur on the stamps from the bottom row of one sheet. A further block with two examples of the variety caused by a paper fold also exists.

The exact dates of issue for Nos. 35/50 are difficult to establish.

The initial stock of overprints is known to have reached CAS(B) headquarters, Imphal, at the beginning of April 1945. Postal directives issued on 11 April refer to the use of the overprints in Akyab and in the Magwe Division where surcharged pre-war postal stationery envelopes had previously been in use. The 6p., 1a., 1½a. and 2a.values were placed on sale at Mandalay on 8 June and the 1a. and 2a. at Rangoon on 16 June. It has been suggested that only a limited service was initially available in Rangoon. All values were on sale by 9 August 1945.

BRITISH CIVIL ADMINISTRATION

3a.6p. Curved plough handle (R. 8/4)

1946 (1 Jan). As Nos. 19/33, but colours changed.

BURMA INDEPENDENCE ARMY ADMINISTRATION

The Burma Independence Army, formed by Aung San in 1941, took control of the Delta area of the Irrawaddy in May 1942. They reopened a postal service in the area and were authorised by the Japanese to overprint local stocks of stamps with the Burmese emblem of a peacock.

Postage and Official stamps with the peacock overprints or handstamps were used for ordinary postal purposes with the probable exception of No. J44.

DISTINGUISHING FEATURES. Type **1**. Body and head of Peacock always clearly outlined by broad uncoloured band. There are four slightly different sub-types of overprint Type **1**.

Type **2**. Peacock with slender neck and more delicately detailed tail. Clear spur on leg at right. Heavy fist-shaped blob of ink below and parallel to beak and neck.

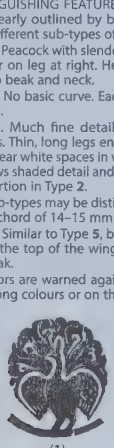
Type **4**. No basic curve. Each feather separately outlined. Straight, short legs.

Type **5**. Much fine detail in wings and tail in clearly printed overprints. Thin, long legs ending in claws which, with the basic arc, enclose clear white spaces in well printed copies. Blob of colour below beak shows shaded detail and never has the heavy fist-like appearance of this portion in Type **2**.

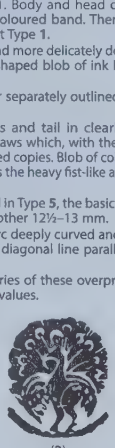
Two sub-types may be distinguished in Type **5**, the basic arc of one having a chord of 14–15 mm and the other 12½–13 mm.

Type **6**. Similar to Type **5**, but with arc deeply curved and reaching nearly to the top of the wings. Single diagonal line parallel to neck below beak.

Collectors are warned against forgeries of these overprints, often in the wrong colours or on the wrong values.



(1)



(2)

(3)

1942 (May). Stamps of Burma overprinted with the national device of a Peacock.

I. Overprinted at Myaungmya

A. With Type **1** *in black*

On Postage Stamps of King George V.

J1		9p. deep green (No. 3)	£110	
J2		3½a. deep blue (No. 8)	80·00	
		On Official Stamp of King George V		
J3		6a. bistre (No. O8)	80·00	
		On Postage Stamps of King George VI		
J4	**2**	9p. yellow-green	£150	
J5	**3**	1a. purple-brown	£550	
J6		4a. greenish blue (opt black on red)	£160	
		a. Triple opt, black on double red	£450	
		On Official Stamps of King George VI		
J7	**2**	3p. bright violet	42·00	90·00
J8		6p. bright blue	27·00	65·00
J9	**3**	1a. purple-brown	28·00	55·00
J9*a*		1½a. turquoise-green	£900	£1300
J10		2a. carmine	40·00	£100
J11		4a. greenish blue	40·00	80·00

The overprint on No. J6 was apparently first done in red in error, and then corrected in black. Some stamps have the black overprint so accurately superimposed that the red hardly shows. These are rare.

Nos. J5 and J9 exist with the Peacock overprint on both the typographed and the litho printings of the original stamps.

B. With Types **2** *or* **3** *(rupee values), in black*

On Postage Stamps of King George VI

J12	**2**	3p. bright violet	22·00	75·00
J13		6p. bright blue	50·00	£110
J14		9p. yellow-green	27·00	70·00
J15	**3**	1a. purple-brown	17·00	65·00
J16		2a. carmine	28·00	85·00
J17		4a. greenish blue	60·00	£120
		a. Opt double		
		b. Opt inverted	£850	
		c. Opt double, one inverted	£475	
		d. Opt double, both inverted	£750	
J18		1r. purple and blue	£450	£750
J19	**8**	2r. brown and purple	£275	£550

The Myaungmya overprints (including No. J44) are usually clearly printed.

(4)

(5)

(6)

Type **5** generally shows the details of the peacock much less clearly and, due to heavy inking, or careless impression, sometimes appears as almost solid colour.

Type **6** was officially applied only to postal stationery. However, the handstamp remained in the possession of a postal official who used it on postage stamps after the war. These stamps are no longer listed.

II. Handstamped (at Pyapon?) with T **4**, *in black (so-called experimental type)*

On Postage Stamps of King George VI.

J19*a*	**2**	6p. bright blue	75·00	
J19*b*	**3**	1a. purple-brown	£100	£250
J20		2a. carmine	£130	£300
J21		4a. greenish blue	£700	£700

Unused specimens of Nos. J20/1 are usually in poor condition.

III. Overprinted at Henzada with T **5** *in blue, or blue-black*

On Postage Stamps of King George V

J22		3p. slate (No. 1)	4·00	23·00
		a. Opt double	10·00	55·00
J23		9p. deep green (No. 3)	27·00	70·00
		a. Opt double	80·00	
J24		2a. vermilion (No. 5)	£130	£225
		On Postage Stamps of King George VI		
J25	**2**	1p. red-orange	£225	£375
J26		3p. bright violet	48·00	80·00
J27		6p. bright blue	25·00	55·00
		a. Opt double	£100	£150
		b. Clear opt, on back and front	£350	
J28		9p. yellow-green	£1100	
J29	**3**	1a. purple-brown	9·00	42·00
		a. Opt inverted	£2500	£1200
J30		1½a. turquoise-green	23·00	70·00
		a. Opt omitted (in pair with normal)	£4250	
J31		2a. carmine	23·00	70·00
		a. Opt double	£2750	
J32		4a. greenish blue	45·00	£100
		a. Opt double	£250	
		b. Opt inverted	£3750	
		On Official Stamps of King George VI		
J33	**2**	3p. bright violet	£140	£275
J34		6p. bright blue	£160	£275
J35	**3**	1½a. turquoise-green	£180	£325
J35*a*		2a. carmine	£375	£450
J36		4a. greenish blue	£1000	

(**6a**) ("Yon Thon" = "Office use")

V. Official Stamp of King George VI optd at Myaungmya with Type **6a** *in black.*

J44	**7**	8a. myrtle-green	£110	£300

No. J44 was probably for official use.

There are two types of T **6a**, one with base of peacock 8 mm long and the other with base about 5 mm long. The neck and other details also vary. The two types are found *se-tenant* in the sheet. Stocks of the peacock types were withdrawn when the Japanese Directorate-General took control of the postal services in the Delta in August 1942.

JAPANESE ARMY ADMINISTRATION

7

8 Farmer

1942 (1 June). Impressed by hand. Thick yellowish paper. No gum. P 12×11.

J45	**7**	(1a.) red	50·00	70·00

This device was the personal seal of Yano Sitza, the Japanese official in charge of the Posts and Telegraphs department of the Japanese Army Administration. It was impressed on paper already perforated by a line machine. Some stamps show part of the papermaker's watermark, either "ABSORBO DUPLICATOR" or "ELEPHANT BRAND", each with an elephant.

Other impressions of this seal on different papers, and showing signs of wear, were not valid for postal purposes.

(Des T. Kato. Typo *Rangoon Gazette* Press)

1942 (15 June). Value in annas. P 11 or 11×11½. Laid bâtonné paper. No gum.

J46	**8**	1a. scarlet	23·00	25·00

Some stamps show part of the papermaker's watermark, either "ELEPHANT BRAND" or "TITAGHUR SUPERFINE", each with an elephant.

½A. (**9**) 1R. (**10**)

(New Currency. 100 cents = 1 rupee)

15 C. (**11**) 15 C. (**12**) 15 C. (**13**)

1942 (15 Oct). Previous issues, with "anna" surcharges obliterated, handstamped with new value in cents, as T **11** and **12** (No. J57 handstamped with new value only).

(a) On No. J46

J57	5c. on 1a. scarlet	26·00	30·00
	a. Surch omitted (in pair with normal)	£2000	

(b) On Nos. J47/53

J58	1c. on ¼a. on 1s. chestnut	55·00	55·00
	a. "1 c." omitted (in pair with normal)	£900	
	b. "¼ a." inverted	£275	
J59	2c. on ½a. on 2s. bright scarlet	55·00	55·00
J60	3c. on ¾a. on 3s. green	60·00	60·00
	a. Surch in blue	£225	
J61	5c. on 1a. on 5s. claret	85·00	65·00
J62	10c. on 3a. on 7s. green	£170	£140
J63	15c. on 4a. on 4s. emerald	50·00	55·00
J64	20c. on 8a. on 8s. violet	£900	£700
	a. Surch on No. J53c (surch in red)	£350	£170

The "anna" surcharges were obliterated by any means available, in some cases by a bar or bars, and in others by the butt of a pencil dipped in ink. In the case of the fractional surcharges, the letter "A" and one figure of the fraction, were sometimes barred out, leaving the remainder of the fraction to represent the new value, e.g. the "1" of "½" deleted to create the 2c. surcharge or the "4" of "¾" to create the 3c. surcharge.

1942. Nos. 314/17, 320/1 and 396 of Japan surcharged in cents only as T **13**.

J65	1c. on 1s. chestnut (Rice harvesting)	40·00	20·00

J71	20c. on 8s. violet (Meiji Shrine)	£200	95·00
	a. Surch double	£425	

Nos. J67c and J68b were issued for use in the Shan States.

BURMESE GOVERNMENT

On 1 November 1942 the Japanese Army Administration handed over the control of the postal department to the Burmese Government. On 1 August 1943 Burma was declared by the Japanese to be independent.

14 Burma State Crest

15 Farmer

(Des U Tun Tin and Maung Tin from drawing by U Ba Than. Typo Rangoon)

1943 (15 Feb). No gum. P 11.

J72	**14**	5c. scarlet	29·00	35·00
		a. Imperf	29·00	35·00
		ab. Printed on both sides	95·00	

No. J72 was usually sold affixed to envelopes, particularly those with the embossed 1a. King George VI stamp, which it covered. Unused specimens off cover are not often seen and blocks are scarce.

1943. Typo. No gum. P 11½.

J73	**15**	1c. orange (22 March)	6·00	9·00
		a. Brown-orange	5·00	10·00
J74		2c. yellow-green (24 March)	1·50	1·00
		a. "3" for "2" in face value (R. 2/10)	£350	
		b. Blue-green	15·00	
J75		3c. light blue (25 March)	5·00	1·00
		a. On laid paper	23·00	40·00
		b. Imperf between (horiz pair)	—	£350
J76		5c. carmine (small "c") (17 March)	32·00	21·00
J77		5c. carmine (large "C")	3·50	8·00
		a. Imperf (pair)	£110	
		b. "G" for "C" (R. 2/6)	£180	
J78		10c. grey-brown (25 March)	9·50	9·50
		a. Imperf (pair)	£110	
		b. Imperf between (horiz pair)	—	£350
J79		15c. magenta (26 March)	30	4·50
		b. On laid paper	6·00	23·00
		ba. Inverted "C" in value (R. 2/3)	£200	
J80		20c. grey-lilac (29 March)	30	1·00
J81		30c. deep blue-green (29 March)	1·25	3·00

The 1c., 2c. and 3c. have large "C" in value as illustrated. The 10c. and higher values have small "c". Nos. J73/81 had the face values inserted individually into the plate used for No. J46 with the original face value removed. There were a number of printings for each value, often showing differences such as missing stops, various founts of figures or "c", etc., in the value tablets.

The face value error, No. J74a, was later corrected.

Some sheets of No. J75a show a sheet watermark of Britannia seated within a crowned oval spread across 15 stamps in each sheet. This paper was manufactured by T. Edmonds and the other half of the sheet carried the watermark inscription "FOOLSCAP LEDGER". No stamps have been reported showing letters from this inscription, but a block of 25 is known on laid paper showing a different sheet watermark "HERTFORDSHIRE LEDGER MADE IN ENGLAND". Examples showing parts of these sheet watermarks are rare.

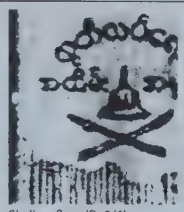
There are marked varieties of shade in this issue.

16 Soldier carving word "Independence"

17 Rejoicing Peasant

18 Boy with National Flag

Normal



Skyline flaw (R. 5/6)

(Des Maung Ba Thit (**16**), Naung Ohn Maung (**17**), and Maung Soi Yi (**18**). Typo State Press, Rangoon)

1943 (1 Aug). Independence Day. No gum.

(a) P 11

J82	**16**	1c. orange	15·00	20·00
J83	**17**	3c. light blue	15·00	20·00
J84	**18**	5c. carmine	23·00	11·00
		a. Skyline flaw	£140	
J82/4 *Set of 3*			48·00	45·00

(b) Rouletted

J85	**16**	1c. orange	1·50	1·75
		b. Perf × roul	£150	£150
		c. Imperf (pair)	45·00	55·00
J86	**17**	3c. light blue	2·50	4·00
		b. Perf × roul	£120	£120
		c. Imperf (pair)	45·00	55·00
J87	**18**	5c. carmine	3·50	4·25
		b. Perf × roul	70·00	70·00
		c. Imperf (pair)	45·00	55·00
		d. Skyline flaw	32·00	38·00
J85/7 *Set of 3*			6·50	9·00

The stamps perf × rouletted may have one, two or three sides perforated.

The rouletted stamps often appear to be roughly perforated owing to failure to make clean cuts. These apparent perforations are very small and quite unlike the large, clean holes of the stamps perforated 11.

A few imperforate sets, mounted on a special card folder and cancelled with the commemorative postmark were presented to officials. These are rare.

Cameroon

Allied operations against the German protectorate of Kamerun commenced in September 1914 and were completed in 18 February 1916. The territory was divided, under an Anglo-French agreement, on 31 March 1916, with the British administering the area in the west along the Nigerian border. League of Nations mandates were issued for the two sections of Cameroon, which were converted into United Nations trusteeships in 1946.

Supplies of Kamerun stamps were found on the German steamer *Professor Woermann*, captured at Freetown, and these were surcharged, probably in Sierra Leone, and issued by the Cameroons Expeditionary Force at Duala in July 1915.

A French post office opened in Duala on 10 November 1915 using stamps of Gabon overprinted "Corps Expeditionnaire Franco Anglais Cameroun". Although under the overall control of the British combined force commander, this office remained part of the French postal system.

PRICES FOR STAMPS ON COVER

The stamps of British Occupation of Cameroons are rare used on cover.

I. CAMEROONS EXPEDITIONARY FORCE

A

B

C.E.F. 1d. (1)

C.E.F. 1s. (2)

SETTINGS. Nos. B1/3 were surcharged from a setting of 100 (10×10) with the face value changed for the 1d.

Nos. B4 and B6/9 were surcharged from a common setting of 50 (5×10) with the face value amended.

No. B5 was surcharged from a setting of ten in a vertical strip repeated across the sheet. The figures of the surcharge on this are in a different style from the remainder of the pence stamps.

Nos. B10/13 were surcharged from a common setting of 20 (4×5) with the face value amended.

		a. "s" inverted	£1300	£4250
		b. "s" broken at top	£1200	
B1/13 *Set of* 13			£900	£3750

The 1d. on 10pf. was previously listed with "C.E.F." omitted. This was due to misplacement, so that all stamps (except for a pair in the Royal Collection) from the bottom row show traces of the overprint on the top perforations.

Examples of all values exist showing a forged Duala, Kamerun postmark dated "11 10 15". Another forged cancel dated "16 11 15" is also known. This can be identified by the lack of a serif on the index letter "b".

The stamps of Nigeria were subsequently used in British Cameroons and the area was administered as part of Nigeria from February 1924.

For issues of Cameroon under French administration see *Part 6 (France)*.

II. CAMEROONS TRUST TERRITORY

Following the independence of the French Trust Territory of Cameroun on 1 January 1960 the United Nations directed that a plebiscite should be held in the British Trust Territory whose postal service continued, for the time being, to be run by Nigeria. The northern area voted to join Nigeria, but the southern part of the territory decided to join the Cameroun Republic.

The following issue, although ordered by the Southern Cameroons authorities, was also on sale in Northern Cameroons, until the latter joined Nigeria on 1 June 1961. The stamps therefore can be found with Nigerian postmarks.

CAMEROONS U.K.T.T. (1)

6d. Major re-touch consisting of heavy diagonal shading (Pl. 2-1, R. 2/10)

1960 (1 Oct)–**61**. Nos. 69/71, 72*cd/f* and 73/80 of Nigeria optd with T **1**, in red.

T12	**29**	£1 black and violet	21·00	38·00
T1/12 *Set of* 12			30·00	55·00

Nos. T2 and T4/*b* were overprinted on stamps printed by Waterlows' subsidiary, Imprimerie Belge de Securité.

Nos. T2*a*, T4*c* and T7a were from new printings produced by De La Rue instead of Waterlow.

As well as being a paler shade, No. T4*c* is much less deeply engraved than T4/*b*, clearly evident in the shading in the hills and sky.

The above stamps were withdrawn on 30 September 1961, when Southern Cameroons became part of the Cameroun Republic, although some post offices had been using unoverprinted Nigerian stamps for some months previously.

Canada

Separate stamp issues appeared for British Columbia and Vancouver Island, Canada, New Brunswick, Newfoundland, Nova Scotia and Prince Edward Island before these colonies joined the Dominion of Canada.

BRITISH COLUMBIA & VANCOUVER ISLAND

Vancouver Island was organised as a Crown Colony in 1849 and the mainland territory was proclaimed a separate colony as British Columbia in 1858. The two colonies combined, as British Columbia, on 19 November 1866.

Nos. 30 and 33 were not issued.

British Columbia joined the Dominion of Canada on 20 July 1871.

COLONY OF CANADA

The first British post offices in what was to become the Colony of Canada were opened at Quebec, Montreal and Trois Rivières during 1763. These, and subsequent, offices remained part of the British G.P.O. system until 6 April 1851.

The two provinces of Upper Canada (Ontario) and Lower Canada (Quebec) were united in 1840.

For illustration of the handstamp types see BRITISH POST OFFICES ABROAD notes, following GREAT BRITAIN.

21	**4**	½d. deep rose	£9500	£2250
		a. Vertically ribbed paper	£10000	£3250
22	**1**	3d. red	£4750	£450
		a. Major re-entry	—	£1600

D. Very thick soft wove paper (1857)

23	**2**	6d. reddish purple	£48000	£4000
		a. Bisected (3d.) on cover	†	£35000

Bisected examples of the 3d. value were used to make up the 7½d. Canadian Packet rate to England from May 1856 until the introduction of the 7½d. value on 2 June 1857.

The 7½d. and 10d. values can be found in wide and narrow versions. These differences are due to shrinkage of the paper, which was wetted before printing and then contracted unevenly during drying. The width of these stamps varies between 17 and 18 mm.

The listed major re-entry on the 10d. occurs on R. 3/5 and shows strong doubling of the top frame line and the left-hand "8d. stg." with a line through the lower parts of "ANAD" and "ENCE". Smaller re-entries occur on all values.

Examples of the 12d. on wove paper come from a proof sheet used for postal purposes by the postal authorities.

The 3d. is known perforated 14 and also *percé en scie* 13. Both are contemporary, but were unofficial.

1858–59. P 11¾.

A. Machine-made medium to thick wove paper with a more even hard texture

25	**4**	½d. deep rose (12.58)	£4750	£950
		a. Lilac-rose	£4750	£1000
		b. Re-entry (R. 10/10)	£8500	£2250
26	**1**	3d. red (1.59)	£13000	£375
		a. Major re-entry	—	£1500
27	**2**	6d. brownish grey (1.59)	£18000	£4250
		a. Slate-violet	£18000	£4000

B. Thin soft horizontally ribbed paper

27*b*	**4**	½d. deep rose-red	—	£4500
28	**1**	3d. red	—	£1800
		a. Major re-entry		

The re-entry on the imperforate and perforated ½d sheets was the same, but occurred on R. 10/10 of the perforated sheets because the two left-hand vertical rows were removed prior to perforation.

43		17c. slate-blue	£1900	£130
43*a*		17c. indigo	£1800	£100

*Slighter re-entries are worth from £40 upwards in used condition.

As there were numerous P.O. Dept. orders for the 10c., 12½c. and 17c. and some of these were executed by more than one separate printing, with no special care to ensure uniformity of colour, there is a wide range of shade, especially in the 10c., and some shades recur at intervals after periods during which other shades predominated. The colour-names given in the above list therefore represent groups only.

It has been proved by leading Canadian specialists that the perforations may be an aid to the approximate dating of a particular stamp, the gauge used measuring 11¾×11¾ from mid-July 1859 to mid-1863, 12×11¾ from March 1863 to mid-1865 and 12×12 from April 1865 to 1868. Exceptionally, in the 5c. value many sheets were perforated 12×12 between May and October, 1862, whilst the last printings of the 12½c. and 17c. perf 11¾×11¾ were in July 1863, the perf 12×11¾ starting towards the end of 1863.

Beware of forged cancellations.

No. 13 was not issued due to objections to the design showing Charles Connell, the Postmaster-General. Most of the printing was destroyed.

New Brunswick joined the Dominion of Canada on 1 July 1867 and its stamps were withdrawn in March of the following year.

NEWFOUNDLAND

Newfoundland became a self-governing colony in 1855 and a Dominion in 1917. In 1934 the adverse financial situation led to the suspension of the constitution.

The first local postmaster, at St. John's, was appointed in 1805, the overseas mails being routed via Halifax, Nova Scotia. A regular packet service was established between these two ports in 1840, the British G.P.O. assuming control of the overseas mails at the same time.

The responsibility for the overseas postal service reverted to the colonial administration on 1 July 1851.

21	**5**	6½d. rose-lake (H/S "CANCELLED" in oval £11000)	£100	£450
22	**4**	8d. rose-lake	£130	£650
23	**2**	1s. rose-lake (H/S "CANCELLED" in oval £12000)	50·00	£300
		a. Bisected (6d.) (1863) (on cover)	†	£22000

Nos. 16/23 come from printings made in July (2d., 4d., 6d., 6½d., and 1s. only) or November 1861 (all values), which were received in Newfoundland in January 1862. The paper used was from the same manufacturer as that for Nos. 10/15, but was of more variable thickness and texture, ranging from a relatively soft medium paper, which can be quite opaque, to a thin hard transparent paper. The rose-lake stamps also show a considerable variation in shade ranging from pale to deep. The extensive remainders of this issue were predominantly in pale shades on thin hard paper, but it is not possible to distinguish between stamps from the two printings with any certainty. Deep shades of the 2d., 4d., 6d., 6½d. and 1s. on soft opaque paper do, however, command a considerable premium.

Beware of buying used examples of the stamps which are worth much less in unused condition, as many unused stamps have been provided with faked postmarks. A guarantee should be obtained.

(New Currency. 100 cents = 1 dollar)

6 Atlantic Cod

7 Common Seal on Ice-floe

8 Prince Consort

9 Queen Victoria

10 Schooner

11 Queen Victoria

(Recess A.B.N. Co, New York)

1865 (15 Nov)–**70**. P 12.

		(a) Thin yellowish paper		
25	**6**	2c. yellowish green	£170	£110
		a. Bisected (1c.) (on cover) (1870)	†	£8500
26	**7**	5c. brown	£600	£180
		a. Bisected (2½c.) (on cover)	†	£10000
27	**8**	10c. black	£375	£110
		a. Bisected (5c.) (on cover) (1869)	†	£7000
28	**9**	12c. red-brown	£650	£150
		a. Bisected (6c.) (on cover) (1869)	†	£5000
29	**10**	13c. orange-yellow	£120	£140
30	**11**	24c. blue	50·00	38·00
		(b) Medium white paper		
31	**6**	2c. bluish green (*to* deep) (1870)	£120	50·00
32	**8**	10c. black (1870)	£275	48·00
33	**9**	12c. chestnut (1870)	60·00	48·00

The inland postage rate was reduced to 3c. on 8 May, 1870. Until the 3c. value became available examples of No. 25 were bisected to provide 1c. stamps.

For the 12c. value in deep brown, see No. 61.

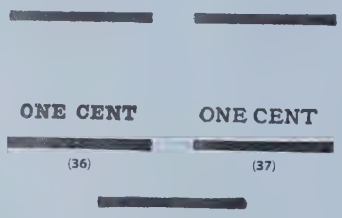
66/79 *Set of 14*			£325	£325

The 60c. surcharged "TWO—2—CENTS" in three lines is an essay made in December 1918 (*Price* £450).



1897 (19 Oct). T **21** surch with T **36/8** by Royal Gazette, St. John's, on stamps of various shades.

80	**36**	1c. on 3c. grey-purple	80·00	40·00
		a. Surch double, one diagonal	£1300	
		d. Vert pair, one without lower bar and "ONE CENT"	£4000	
81	**37**	1c. on 3c. grey-purple	£170	£120
82	**38**	1c. on 3c. grey-purple	£600	£500

Nos. 80/2 occur in the same setting of 50 (10×5) applied twice to each sheet. Type **36** appeared in the first four horizontal rows, Type **37** on R. 5/1–8 and Type **38** on R. 5/9 and 10.

Trial surcharges in red or red and black were not issued. (*Price*: Type **36** *in red* £1000, *in red and black* £1000: Type **37** *in red* £3000, *in red and black* £3000: Type **38** *in red* £7500, *in red and black* £8000).

These surcharges exist on stamps of various shades, but those on brown-grey are clandestine forgeries, having been produced by one of the printers at the *Royal Gazette*.

130/41 *Set of* 12			£160	£350

Each value bears with "Trail of the Caribou" the name of a different action: 1c. Suvla Bay; 3c. Gueudecourt; 4c. Beaumont Hamel; 6c. Monchy; 10c. Steenbeck; 15c. Langemarck; 24c. Cambrai; 36c. Combles; 2c., 5c., 8c., and 12c. inscribed "Royal Naval Reserve-Ubique".

Perforations. Two perforating heads were used: (*a*) comb 14×13.9; (*b*) line 14.1×14.1.

Nos. 130/41 exist imperforate, without gum. (*Price* £350 *unused, for each pair*).

1919 (12 Apr). Air. No. 132 optd with T **69**, by Robinson & Co Ltd, at the offices of the "Daily News".

142	**68**	3c. brown	£22000	£12000

These stamps franked correspondence carried by Lieut. H. Hawker on his Atlantic flight. 18 were damaged and destroyed, 95 used on letters, 11 given as presentation copies, and the remaining 76 were sold in aid of the Marine Disasters Fund.

1919 (19 Apr). Nos. 132 inscribed in MS. "Aerial Atlantic Mail. J.A.R.".

142*a*	**68**	3c. brown	£70000	£20000

This provisional was made by W. C. Campbell, the Secretary of the Postal Department, and the initials are those of the Postmaster, J. A. Robinson, for use on correspondence intended to be carried on the abortive Morgan-Raynham Trans-Atlantic flight. The mail was eventually delivered by sea.

In addition to the 25 to 30 used examples, one unused, no gum, example of No. 142*a* is known.

Single examples of a similar overprint on the 2c., (No. 131) and 5c. (No. 134) are known used on cover, the former with an unoverprinted example of the same value.

Trans-Atlantic AIR POST, 1919. ONE DOLLAR.

		a. Surch inverted	£3000	
146		3c. on 15c. bright scarlet (B) (13 Sept)	35·00	38·00
147	**34**	3c. on 35c. red (15 Sept)	17·00	26·00
		a. Surch inverted	£2750	
		b. Lower bar omitted	£180	£225
		c. "THREE" omitted	£1200	

Our prices for Nos. 147b and 147c are for stamps with lower bar or "THREE" entirely missing. The bar may be found in all stages of incompleteness and stamps showing broken bar are not of much value.

On the other hand, stamps showing either only the top or bottom of the letters "THREE" are scarce, though not as rare as No. 147c.

The 6c. T **27** surcharged "THREE CENTS", in red or black, is an essay (*Price* £950). The 2c. on 30c. with red surcharge is a colour trial (*Price* £1300).

AIR MAIL to Halifax, N.S. 1921.
(**72**)

1921 (16 Nov). Air. No. 78 optd with T **72** by *Royal Gazette*.

I. 2¾ mm between "AIR" and "MAIL"

148	**34**	35c. red	£150	£100
		a. No stop after "1921"	£130	90·00
		b. No stop and first "1" of "1921" below "f" of "Halifax"	£375	£275
		c. As No. 148, inverted	£7000	
		d. As No. 148a, inverted	£5000	
		e. As No. 148b, inverted	£27000	

II. 1½ mm between "AIR" and "MAIL"

148*f*	**34**	35c. red	£180	£120
		g. No stop after "1921"	£225	£150
		h. No stop and first "1" of "1921" below "f" of "Halifax"	£375	£275
		i. As No. 148*f*, inverted	£9000	
		k. As No. 148g, inverted	£16000	
		l. As No. 148h, inverted	£27000	

Type **72** was applied as a setting of 25 which contained ten stamps as No. 148a, seven as No. 148, four as No. 148*f*, two as No. 148g, one as No. 148b and one as No. 148h.

The line perforations measure 14.1 (14) or 13.7 (13½). The comb perforation measures 13.3×13.2. The 1c., 7c. and 14c. values are known with compound perforations of 13½ and 14.

The paper used had the watermarks spaced for smaller format stamps. In consequence, the individual watermarks are out of alignment so that for instance stamps from the second vertical column or the bottom horizontal row were sometimes without watermark.

155 King George VI

		d. Watermarked	£25000	£6000
8		1s. purple (1857)	£18000	£3500
		a. Bisected (6d.) (on cover) (1860)	†	£38000
		b. Quartered (3d.) (on cover) (1858)	†	£90000

The watermark on No. 7d consists of the whole or part of a letter from the name "T. H. SAUNDERS" (the papermakers).

The stamps formerly catalogued on almost white paper are probably some from which the bluish paper has been discharged.

Reprints of all four values were made in 1890 on thin, hard, white paper. The 1d. is brown, the 3d. blue, the 6d. deep green, and the 1s. violet-black.

The 3d. bisects, which were authorised on 19 October 1854, are usually found used to make up the 7½d. rate.

(New Currency. 100 cents = 1 dollar)

47	10	3c. rose	£120	70·00
		a. Stop between "PRINCE. EDWARD"	£300	£275

The Stop between "PRINCE. EDWARD" variety listed as Nos. 37a, 45a, 47a occurred at R. 1/2 in the master block of ten clichés (5×2), which was repeated ten times to construct the plate of 100 (10×10). It therefore appears ten times in each sheet at R. 1/2, 1/7, 3/2, 3/7, 5/2, 5/7, 7/2, 7/7, 9/2 and 9/7.

Prince Edward Island joined the Dominion of Canada on 1 July 1873.

DOMINION OF CANADA

On 1 July 1867, Canada, Nova Scotia and New Brunswick were united to form the Dominion of Canada.

The provinces of Manitoba (1870), British Columbia (1871), Prince Edward Island (1873), Alberta (1905), Saskatchewan (1905), and Newfoundland (1949) were subsequently added, as were the Northwest Territories (1870) and Yukon Territory (1898).

61b		15c. dull violet-grey	£250	35·00
		ba. Watermarked (1868)	£5500	£800
61c		15c. dull grey-purple	£325	35·00

The official date of issue was 1 April 1868. Scattered examples of most values can be found used in the second half of March.

The watermark on the stout paper stamps consists of the words "E & G BOTHWELL CLUTHA MILLS," in large double-lined capitals which can be found upright, inverted or reversed. Portions of one or two letters only may be found on these stamps, which occur in the early printings of 1868.

The paper may, in most cases, be easily divided if the stamps are laid face downwards and carefully compared. The thin hard paper is more or less transparent and shows the design through the stamp; the thicker paper is softer to the feel and more opaque.

Of the 2c. laid paper No. 57ac three examples only are known.

No. 60a is only known as a vertical strip of five.

II. Montreal printings. Medium to stout wove paper

(a) P 11½×12 or 11¾×12

62	13	½c. black (1873)	£110	85·00

(b) P 12

67	**14**	15c. clear deep violet (*thick paper*) (1879)	£4000	£700
68		15c. deep slate (1881)	£160	35·00
69		15c. slaty blue (1887)	£180	35·00
70		15c. slate-purple (*shades*) (7.88–92)	75·00	20·00

No. 63a gauges 12 or above on all four sides.

The watermark on No. 65a is part of "Alex.Pirie & Sons" which appeared diagonally as script letters once per sheet in a small batch of the paper used for the 1877 printing. For a description of the sheet watermark on No. 65b, see note after No. 61c.

Several used examples of the 12½c. have been reported perforated 11½×12 or 11¾×12.

The last printing of the 15c. slate-purple, No. 70, took place at Ottawa.

III. Ottawa printings. Thinnish paper of poor quality, often toned grey or yellowish. P 12

71	**14**	15c. slate-violet (*shades*) (5.90)	75·00	22·00
		a. Imperf (pair). *Brown-purple*	£1400	

Examples of No. 71 are generally found with yellowish streaky gum.

89		10c. lilac-pink (3.88)	£350	50·00

Nos. 75 and 78 were printed in the same shades during the second Ottawa period. Nos. 75a and 78a date from *circa* 1894–95.

There are four variants of the Strand of Hair, with the strand in the same position but varying in length. R. 2/13 and R. 3/16 have been identified. The illustration shows the "Long Strand".

Examples of paper (*a*) can often be found showing traces of ribbing, especially on the 2c. value.

No. 79a was issued in New Brunswick and Nova Scotia.

*The exact perforation measurement on No. 86c is 11.85×11.6.

6c. Neck flaw ("A" Plate, R. 5/1)

1873–79. Montreal printings. Medium to stout wove paper. P 11½×12 or 11¾×12.

90	**21**	1c. bright orange	£300	50·00
91		1c. orange-yellow (1873–79)	£250	17·00

3c. "Vampire bite"

5c. on 6c. re-entry (R. 3/5)

6c. Major re-entry (Pane B, R. 9/7)

1889–97. Ottawa printings. Thinnish paper of poor quality, often toned grey or yellowish. P 12.

103	**21**	2c. dull sea-green	75·00	2·50
104		2c. blue-green (7.89–91)	60·00	3·50
		a. Latent entries	£500	£140
105		3c. bright vermilion (4.89–97)	55·00	1·50
		a. Vampire bite	£475	£130
		b. Imperf (pair) (1891–93?)	£550	
106		5c. brownish grey (5.89)	£110	1·75
		a. Imperf (pair) (1891–93)	£700	
107		6c. deep chestnut (10.90)	50·00	18·00
		a. "5c." re-entry*	£4250	£1600
		b. Major re-entry	£400	85·00
		c. Imperf (pair) (1891–93?)	£750	
108		6c. pale chestnut	65·00	18·00
109		10c. salmon-pink	£325	£110
110		10c. carmine-pink (4.90)	£275	45·00
		a. Imperf (pair) (1891–93?)	£850	
111		10c. brownish red (1894?)	£250	42·00
		a. Imperf (pair)	£750	

On No. 107a the top portion of the 5c. design cuts across "CANADA POSTAGE", the white circle surrounding the head, and can be seen on the top of the head itself. Lesser re-entries are visible on R. 2/10 and R. 3/1 from another plate.

There are two latent re-entries recognised on the 2c. The stamp with the partial image in the upper margin has been identified as being R. 10/8, that with the image in the lower margin is from a position in row 9. The plates are not known.

The 1c. showed no change in the Ottawa printings, so is not included. The 2c. reverted to its previous grass-green shade in 1891.

149		10c. brownish purple (1.98)	£140	55·00
		a. Imperf (pair)	£550	
141/9 *Set of 8*			£425	£100

BOOKLET PANES. Most definitive booklets issued from 1900 onwards had either the two horizontal sides or all three outer edges imperforate. Stamps from the panes show one side or two adjacent sides imperforate.

Two types of the 2c.

Die Ia. Frame consists of four fine lines.
Die Ib. Frame has one thick line between two fine lines.

The die was retouched in 1900 for Plates 11 and 12, producing weak vertical frame lines and then retouched again in 1902 for Plates 15 to 20 resulting in much thicker frame lines. No. 155*b* covers both states of the retouching.

1898–1902. P 12.

150	**32**	½c. black (9.98)	8·00	1·10

		s. Handstamped "SPECIMEN"	£110	
187		50c. deep violet (19.11.08)	£500	£130
173/87 *Set of 7*			£1100	£180

The 1c., 5c., 7c. and 10c. exist imperforate but are believed to be proofs. (*Prices per pair*, 1c. £550, 5c. £1000, 7c. £650, 10c. £1000, *without gum*).

IMPERFORATE AND PART-PERFORATED SHEETS. Prior to 1946 many Canadian issues exist imperforate, or with other perforation varieties, in the colours of the issued stamps and, usually, with gum. In the years before 1927 such examples are believed to come from imprimatur sheets, removed from the Canadian Post Office archives. From 1927 until 1946 it is known that the printers involved in the production of the various issues submitted several imperforate plate proof sheets of each stamp to the Post Office authorities for approval. Some of these sheets or part sheets were retained for record purposes, but the remainder found their way on to the philatelic market.

Part-perforated sheets also occur from 1927–29 issues.

From 1908 until 1946 we now only list and price such varieties of this type which are known to be genuine errors, sold from post offices. Where other imperforate or similar varieties are known they are recorded in footnotes.

It is possible, and in some cases probable, that some imperforate varieties listed before 1908 may have also been removed from the archives as mentioned above, but it is far harder to be explicit over the status of this earlier material.

36 King George V and Queen Mary when Prince and Princess of Wales

195	**43**	20c. dull brown	£160	£130
188/95 *Set of 8*			£550	£375

Some values exist on both toned and white papers.
Nos. 188/95 exist imperforate. (*Price* £650, *un, for each pair*).

WET AND DRY PRINTINGS. Until the end of December 1922 all Canadian stamps were produced by the "wet" method of recess-printing in which the paper was dampened before printing, dried and then gummed.

In late December 1922 the Canadian Bank Note Co. began to use the "dry" process in which the paper was gummed before printing. Late printings of the 3c. brown were the first stamps to be produced by this method, but the changeover was not completed until January 1926.

"Dry" printings have a sharper appearance and can often be found with a degree of embossing showing on the reverse. Stamps from "wet" printings shrink during drying and are narrower than "dry" examples. In many cases the difference can be as great as 0.5 mm. On some early booklet panes the difference is in the vertical, rather than the horizontal, measurement.

On Nos. 196/215 all values only exist from "wet" printings, except the 3c., 20c. and 50c. which come from both types of printing.

44 King George V

1c. Major re-entry

1911–22. P 12.

196	**44**	1c. yellow-green (22.12.11)	12·00	75

215		50c. sepia	50·00	3·75
196/215 *Set of 8*			£275	12·00

The 20c. and 50c. values exist imperforate (*Price* £3500 *un, for each pair*).

The major re-entry on the 1c. (No. 197a) shows as a distinct doubling of the lower right corner of the stamp on Plate 12, lower right pane, R. 4/5.

1912 (Oct)–**21.** For use in coil-machines.

(a) P 12×imperf

216	**44**	1c. yellow-green (1914)	3·50	16·00
217		1c. blue-green (1914)	28·00	28·00
		a. Two large holes at top and bottom (vert pair) (7.18)	80·00	90·00
218		2c. deep rose-red (1914)	45·00	26·00
218*a*		3c. brown (1921)	5·00	10·00

No. 217a has two large holes about 3½ mm in diameter in the top and bottom margins. They were for experimental use in a vending machine at Toronto in July 1918 and were only in use for two days.

The 1c. and 2c. also exist with two small "V" shaped holes about 9.5 mm apart at top which are gripper marks due to modifications made in vending machines in 1917.

(b) Imperf×perf 8

219	**44**	1c. yellow-green (10.12)	24·00	8·00
220		1c. blue-green	30·00	7·50
		a. With fine horiz lines across stamp	75·00	
221		2c. carmine (10.12)	22·00	1·75
222		2c. rose-red	23·00	2·50
223		2c. scarlet	48·00	6·50
224		3c. brown (8.18)	5·00	2·00

(c) P 8×imperf

224*a*	**44**	1c. blue-green (13.2.13)	65·00	50·00
224*b*		2c. carmine (15.2.13)	65·00	50·00

The stamps imperf×perf 8 were sold in coils over the counter; those perf 8×imperf were on sale in automatic machines. Varieties showing perf 12 on 2 or 3 adjacent sides and 1 or 2 sides imperf are from booklets, or the margins of sheets.

(**45**)

46

47

1915 (12 Feb). Optd with T **45**.

225	**44**	5c. blue	£130	£200
226		20c. olive-green	60·00	£100
227		50c. sepia (R.)	£140	£180
225/7 *Set of 3*			£300	£425

These stamps were intended for tax purposes, but owing to ambiguity in an official circular dated 16 April 1915, it was for a time believed that their use for postal purposes was authorised. The position was clarified by a further circular on 20 May 1916 which made clear that Nos. 225/7 were for fiscal use only.

1915. P 12.

228	**46**	1c. green (15.4.15)	7·00	50

230		2c. rose-carmine	35·00	4·50

Die I

Die II

In Die I there is a long horizontal coloured line under the foot of the "T", and a solid bar of colour runs upwards from the "1" to the "T".

In Die II this solid bar of colour is absent, and there is a short horizontal line under the left side of the "T", with two short vertical dashes and a number of dots under the right-hand side.

1916 (1 Jan). P 12.

231	**47**	2c. +1c. rose-red (Die I)	65·00	1·25

239		2c.+1c. yellow-brown (Die II)	7·00	50
		a. Imperf (pair)	£1500	
240		2c.+1c. deep brown (Die II)	21·00	50

(b) Imperf×perf 8

241	**47**	2c.+1c. brown (Die I)	£110	13·00
		a. Pair, 241 and 243	£350	
243		2c.+1c. deep brown (Die II)	60·00	4·75

No. 239a, which is a genuine error, should not be confused with ungummed proofs of the Die I stamp, No. 238 (*Price per pair*, £140).

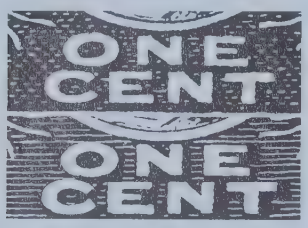
This value also exists P 12×imperf or imperf×p 12, but was not issued with these perforations (*Price, in either instance*, £350, *un, per pair*).

48 Quebec Conference, 1864, from painting "The Fathers of Confederation", by Robert Harris

1917 (15 Sept). 50th Anniv of Confederation. P 12.

244	**48**	3c. bistre-brown	23·00	3·50
245		3c. deep brown	25·00	4·25

No. 244 exists imperforate, without gum (*Price per pair*, £500 *un*).



Die I (top). Space between top of "N" and oval frame line and space between "CENT" and lower frame line.

Die II (bottom). "ONE CENT" appears larger so that "N" touches oval and "CENT" almost touches frame line. There are other differences but this is the most obvious one.

Die I (top). The lowest of the three horizontal lines of shading below the medals does not touch the three heavy diagonal lines; three complete white spaces over both "E's" of "THREE"; long centre bar to figures "3". Vertical spandrel lines fine.

Die II (bottom). The lowest horizontal line of shading touches the first of the three diagonal lines; two and a half spaces over first "E" and spaces over second "E" partly filled by stem of maple leaf; short centre bar to figures "3". Vertical spandrel lines thick. There are numerous other minor differences.

WET AND DRY PRINTINGS. See notes above No. 196.

On Nos. 246/63 all listed items occur from both "wet" and "dry" printings except Nos. 246aa/ab, 248aa, 256, 259, 260 and 262 which come "wet" only, and Nos. 246a, 248/a, 252/4a, 256b and 263 which are "dry" only.

1922–31. As T **44**.

*No. 467c is from the left side of a sheet and shows perforations between the stamps and the sheet margin.

Nos. 464a and 467b are blocks with the outer edges imperf. These come from "One Dollar Plastic Packages" sold at post offices.

WINNIPEG PHOSPHOR BANDS. In 1962 facer-cancelling machines were introduced in Winnipeg which were activated by phosphor bands on the stamps. Under long or short wave ultra-violet light the phosphor glows and there is also a short after-glow when the lamp is turned off. This should not be confused with the fluorescent bands introduced in Ottawa in 1971.

Symbols:—1c. Crystals (Mining); 2c. Tree (Forestry); 3c. Fish (Fisheries); 4c. Electricity pylon (Industrial power).

Nos. 528a, 530b, 531b and 531pa are blocks with the outer edges imperf. These come from "One Dollar Plastic Packages" sold at post offices.

†This is a fugitive colour which tends to become reddish on drying. In successive printings the violet colour became more and more reddish as the printer tried to match the shade of each previous printing instead of referring back to the original shade. A deep reddish violet is also known from Plate 3. As there is such a range of shades it is not practical to list them.

*On No. 530p the band is 4 mm wide as against 8 mm on No. 530pa. No. 530pb exists with the band at either left or right side of the stamp, the bands being applied across alternate vertical perforations.

Postal forgeries are known of the 4c. showing a coarser background and lack of shading on the Queen's face.

No. 581q only exists as a pre-cancel.

Nos. 582b, 583b, 583pa are blocks with the outer edges imperf. These come from "One Dollar Plastic Packages" sold at post offices.

No. 582p comes with the band to the left or right of the stamp, the phosphor having been applied across alternate vertical perforations.

Postal forgeries exist of the 6c. orange printed in lithography and perforated 12½.

Normal

Re-engraved

When the basic postal rate was changed to 6c. the C.B.N. lent their die to B.A.B.N. who made a duplicate die from it by transfer. Parts of this proved to be weak, but it was used for Nos. 601/2 and 606/7. B.A.B.N. later re-engraved their die to make fresh plates which were used for Nos. 603 and 608. No. 608 first appeared on sheets from Plate 4.

There are no records of dates of issue of the booklets, packs and coils, but supplies of these were distributed to depots in the months indicated.

IMPERF BETWEEN PAIRS FROM COIL STAMPS. Nos. 594/7 are known in blocks or horizontal pairs imperf between vertically. Coils are supplied to post offices in batches of ten coils held together by roulettes between every fourth stamp so that they can easily be split apart. If two or more unsplit coils are purchased it is possible to obtain blocks or pairs imperf between vertically.

Vertical coil stamps are also known imperf between horizontally or with some stamps apparently completely imperf. These can result from blind perforations identifiable by slight indentations.

WHITE PAPERS. Original printings of the sheet and coil stamps were made on toned paper. From the later part of 1969 experimental printings were made on white fluorescent paper, as referred to in the note below No. 620; this paper is distinct from the glazed type used for the "Opal" booklet (see Nos. 580a and 581a).

During 1971 a further type of paper, white but non-fluorescent, was introduced. This later white (non-fluorescent) paper typically has PVA gum, readily distinguishable from the shiny 'Dextrine' gum of the white fluorescent paper. Exceptions are 582paca and 610/qfa, which have PVA gum. Identification of fluorescent papers can be confirmed with the use of a U.V. lamp. Particular care is needed in the cases of Nos. 602c/ca and 606pf, where the listings refer to examples on the "hybrite" paper.

FLUORESCENT BANDS. During the second half of 1971 new sorting machines were installed in the Ottawa area which were activated by stamps bearing fluorescent bands. These differ from the Winnipeg phosphor bands in that they react green and have no after-glow. To the naked eye the fluorescent bands appear shiny when compared with the remainder of the stamp when looking along its surface. Winnipeg phosphor bands appear matt.

The experiments were successful and what was at first called "Ottawa tagging" has since come into more general use and the Winnipeg phosphor was phased out. However, the substance at first used (known as OP-4) was found to migrate to envelopes, documents, album pages, etc. as well as to adjoining stamps. Late in 1972 this fault was cured by using another substance (called OP-2). The migrating bands were used on early printings of Nos. 604q, 608q and 610q as well as certain stamps referred to in a footnote after No. 692. It is most advisable to use plastic mounts for housing stamps with migrating bands or else clear acetate should be affixed to the album leaves.

WHITE FLUORESCENT PAPER. Different papers with varying degrees of whiteness have been used for Canadian stamps and it is understood that much of the paper contained a high percentage of recycled pulp. The fluorescent content of this paper varies, but during 1968–70 a distinctive very white and highly fluorescent paper was used known by the trade-name "hybrite"; this fluoresces on the back and front. Some issues were wholly printed on this paper, and these can be used for distinguishing those which appeared on ordinary paper as well, both being listed.

No. 622 has a background of yellow-green and pale blue but copies are known with the yellow-green apparently missing. This "yellow-green" is produced by an overlay of yellow on the blue but we have not come across any examples where the yellow is completely missing and the wide range of colour variation is due to technical difficulties in maintaining an exact blend of the two colours.

The designs of the 5c. and 6c. were each issued with the various designs *se-tenant* in a diamond-shaped arrangement within the sheet. This generally results in *se-tenant* pairs both vert and horiz, but due to the sheet arrangement vert and horiz pairs of the same design exist from the two centre vert and horiz rows.

328 Sir Donald A. Smith

(Des Dora de Pédery-Hunt. Litho C.B.N.)

1970 (4 Nov). 150th Birth Anniv of Sir Donald Alexander Smith. P 12.

a. Bilingual text (18 May) 5·00

1950 (5–10 May). Orange and white cover. One pane of six 4c. (No. 417a) (3×2).
SB45 25c. booklet. Cover as Type B **4** with English text 32·00
a. Stitched 60·00
b. Bilingual text (10 May) 55·00

1950 (18 May). Black and white cover. Panes of three 1c., 3c. and 4c. (Nos. 422ba, 423a, 423ba) (3×1).
SB46 25c. booklet. Cover as Type B **5** with English text 55·00
a. Bilingual text 70·00

1951 (2 June). Orange and white cover. One pane of six 4c. (No. 417ba) (3×2).
SB47 25c. booklet. Cover as Type B **4** with English text 6·00
a. Stitched 12·00
b. Bilingual text 12·00

1951 (25 Oct)–**52**. Black and white cover. Panes of three 1c., 3c. and 4c. (Nos. 422ba, 423a, 423ca) (3×1).
SB48 25c. booklet. Cover as Type B **5** with English text 55·00
a. Bilingual text (9.7.52) 65·00

1953 (6 July–19 Aug). Orange cover. One pane of six 4c. (No. 453a) (3×2).
SB49 25c. booklet. Cover as Type B **4** with English text 4·75
a. Bilingual text (19 Aug) 10·00

1953 (17 July–20 Oct). Purple cover. Two panes of four 3c. (No. 452a) and 2 labels (3×2).
SB50 25c. booklet. Cover as Type B **4** with English text 4·25
a. Bilingual text (20 Oct) 17·00

1953 (12 Aug). Grey cover. Panes of three 1c., 3c. and 4c. (Nos. 458a, 459a, 460a) (3×1).
SB51 25c. booklet. Cover as Type B **5** with English text 16·00
a. Bilingual text 38·00

All the following booklets are bilingual

1954 (1 Apr–Nov). Blue cover as Type B **4**.
SB52 25c. booklet containing pane of five 5c. and 1 label (No. 473a) (3×2) 2·25
a. Stitched (Nov) 3·25

1954 (14 July–Nov). Blue cover as Type B **4**.
SB53 25c. booklet containing pane of five 5c. and 1 label (No. 467a) (3×2) 2·75
a. Stitched (Nov) 5·50

1955 (7 July). Violet cover as Type B **4**.
SB54 25c. booklet containing pane of six 4c. (No. 466a) (3×2) 4·75

B **7**

1956 (1 June). Red and white cover as Type B **7**.
SB55 25c. booklet containing two panes of five 1c. and five 4c., each with 1 label (Nos. 463a, 466b) (3×2) 3·50

1956 (July). Blue and white cover as Type B **7**.
SB56 25c. booklet containing pane of five 5c. and 1 label (No. 467a) (3×2) 2·75

B **8**

1963 (May)–**67**. Blue and white cover as Type B **7**.
SB57 25c. booklet containing pane of five 5c. and 1 label (No. 531a) (2×3) 7·00
a. Cover Type B **8** (1.67) 48·00

1963 (15 May). Red and white cover as Type B **7**.
SB58 25c. booklet containing two panes of five 1c. and five 4c., each with 1 label (Nos. 527a, 530a) (2×3) 10·00

1967 (Feb). Red cover as Type B **8**.
SB59 25c. booklet containing two panes of five 1c. and five 4c., each with 1 label (Nos. 579a, 582a) (2×3) ..... 3·00

1967 (Mar). Blue cover as Type B **8**.
SB60 25c. booklet containing pane of five 5c. and 1 label (No. 583a) (2×3) ..... 6·00

B **9**

1968 (Sept). Brown and cream cover, 70×48 mm, as Type B **9**.
SB61 25c. booklet containing *se-tenant* pane of five 1c. and five 4c. (No. 598a) (2×5) ..... 1·75

1968 (Sept). Red and cream cover as Type B **9**.
SB62 $1 booklet containing pane of twenty-five 4c. and 2 labels (No. 599a) (3×9) ..... 6·50

1968 (Sept). Blue and cream cover, 82×48 mm, as Type B **9**.
SB63 $1 booklet containing pane of twenty 5c. (No. 600a) (2×10) ..... 4·50

1968 (Oct). Orange and cream cover, 70×48 mm, as Type B **9**, but without border.
SB64 25c. booklet containing *se-tenant* pane of one 1c., four 6c. and 1 label (No. 598b) (2×3) ..... 2·00

B **10** (*Illustration reduced. Actual size* 128×60 *mm*)

1968 (15 Nov). Christmas. Red and green cover as Type B **10**.
SB65 $1 booklet containing two panes of ten 5c. (No. 630a) (5×2) ..... 4·50
p. Phosphor (No. 630pa) ..... 6·00
Nos. SB65/p exist with left or right opening (i.e. with selvedge at left or right of pane).

1969 (Jan). Orange-red on cream cover as Type B **9**, but without border.
SB66 $1.50, booklet containing pane of twenty-five 6c. and 2 labels (No. 601a) (3×9) ..... 10·00

1969 (8 Oct). Christmas. Red cover size as Type B **10**.
SB67 $1 booklet containing two panes of ten 5c. (No. 644a) (5×2) ..... 3·00
p. Phosphor (No. 644pa) ..... 5·00

1970 (Jan). Black on cream cover as Type B **9**, but without border.
SB68 $1.50 booklet containing pane of twenty-five 6c. and 2 labels (No. 602a) (3×9) ..... 14·00

1970 (Aug). Black on cream cover, 70×48 mm, as Type B **9**, but without border.
SB69 25c. booklet containing pane of four 6c. (No. 603a) (2×2) ..... 11·00

1970 (Aug). Black on cream cover as Type B **9**, but without border.
SB70 $1.50 booklet containing pane of twenty-five 6c. and 2 labels (No. 607a) (3×9) ..... 17·00

1970 (26 Oct). Indigo on cream cover, 70×50 mm. Inscr "CANADIAN POSTAGE STAMPS ... MADE EXPRESSLY FOR OPAL MANUFACTURING CO. LIMITED".
SB71 25c. booklet containing four 2c. and four 3c. (No. 580b) (2×2) with gutter margin between ..... 1·75

D32/44 *Set of 13*			14·00	27·00

There are no records of dates of issue of the above but supplies were distributed to depots in the months indicated.

The original 1969 printings of the 1, 4, 5, 8, 10 and 12c. on ordinary paper, and the 8c. and 12c. on white fluorescent paper (Nos. D38b, 40b), have shiny "Dextrine" gum. Later issues on white and white fluorescent ("hybrite") papers have PVA gum.

OFFICIAL STAMPS

Stamps perforated "O H M S" were introduced in May 1923 for use by the Receiver General's department in Ottawa and by the Assistant Receiver Generals' offices in provincial cities. From 1 July 1939 this use was extended to all departments of the federal government and such stamps continued to be produced until replaced by the "O.H.M.S." overprinted issue of 1949.

The perforated initials can appear either upright, inverted or sideways on individual stamps. The prices quoted are for the cheapest version. Stamps perforated with Type O **1** are only priced used. Only isolated examples are known mint and these are very rare.

A number of forged examples of the perforated "O.H.M.S." are known, in particular of Type O **1**. Many of these forged perforated initials were applied to stamps which had already been used and this can aid their detection. Genuine examples, postmarked after the perforated initials were applied, often show the cancellation ink bleeding into the holes.

(O **1**) (Five holes in vertical bars of "H") (O **2**) (Four holes in vertical bars of "H")

1923 (May). Nos. 196/215 punctured as Type O **1**.

O162/71 *Set of 10*			£275	£275

Forgeries exist of this overprint. Genuine examples are 2.3×15 mm and show the tops of all letters aligned, as are the stops. The serifs are well defined and, in the case of the "S", they are vertical. The crossbar of the "H" is slightly above centre. Overprints applied by lithography are forgeries.

Only a few sheets of the $1 showed the variety, No. O170a.

MISSING STOP VARIETIES. These occur on R. 6/2 of the lower left pane (Nos. O162a, O163a, O175a and O176a) or R. 10/2 of the lower left pane (O166a, O167a, O168a, O169a, O170a and O171a). No. O176a also occurs on R. 8/8 of the upper left pane in addition to R. 6/2 of the lower left pane.

1949–50. Nos. 414/15, 416/17, 418 and 431 optd as Type O **3** by typography.

The use of official stamps was discontinued on 31 December 1963.

Cape of Good Hope *see* South Africa

Cayman Islands

The first post office was opened at Georgetown in April 1889. The stamps of Jamaica with the following cancellations were used until 19 February 1901. At some stage, probably around 1891, a supply of the Jamaica 1889 1d., No. 27, was overprinted "CAYMAN ISLANDS", but these stamps were never issued. Two surviving examples are known, one unused and the other cancelled at Richmond in Jamaica.

		a. Surch double	£50000	£30000
		b. Dented frame	£24000	

No. 35 should only be purchased when accompanied by an expert committee's certificate or similar form of guarantee.

MANUSCRIPT PROVISIONALS. During May and June 1908 supplies of ½d. and 1d. stamps became exhausted, and the payment of postage was indicated by the postmistress, Miss Gwendolyn Parsons, using a manuscript endorsement. Such endorsements were in use from 12 May to 1 June.

MP1	"(Postage Paid G.A.P.)" (12 May to 1 June)	£6000
MP1*a*	"(Postage Paid G.A.P.)½" (23 May to 1 June)	£8500
MP1*b*	"(Postage Paid G.A.P.)1" (23 May to 1 June)	£7500

In October of the same year there was a further shortage of ¼d. stamps and the manuscript endorsements were again applied by either the new Postmaster, William Graham McCausland or by Miss Parsons who remained as his assistant.

MP2	"Pd ¼d.W.G. McC" (4 to 27 October)	£250
MP2*a*	¼d. Pd. W.G. McC" (14 October)	£1500
MP2*b*	"Pd ¼d.W.G. McC" (6 October)	£2000
MP3	"Paid" (7 October)	£13000
MP4	"Pd ¼d." (8 October)	£8500
MP5	"Paid ¼d/ GAP. asst." (15 October)	£11000

No. MP2 exists in different inks and formats. Nos. MP2 and MP2*a* show the endorsement in two lines, whereas it is in one line on No. MP2*b*.

Manuscript endorsement for the 2½d. rate is also known, but this is thought to have been done by oversight.

A 1d. surcharge on 4d. (No. 29), issued in mid-May, was intended as a revenue stamp and was never authorised for postal use (*price* £250 *un.*). Used examples were either cancelled by favour or passed through the post in error. Exists with surcharge inverted (*price* £2000 *un.*), surcharge double (*price* £2750 *un.*) or surcharge double, both inverted (*price* £3000 *un.*).

(14)

(15)

Straight serif (Left-hand pane R. 10/2)

1917 (26 Feb). T **12** surch with T **14** or **15** at Kingston, Jamaica.

53	**14**	1½d. on 2½d. deep blue	20·00	24·00
		a. No fraction bar	£275	£300
		b. Missing stop after "STAMP" (R. 1/4)	£850	
54	**15**	1½d. on 2½d. deep blue	1·75	6·00
		a. No fraction bar	75·00	£140
		b. Straight serif	95·00	£180

On No. 53 "WAR STAMP" and "1½d." were applied separately.

(16)

(17)

(18)

1917 (4 Sept). T **12** surch with T **16** or **17** by D.L.R.

55	**16**	1½d. on 2½d. deep blue	£750	£2000
56	**17**	1½d. on 2½d. deep blue	30	60
		s. Optd "SPECIMEN"	£120	
		x. Wmk reversed	£170	

De La Rue replaced surcharge Type **16** by Type **17** after only a few sheets as it did not adequately obliterate the original face value. A small quantity, said to be 3½ sheets, of Type **16** was included in the consignment in error.

1919–20. T **12** and **13** (2½d. special printing), optd only, or surch in addition at Kingston (No. 58) or by D.L.R. (others).

57	—	½d. green (4.2.19)	60	2·50
		a. Short opt (right pane R. 10/1)	27·00	
58	**18**	1½d. on 2d. grey (10.3.20)	5·00	8·50
59	**17**	1½d. on 2½d. orange (4.2.19)	80	1·25
57s, 59s Optd "Specimen" *Set of 2*			£120	

No. 57 was overprinted with T **13** of British Virgin Islands.

The ½d. stamps on *buff* paper, and later consignments of the 2d. T **13** on *pinkish*, derived their colour from the paper in which they were packed for despatch from England.

No. 57a shows the overprint 2 mm high instead of 2½ mm.

A further surcharge as No. 58, but in red, was prepared in Jamaica during April 1920, but these were not issued.

19

An example of the 4d, No. 62, is known with the 'C' missing from the watermark in the top sheet margin.

"A.S.R." PROVISIONAL. On the night of 9/10 November 1932 the Cayman Brac Post Office at Stake Bay, and its contents, was destroyed by a hurricane. Pending the arrival of replacement stamp stocks and cancellation the Postmaster, Mr A. S. Rutty, initialled covers to indicate that postage had been paid. Those destined for overseas addresses additionally received a "Postage Paid" machine postmark in red when they passed through Kingston, Jamaica.

MP6	Endorsed "A.S.R." in manuscript	£11000
MP7	Endorsed "A.S.R." in manuscript and "Postage Paid" machine postmark in red	£16000

These emergency arrangements lasted until 19 December.

(Recess Waterlow)

1932 (5 Dec). Centenary of the "Assembly of Justices and Vestry". Wmk Mult Script CA. P 12½.

CROWN COLONY

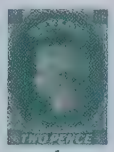
PRICES. The prices of the imperf stamps of Ceylon vary greatly according to condition. The following prices are for fine copies with four margins.

Poor to medium specimens can be supplied at much lower prices.



1

2

3

NOTE. Beware of stamps of Type **2** which are often offered with corners added.

(Recess P.B.)

1857 (1 Apr). Blued paper. Wmk Star W w **1**. Imperf.

1	**1**	6d. purple-brown	£12000	£450

Collectors should beware of proofs with faked watermark, often offered as originals.

PERKINS BACON "CANCELLED". For notes on these handstamps, showing "CANCELLED" between horizontal bars forming an oval, see Catalogue Introduction.

1857 (2 July)–**59**. Wmk Star, W w **1**. White paper.

(a) Imperf

2	**1**	1d. deep turquoise-blue (24.8.57)	£1100	45·00
		a. Blue	£1200	80·00
		b. Blued paper	—	£225
3		2d. green (*shades*) (24.8.57)	£200	65·00
		a. Yellowish green	£500	90·00
4	**2**	4d. dull rose (23.4.59)	£70000	£4500
5	**1**	5d. chestnut	£1600	£150

		(c) P 12½ by D.L.R.		
38	3	10d. dull vermilion (9.64)	£325	22·00

The line machine used for Nos. 19/37 produced perforations of variable quality due to wear, poor cleaning and faulty servicing, but it is generally accepted that the clean-cut and intermediate versions occurred on stamps perforated up to March 1861 and the rough variety when the machine was used after that date.

(Recess D.L.R.)

1862. No wmk. Smooth paper.

		(a) P 13		
39	1	1d. dull blue	£180	7·00

		(b) P 11½, 12		
44	1	1d. dull blue	£1800	£130
		a. Imperf between (horiz pair)	†	£18000

Nos. 39/44 were printed on paper showing a papermaker's watermark of "T H SAUNDERS 1862", parts of which can be found on individual stamps. Examples are rare and command a premium.

The 1s. is known imperforate, but was not issued in this condition (*Price*, £4000, *unused*).

5 (23 *mm* high. "CC" oval)

6 (21½ *mm* high. "CC" round and smaller)

(Typo (½d.) or recess (others) D.L.R.)

		x. Wmk reversed	£750	£130
		y. Wmk inverted and reversed	£1000	£350

Watermarks as Type **5** were arranged in four panes, each of 60, with the words "CROWN COLONIES" between the panes. Parts of this marginal watermark often appear on the stamps.

De La Rue had considerable difficulty matching the standard Crown CC watermark to the plates received from Perkins Bacon with the result that the watermark W **5** is frequently found misplaced.

A further aid to identifying the two watermarks is the distance between the top of the cross and the foot of "CC", which measures 2 mm on W **5** and 6.5 mm on W **6**.

The ½d. dull mauve, 2d. ochre and 5d. grey-olive with this watermark also exist imperforate, but are not known used. The 6d. sepia and 2s. steel-blue also exist imperforate on wove paper without watermark.

One used example of the 2d. grey-green is known showing private roulettes added to an imperforate stamp (*Price* £5000).

The 4c. rose and the 4c. rosy mauve are found surcharged "Postal Commission 3 (or "Three") Cents". They denote the extra commission charged by the Post Office on postal orders which had not been cashed within three months of the date of issue. For a short time the Post Office did not object to the use of these stamps on letters.

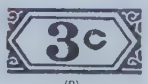
52

53

(A)



(B)

Most values in Type **52** were produced by two printing operations, using "Key" and "Duty" plates. Differences in the two Dies of the Key plate are described in the introduction to this catalogue.

In the Ceylon series, however, the 1c. and 5c. values, together with later printings of the 3c. and 6c., were printed from special plates at one operation. These plates can be identified by the large "C" in the value tablet (see illustration A). Examples of these values from Key and Duty plates printing have value tablet as illustration B. The 3c. and 5c. stamps from the single plates *resemble* Die I, and the 1c. and 6c. Die II, although in the latter case the inner top corners of the side panels are square and not curved.

1912–25. Wmk Mult Crown CA. Chalk-surfaced paper (30c. to 100r.). P 14.

301/18 *Set of* 14			£100	£140
301s/19s Optd "SPECIMEN" *Set of* 15			£425	

For illustrations of the varieties on Nos. 320/3 see above No. 51*b* of Bermuda.

The 2c. and 5c. exist in coils, constructed from normal sheets, used in stamp-affixing machines introduced in 1915.

Sideways watermark varieties are described *as seen from the back of the stamp*.

The "substituted crown" watermark variety is known on the sheet margin of the 1c., No. 301.

An example of the 1000r. optd "SPECIMEN" is known with the break in scroll variety (R. 1/12).

338/56 *Set of* 19			£100	£150
338s/57s Optd "SPECIMEN" *Set of* 20			£650	

The 2c. to 30c. and 1r. values produced from Key and Duty plates were printed in sheets of 240 using two plates one above the other. Nos. 346c, 347b, 349b, 350c, 351b, 353b and 354b come from printings in 1924 and 1925 which combined Key Plate 7 (Die I) with Key Plate 12 (Die II).

No. 353a, from Key Plate 23, was a mistake; the "retired" Die I being issued in error when it became necessary to replace Key Plate 21.

For illustrations of the varieties on Nos. 358/60 see above No. 51*b* of Bermuda.

2 Cents.

(56) 57

(Surch at Ceylon Govt Printing Works)

1926 (27 Nov). Surch as T **56**.

361	**52**	2c. on 3c. slate-grey	3·00	1·00
